NEP 2020 ALIGNED OBE CURRICULUM

PROGRAM: DIPLOMA IN METALLURGICAL ENGINEERING

by

Curriculum Development Cell,

Government Polytechnic, Nagpur

Document Written by

Dr. G.V. Gotmare

I/C Curriculum Development Cell

Government Polytechnic, Nagpur, India

Curriculum Developed by

Faculties and Experts (Mentioned in individual curriculum)

Approved by

Advisory Board (AB),

Program wise Board of Studies (PBOS),

And

Board of Studies (BOS),

Government Polytechnic, Nagpur

Accepted by

Governing Board (GB),

Government Polytechnic, Nagpur

Published by

Dr. R. P. Mogre

Principal,

Government Polytechnic, Nagpur, India

Government Polytechnic, Nagpur

(An Autonomous Institute of Government of Maharashtra)

NEP 2020 ALIGNED OBE CURRICULUM

DIPLOMA IN METALLURGICAL ENGINEERING

The Program Structure and Curriculum Contents for Diploma in Metallurgical Engineering are approved in Program-wise Board of Studies (PBOS) of Metallurgical Engineering, Board of Studies (BOS), and Governing Board (GB), of Government Polytechnic, Nagpur.

(Miss. V.C.Humney)
I/C. Head of Deptt.
Metallurgical Engineering
and
Chairman PBOS (EE)

(Dr. G.V.Gotmare)
In-charge
Curriculum Development Cell
and
Member Secretary PBOS (EE)

(Dr. R.P.Mogre)
Principal
Government Polytechnic, Nagpur, India

Governing Board, Government Polytechnic, Nagpur

S. N.	Name of Members	Designation	Organization
1	Dr. V. M. Mohitkar	Chairman	Director, Technical Education, Mumbai
	Dr. D. V. Jadhao	Chairman (till 15/04/2024)	Jt. Director, Technical Education, R.O. Pune
2	Dr. R. P. Mogre	Member Secretary	Principal, Government Polytechnic, Nagpur
	Dr. M. B. Daigavane	Member Secretary (till 15/10/2024)	Principal, Government Polytechnic, Nagpur
3	Dr. V.R.Mankar	Member Representative Educational Institute	Principal, Government Polytechnic, Amravati
4	Mrs. Kanchan Mankar	Member Representative MSBTE	Deputy Secretary, Maharashtra State Board of Technical Education, RO, Nagpur
5	Shri. Jayant Paranjpe	Member Representative Industry	MD, Rutam Technocrats, Nagpur.
6	Dr. R.L. Shrivastav	Member Representative Industry	Chairman, Institution of Engineers (I), Nagpur Local Centre, Nagpur
7	Mr. Hemant Bal	Member Representative Industry	CEO, Indorama Synthetics (I) Pvt. Ltd. Butibori, Nagpur.
8	Mr. J.K.Wadhavan	Member Representative Industry	Director, Epsillon Cables Pvt. Ltd. MIDC Area, Hingna, Nagpur
9	Mr. Milind S. Kanade	Member Representative Engineering Association	Secretary, Federation of Industries Association of Vidarbh
10	Mr. Amol Pusadkar	Member Representative Industry	Senior Manager, Tata Advanced System Ltd. (TAL), MIHAN, Nagpur

11	Mr. Narendra Naktode	Member Representative Industry	General Manager, Bharat Broad Band Network Ltd. BBNL
12	Mr. P.S. Patankar	Member Representative Industry	Director, Patankar Consultant Pvt. Ltd. Nagpur
13	Mr. Pravin Chandak	Member Representative Industry	Director, Gimar Cars Pvt. Ltd and Gimar Auto Venture and Partner Gimar Motors, Nagpur
14	Dr. D.V.Patil	Member Representative NITTTR	Coordinator, NITTTR Extension Centre, Pune
15	Dr. Ajeet Singh	Member Representative AICTE	Assistant Director, AICTE-Western Regional Office, Mumbai
16	Mr. Sudhir P Pathak	Co-Opt Member BOS Chairman	Former Senior Vice President, Mahindra & Mahindra, Nagpur

Board of Studies, Government Polytechnic, Nagpur

S.N.	Name of Members	Designation	Organization
1	Shri. Sudhir S. Pathak	Chairman	Former Senior Vice President, Mahindra & Mahindra, Nagpur
2.	Dr. R. P. Mogre	Member Invitee	Principal, Government Polytechnic, Nagpur
	Dr. M. B. Daigavane	Member Invitee (till 15/10/2024)	Principal, Government Polytechnic, Nagpur
3.	Mrs. Kanchan Mankar	Member Representative MSBTE	Deputy Secretary, MSBTE, RO, Nagpur
4.	Dr. M. M. Renge	Member Representative Industry	Technical Consultant, D A Power Solutions, Nagpur
5.	Mr. Ashok Kale	Member Representative Industry	Managing Director, SANSTAR Microsystems Pvt. Ltd. Nagpur
6.	Dr. Sandeep Shirkhedkar	Member Representative Industry	Director, IMAGIS Engineering Solutions, Pvt. Ltd. Nagpur
7.	Mr. Sandeep Darwhekar	Member Representative Industry	Director, Beta Computronics, Pvt. Ltd. Nagpur
8.	Mr. V.G. Thakare	Member Representative Industry	Director, Simsoft Technologies, Nagpur
9.	Dr. M. V.Sarode	Member	HOD, Computer Engineering, Government Polytechnic, Nagpur
10.	Dr. R.V.Yenkar	Member	HOD, Electronics & Tele. Comm. Engineering, Government Polytechnic, Nagpur
11.	Dr. G.K.Awari	Member	HOD, Automobile Engineering, Government Polytechnic, Nagpur
12.	Dr. G.K.Parbat	Member	HOD,

			Civil Engineering, Government Polytechnic, Nagpur
13	Dr. A. R. Umale	Member	HOD, Mechanical Engineering, Government Polytechnic, Nagpur
	Mr. S. R. Kaduskar	Member (till 24/09/2024)	I/C HOD, Mechanical Engineering, Government Polytechnic, Nagpur
	Dr. S. S. Baraskar	Member (till 31/03/2024)	I/C HOD, Mechanical Engineering, Government Polytechnic, Nagpur
	Mr. Y. K. Gaiky	Member (till 31/10/2023)	I/C HOD, Mechanical Engineering, Government Polytechnic, Nagpur
14.	All HODs	Invitee Member & Chairman PBOS	HOD, Government Polytechnic, Nagpur
15	Dr. G.V.Gotmare	Member Secretary	I/C Curriculum Development Cell, Government Polytechnic, Nagpur
16.	Dr. Swapnil Ambade	Member (Invitee)	Co-I/C, Curriculum Development Cell, Government Polytechnic, Nagpur

Program wise Board of Studies (PBOS) - Civil Engineering

Sr. No.	Name of Member	Designation	Organization
1	Dr. D.K.Parbat	Chairman	HOD, Civil Engineering, Government Polytechnic, Nagpur
2	Mr. G.B.Takey	Member (Industry)	Executive Engineer, V&QC, PWD, Nagpur
3	Dr. Abhay Shende	Member (Academic)	Principal, J.L.Chaturvedi College of Engineering, Nagpur
4	Dr. V.G. Kondekar	Member (MSBTE Nominee)	HOD, Civil Engineering, Government Polytechnic, Sakoli
5	Dr. D.N.Kongre	Member (Institute)	Lecturer in Civil Engineering, Government Polytechnic, Nagpur
6	Dr. B.R.Ambade	Member (Institute)	Lecturer in Civil Engineering, Government Polytechnic, Nagpur
7	Dr. G.V.Gotmare	Member Secretary	I/C Curriculum Development Cell, Government Polytechnic, Nagpur

Program wise Board of Studies (PBOS) - Mechanical Engineering

Sr. No.	Name of Member	Designation	Organization
1	Mr. A.R.Umale	Chairman	HOD, Mechanical Engineering (I), Government Polytechnic, Nagpur
	Mr. S.R.Kaduskar	Chairman (till 24/09/2024)	I/C HOD, Mechanical Engineering, Government Polytechnic, Nagpur
	Dr. S. S. Baraskar	Chairman (till 31/03/2024)	I/C HOD, Mechanical Engineering, Government Polytechnic, Nagpur
	Mr. Y. K. Gaiky	Chairman (till 31/10/2023)	I/C HOD, Mechanical Engineering, Government Polytechnic, Nagpur
2	Mr. A.M.Onkar	Member (Industry)	Chief Executive Officer, Omkar Furnitures, Nagpur
3	Mr. G.F.Potbhare	Member (Academic)	Principal, NIT Polytechnic, Nagpur
4	Mr. G.H.Dahole	Member (MSBTE Nominee)	Lecturer in Mechanical Engineering, Government Polytechnic, Gondia
5	Mr. A.S.Ramteke	Member (Institute)	Lecturer in Mechanical Engineering, Government Polytechnic, Nagpur
6	Mr. N.J.Burbure	Member (Institute)	Lecturer in Mechanical Engineering, Government Polytechnic, Nagpur

7	Dr. G.V.Gotmare	Member Secretary	I/C Curriculum Development Cell, Government Polytechnic, Nagpur

Program wise Board of Studies (PBOS) - Electrical Engineering

Sr. No.	Name of Member	Designation	Organization
1	Mr. M.C.Musale	Chairman	I/C HOD, Electrical Engineering, Government Polytechnic, Nagpur
	Dr. G.V.Gotmare	Chairman (till 19/12/2024)	I/C HOD, Electrical Engineering, Government Polytechnic, Nagpur
2	Ms. Divya Piprode	Member (Industry)	Engineer (Executive- E2), BDD, POWERGRID Corp of India, Nagpur
3	Dr. P.M.Daigavane	Member (Academic)	HOD Electrical Engg. G.H.Raisoni College of Engineering, Nagpur
4	Mr. M.N.Gawande	Member (MSBTE Nominee)	Lecturer in Electrical Engineering, Government Polytechnic, Gondia
5	Mr. J.K.Pandit	Member (Institute)	Lecturer in Electrical Engineering, Government Polytechnic, Nagpur
	Mrs. A.A.Alegaonkar	Member (Institute) (till 19/12/2024)	Lecturer in Electrical Engineering, Government Polytechnic, Nagpur
6	Mr. A.P.Dasarwar	Member (Institute) (till 19/12/2024)	Lecturer in Electrical Engineering, Government Polytechnic, Nagpur
	Mrs. A.P.Gandhi	Member (Institute)	Lecturer in Electrical Engineering, Government Polytechnic, Nagpur
7	Dr. G.V.Gotmare	Member Secretary	I/C Curriculum Development Cell, Government Polytechnic, Nagpur

Program wise Board of Studies (PBOS) – Electronics and Telecomm. Engineering

Sr. No.	Name of Member	Designation	Organization
1	Dr. R.V.Yenkar	Chairman	HOD, Electronics & Tele. Engg, Government Polytechnic, Nagpur
2	Mr.S.V.Darvekar	Member (Industry)	Director, Beta Computer Pvt. Ltd. Nagpur
3	Mrs. Gazala Ali	Member (Academic)	HOD Electronics Engg. Anjuman Polytechnic, Nagpur
4	Dr. V.J.Dongare	Member (MSBTE Nominee)	HOD, Electronics Engineering, Government Polytechnic, Gondia
5	Dr. M.N.Bawane	Member (Institute)	Lecturer in Electro. & Telecom, Government Polytechnic, Nagpur
6	Mrs. U.M.Ramteke	Member (Institute)	Lecturer in Electro. & Telecom, Government Polytechnic, Nagpur
7	Dr. G.V.Gotmare	Member Secretary	I/C Curriculum Development Cell, Government Polytechnic,

			Nagpur

Program wise Board of Studies (PBOS) – Packaging Technology

Sr. No.	Name of Member	Designation	Organization
1	Mr. Syed Imran Ahmed K.	Chairman	I/C HOD, Packaging Technology Government Polytechnic, Nagpur
2	Mr. Uday D.Raut	Member (Industry)	Managing Director, B.R.Plastic Industries, MIDC, Nashik
3	Mr. S.N.Madhugiri	Member (Academic)	Ex. Principal Dharampeth Polytechnic, Nagpur
4	Dr. M.S.Deshpande	Member (MSBTE Nominee)	Lecturer in Mechanical Engineering, Government Polytechnic, Arvi
5	Mr. R.S.Raool	Member (Institute)	Rtd. Lecturer in Packaging Tech., Government Polytechnic, Nagpur
6	Prof. P.B. Iyer	Member (Institute)	Director SIES School of Packaging Mumbai
	Mr. P.P.Sargaonkar	Member (Institute) (Till 19/12/2024)	Rtd. Lecturer in Packaging Tech., Government Polytechnic, Nagpur
7	Dr. G.V.Gotmare	Member Secretary	I/C Curriculum Development Cell, Government Polytechnic, Nagpur

Program wise Board of Studies (PBOS) – Metallurgical Engineering

Sr. No.	Name of Member	Designation	Organization
1	Mr. K.L.Meshram	Chairman	HOD, Metallurgical Engineering Government Polytechnic, Nagpur
2	Mr. S.B.Varadpande	Member (Industry)	Technical Director, Orange City Alloys Pvt. Ltd. Nagpur
3	Mr. Y.Y.Mahajan	Member (Academic)	Assistant Professor, Metallurgy & Material Science, VNIT, Nagpur
4	Mr. A.V.Abhyankar	Member (MSBTE Nominee)	Lecturer in Mechanical Engineering, Government Polytechnic, Sakoli
5	Miss. V.C.Humney	Member (Institute)	Lecturer in Metallurgical Engineering, Government Polytechnic, Nagpur
6	Mr. D.K.Mukharjee	Member (Institute)	Guest Lecturer, Metallurgy Rtd. Manager, Ordnance Factory, Nagpur
7	Dr. G.V.Gotmare	Member Secretary	I/C Curriculum Development Cell, Government Polytechnic, Nagpur

Program wise Board of Studies (PBOS) – Information Technology

Sr. No.	Name of Member	Designation	Organization
1	Dr. A.R.Mahajan	Chairman	HOD, Information Technology Government Polytechnic, Nagpur
2	Mr. Dipak Dhote	Member (Industry)	Operations Manager, It-Network, Infosystems Pvt. Ltd, Nagpur
3	Dr. Rakesh Kadu	Member (Academic)	Assistant Professor, in IT, Ramdeobaba College of Engg. Nagpur
4	Mrs. V.A.Raje	Member (MSBTE Nominee)	System Analyst, MSBTE, RO, Nagpur
5	Ms. D.P. Chanmanwar	Member (Institute)	Lecturer in IT, Government Polytechnic, Nagpur
	Mr. L.D.Vilhekar	Member (Institute) (Till 19/12/2024)	Lecturer in IT, Government Polytechnic, Nagpur
6	Ms. Shifa Syed	Member (Institute)	Lecturer in IT, Government Polytechnic, Nagpur
	Ms. Isha Lokhande	Member (Institute) (Till 19/12/2024)	Lecturer in IT, Government Polytechnic, Nagpur
7	Dr. G.V.Gotmare	Member Secretary	I/C Curriculum Development Cell, Government Polytechnic, Nagpur

Program wise Board of Studies (PBOS) – Automobile Engineering

Sr. No.	Name of Member	Designation	Organization
1	Dr. G.K.Awari	Chairman	HOD, Automobile Engineering Government Polytechnic, Nagpur
2	Mr. Pramod Nichat	Member (Industry)	Rtd. Assistant General Manager, Ashok Leyland, Chennai
3	Dr. Manoj Baseshankar	Member (Academic)	HOD, Mechanical Engineering, Suryodaya Polytechnic, Nagpur
4	Dr. Suhas Kongare	Member (MSBTE Nominee)	Lecturer, ASTS Polytechnic, Wardha
5	Mr. Syed J.M.	Member (Institute)	Lecturer in Automobile Engineering, Government Polytechnic, Nagpur
6	Mr. D.K.Bawane	Member (Institute)	Lecturer in Automobile Engineering, Government Polytechnic, Nagpur
7	Dr. G.V.Gotmare	Member Secretary	I/C Curriculum Development Cell, Government Polytechnic, Nagpur

Program wise Board of Studies (PBOS) - Computer Engineering

Sr. No.	Name of Member	Designation	Organization
1	Dr. M.V.Sarode	Chairman	HOD, Computer Engineering Government Polytechnic, Nagpur
2	Mr. Dipak Dhote	Member (Industry)	Operations Manager, It-Network, Infosystems Pvt. Ltd, Nagpur
3	Dr. Rakesh Kadu	Member (Academic)	Assistant Professor, in IT, Ramdeobaba College of Engg. Nagpur
4	Mrs. V.A.Raje	Member (MSBTE Nominee)	System Analyst, MSBTE, RO, Nagpur
5	Dr. K.L.Bawankule	Member (Institute)	Lecturer in Computer Engineering, Government Polytechnic, Nagpur
6	Mrs. D.S.Nalinde	Member (Institute)	Lecturer in Computer Engineering, Government Polytechnic, Nagpur
7	Dr. G.V.Gotmare	Member Secretary	I/C Curriculum Development Cell, Government Polytechnic, Nagpur

Program wise Board of Studies (PBOS) – Travel and Tourism

Sr. No.	Name of Member	Designation	Organization
1	Dr. P.P.Virkhare	Chairman	HOD, Travel and Tourism Government Polytechnic, Nagpur
2	Mr. Adityashekhar Gupta	Member (Industry)	Director, Horizon Holidays, Nagpur
3	Miss. Erika Kar	Member (Academic)	Director, Pegasus Institute, Nagpur
4	Dr. Arti Meshram	Member (MSBTE Nominee)	I/C Principal, GIHMCT, Nagpur
5	Mr. Rajesh Pund	Member (Institute)	Lecturer in Travel and Tourism, Government Polytechnic, Nagpur
6	Dr. Arvind Upasani	Member (Institute)	Visiting Lecturer RSTM Nagpur University, Nagpur
7	Dr. G.V.Gotmare	Member Secretary	I/C Curriculum Development Cell, Government Polytechnic, Nagpur

Program wise Board of Studies (PBOS) – Textile Manufacture

Sr. No.	Name of Member	Designation	Organization
1	Dr. C.P.Kapse	Chairman	HOD, Textile Manufacture Government Polytechnic, Nagpur
2	Mr. Laxminarayan Kaushik	Member (Industry)	Founder Director of Textile Professional LLP, Nagpur
3	Dr. Ganesh Kakad	Member (Academic)	HOD, Textile Engineering, JDIET, MIDC Area, Yavatmal
4	Mr. Harsh Ramteke	Member (MSBTE Nominee)	HOD, SASMIRA, Mumbai
5	Dr. S.G.Gaikwad	Member (Institute)	Lecturer in Textile Manufacture, Government Polytechnic, Nagpur
6	Mrs. Lipik S. Chakraborty	Member (Institute)	Lecturer in Textile Manufacture, Government Polytechnic, Nagpur
7	Dr. G.V.Gotmare	Member Secretary	I/C Curriculum Development Cell, Government Polytechnic, Nagpur

Program wise Board of Studies (PBOS) – Mechatronics Engineering

Sr. No.	Name of Member	Designation	Organization
1	Dr. G.K.Awari	Chairman	HOD, Automobile & Mechatronics Engineering, G.P. Nagpur
2	Dr. H.B.Warkad	Member (Industry)	Junior Works Manager, OFA Yantra India Ltd, Nagpur
3	Mr.Vikas M.Mankar	Member (Academic)	I/C HOD, Electronics & Tele Engg, Priyadarshani Polytechnic, Nagpur
4	Dr. Sachin M.Kale	Member (MSBTE Nominee)	Lecturer Electronics Engineering, Government Polytechnic, Amaravati
5	Ms. Anagha Aghav	Member (Institute)	Lecturer in Electronics & Tele Engg, Government Polytechnic, Nagpur
6	Ms. Karuna Thaware	Member (Institute)	Lecturer in Mechanical Engineering, Government Polytechnic, Nagpur
	Dr. Kiran Thekedar	Member (Institute) (Till 19/12/2024)	Lecturer in Mechanical Engineering, Government Polytechnic, Nagpur
7	Dr. G.V.Gotmare	Member Secretary	I/C Curriculum Development Cell, Government Polytechnic, Nagpur

Program wise Board of Studies (PBOS) – Artificial Intelligence & Machine Learning

Sr. No.	Name of Member	Designation	Organization
1	Dr. A.R.Mahajan	Chairman	I/C HOD, AIML Government Polytechnic, Nagpur
2	Dr. Paresh R Kamble	Member (Industry)	Machine Learning Specialist, OZ Sportz Nagpur, HQ-Reykjavik Iceland
3	Dr. Vijaya Balpande	Member (Academic)	Associate Professor, Priyadarshani J L Chaturvedi College of Engg. Nagpur
4	Mr. L.D.Vilhekar	Member (MSBTE Nominee)	Lecturer in Information Technology, Government Polytechnic, Gondia
	Ms. Shifa Azharuddin	Member (MSBTE Nominee) (Till 19/12/2024)	Lecturer in Information Technology, Government Polytechnic, Gondia
5	Dr. S.S.Gharde	Member (Institute)	Lecturer in Information Technology Government Polytechnic, Nagpur
6	Ms. Shifa Azharuddin	Member (Institute)	Lecturer in IT, Government Polytechnic, Nagpur
	Ms. Isha Lokhande	Member (Institute) (Till 19/12/2024)	Lecturer in IT, Government Polytechnic, Nagpur
7	Dr. G.V.Gotmare	Member Secretary	I/C Curriculum Development Cell, Government Polytechnic, Nagpur

Advisory Board (AB) – Mathematics

Sr. No.	Name of Member	Designation	Organization
1	Mr. P. T. Khobragade	Chairman	I/C, Science & Humanities Government Polytechnic, Nagpur
2	Mr. G.R. Dewalkar	Member	Lecturer In Mathematics Government Polytechnic, Sakoli
3	Mr. S.M. Sayyed	Member	Lecturer In Mathematics (Rtd.) Government Polytechnic, Nagpur
4	Dr. P. B. Bahatkar	Member	Professor, YCCE, Nagpur
5	Mr. V.M.Meshram	Member	Lecturer In Mathematics (Rtd.) Government Polytechnic, Nagpur
6	Dr. G.V.Gotmare	Member Secretary	I/C Curriculum Development Cell, Government Polytechnic, Nagpur

Advisory Board (AB) – Physics

Sr. No.	Name of Member	Designation	Organization
1	Mr. P. T. Khobragade	Chairman	I/C, Science & Humanities Government Polytechnic, Nagpur
2	Mrs. S. B. Adulkar	Member	Lecturer in Physics Government Polytechnic, Nagpur
3	Dr. A. R. Karule	Member	Lecturer in Physics Government Polytechnic, Nagpur
4	Mr. A. J. Khobragade	Member	Lecturer in Physics Government Polytechnic, Nagpur
5	Mr. D. D. Bodele	Member	Lecturer in Physics Government Polytechnic, Nagpur
6	Dr. S. B. Raut	Member	Lecturer in Physics Government Polytechnic, Gondia
7	Dr. A. M. Dabhade	Member	Lecturer in Physics Government Polytechnic, Bramhpuri
8	Mr. A. D. Ningurkar	Member	Lecturer in Physics Government Polytechnic, Bramhpuri
9	Dr. G.V.Gotmare	Member Secretary	I/C Curriculum Development Cell, Government Polytechnic, Nagpur

Advisory Board (AB) – Chemistry

Sr. No.	Name of Member	Designation	Organization
1	Mr. P. T. Khobragade	Chairman	I/C, Science & Humanities Government Polytechnic, Nagpur
2	Dr.M.S.Rathod	Member	Lecturer in Chemistry Government Polytechnic, Nagpur
3	Dr. C.P. Pandhurnekar	Member	Asst. Professor, Ramdeobaba College of Engineering, Nagpur
4	Dr.P.B.Sarode	Member	Lecturer in Chemistry Government Polytechnic, Khamgaon
5	Dr.D.B.Rana	Member	Asst. Professor, S B Jain College of Engg., Nagpur
6	Dr S.L.Sayre	Member	Lecturer in Chemistry Government Polytechnic, Nagpur
7	Dr.P.B.Chouke	Member	Lecturer in Chemistry Government Polytechnic, Nagpur
8	Mr.D.H. Patil	Member	Lecturer in Chemistry Government Polytechnic, Nagpur
9	Dr. G.V.Gotmare	Member Secretary	I/C Curriculum Development Cell, Government Polytechnic, Nagpur

Advisory Board (AB) – English

Sr. No.	Name of Member	Designation	Organization
1	Mr. P. T. Khobragade	Chairman	I/C, Science & Humanities Government Polytechnic, Nagpur
2	Dr. Rupali Londhe	Member	Lecturer in English Government Polytechnic, Nagpur
3	Dr. M. M. Machale	Member	Lecturer in English Government Polytechnic, Nagpur
4	Mr. Nitin Pote	Member	Lecturer in English Government Polytechnic, Bramhapuri
5	Mr. Ravindra Suryawanshi	Member	Lecturer in English NIT Polytechnic, Nagpur
6	Mr. Nitin Pathak	Member	Lecturer in English Kamptee Polytechnic, Nagpur
7	Dr. G.V.Gotmare	Member Secretary	I/C Curriculum Development Cell, Government Polytechnic, Nagpur

List of contributors for curriculum development

Sr. No.	Name of Faculty	Designation
Metallurgical Engineering		
1	Mr.K.L.Meshram	HOD, Metallurgical Engineering
2	Miss V.C.Humney	Lecturer in Metallurgical Engineering

Contributed by,

List of contributors for the curriculum is mentioned in individual curriculum.

@ 2025, Government Polytechnic, Nagpur

No part of this curriculum document is allowed to publish in any form before prior permission of publisher.

CHAPTER 1 INTRODUCTION 1

1.1 History 1

1.1.1 Autonomy 1

1.1.2 Awards 2

1.1.3 Geographical Location 2

1.1.4 Campus 4

1.2 Organizational Structure 4

1.3 Curriculum Development System 5

1.3.1 Governing Board (GB) 7

1.3.2 Board of Studies (BOS) 8

1.3.3 Program Wise Board of Studies (PBOS) 9

1.3.4 Advisory Board (AB) 10
1.4 Outline of Document 10
CHAPTER 2 NATIONAL EDUCATION POLICY 2020 12
2.1 NEP 2020: Reforms in Education System 12
2.1.1 Pillars of NEP 12
2.2 Features of NEP 2020 13
2.2.1 Holistic and Multidisciplinary Learning 13
2.2.2 Multiple Entry and Exit Options 13
2.2.3 Education in Mother Tongue/Local Language 14
2.2.4 Flexibility and Choice-Based Credit System (CBCS) 14
2.2.5 Vocational Education and Skill Development 14
2.2.6 Research and Innovation Ecosystem 14
2.2.7 Emphasis on Ethical and Sustainable Practices 15
2.2.8 Global Exposure and Collaboration 15
2.2.9 Gradual De-affiliation from Universities 15
2.3 Implementation of NEP 2020 in Engineering Institutes 15
2.3.1 Key Highlights of the GoM GR 16
2.4 Conclusion 17
CHAPTER 3 OBE APPROACH IN CURRICULUM DESIGN 18
3.1 Introduction to OBE 18
3.2 Why the OBE Approach? 19

3.3 Outcome-Based Education 19
3.3.1 Outcome-Based Curriculum (OBC) 20
3.3.2 Outcome-Based Learning and Teaching (OBLT) 20
3.3.3 Outcome-Based Assessment (OBA) 21
3.4 Benefits of Outcome-Based Education 21
3.5 Key Constituents of OBE 22
3.6 Role of Feedback in Curriculum Design 24
3.7 Conclusion 24
CHAPTER 4 BLOOM'S TAXONOMY 26
4.1 Introduction to Bloom's Taxonomy 26
4.2 Domains of Learning 27
4.2.1 Cognitive Domain 28
4.2.1 Psychomotor Domain 30
4.2.1 Affective Domain 32
4.3 Program Outcomes and Domains of Learning 33
4.4 Conclusion 34
CHAPTER 5 SWOT ANALYSIS FOR OBE CURRICULUM DEVELOPMENT 35
5.1 Stepwise Procedure for SWOT Analysis 35
5.1.1 Identify the Questionnaire for Conducting SWOT Analysis 35

5.1.2 Finalize the Questionnaire through Program-Level Brainstorming 36
5.1.3 Prepare Google Forms for Feedback Collection 36
5.1.4 Conduct Feedback Analysis at the Department Level 37
5.1.5 Conclude the SWOT Analysis 37
5.2 SWOT analysis of Metallurgical Engineering Program 38
5.2.1 Strengths (S): 38
5.2.2 Weaknesses (W): 38
5.2.4 Threats (T): 39
5.3 Conclusion 40
CHAPTER 6 CURRICULUM REVISION PROCESS 41
6.1 Change Management 41
6.1.1 ADKAR Model for Change Management 42
6.1.2 Results of ADKAR Model 43
6.2 Curriculum Development Process 43
6.2.1 Identify the Competencies and Skills 44
6.2.2 Finalize Competencies and Skills 45
6.2.3 Obtain Feedback Through Google Forms 45
6.2.4 Perform Feedback Analysis 47
Outcome: A clear understanding of stakeholder perspectives, which informs the validation process. 47

6.2.5 Validate Competencies and Skills in Search Conference 48
6.2.6 Preparation of Program Structure 51
6.2.7 Preparation of Course Curriculum 53
6.2.8 Approval from AB, PBOS, BOS and GB 53
6.3 Curriculum Development at a Glance 54
6.4 Conclusion 54
CHAPTER 7 FEATURES OF NEP ALIGNED CURRICULUM 56
7.1 Introduction 56
7.2 Initiatives by the CDC Cell 57
7.3 Features of NEP aligned curriculum 58
7.3.1 Seven Verticals 58
7.3.2 Outcome-Based Education (OBE) 63
7.3.3 Multiple Entry-Multiple Exit (MEME) 63
7.4 Lateral Entry (As per AICTE/State Govt. Guidelines) 64
7.5 Credit-based System 64
7.6 Industrial Training 65
7.7 Self-Study Learning & Its Assessment 65
7.8 Inclusion of Spoken Tutorials and NPTEL Courses 66
7.9 One Skill Enhancement Course (SEC) in Every Semester 67
7.10 One Value Education Course (VEC) in Every Semester 67
7.11 Generic Elective Courses 67

7.12 Introduction of Notional Hours 67
7.13 Award of Certificate/Diploma 68
7.14 Conclusion 68
CHAPTER 8 COURSE CURRICULUM 69
8.1 Basic Information 69
8.1.1 Program 69
8.1.2 Course Category 70
8.1.3 Course Code 70
8.1.4 Course Title 71
8.2 Rationale 71
8.3 Industry-identified competency 72

APPENDIX A CURRICULUM 103

FOREWORD- Chairman Governing Board

Dr. Vinod Mohitkar
Chairman, Governing Board
&
Director, Technical Education, Mumbai

It is with immense pride and a deep sense of purpose that I present the *NEP aligned 2023 Curriculum for Diploma in Engineering*, a landmark step in advancing technical education. As Chairman of the Governing Board of Government Polytechnic, Nagpur and Director of Technical Education, Maharashtra State, I consider this curriculum a reflection of our collective commitment to the transformative vision laid out in the National Education Policy (NEP) 2020.

This curriculum embraces the core principles of Outcome-Based Education (OBE) and integrates the modern educational framework of Bloom's Taxonomy, focusing on equipping students with future-ready skills, practical knowledge, and professional competencies. Designed to foster innovation, critical thinking, and a hands-on learning approach, it addresses the rapidly evolving needs of industries and communities alike.

I wish to place on record my sincere appreciation for the Board of Studies Chairman and all Board of Studies members, whose leadership, insight, and dedication played a pivotal role in shaping this curriculum. Special thanks are also due to the Principal, Heads of Departments (HODs) and faculty members of various programs who actively contributed by

sharing ground-level teaching insights, refining course content, and ensuring alignment with real-world applications. Their collaborative efforts with the Program-wise Board of Studies academic and industry experts, who brought in valuable field experience, ensured that the curriculum remained dynamic, relevant, and future-oriented.

Through multiple rounds of consultations, workshops, and rigorous reviews, the curriculum has evolved to incorporate sector-specific innovations, practical implementation pathways, and learner-centric strategies. The collaboration between academia and industry—spearheaded by the Boards of Studies—has ensured that the curriculum is not only academically robust but also aligned with current industry standards and future demands.

This curriculum document, including chapters on NEP 2020, OBE philosophy, SWOT analysis, and curriculum development methodology, along with more than 50 carefully curated course curricula of each program, stands as a testimony to the vision and meticulous planning behind this academic reform.

I am confident that *Curriculum 2023* will serve as a cornerstone for excellence in technical education. It is our collective responsibility to implement it with the same spirit of dedication that guided its creation, as we work toward nurturing a generation of skilled, thoughtful, and responsible technocrats.

(Dr. Vinod Mohitkar)
Chairman, Governing Board, Government Polytechnic, Nagpur
and Director, Technical Education, Maharashtra State.

FOREWORD- Past Member Secretary Governing Board

Dr. Manoj Daigavane
Ex. Member Secretary, Governing Board,
Government Polytechnic, Nagpur &
Jt. Director, Technical Education, R.O. Nagpur

It is with immense pride and a deep sense of accomplishment that I pen this foreword for the revised NEP aligned curriculum document of Government Polytechnic, Nagpur. Having had the privilege to serve as the Member Secretary when the journey of aligning our educational framework with the transformative vision of the National Education Policy (NEP) was first initiated, I witnessed firsthand the dedication and foresight that has culminated in this comprehensive and forward-thinking curriculum.

The landscape of technical education is ever-evolving, and the NEP 2020 has provided a robust framework for fostering holistic, multidisciplinary, and skill-oriented learning. This curriculum document is a testament to our institution's commitment to embracing these progressive ideals. It meticulously integrates key NEP principles, ensuring that our students are not only academically proficient but also adaptable, innovative, and socially responsible citizens ready to contribute meaningfully to the nation's growth.

A cornerstone of this revision has been the unwavering focus on Outcome-Based Education (OBE), meticulously structured around the principles of Bloom's Taxonomy. This ensures that every learning experience is purposeful, with clearly defined outcomes that empower students to

acquire not just knowledge, but also critical thinking, problem-solving, and practical skills. The shift towards an outcome-centric approach will undoubtedly enhance the quality of learning and prepare our graduates for the complex demands of the 21st-century workforce.

The development of this curriculum has been a truly collaborative endeavor, embodying the spirit of collective expertise. The rigorous curriculum development process, involving extensive deliberations, workshops, and feedback sessions, has been instrumental in shaping this document. This curriculum is a testament to collaborative effort. My sincere gratitude goes to the distinguished experts and dedicated faculty, especially the In-charge of the Curriculum Development Cell, who spearheaded the writing of various chapters, ensuring their depth and relevance. Their tireless work has been instrumental.

As the Ex. Member Secretary of the Governing Board, Government Polytechnic, Nagpur, the supreme authority for curriculum approval, I can attest to the thorough scrutiny and thoughtful consideration given to every aspect of this revision. We are confident that this new curriculum will not only uphold the high standards of academic rigor that Govt. Polytechnic, Nagpur is known for, but also empower our students to become lifelong learners and leaders in their chosen fields.

I commend everyone involved in this monumental undertaking. This curriculum is a beacon guiding our students towards a brighter future, and I am confident it will contribute significantly to their personal and professional growth, and ultimately, to the progress of our nation.

[Dr. M. B. Daigavane]
Ex-Member Secretary, Governing Board,
Government Polytechnic, Nagpur

FOREWORD- Member Secretary Governing Board

(Dr. R.P.Mogre)
Member Secretary, Governing Board
&
Principal, Government Polytechnic, Nagpur

It gives me immense pleasure to present this comprehensive curriculum document developed by our autonomous polytechnic, a result of collaborative academic vision, pedagogical advancement, and policy alignment. This curriculum reflects a strategic response to the National Education Policy (NEP) 2020, integrating its transformative vision into technical education.

The document outlines the systematic curriculum development process, beginning with institutional introspection through SWOT analysis and guided by the principles of Outcome-Based Education (OBE). The integration of Bloom's Taxonomy ensures that the curriculum targets holistic cognitive development, fostering analytical, creative, and application-level competencies in students.

The curriculum has been developed by teams of experienced faculty members and subject experts under the guidance of the In-charge of the Curriculum Development Cell. Their efforts were directed toward making the curriculum learner-centric, industry-responsive, and future-ready. Notably,

the design process included inputs from domain specialists and industry professionals previously associated with our Program-wise Board of Studies and Board of Studies, ensuring both academic relevance and industrial applicability.

As the Member Secretary of the Governing Board—the apex academic authority for curriculum approval—I take pride in acknowledging the tireless dedication and academic integrity with which this document has been developed and approved. I am confident that this curriculum will serve as a robust foundation to produce competent, ethical, and innovative diploma professionals aligned with national aspirations.

(Dr. R.P. Mogre)
Member Secretary,
Governing Board, Government Polytechnic, Nagpur
&
Principal, Government Polytechnic, Nagpur

FOREWORD- Member Secretary, Board of Studies

Mr. Sudhir P. Pathak
Chairman, Board of Studies
Government Polytechnic, Nagpur

It gives me immense pleasure to present the NEP aligned 2023 Curriculum for the Diploma in Engineering, developed at Government Polytechnic, Nagpur.

As a Chairman of the Board of Studies and with the background of having served in Engineering and Auto industry for several decades, I deeply recognize the need for a dynamic, responsive, and industry-aligned technical education framework. This curriculum is a forward-looking document, inspired by the National Education Policy 2020 and built upon the principles of Outcome-Based Education (OBE).

The demands of the modern industrial landscape viz. digital transformation, sustainability, automation, global competitiveness, et al. requires diploma engineers who are not just technically competent but also, innovative, versatile, resourceful, and ethically grounded. This curriculum assuredly reflects those very values. It is designed with inter and intra institute deliberations and with careful consideration to the needs of students, industry, and society as well. It integrates modern pedagogical approaches such as Bloom's Taxonomy, continuous curriculum enhancement through SWOT analysis, and comprehensive assessment techniques. It also emphasizes skill development, entrepreneurship, and holistic learning

through internship and industry interaction and fosters a vibrant academic environment, ensuring that students graduate with the competencies required in the 21st-century workplace.

The Board of Studies has worked collaboratively with faculty, industry experts, alumni, and academic leaders to ensure that every course and learning outcome is relevant and robust.

I commend the entire curriculum development team for their assiduous efforts and dedication to excellence. Their work marks a significant step toward creating technically sound, socially responsible, and globally employable engineers. I am confident that this document will serve as a strong foundation for academic delivery and industry collaboration in the years to come.

Let us continue to inspire, evolve and, innovate building a stronger future for technical education in India.

[Sudhir P. Pathak]
Chairman, Board of Studies, Government Polytechnic, Nagpur

Preamble

The 2023 Curriculum of Government Polytechnic, Nagpur for the Diploma in Engineering reflects a transformative shift in technical education, firmly rooted in the Outcome-Based Education (OBE) framework, and aligned with the visionary directives of the National Education Policy (NEP) 2020. This curriculum has been thoughtfully designed to respond to the changing educational landscape, technological advancements, and evolving industry requirements, with a strong focus on practical skills, flexibility, and holistic development.

Our institute, renowned for its commitment to excellence in technical education, continues to play a vital role in shaping competent professionals who contribute meaningfully to national development. Through the modernization and continuous refinement of our academic offerings, we aim to empower students with the skills, attitudes, and knowledge necessary for lifelong success. Our focus has always remained on innovative, learner-centered curriculum development, emphasizing both technical competence and personal growth.

In line with NEP 2020 reforms, the revised curriculum embraces several key features: a choice-based credit system, multiple entry and exit options, skill-based education, soft skill and industry internship, and value-based education. These features not only support multidisciplinary learning but also foster creativity, critical thinking, and ethical responsibility among students.

The curriculum revision process was undertaken through a highly participative and structured approach. Valuable inputs were gathered from a wide spectrum of stakeholders, including industry experts, alumni, academic leaders, and students, ensuring the curriculum remains relevant, responsive, and forward-looking. Guided by the Governing Board (GB), Board of Studies (BOS), Program-wise Board of Studies (PBOS), and the Curriculum

Development Cell (CDC) of the institute, played integral roles in shaping this document. The contributions of faculty members, Heads of Departments (HODs), and domain experts further enriched the content and ensured alignment with the latest technological and pedagogical standards.

The implementation of OBE principles ensures clarity in learning outcomes, structured assessment strategies, and continuous improvement through feedback and evaluation. The integration of Bloom's Taxonomy, domain-specific learning objectives, and a clearly defined assessment framework supports differentiated learning across cognitive, affective, and psychomotor domains. A SWOT analysis methodology was employed to identify program-level strengths, gaps, opportunities, and challenges—laying the foundation for robust and future-ready program structures.

The NEP aligned 2023 curriculum offers a balanced and flexible learning scheme incorporating classroom instruction, laboratory experience, tutorials, and self-directed learning. Innovative elements such as skill enhancement courses, value education, NPTEL and Spoken Tutorial integration, and notional hour calculation reflect the comprehensive nature of the new academic structure.

Our institutional vision is to emerge as a Center of Excellence in technical education, committed to nurturing innovation, employability, and entrepreneurship. The NEP aligned 2023 Curriculum is a significant milestone in our academic journey, reinforcing our legacy of quality and our dedication to continuous educational advancement. It sets the stage for dynamic, student-centric learning environments that inspire students to contribute actively to society and industry.

[Dr. G. V. Gotmare]
Member Secretary, Board of Studies &
I/C, Curriculum Development Cell, Government Polytechnic, Nagpur

CHAPTER 1

Introduction

This chapter describes the history, organization structure, curriculum development system and the various bodies responsible for the development of curriculum of Government Polytechnic, Nagpur (GPN).

1.1 History

The Government Polytechnic, Nagpur, stands as one of the oldest technical institutions in central India. Established on July 14, 1914, it began as the Government Engineering School. Initially housed in the Victoria Science College (currently the Institute of Science), the institution started with just 16 students. In its inaugural year, it offered diploma-level courses in Civil and Mechanical Engineering. By 1915, an Automobile Engineering course was introduced, which later evolved into a Post Diploma program in Automobile Engineering. The institution played a pivotal role in the establishment of what is now the Visvesvaraya National Institute of Technology (VNIT), Nagpur. Over the years, the institution experienced significant growth, expanding from its modest beginnings to an enrollment of nearly 2,000 students today. The Government Engineering School was eventually renamed Government Polytechnic, Nagpur.

1.1.1 Autonomy

The Institute recently commemorated its centenary, celebrating 111 years of outstanding contribution to technical education. Government

Polytechnic, Nagpur has a rich history of evolving to meet the needs of industry and society. The institution remains committed to addressing the educational demands of an ever-changing world.

In 1995, the Government of Maharashtra granted the institute autonomous status under Government Resolution No. WBP-1093/(2640) (69)VE-5, dated March 31, 1994. This autonomy empowered the institute to independently introduce new programs, design curricula, implement self-developed academic plans, and oversee the assessment, evaluation, and certification of students.

1.1.2 Awards

Some of the prestigious awards received by Government Polytechnic, Nagpur are as follows:

- State Award "Best Overall Performance 1996" (ISTE Narsee Monjee Award)
- State Award "Best Polytechnic, 1997" , (Govt. of Maharashtra)
- National Awards "Best Polytechnic, Student Chapter 2002", (Institute of Engineers (India))
- National Awards "Best Polytechnic, Student's Project ,2002" (ISTE Narsee Monjee)
- State Award "Best Overall Performance 2016" (ISTE Narsee Monjee Award)
- National Education Award for "Best Technical Educational Institute in Maharashtra State-2016"

1.1.3 Geographical Location

Nagpur, located in India, lies at a latitude of 21.146633 and a longitude of 79.088860. Its geographical coordinates are 21° 8'

47.8788'' N and 79° 5' 19.8960'' E. The city sits at an elevation of 311 meters above sea level and is positioned at the very center of the Indian subcontinent. As shown in Figure 1.1, Nagpur is home to the Zero Mile Stone, a landmark that historically marked the geographical center of India and was used by the British to measure distances across the Indian subcontinent. The city's name is derived from the Nag River, which flows through it, originating from a village named Lavha. Nagpur is renowned for its oranges, often referred to as "Nagpur oranges," and has earned the title of the "Orange City" due to its prominence as a major trading hub for the region's orange cultivation.

Figure 1.1. Location of Nagpur City

1.1.4 Campus

Government Polytechnic, Nagpur is situated in heart of the Nagpur City at "Sadar" area, 2.1 km walking distance from zero-mile stone as well as Nagpur railway station.

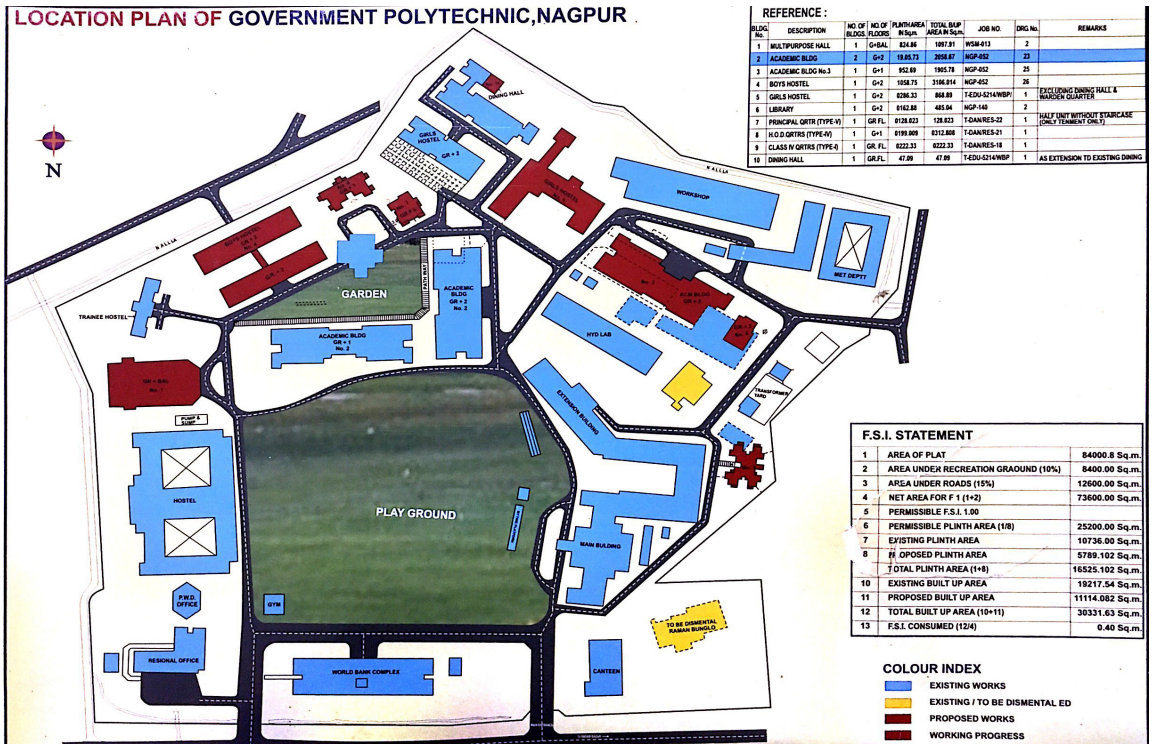

Figure 1.2. Government Polytechnic, Nagpur Campus

1.2 Organizational Structure

GPN, as a part of the Polytechnic Education System, has been addressing the needs of individuals, the community, society, and industry for over 111 years. Until 1995, its services operated under various affiliations, including the university, MP DTE, and MSBTE.

In 1995, the Government of Maharashtra granted GPN autonomous status. This autonomy empowered the institute to independently manage academic matters such as identifying the need for new

programs, designing requisite curricula, implementing self-designed curricula, and conducting student assessment, evaluation, and certification. In essence, the institute became fully accountable for these academic responsibilities, including facilitating student placements in the workforce.

To ensure effective and efficient operations under autonomous status, a functional organization was established alongside the institute's hierarchical structure, enabling streamlined management and governance.

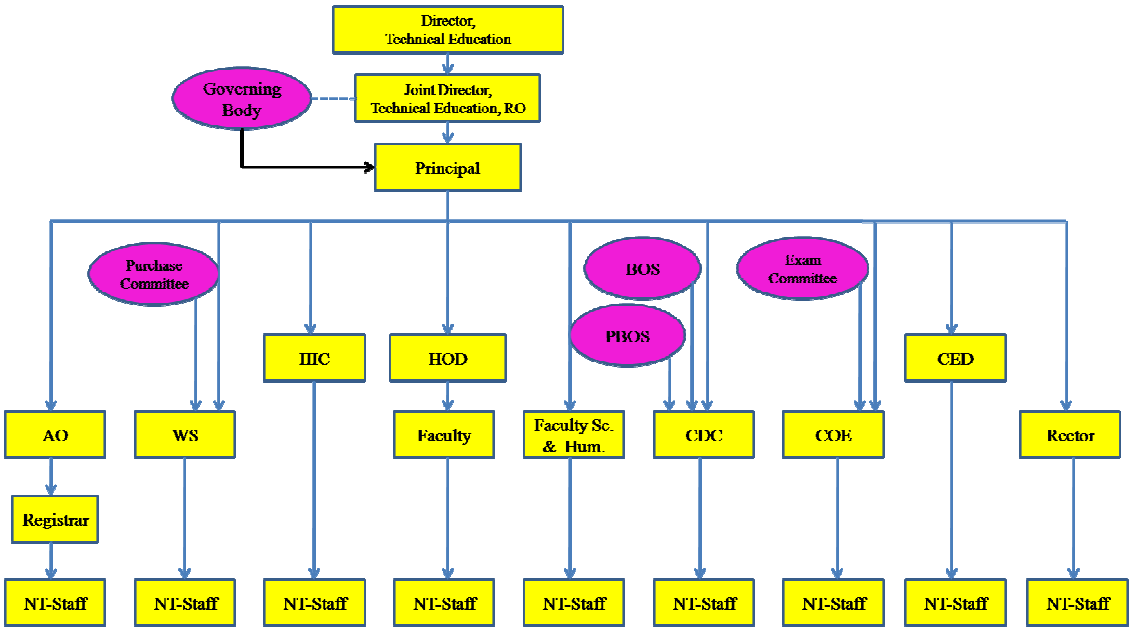

Figure 1.3. Organizational Structure of GPN

1.3 Curriculum Development System

Since 1995, the institute has been independently designing, revising, and implementing curricula for all programs under its autonomous status, except for Mining and Mine Surveying. This process is carried out using the Curriculum Development System illustrated in the accompanying figure 1.4.

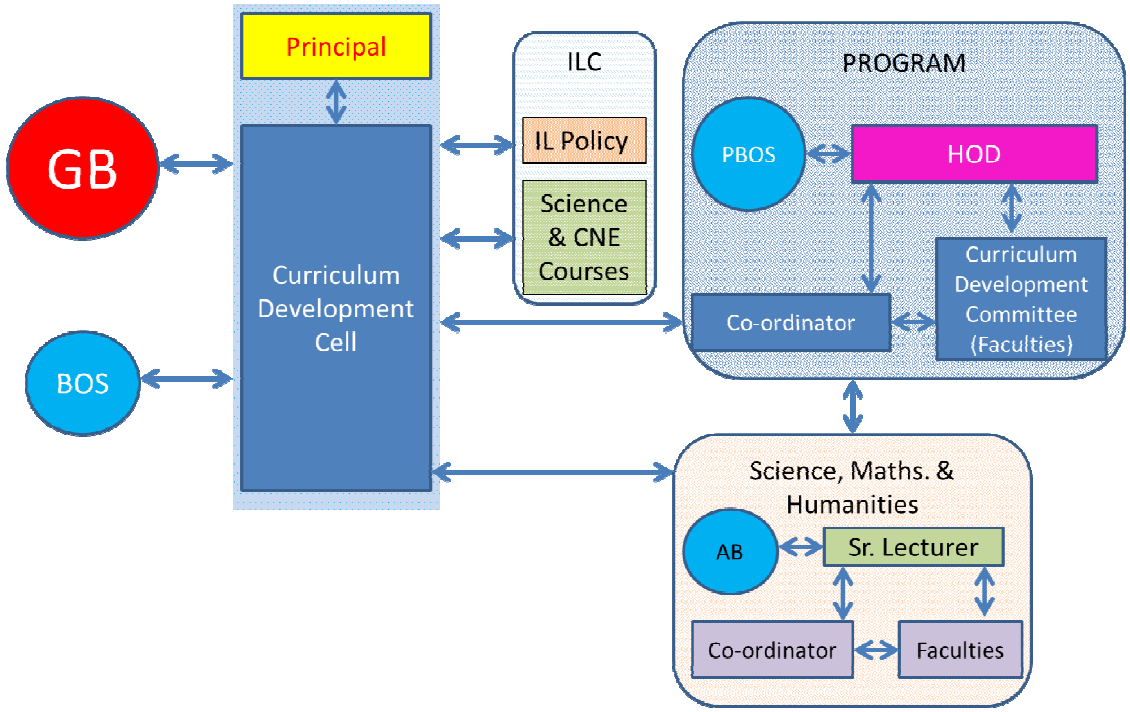

Figure 1.4. Curriculum Development System

The Curriculum Development System comprises various entities, including Program Departments (such as Civil, Mechanical, and Electrical), Non-Program Departments (such as Science, Mathematics, and Humanities), the Institute Level Committee (ILC), and the Curriculum Development Cell (CDC), which is headed by the Principal of the Institute. The institute follows a systematic process for designing, revising, developing, implementing curricula, and assessing and evaluating students to enhance their learning outcomes.

Constitutional bodies, such as the Governing Body (GB), Board of Studies (BOS), and Program-wise Board of Studies (PBOS) for specific programs, along with the non-constitutional Advisory Board (AB) for Non-Program Departments, are responsible for curriculum approval.

This section outlines the philosophy underpinning curriculum design, the mechanisms for its implementation, and the approach adopted for assessing student performance.

1.3.1 Governing Board (GB)

The Governing Body (GB) serves as the apex authority of GPN. Below is a detailed outline of its committee members, along with their roles and responsibilities.

- **Committee Members:**

1. Joint Director of Technical Education Maharashtra State, Bombay - Chairman
2. Nominee from Western Regional Committee Govt. of India - Member
3. Regional Officer, Human Resource Development or Co-ordinator, TTTI, Pune - Member
4. Representative from the Local Centre the I.E.(India) - Member
5. Representative from the Engineering Association - Member
6. Representative from the District Industries - Member
7. Project Director, State Project Implementation Unit (World Bank) – Member
8. Principal of the Polytechnic – Member Secretary

- **Functions and Responsibilities:**

1. To decide the policy of the institute and decide guidelines of the function of various committees.
2. To analyse all issues and provide policy directive for developing the scheme and implementing it at the institute level.

3. To appoint the various committees of Governance for smooth functioning of the Institute.
4. To institute scholarships fellowships studentships, Mudat prize and certificates on the recommendation of Board of Studies.
5. Approve new programmes of studies leading to Diploma/Post-Diploma.
6. Approve modifications in present curriculum in order to meet the changed demands of the industry society from time to time.
7. Approve Annual Reports of the Institute.
8. Approve Continuing Education Programmes or similar Activities Beneficial to the Students/Community Institute.
9. To approve the fees and other charges payable by the students of the Polytechnics on the recommendation of Board of Studies.

1.3.2 Board of Studies (BOS)

The Board of Studies (BOS) functions as an institute-level committee at GPN. The composition of its members, along with their roles and responsibilities, is detailed below.

- **Committee Members:**

1. Representative of the Industry - Chairman
2. Head of Department of 5 Programmes - Member
3. Local Experts of 5 Programmes- Member
4. Nominee of Board of Technical Examinations, M.S. Bombay- Member
5. In-charge of Curriculum Development Component– Member Secretary

- **Functions and Responsibilities:**

1. To prepare Syllabi for various courses and develop curriculum keeping in view the objectives of the Institute and the national requirement for consideration. Syllabi shall be equivalent to Syllabi of Board of Technical Examinations.
2. To suggest methodologies for innovative teaching and evaluation techniques.
3. To Co-ordinate research teaching, extension, and other academic activities in the various departments/ institute.
4. To recommend books including test books for various courses of studies.

1.3.3 Program Wise Board of Studies (PBOS)

The Program Board of Studies (PBOS) is a program-specific committee, with GPN comprising 13 PBOS committees. The composition of its members, along with their roles and responsibilities for each program, is outlined below.

- **Committee Members:**

1. Head of the Department concerned- Chairman
2. Two Senior Lecturers- Member
3. One expert in the programme from the neighbouring institution - Member
4. Nominee from the Board of Technical Examinations Bombay - Member
5. One Expert from the local industry in each Programme – Member
6. In-charge of Curriculum Development component - Member-Secretary

- **Functions and Responsibilities:**

1. To decide Philosophy of curriculum design course wise.
2. To analyse present needs and to identify desirable changes, additions, deletions course-wise.
3. Analyse of personnel development.
4. Formation of Programme objectives.
5. Selection of contents.
6. Design of student's evaluation.
7. To decide resources required and development thereof.
8. To decide strategy of implementation.
9. Recommend equivalence for granting exemptions.

1.3.4 Advisory Board (AB)

The Non-Program Departments (Science, Mathematics, and Humanities) do not have PBOS as per the Government Resolution. Instead, an Advisory Board (AB) has been constituted to function similarly to PBOS for these departments. There are four ABs, one each for the Physics, Chemistry, Mathematics, and English Departments.

1.4 Outline of Document

This document comprises nine chapters, each covering a key aspect of curriculum development at GPN:

Chapter 1 provides an overview of GPN, its organizational structure, and the curriculum development system.

The key provisions of NEP 2020 and relevant Government Resolutions (GR) issued by the Government of Maharashtra are examined in Chapter 2.

A detailed discussion on the principles and implementation of Outcome-Based Education (OBE) is presented in Chapter 3.

Chapter 4 focuses on Bloom's Taxonomy and its significance in designing effective learning outcomes.

A structured approach to conducting a SWOT analysis is outlined in Chapter 5.

The process for revising the 2023 curriculum is comprehensively detailed in Chapter 6.

Chapter 7 highlights the key features of an NEP 2020-aligned curriculum at GPN.

Detailed course curriculum content is presented in Chapter 8.

The complete curriculum document, along with comprehensive descriptions, is compiled in Chapter 9, while the appendix provides course-specific details.

.

CHAPTER 2

National Education Policy 2020

The National Education Policy (NEP) 2020 aims to revolutionize India's education system for the 21st century by fostering holistic learning, inclusivity, and global competitiveness. Key reforms include flexible learning pathways, vocational integration, and a focus on research and sustainability. This chapter explores these features, highlighting their impact on engineering education and India's evolution into a vibrant knowledge society.

2.1 NEP 2020: Reforms in Education System

The National Education Policy (NEP) 2020 is a landmark reform in India's educational landscape, promising transformative changes to prepare students for the 21st century and beyond. Rooted in Indian ethos, NEP 2020 aspires to create a knowledge society by ensuring high-quality, inclusive, and equitable education for all. It emphasizes holistic development, employability, and international competitiveness while maintaining alignment with India's traditions, culture, and value system.

2.1.1 Pillars of NEP

NEP 2020 is built on five foundational pillars:

- **Access**: Ensuring education is available to all.
- **Equity**: Bridging disparities across regions and communities.
- **Quality**: Enhancing educational standards to global levels.

- **Affordability**: Making education economically accessible.
- **Accountability**: Promoting transparency and efficiency.

2.2 Features of NEP 2020

The NEP 2020 emphasizes holistic and multidisciplinary learning, flexible academic pathways with multiple entry and exit options, and the integration of vocational education for skill development. Following paragraph describes these features.

2.2.1 Holistic and Multidisciplinary Learning

NEP 2020 emphasizes a multidisciplinary approach, enabling students to explore diverse subjects beyond their core disciplines. For engineering students, this approach:

- Encourages creativity, critical thinking, problem-solving, and digital literacy.
- Allows for degree customization with minors in humanities, social sciences, or management, complementing technical expertise.
- Offers options for degrees with research, honors, or dual specializations.

2.2.2 Multiple Entry and Exit Options

The policy introduces flexibility in education:

- **Stages of Certification**: Students can receive certificates, diplomas, or degrees based on their level of completion, ensuring recognition at every stage.
- **Academic Bank of Credits (ABC)**: Facilitates credit accumulation and transfer across institutions.

- **Lifelong Learning**: Enables students to re-enter education at any stage for skill enhancement.

2.2.3 Education in Mother Tongue/Local Language

Promoting instruction in regional languages enhances comprehension, retention, and communication, fostering a deeper connection to cultural roots.

2.2.4 Flexibility and Choice-Based Credit System (CBCS)

NEP 2020 introduces CBCS to:

- Allow students to tailor their learning paths.
- Enable deeper exploration of specialized areas or interdisciplinary studies.
- Support internships and research projects for hands-on skill development.

2.2.5 Vocational Education and Skill Development

Integrating vocational education ensures:

- Alignment with industry needs.
- Access to skill-based courses, apprenticeships, and collaborations.
- Graduates are both academically proficient and industry-ready.

2.2.6 Research and Innovation Ecosystem

The policy fosters a culture of research and innovation by:

- Encouraging institutes to establish research parks, incubators, and technology transfer offices.
- Promoting collaboration between students and industry partners.

- Supporting commercialization of student innovations.

2.2.7 Emphasis on Ethical and Sustainable Practices

Engineering curricula under NEP 2020 incorporate ethics, environmental studies, and social responsibility. This equips students to:

- Tackle societal challenges like climate change and resource scarcity.
- Develop solutions that prioritize sustainability and equity.

2.2.8 Global Exposure and Collaboration

NEP 2020 encourages:

- Internationalization through partnerships, exchange programs, and joint research.
- Exposure to diverse cultures and advanced technologies, enhancing global competence.

2.2.9 Gradual De-affiliation from Universities

The policy advocates autonomous institutions, allowing them to develop independent academic frameworks and standards.

2.3 Implementation of NEP 2020 in Engineering Institutes

A flexible credit framework, detailed in Maharashtra Government's GRs dated July 4 and August 3, 2023, mandates NEP-aligned curricula from AY 2023-24 for autonomous institutions and AY 2024-25 for affiliating institutions.

2.3.1 Key Highlights of the GoM GR

1. **Multiple Entry and Exit Options**
    - Certificates, diplomas, and degrees are awarded at progressive stages.
    - Holistic and multidisciplinary education is facilitated, with major and minor subject combinations.
2. **Choice of Major and Minor Subjects**
    - Students must complete a minimum of 50% credits in core subjects.
    - Options for multidisciplinary minors and honors degrees are provided.
3. **Indian Knowledge Systems (IKS)**
    - Integration of IKS courses promotes interdisciplinary research and societal applications.
4. **Academic Bank of Credits (ABC)**
    - Enables credit transfer and mobility within the education system.
5. **Outcome-Based Curriculum**
    - Designed per international standards, focusing on learning outcomes and assessments.
6. **Strengthening Industry-Academia Linkages**
    - Emphasizes internships and apprenticeships, fostering collaboration with industries.
7. **Key Result Areas (KRAs)**
    - Institutions are advised to implement KRAs for the successful execution of NEP 2020.

2.4 Conclusion

The NEP 2020 is a transformative step toward reimagining India's education system. It not only addresses the present educational challenges but also paves the way for creating a globally competent, ethically grounded, and environmentally conscious workforce. For engineering students, it opens doors to multidisciplinary learning, research opportunities, and industry alignment, equipping them to meet the demands of a dynamic global landscape.

CHAPTER 3

OBE Approach in Curriculum Design

Outcome-Based Education (OBE) focuses on achieving specific learning outcomes to meet real-world demands. It emphasizes skill development through learner-centric methods, preparing students for modern challenges. OBE ensures quality education aligned with accreditation standards and societal needs, fostering holistic student growth. This chapter describes some aspect of OBE.

3.1 Introduction to OBE

Outcome-Based Education (OBE) is a transformative educational framework that prioritizes the attainment of specific outcomes or graduate attributes by students upon the completion of an academic program. Unlike traditional teacher-centric models, OBE is inherently learner-centric, emphasizing what students are expected to know, demonstrate, and achieve at the end of their learning journey. This paradigm shift ensures that educational programs align closely with the demands of industry, society, and other stakeholders.

The adoption of OBE has gained significant momentum globally due to its focus on measurable outcomes and its ability to produce graduates who are better equipped to meet real-world challenges. Recognizing its importance, the National Board of Accreditation (NBA) in India has mandated the implementation of OBE for all engineering programs seeking accreditation from 2013 onwards. By adopting the OBE model, educational institutions ensure that their programs meet international standards of quality and relevance.

3.2 Why the OBE Approach?

The NBA's emphasis on OBE stems from its fundamental focus on producing competent and industry-ready graduates. OBE shifts the focus from the teaching process to the learning outcomes, making it a student-focused model. This approach ensures that the curriculum, teaching methods, and assessments are designed to enable students to achieve predefined outcomes, thereby enhancing the overall educational experience.

Key reasons for adopting OBE include:

- **Learner-Centric Philosophy:** OBE places the student at the center of the educational process, focusing on their ability to apply knowledge and skills effectively in practical scenarios.
- **Alignment with Accreditation Standards:** As accreditation bodies like NBA prioritize OBE, its adoption is essential for programs aiming for national and international recognition.
- **Focus on Graduate Attributes:** OBE ensures that students develop specific attributes such as critical thinking, problem-solving, communication, teamwork, and ethical responsibility, which are crucial for success in their careers.

3.3 Outcome-Based Education

The framework required for implementation of OBE consists of the following as shown in Figure:

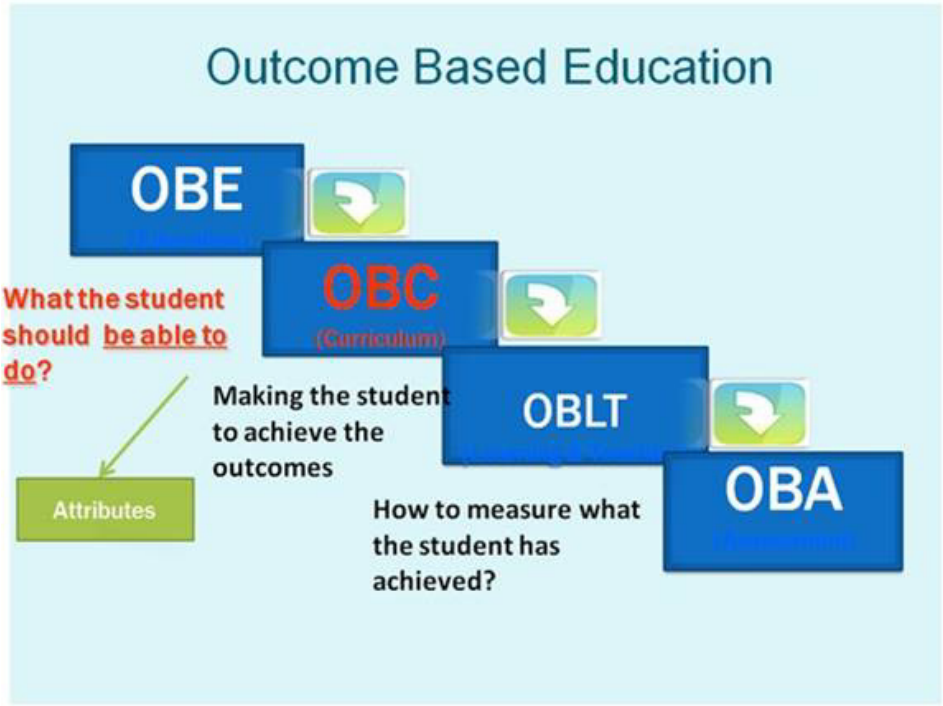

Figure 3.1. Outcome Based Education Framework

3.3.1 Outcome-Based Curriculum (OBC)

The curriculum forms the foundation of the OBE framework. An outcome-based curriculum is structured around the specific abilities and knowledge students should acquire by the end of the program. The design process begins by defining program educational objectives (PEOs), program outcomes (POs), and course outcomes (COs). These outcomes are tailored to meet the needs of stakeholders, including industries, employers, and society at large.

The key question driving an outcome-based curriculum is: **"What should students be able to do upon completing the program?"**

3.3.2 Outcome-Based Learning and Teaching (OBLT)

OBE extends beyond curriculum design to include teaching and learning practices. Outcome-based teaching and learning involve

adopting instructional strategies that actively engage students and help them achieve the desired outcomes. These methods include project-based learning, case studies, problem-solving exercises, and hands-on practical sessions.

The focus of OBLT is: **"How can we facilitate students in achieving the defined outcomes?"**

3.3.3 Outcome-Based Assessment (OBA)

Assessment plays a pivotal role in measuring whether students have achieved the intended outcomes. Outcome-based assessment uses various tools and methods, such as rubrics, assignments, projects, and exams, to evaluate student performance. These assessments are designed to provide feedback on students' mastery of skills, knowledge, and competencies.

The central question for outcome-based assessment is: **"How do we measure what students have achieved?"**

3.4 Benefits of Outcome-Based Education

The OBE approach offers several advantages that make it a preferred choice for curriculum design in engineering and technical education:

1. **Directed and Coherent Curriculum:** OBE ensures that the curriculum is well-structured and aligned with the desired outcomes, enabling a seamless progression of learning.
2. **Relevance to Industry and Stakeholders:** Graduates from OBE-aligned programs possess skills and knowledge that meet the needs of employers, industries, and society, making them more employable and impactful.
3. **Focus on Lifelong Learning:** By emphasizing critical thinking, problem-solving, and adaptability, OBE prepares students for

continuous learning and growth in their professional and personal lives.

4. **Improved Accountability:** With clear outcomes, institutions are better able to demonstrate the effectiveness of their programs to accreditation bodies and stakeholders.
5. **Enhanced Student Engagement:** The learner-centric nature of OBE encourages active participation, fostering a deeper understanding of concepts.

3.5 Key Constituents of OBE

Outcome-based education (OBE) focuses on clearly defined learning outcomes, ensuring students achieve specific knowledge, skills, and attitudes by the end of their educational experience. The following are the key constituents of OBE, which are shown in following figure:

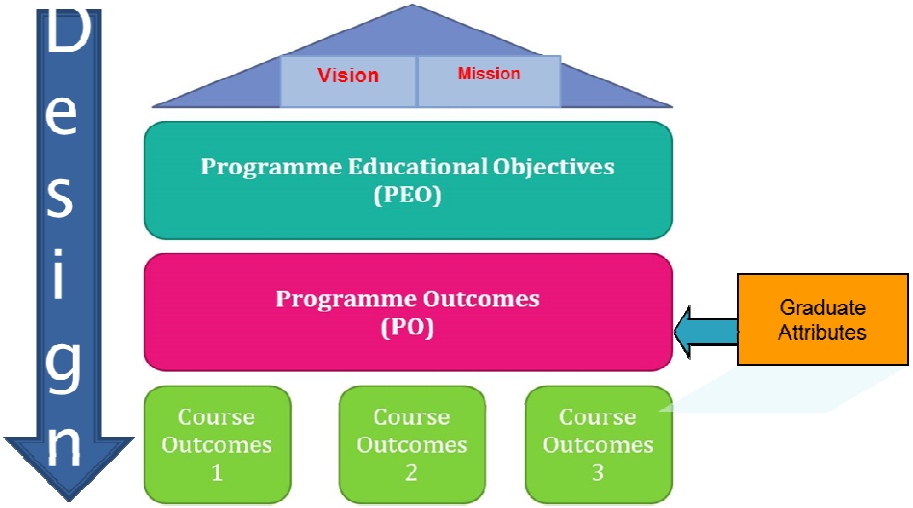

Figure 3.2. Key Constituents of OBE

1. **Vision:** Vision is a picture of the future you seek to create, described in the present tense, as if it were happening now. It

shows where we want to go, and what we will be like when we get there.

2. **Mission:** Mission statement defines what an institution is, why the institution exists, and its reason for being. It defines what we are here to do together.
3. **Graduate Attributes (GAs):** Graduate attributes are the qualities, skills and understandings a university community agrees its students should develop during their time with the institution. These attributes include but go beyond the disciplinary expertise or technical knowledge that has traditionally formed the core of most university courses. WA (Washington Accord) defines 12 GA's for Engineering Graduates.
4. **Program Outcomes (POs):** Programme Outcomes (POs) describe what students should know and be able to do at the end of the programme. They are to be in line with the graduate attributes (GAs). PO's are to be specific, measurable and achievable. POs transform the PEOs into specific student performance and behaviors that demonstrate student learning and skill development.
5. **Program Specific Outcomes (PSOs):** PSOs focus on equipping students with specialized knowledge, skills, and competencies required for industry, research, or higher education, ensuring they are ready to contribute effectively in their chosen field.
6. **Program Educational Objectives (PEOs):** The Program Educational Objectives (PEOs) are broad statements that describe the career and professional accomplishments that the programme is preparing graduates to accomplish. PEOs should

be measurable, appropriate, realistic, time bound and achievable.

7. **Course Outcomes (COs):** Course Outcomes (COs) are specific, measurable statements that describe the knowledge, skills, and attitudes students are expected to acquire upon completing a particular course.
8. **Specific Learning Outcomes (SLOs):** Specific Learning Outcomes (SLOs) are precise, actionable statements that define the intended achievements of students for each topic or unit within a course, focusing on knowledge, skills, or attitudes.

3.6 Role of Feedback in Curriculum Design

Feedback from stakeholders plays a crucial role in designing and refining an OBE-based curriculum. Insights from industry experts ensure that the curriculum remains aligned with current trends and demands. Alumni feedback provides valuable information on the relevance of the program in real-world applications, while academic experts offer guidance on integrating innovative pedagogical practices. This collaborative approach ensures that the curriculum remains dynamic, relevant, and effective.

3.7 Conclusion

The adoption of Outcome-Based Education in curriculum design marks a significant step forward in aligning technical education with the evolving needs of the 21st century. By focusing on clearly defined outcomes and employing a structured framework, OBE ensures that students are equipped with the skills and knowledge required to thrive in their professional and personal lives. As the NBA continues to emphasize the importance of OBE for accreditation, institutions must

embrace this learner-centric approach to deliver quality education and contribute meaningfully to society.

CHAPTER 4

Bloom’s Taxonomy

Outcome-Based Education (OBE) is a learning-centered educational model where the curriculum, teaching methods, and assessments are designed to achieve specific student learning outcomes. Learning is defined as a relatively permanent change in behavior or abilities resulting from reinforced practice or experience. Educational taxonomies, such as Bloom's Taxonomy, play a crucial role in developing an OBE curriculum. Benjamin Bloom and a group of educational psychologists created this classification system to categorize learning objectives. Key aspects of Bloom's Taxonomy are foundational to designing effective learning outcomes in OBE which are outlined below.

4.1 Introduction to Bloom’s Taxonomy

In 1948, Benjamin Bloom developed a framework for classifying intellectual behavior and learning to identify and measure progressively advanced learning levels. Bloom's Taxonomy is particularly significant in higher education, where outcomes must assess students' ability to apply information rather than simply recall and repeat concepts. While lower levels of learning are easier to evaluate, they fail to fully demonstrate students' ability to utilize their knowledge. Additionally, learning extends beyond cognitive processes; it varies when it involves performing a skill or re-evaluating behavior. This approach is rooted in the biological structure of human beings, as illustrated in the figure 4.1.

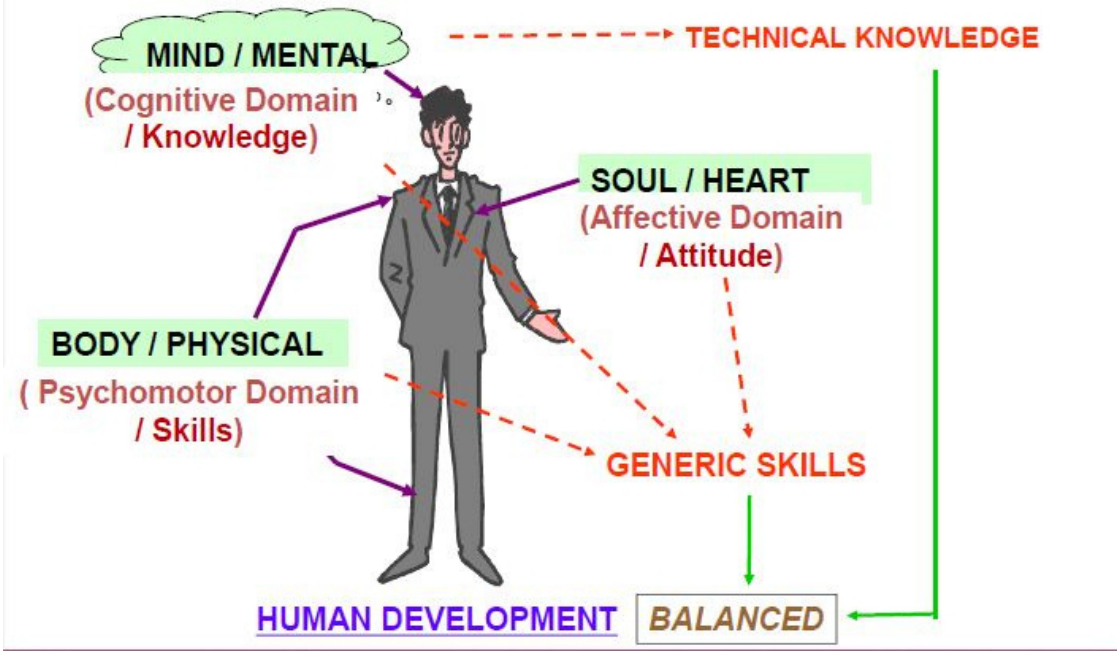

Figure 4.1. Human Being and Domains of Learning

The key elements of this approach, which form the foundation of learning, are outlined below.

4.2 Domains of Learning

Learning is the process through which students achieve a relatively permanent change in mental associations through experience, as defined by cognitive psychologists. Behavioral psychologists, on the other hand, define learning as a relatively permanent change in behavior. However, learning is not solely a cognitive function; it varies when it involves performing skills or re-evaluating behavior.

Learning encompasses the following three domains:

- **Cognitive Domain:** Focuses on intellectual skills and abilities.
- **Affective Domain:** Relates to emotions, attitudes, preferences, and values.

- **Psychomotor Domain:** Involves physical skills, such as hand-eye coordination and manipulative abilities.

In Engineering and Technology courses, the curriculum is designed to emphasize the development of cognitive skills through classroom teaching. Psychomotor skills are cultivated in workshops, laboratories, and seminars where students engage in individual or group activities. Affective skills, including attitudes and values, are nurtured through projects, co-curricular activities, and the institution's work culture.

Student progress in cognitive and psychomotor domains is evaluated through classroom learning and laboratory learning assessments respectively. Additionally, self-study learning plays a vital role by encouraging independent exploration, critical thinking, and problem-solving skills, enabling students to deepen their understanding and apply knowledge effectively.

4.2.1 Cognitive Domain

In 1956, Dr. Benjamin Bloom analyzed examination questions in the American education system and proposed a hierarchical structure of instructional objectives based on the intellectual abilities these questions assessed.

At the most basic level of cognitive learning, students demonstrate their ability to recall information directly from long-term memory. This includes retrieving facts, concepts, principles, laws, definitions, properties, and procedures. Objectives focused on memory recall were classified as knowledge-level objectives, representing the lowest tier in Bloom’s hierarchy of intellectual abilities. Questions testing memory were considered the simplest form of assessment.

The higher levels of the hierarchy introduced by Dr. Bloom in 1956, and later revised in 2001, involve progressively more complex

cognitive processes required to answer questions. These levels reflect increasing demands on the brain's ability to process and use information. The complete hierarchy, including its revised version, is depicted in the accompanying figure 4.2.

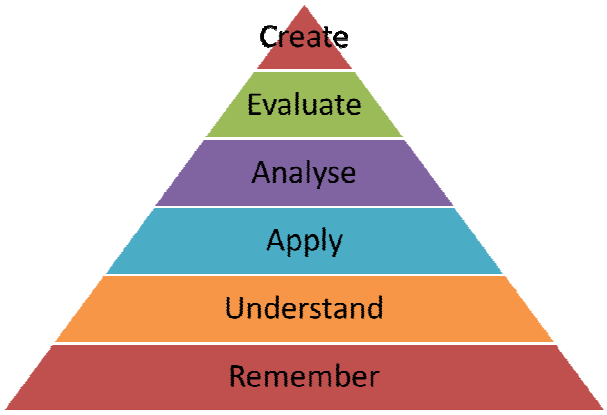

Figure 4.2. Revised cognitive hierarchy Levels

Table 4.1. Cognitive Domain Levels Action Verbs

Cognitive Domain Levels	Behavior descriptions	Action Verbs
Remember	Recall or recognize information	Define, Duplicate, List, Name, Identify, Recall, Reproduce, Recognize, Retrieve
Understand	Understand meaning, re-state data in one's own words, interpret, extrapolate, translate	Calculate, Categorize, Clarify, Classify, Compare, Conclude, Contrast, Describe, Exemplify, Expand, Illustrate, Infer, Interpret, Locate, Paraphrase, Predict, Report, Restate, Summarize, Translate

Apply	Use or apply knowledge, put theory into practice, use knowledge in response to real circumstances	Carry out, Classify, Demonstrate, Execute, Illustrate, Implement, Practice, Solve, Use, Utilize
Analyse	Interpret elements, organizational principles, structure, construction, internal relationships; quality, reliability of individual components	Appraise, Attribute, Compare, Contrast, Deconstruct, Detect, Differentiate, Discriminate, Distinguish, Examine, Formulate, Infer, Integrate, Organize, Parse, Relate, Select, Sequence, Structure, Test
Evaluate	Assess effectiveness of whole concepts, in relation to values, outputs, efficacy, viability; critical thinking, strategic comparison and review; judgment relating to external criteria	Appraise, Check, Coordinate, Critique, Defend, Detect, Dispute, Judge, Monitor, Prioritize, Rate, Reconstruct, Select, Support, Verify
Create	Develop new unique structures, systems, models, approaches, ideas; creative thinking, operations	Change, Combine, Compile, Compose, Construct, Create, Design, Formulate, Generate, Hypothesize, Improve, Invent, Plan, Predict, Produce

4.2.1 Psychomotor Domain

The Psychomotor Domain, as defined by R.H. Dave in 1970, was introduced to focus on the development of skills related to the physical aspects of performing tasks. Since 'motor' skills go beyond the traditional notion of manual and physical abilities, it is important to incorporate this domain, even if the Cognitive and Affective Domains appear sufficient in your context. Regardless of the scenario, the Psychomotor Domain is likely to play a significant role.

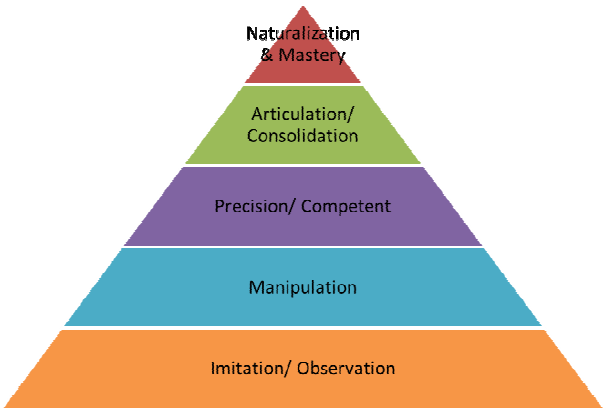

Figure 4.3. Psychomotor hierarchy Levels

Table 4.2. Psychomotor Domain Levels Action Verbs

Psychomotor Domain Levels	Behavior descriptions	Action Verbs
Imitation/ observation	Copy action of another; observe and replicate	Copy, follow, replicate, repeat, adhere, attempt, reproduce, organize, sketch, duplicate
Manipulation	Reproduce activity from instruction or memory	Re-create, build, perform, execute, implement, acquire, conduct, operate
Precision/ competent	Execute skill reliably, independent of help, activity is quick, smooth, and accurate	Demonstrate, complete, show, perfect, calibrate, control, achieve, accomplish, master, refine
Articulation/ consolidation	Adapt and integrate expertise to satisfy a new context or task	Solve, adapt, combine, coordinate, revise, integrate, adapt, develop, formulate, modify, master
Naturalization & Mastery	Instinctive, effortless, unconscious mastery of activity and related skills at strategic level	Construct, compose, create, design, specify, manage, invent, project-manage, originate

4.2.1 Affective Domain

The Affective Domain, as outlined by Bloom, Krathwohl, and Masia in *Taxonomy of Educational Objectives: Vol. II* (1964)*, The Affective Domain*, emphasizes the development of attitudes, which are now often referred to as 'beliefs' in personal development. Bloom's theory proposes a structure and sequence for cultivating attitudes, providing a framework for teaching, training, and evaluating the effectiveness of instruction. This framework also helps assess the impact on learners, including how well the training is retained and its influence on the individual.

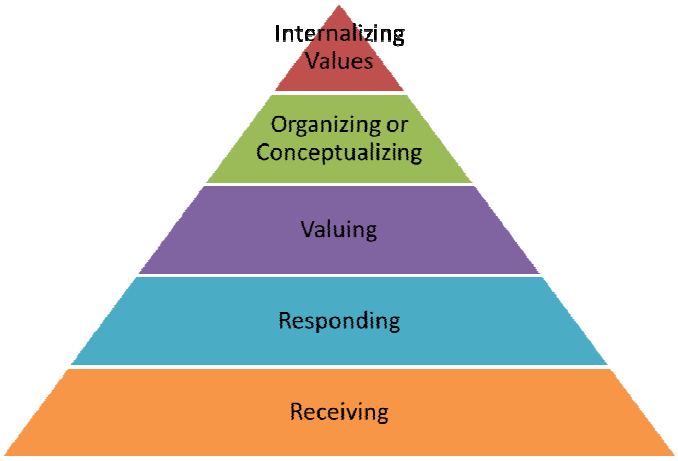

Figure 4.4. Affective Domain hierarchy Levels

Table 4.3. Affective Domain Levels Action Verbs

Affective Domain Levels	Behavior descriptions	Action Verbs
Receiving	Open to experience, willing to hear	Ask, listen, focus, attend, take part, acknowledge, hear, be open to, retain, follow, concentrate, read, do, feel
Responding	React and participate actively	React, respond, interpret, clarify, contribute, question, present, cite, write, perform

Valuing	Attach values and express personal opinions	Argue, challenge, debate, refute, confront, justify, persuade, criticize,
Organizing or Conceptualizing	Reconcile internal conflicts; develop value system	Build, develop, formulate, defend, modify, relate, prioritize, reconcile, contrast, arrange, compare
Internalizing Values	Adopt belief system and philosophy	Act, display, influence, solve, practice,

4.3 Program Outcomes and Domains of Learning

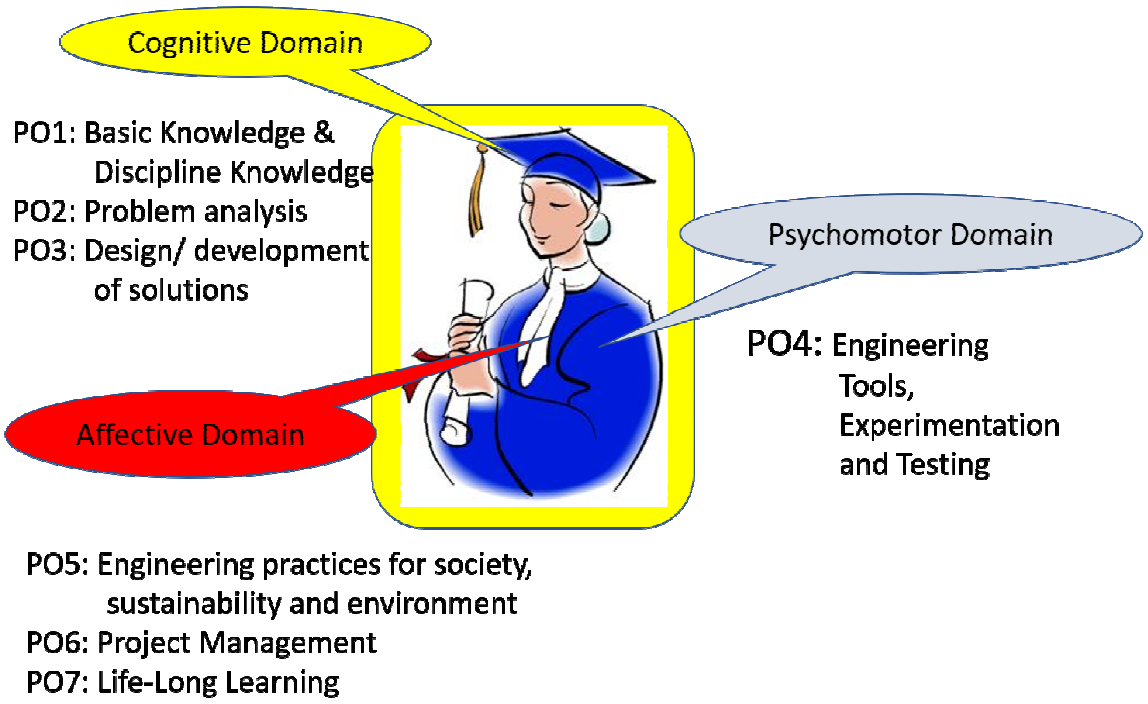

Figure 4.5. Program Outcomes and Domains of Learning

Program Outcomes (POs) defined by the NBA for diploma students represent the specific skills and characteristics expected by stakeholders from the students. These outcomes are closely linked to the three domains of learning, as illustrated in the figure. This classification plays a key role in shaping the curriculum.

4.4 Conclusion

Outcome-Based Education (OBE) provides a structured framework for aligning curriculum, teaching methodologies, and assessments with clearly defined learning outcomes. Rooted in the OBE philosophy, this approach ensures that the curriculum of GPN is designed to develop competencies that meet academic and professional expectations. By leveraging educational taxonomies, educators can systematically define and assess learning objectives across cognitive, affective, and psychomotor domains. A well-implemented OBE model enhances student learning by focusing on measurable outcomes and continuous improvement.

CHAPTER 5

SWOT Analysis for OBE Curriculum Development

SWOT analysis, a strategic planning tool, plays a vital role in developing an effective Outcome-Based Education (OBE) curriculum. By systematically identifying Strengths, Weaknesses, Opportunities, and Threats (SWOT), institutions can align their educational programs with stakeholders' needs and expectations. This chapter outlines a stepwise approach for conducting a SWOT analysis as part of the curriculum development process.

5.1 Stepwise Procedure for SWOT Analysis

The stepwise procedure for SWOT analysis involves preparing a questionnaire, gathering feedback via digital forms, and analyzing responses at the department level. This systematic approach concludes with actionable insights to refine the curriculum and align it with stakeholder needs.

5.1.1 Identify the Questionnaire for Conducting SWOT Analysis

The first step involves formulating a questionnaire that will serve as a foundation for gathering feedback. The Curriculum Development Cell (CDC) collaborates with stakeholders to create questions targeting key areas such as academic quality, infrastructure, teaching methodologies, industry relevance, and overall program effectiveness. These questions must be:

- Clear and concise.
- Relevant to the program’s objectives and outcomes.
- Designed to elicit actionable insights.

Example Questions:

- What are the program's key strengths that contribute to achieving its objectives?
- What challenges or weaknesses hinder program effectiveness?
- What opportunities can be leveraged to enhance the curriculum?
- What external threats could impact the program’s success?

5.1.2 Finalize the Questionnaire through Program-Level Brainstorming

The draft questionnaire is reviewed and refined through brainstorming sessions at the program level. Faculty members, department heads, and other relevant stakeholders participate in this collaborative process to ensure:

- Comprehensive coverage of all critical aspects.
- Inclusion of diverse perspectives.
- Alignment with the program’s vision and mission.

The finalized questionnaire should be validated for clarity and relevance before proceeding to the next step.

5.1.3 Prepare Google Forms for Feedback Collection

Each program uses the finalized questionnaire to create digital feedback forms, such as Google Forms, to ensure ease of access and convenience for respondents. The forms are designed to:

- Include multiple-choice, Likert scale, and open-ended questions.
- Ensure anonymity to encourage honest feedback.
- Be mobile-friendly to maximize response rates.

Feedback is solicited from key stakeholders:

- **Faculty**: Insights on academic and administrative challenges.
- **Students**: Perspectives on learning experiences and outcomes.
- **Alumni**: Reflections on the program’s impact in their professional lives.

5.1.4 Conduct Feedback Analysis at the Department Level

The collected data is analyzed at the departmental level to derive meaningful insights. The analysis process includes:

- **Quantitative Analysis**: Statistical methods to summarize responses and identify trends.
- **Qualitative Analysis**: Thematic analysis of open-ended responses to uncover nuanced insights.

Departments categorize the findings under the four SWOT components:

- **Strengths**: Areas of excellence and key program differentiators.
- **Weaknesses**: Areas needing improvement.
- **Opportunities**: Emerging trends and potential areas for growth.
- **Threats**: External factors that may pose challenges.

5.1.5 Conclude the SWOT Analysis

The final step is to summarize and document the findings of the SWOT analysis. This involves:

- Preparing a comprehensive report highlighting key observations and actionable recommendations.
- Sharing the report with stakeholders, including the CDC and institutional leadership.
- Using the findings to inform curriculum revisions, resource allocation, and strategic planning.

Example Outcome:

- Strength: Strong industry tie-ups for internships and placements.
- Weakness: Limited access to advanced laboratory equipment.
- Opportunity: Growing demand for skill-based courses in emerging technologies.

- Threat: Increasing competition from online education platforms.

5.2 SWOT analysis of Metallurgical Engineering Program

5.2.1 Strengths (S):

1. Highly Experienced Faculty (45.70%): The department's experienced faculty is a significant strength, contributing to its academic excellence.
2. Modern Curriculum (61.5%): The alignment of the curriculum with industry needs is a notable advantage.
3. Excellent Hands-On Training (66.7%): The department's ability to provide practical training is highly appreciated.
4. Faculty Reputation (66.1%): Faculty plays a major role in enhancing the department's reputation.
5. Inclusive Learning Environment (66.7%): Inclusive and supportive faculty enhance the learning environment.

5.2.2 Weaknesses (W):

1. Laboratory Upgradation (45.7%): Immediate improvements are needed in laboratory facilities.
2. Student Engagement (42.6%): Student clubs and organizations require more engagement.
3. Non-Traditional Student Support (12.6%): Strategies for supporting non-traditional students need enhancement.
4. Interdisciplinary Initiatives (51.3%): More efforts are needed to engage in interdisciplinary projects.
5. Diversity in Course Offerings (82.1%): Curriculum relevance needs improvement.

5.2.3 Opportunities(O):

1. Emerging Technologies (59.1%): Opportunities lie in areas like Steel making and selection of material.
2. Community Engagement (82.8%): Opportunities exist to contribute to community development.
3. Sustainable Technologies (92.1%): The department can make significant contributions to sustainable technologies.
4. Industry Collaborations (56.4%): Effective engagement with local industries for collaborative projects
5. Value-Added Courses (21.3%): Opportunities to improve value-added courses in the curriculum
6. Government initiatives supporting research and development: (46.20%)
7. Opportunities for expansion :(92.30%)

5.2.4 Threats (T):

1. Government Budget Cuts (39.4%): Potential reductions in funding pose a threat.
2. Rapid Technological Disruptions (19.7%): Adapting to technological changes is challenging.
3. Funding Uncertainty (70.9%): Uncertainty in funding sources is a significant concern.
4. Limited Elective Courses (5%): Providing a variety of elective courses is essential.
5. Inadequate Interdisciplinary Initiatives (7.9%): Expanding interdisciplinary projects is critical.
6. Potential threats to faculty recruitment and retention: (76.9%)
7. Limited resources for international programs: 61.50%

5.3 Conclusion

SWOT analysis is a critical step in the OBE curriculum development process, enabling institutions to align their programs with stakeholder needs and industry trends. By following the stepwise procedure outlined in this chapter, programs can ensure a systematic, inclusive, and data-driven approach to curriculum improvement, fostering academic excellence and long-term success.

CHAPTER 6

Curriculum Revision Process

Since attaining autonomous status, GPN has revised its curriculum every five years, with the 2023 revision marking the seventh iteration. While the concept of Bloom's Taxonomy has been part of the GPN curriculum from the start, the comprehensive Outcome-Based Education (OBE) model was first implemented in the 2016 curriculum and has been carried forward to the 2023 curriculum. The 2023 curriculum is also aligned with the National Education Policy 2020. The detailed process of revising the 2023 curriculum is outlined below.

6.1 Change Management

GPN, a diploma-level educational institute, offers 14 diploma programs, 13 of which operate under autonomous status. Revising the curriculum for these programs within a short timeframe, while adopting a new and unfamiliar model, posed a significant challenge for the Curriculum Development Committee (CDC). It is natural for individuals to resist change, even under the best circumstances.

To address this, GPN implemented the ADKAR model for change management. This diagnostic tool enabled the institution and its staff to understand their position in the change process. It also helped identify gaps in the change management process and provided effective coaching for faculty members.

The ADKAR model was instrumental in:

- Managing faculty resistance.
- Guiding faculty through the transition process.

- Creating a successful action plan for curriculum development.
- Developing an effective strategy for curriculum design and implementation.

6.1.1 ADKAR Model for Change Management

The ADKAR model has gained significant popularity among managers and project teams due to its simplicity and ease of application. It is also effective in educating others, including executive sponsors of change. ADKAR represents five key building blocks for successful change:

- **Awareness**: Understanding the need for change.
- **Desire**: Willingness to participate in and support the change.
- **Knowledge**: Learning how to implement the change.
- **Ability**: Developing the skills and behaviors required for the change.
- **Reinforcement**: Ensuring the change is sustained over time.

In the curriculum revision process, the following change management tools are utilized:

1. Communication
2. Motivation
3. Workshops
4. Resistance Management
5. Training

Figure 6.1 illustrates the mapping of these tools with the ADKAR framework.

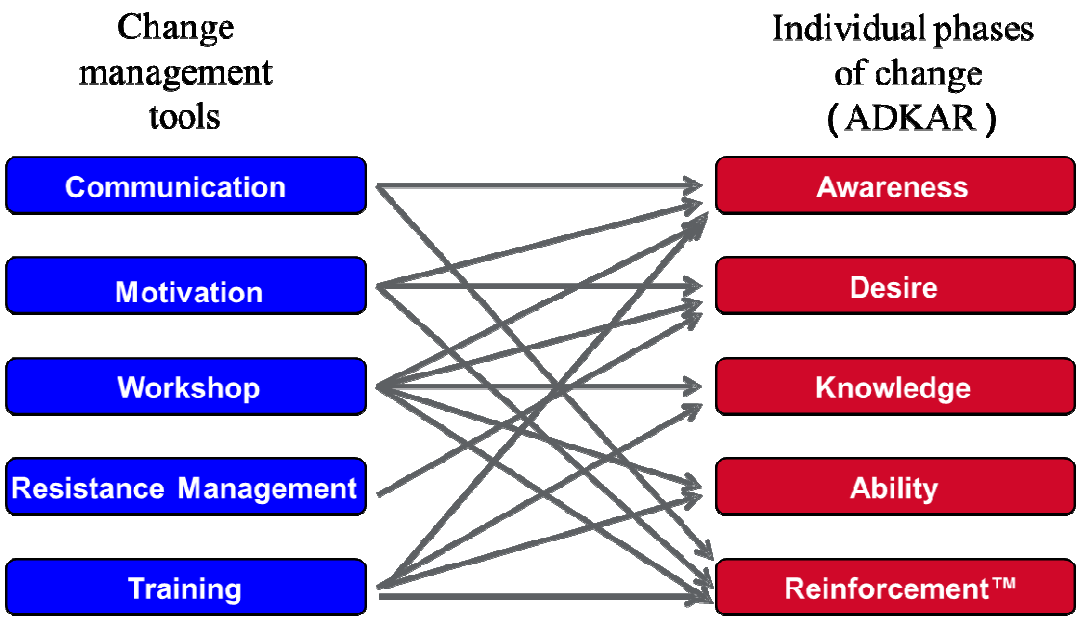

Figure 6.1. Mapping of change management tools with ADKAR

6.1.2 Results of ADKAR Model

The application of the ADKAR model in the curriculum revision process achieved the following results:

- Start Date of Curriculum Revision Process: **16/08/2023**
- Completion Date of Curriculum Revision Process: **31/12/2024**
- Duration to Complete Curriculum Revision: **16 ½ months**
- Number of Programs: **13**
- Number of Course curriculum Developed: **383**
- Implementation of NEP aligned OBE curriculum from for First Semester: **September 2023**

6.2 Curriculum Development Process

Curriculum development is a systematic process aimed at designing and refining educational programs to meet the needs of learners and

stakeholders. The steps outlined below describe an effective approach for developing a curriculum based on identified competencies and skills

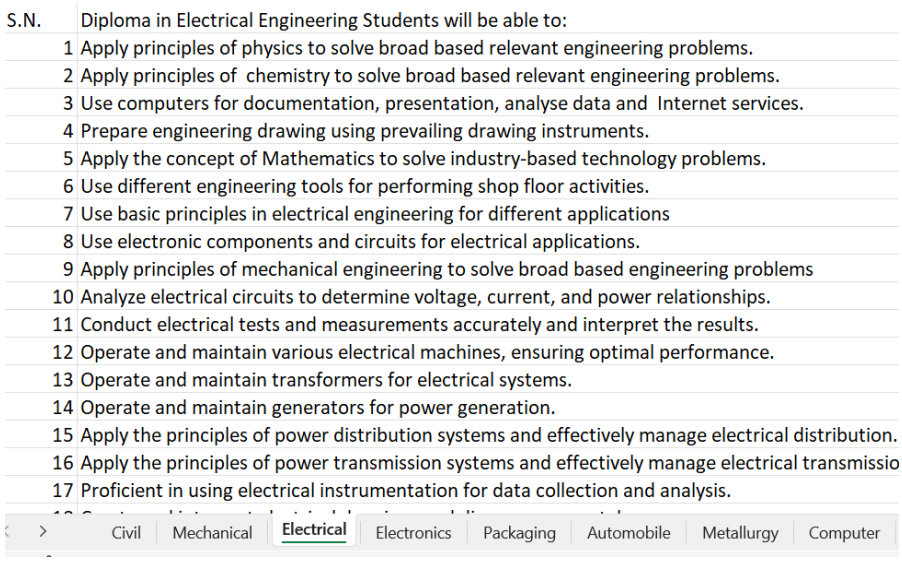
6.2.1 Identify the Competencies and Skills

The first step in curriculum development involves identifying the key competencies and skills that students must acquire. This stage requires a thorough understanding of industry demands, technological advancements, and stakeholder expectations. Input from subject matter experts, educators, and industry professionals is crucial to ensure the relevance of the competencies and skills being identified.

Key Activities:

- Conduct surveys through internet.
- Review current trends and advancements in the field.
- Analyze job descriptions and roles to pinpoint essential skills.

Outcome: A comprehensive list of competencies and skills required by learners to succeed in their field. List of competencies and skills for various diploma programs prepared by Curriculum Development Cell is shown in Figure 6.2 (Screen Shot).



S.N.	Diploma in Electrical Engineering Students will be able to:
1	Apply principles of physics to solve broad based relevant engineering problems.
2	Apply principles of chemistry to solve broad based relevant engineering problems.
3	Use computers for documentation, presentation, analyse data and Internet services.
4	Prepare engineering drawing using prevailing drawing instruments.
5	Apply the concept of Mathematics to solve industry-based technology problems.
6	Use different engineering tools for performing shop floor activities.
7	Use basic principles in electrical engineering for different applications
8	Use electronic components and circuits for electrical applications.
9	Apply principles of mechanical engineering to solve broad based engineering problems
10	Analyze electrical circuits to determine voltage, current, and power relationships.
11	Conduct electrical tests and measurements accurately and interpret the results.
12	Operate and maintain various electrical machines, ensuring optimal performance.
13	Operate and maintain transformers for electrical systems.
14	Operate and maintain generators for power generation.
15	Apply the principles of power distribution systems and effectively manage electrical distribution.
16	Apply the principles of power transmission systems and effectively manage electrical transmissio
17	Proficient in using electrical instrumentation for data collection and analysis.

Figure 6.2. Identification of Competencies and Skills

6.2.2 Finalize Competencies and Skills

Once the competencies and skills have been identified, they are refined and finalized to ensure alignment with the program's objectives. This involves collaboration with key stakeholders to validate the findings and incorporate their feedback.

Key Activities:

- Organize meetings with curriculum development cell.
- Prioritize competencies and skills based on their importance and applicability.
- Document finalized competencies and skills for further use.

Outcome: A finalized and well-documented list of competencies and skills, forming the foundation of the curriculum.

Score	Hands on Skills
3.7	Conduct electrical tests using instruments such as multimeters, and other testing equipment to evaluate the performance of electrical system.
3.5	Wire and install electrical components, switches, outlets, and lighting fixtures.
3.5	Diagnose and troubleshoot electrical faults and problems in electrical equipment and domestic appliances.
3.4	Assemble and solder electronic components onto circuit boards.
3	Repair and modify electronic devices and PCBs.
3.3	Calibrate and maintain electrical instrumentation devices for measurement and control.
3.2	Install and maintain solar panels, wind turbines, and other renewable energy systems.
3	Install and maintain EV charging stations and systems.
3.3	Create and interpret electrical schematics and drawings using CAD software.
3.4	Conduct safety audits and inspections to ensure compliance with electrical safety standards.
3.2	Build and wire electrical panels and control cabinets.
2.8	Develop digital control systems for motors, power converters and battery stems using MATLAB and Simulink

Figure 6.3. Finalized List of Competencies and Skills

6.2.3 Obtain Feedback Through Google Forms

To ensure the relevance and quality of the identified competencies and skills, feedback is gathered from a broader audience. Google Forms is an effective tool for collecting responses from various stakeholders, including faculty members, industry representatives, and alumni.

Key Activities:

- Design a structured feedback form.
- Share the Google Form with relevant stakeholders through email and social media.
- Encourage stakeholders to provide honest and constructive feedback.

Outcome: A diverse set of feedback data that highlights the strengths and areas for improvement in the proposed competencies and skills.

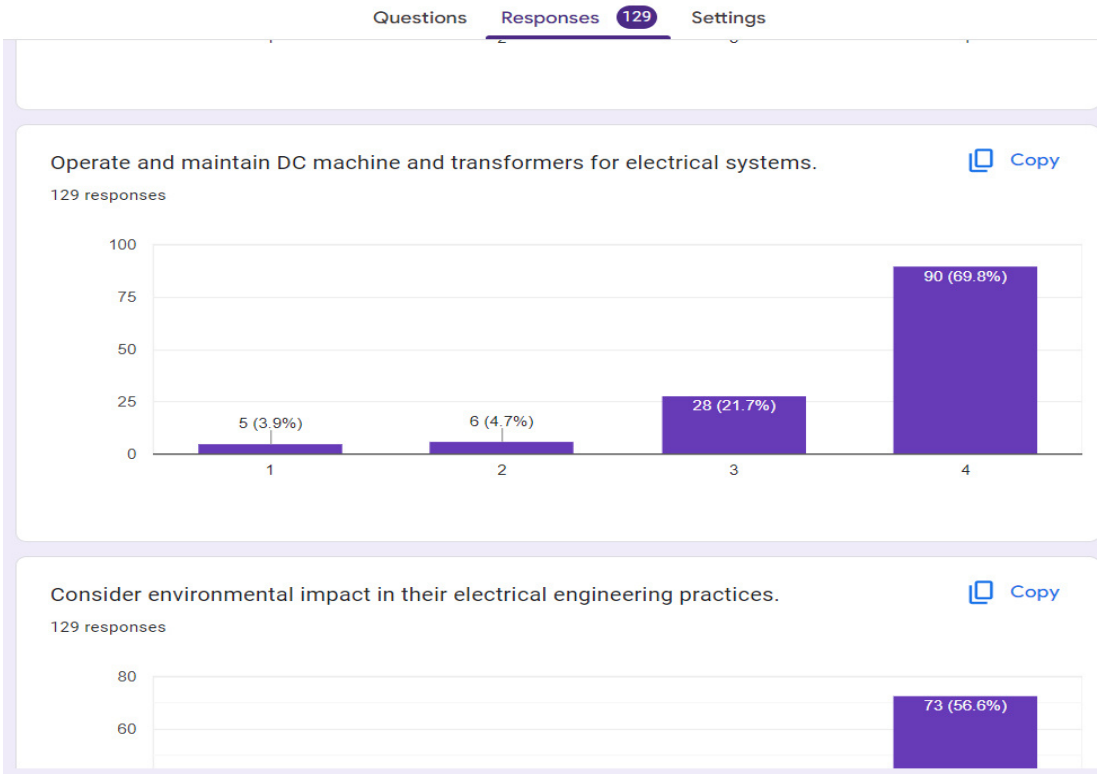


Figure 6.4. Feedback through Google Form

6.2.4 Perform Feedback Analysis

The feedback collected is analyzed to identify patterns, trends, and actionable insights. This step ensures that the curriculum aligns with stakeholder expectations and meets industry requirements.

Key Activities:

- Categorize feedback based on common themes and suggestions.
- Use data analysis tools to interpret quantitative and qualitative responses.
- Summarize findings and identify key takeaways.

Outcome: A clear understanding of stakeholder perspectives, which informs the validation process.

	A	B	C	D	E	F	G

6.2.5 Validate Competencies and Skills in Search Conference

The search conference is a structured event aimed at fostering dialogue among key stakeholders in education and industry. It serves as a forum for validating existing skills, identifying new competencies, and refining curriculum frameworks to ensure that graduates are equipped to meet industry demands. By involving a diverse array of participants, including industry professionals, academic experts, and alumni, the search conference creates a comprehensive feedback loop essential for continuous improvement in education.

The search conference is organized after systematically gathering feedback from stakeholders, ensuring that their insights and suggestions form the foundation of discussions and decisions. This preparatory step ensures that the conference discussions are relevant, targeted, and actionable, paving the way for meaningful outcomes.

During the Search Conference, additional suggestions are gathered from participants to further refine the curriculum. This step ensures inclusivity and leverages the expertise of diverse participants.

Objectives of the Search Conference

The primary objectives of organizing a search conference are as follows:

1. **Validation of Skills**: The search conference provides an opportunity to validate the competencies and skills outlined by the academic program. Industry experts assess whether these competencies and skills align with current workplace requirements, ensuring graduates possess competencies relevant to their fields.

2. **Identification of New Skills**: With rapid technological advancements and changing job roles, new skill sets are continually emerging. Industry and field experts suggest additional competencies that technicians need to excel in their specific work areas.
3. **Feedback Collection**: Feedback on the existing curriculum is gathered to identify strengths and areas for improvement. This includes reviewing suggestions from prior conferences or feedback sessions, creating a continuous cycle of curriculum enhancement.
4. **Curriculum Enhancement**: The conference serves as a brainstorming platform to propose new course content that reflects industry trends and innovations. This ensures the curriculum remains dynamic and forward-looking.
5. **Program Structure Analysis**: Stakeholders provide insights and suggestions on broader aspects of the program structure, such as course sequencing, interdisciplinary integration, and practical training components.
6. **Skills Analysis and Course Formation**: The validated and newly identified competencies and skills are analyzed to prepare a final list. This serves as a foundation for designing or revising courses that align with these skills, ensuring a targeted and effective educational approach.

Key Activities:

- Organize the Search Conference with representatives from academia, industry, and alumni.
- Present the identified competencies and skills for discussion.

- Facilitate group discussions to ensure active participation and consensus-building.

Outcome: The courses are designed based on competencies and skills validated during the Search Conference, ensuring alignment with industry needs. Inputs from the conference were systematically incorporated to create an industry-relevant, practical, and dynamic curriculum.

Industry Survey Rating Report for Diploma in Electrical Engineering

Competencies Required for Diploma in Electrical Engineering

S.N.	Competencies (What diploma holders will be able to do in the industry at entry level) Legends: ME-Most Essential, E-Essential, D-Desirable, NR-Not Required	ME	E	D	NR	Total	Score	Rank
1	Communicate technical information clearly and effectively.	105	16	4	4	129	3.72093	1

Formation of Courses according to Industry Feedback

S.N.	Competencies (What diploma holders will be able to do in the industry at entry level)	Rank based on Industry Feedback	Name of Course to be introduced in Curriculum	Remarks (if any)	Course Category DSC/DSE/SEC/AEC/ VEC/INP etc.	Semester of the course
1	Communicate technical information clearly and effectively.	1	Communication Skill		AEC	First
2	Create and interpret electrical drawings and diagrams accurately.	2	Electrical Software and Computer Aided Drawing		SEC	
3	Prioritize safety in electrical engineering practices and adhere to established safety protocols.	3	Testing and Maintenance of Electrical Machines		DSC	Sixth
4	Identify, select, and use appropriate electrical materials and components.	4	Electrical Wiring		SEC	Third

Figure 6.7. Identified Courses List based on Industry Survey

6.2.6 Preparation of Program Structure

After analyzing the NEP 2020 guidelines, Government of Maharashtra GRs for NEP implementation, and conducting brainstorming sessions, the program structure is designed to align with NEP 2020 policies and industry standards. This step ensures a balanced curriculum that fosters holistic development and interdisciplinary learning.

Key Activities:

- Map courses to the seven verticals defined in NEP 2020 guidelines.
- Identify core, elective, skill-enhancement, value education, and internship courses for comprehensive coverage.
- Define semester-wise and course-wise credit distribution.
- Ensure interdisciplinary and multidisciplinary integration as per NEP requirements.

Outcome:

A well-structured program framework that reflects NEP 2020 principles, integrates stakeholder inputs, and supports the achievement of desired learning outcomes.

Table 6.1 presents the basic program structure common to all diploma programs in engineering. Figure 6.5 provides a visual representation of the program structure, including the exit options for a Certificate in Vocation after the first year and a Diploma in Vocation after the second year.

Table 6.1. Basic Program Structure

SN	Semester	DSC	DSE	GE	AEC	SEC	VEC	INP	Total Courses (Credits)
1	Sem I	DSC 1 (4) DSC 2 (4) DSC 3 (3)			AEC 1 (3)	SEC 1 (2) SEC 2 (2)	VEC 1 (2)		7 (20)
2	Sem II	DSC 4 (4) DSC 5 (4) DSC 6 (3) DSC 7 (3)			AEC 2 (2)	SEC3 (2)	VEC 2 (2)		7 (20)

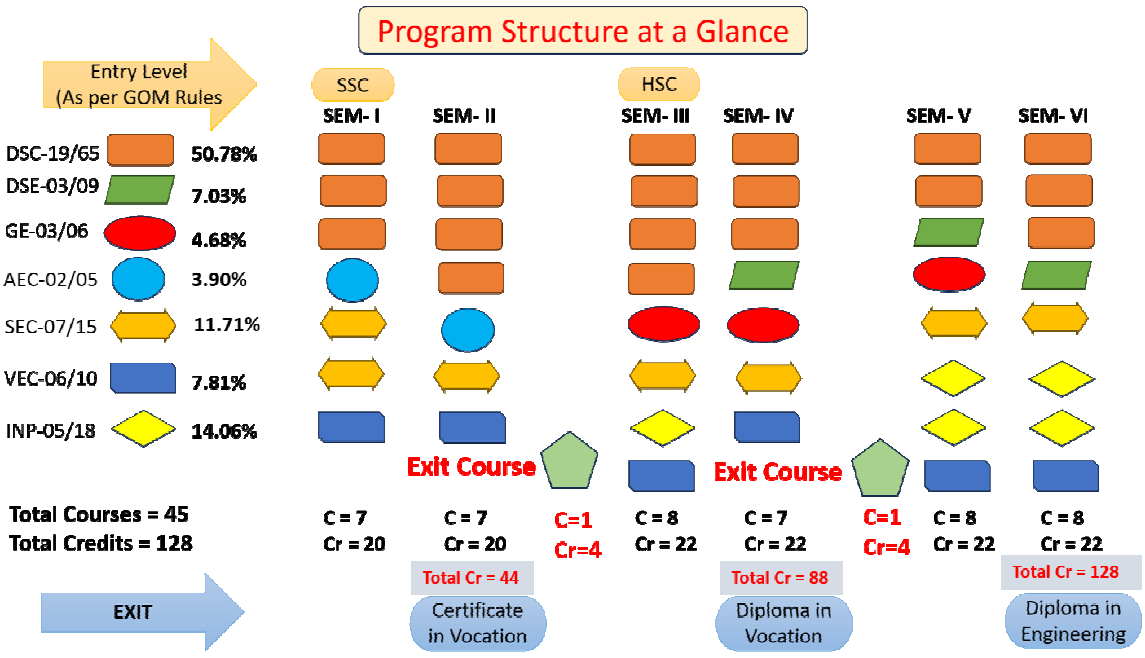

Figure 6.8. Basic Program Structure

6.2.7 Preparation of Course Curriculum

The course curriculum is developed based on industry-identified competencies, ensuring alignment with real-world demands and enhancing employability. Faculty members play a key role in integrating these competencies into the course design, focusing on practical and theoretical balance.

Key Activities:

- Align identified competencies with course outcomes (COs) and specific learning outcomes (SLOs).
- Develop course content that integrates classroom learning, laboratory learning, and self-study learning.
- Design assessment strategies to effectively measure the attainment of industry identified competencies.
- Identify essential textbooks, e-references, and major equipment required for course delivery.
- Establish a mapping framework to correlate course outcomes (COs) with program outcomes (POs) and program-specific outcomes (PSOs).

Outcome:

A NEP 2020 aligned competency-based OBE course curriculum that addresses industry requirements, promotes skill development, and ensures students are job-ready upon completion of diploma program.

6.2.8 Approval from AB, PBOS, BOS and GB

The program structure for all programs and the course curricula are approved by their respective PBOS, while the curricula for Science, Mathematics, and Humanities departments are approved by the Academic Board (AB). Science, Mathematics, and Humanities courses are also presented to the PBOS of each program for review and

approval. Suggestions received during PBOS meetings are incorporated before submission to the Board of Studies (BOS). All approved curricula are then forwarded to the Governing Body (GB) for final approval, incorporating the suggestions obtained from BOS.

6.3 Curriculum Development at a Glance

- No. of Programs : 13
- No. of Courses : 383
- No. of GB Meetings : 04
- No. of BOS Meetings : 04
- No. of PBOS Meetings : 52
- No. of AB Meetings : 04
- No. of ILC Meetings : 02
- No. of Coordinators Meetings : 09
- Trainings Workshops : 04
- Search Conference : 01
- No. of Industry Experts in Search Conference : 39
- No. of Faculties Involved : 101
- No. of outside Experts Involved : 39
- Curriculum Editing Workshops : 52
- Industries Feedback (for each Program) :100+

6.4 Conclusion

The detailed process of revising the 2023 curriculum has been comprehensively outlined in this chapter, covering the key methodologies, considerations, and steps involved in the revision. This structured approach ensures alignment with industry requirements, technological advancements, and educational best practices. While this

chapter focuses on the process of curriculum revision, the subsequent chapter delves into the distinctive features of the revised curriculum, highlighting its key components.

CHAPTER 7

Features of NEP Aligned Curriculum

The National Education Policy (NEP) 2020 marks a transformative shift in the Indian education system, emphasizing holistic, multidisciplinary, and flexible learning. Its curriculum framework is designed to foster critical thinking, creativity, and global competencies while rooted in India's cultural ethos. Below are the key features of an NEP 2020-aligned curriculum of GPN.

7.1 Introduction

The National Education Policy (NEP) 2020 has introduced significant reforms in India's education system, emphasizing a holistic, flexible, multidisciplinary, and skill-based approach to learning. To align with these objectives, the Government of Maharashtra issued guidelines for implementing NEP 2020 in undergraduate (UG) engineering courses. The Board of Studies (BOS) deliberated on these developments, highlighting the need to align diploma-level curricula with NEP principles.

Although specific guidelines for diploma institutions were initially unavailable, the BOS decided to implement the NEP-aligned curriculum from the 2024 academic session. Consequently, the Curriculum Development Cell (CDC) was tasked with formulating an action plan for program structure and first-semester curriculum development by December 2023. Meanwhile, the Maharashtra State Board of Technical Education (MSBTE) had already initiated curriculum restructuring four months earlier and announced the implementation of an NEP-aligned curriculum for diploma institutions. Subsequently, MSBTE mandated

that all autonomous diploma institutions adopt the NEP-aligned curriculum from the 2023-24 academic year.

In light of these developments, the restructuring of the 2021 curriculum to comply with NEP 2020 guidelines has become essential. A final decision has been made to implement the NEP-aligned curriculum from the 2023-24 academic year.

7.2 Initiatives by the CDC Cell

Before MSBTE's Decision

1. **Institute-Level Committee Meeting**: Conducted on 24th July 2023 to plan curriculum alignment with NEP 2020.
2. **NEP 2020 Workshop**: Organized on 7th and 8th August 2023 for Heads of Departments (HODs) and faculty members.
3. **Formation of Program-Wise Board of Studies (PBOS)**: PBOS committees were constituted to oversee curriculum development.

After MSBTE's Decision

1. **Development of Tentative Program Structure and Curriculum Format**: Drafted between 15th and 16th August 2023, adhering to NEP, UG, and MSBTE guidelines.
2. **Institute-Level Committee Meetings**: Conducted on 17th and 29th August 2023 to review progress.
3. **Curriculum Development Workshop**: Held on 19th August 2023 for curriculum drafting and refinement.
4. **PBOS Meetings**: Held between 22nd to 29th August 2023 for detailed discussions on program structure.

7.3 Features of NEP aligned curriculum

The features of NEP aligned curriculum of GPN are mentioned below.

7.3.1 Seven Verticals

The Curriculum Development Cell (CDC) conducted a comparative analysis of the verticals and found that all verticals proposed for the undergraduate (UG) program by the Government of Maharashtra (GoM) are already included in the Maharashtra State Board of Technical Education (MSBTE) framework, with only differences in nomenclature. The detailed nomenclature of UG program proposed by GOM and their percentage are mentioned in table.

Table 7.1. UG Verticals

UG Verticals as per GOM GR	Percentage
Basic Science Course & Engineering Science Course	43
Program Courses (PCC & PEC)	17
Multidisciplinary Courses (MDM & OE)	12
Skill Courses (VSEC)	4.5
Humanities Social Science and Management (AEC, EDP, IKS, VEC)	8.5
Experiential Learning Courses (FP, IN, OJT)	12.5
Liberal Learning Courses (CC)	2.5

To ensure equivalence with MSBTE, the NEP-aligned curriculum of the institute adopts MSBTE's nomenclature, as detailed below. Since diploma graduates require a higher level of skill development compared to undergraduates, the proportion of Skill Enhancement and Generic Elective (MDM) courses has been adjusted, prioritizing skill components. The proposed percentage distribution for these

components before finalization of program structure and the actual percentage adopted after finalizing program structure in the NEP-aligned curriculum across various verticals is outlined in the following table.

Table 7.2. Seven Verticals adopted by GPN

GPN Verticals equivalent to MSBTE	Proposed	Actual
DSC = Discipline Specific Courses Core	50%	50.78%
DSE = Discipline Specific Elective	8%	7.03%
GE = Generic Elective	5%	4.68%
AEC = Ability Enhancement Course	5%	3.90%
SEC = Skill Enhancement Course	12%	11.71%
VEC = Value Education Course	8%	7.81%
INP = Internship/Apprentice/Community	12%	14.06%

The curriculum is structured into seven verticals as explained below.

1. Discipline Specific Courses Core (DSC)

These are mandatory courses fundamental to a student's discipline. The aim is to build a strong foundation by covering essential concepts and principles specific to the chosen field of study. DSC courses ensure that students acquire the requisite core competencies for their professional journey.

A total of 19 Discipline Specific Courses Core (DSC) courses has been incorporated into the curriculum to provide in-depth knowledge and hands-on skills in diploma engineering. These courses cover fundamental, applied, and emerging topics essential for diploma students.

2. Discipline Specific Elective (DSE)

DSE courses allow students to explore advanced and specialized areas within their discipline. Offered in the fourth, fifth and sixth semesters, these electives provide deeper insights into specific topics, enabling students to tailor their learning experience based on interests and career goals.

A total of 3 Discipline-Specific Elective (DSE) courses have been incorporated into the curriculum to enhance specialized knowledge and practical skills in diploma engineering. These courses cover advanced, industry-relevant, and emerging topics, allowing students to explore specific areas of interest and improve their employability.

3. Generic Elective (GE)

GE courses promote interdisciplinary and multidisciplinary education and offered in the third, fourth, and fifth semesters. These courses offer students the flexibility to choose subjects beyond their core specialization, fostering broad-based knowledge and skills. The objective is to enhance personal and professional development while encouraging intellectual curiosity. Minor diploma in based on these courses.

A total of 3 Generic Elective (GE) courses has been incorporated into the curriculum, offered in the third, fourth, and fifth semesters for awarding a Minor Diploma. To earn a Minor Diploma alongside their Major Diploma, students must select all three courses from the same discipline. These courses provide interdisciplinary knowledge, industry-oriented skills, and a broader understanding of specialized domains, enhancing career opportunities and academic progression.

4. Ability Enhancement Courses (AEC)

AEC courses aim to strengthen social, communication, and leadership skills essential for personal and professional success. These courses

focus on areas such as language, and communication, empowering students to navigate diverse challenges effectively.

A total of 2 Ability Enhancement Courses (AEC) have been incorporated into the curriculum in the first and second semesters, focusing on Communication Skills and Business Communication. These courses aim to develop students' proficiency in verbal and written communication, workplace etiquette, and professional interaction, enhancing their confidence and employability in technical and business environments.

5. Skill Enhancement Courses (SEC)

Skill Enhancement Courses (SEC) are designed to equip diploma engineering students with practical, hands-on skills in their specialization, combining theoretical knowledge with lab work, training, and fieldwork to meet industry demands.

A total of 7 SEC courses has been incorporated into the curriculum, with at least one course in each semester, ensuring vocational and technical proficiency. These courses emphasize hands-on training, technical expertise, problem-solving, and industry-relevant competencies, preparing students to work effectively as technicians (supervisors). By bridging the gap between theory and practice, SEC courses ensure graduates are job-ready and capable of handling real-world engineering challenges.

6. Value Education Courses (VEC)

VEC courses focus on holistic personality development and instilling ethical, cultural, and constitutional values. These courses encourage critical thinking, teamwork, sportsmanship, and scientific temperament. Topics such as Indian Knowledge Systems, Personality

development, human rights, and Sustainability Development are integral to these courses, ensuring well-rounded growth.

A total of 6 Value Education Courses has been incorporated into the curriculum, with one course in each semester, common to all diploma engineering programs. These courses include Integrated Personality Development, Advanced Personality Development, Yog and Meditation, Environmental Sustainability, Indian Constitution, and Indian Knowledge System. They aim to foster holistic development, ethical values, environmental responsibility, constitutional awareness, and a deeper understanding of India's rich knowledge traditions, ensuring well-rounded personal and professional growth.

7. Internship/Apprenticeship/Community (INP)

Internship (INP) courses offer experiential learning through professional work environments, providing students with meaningful, practical exposure aligned with their field of study or career aspirations. These structured and credit-bearing internships help students develop industry-relevant skills, build professional networks, and gain real-world experience, effectively bridging the gap between academic knowledge and practical application. By integrating domain-specific expertise, multidisciplinary exposure, skill-building, and values-based education, INP courses ensure holistic learning, aligning with NEP 2020's vision for well-rounded professional and personal development.

Internship courses include summer internships after the second and fourth semesters, along with courses on Industrial Management, Entrepreneurship, and Startups. These courses provide students with practical industry exposure, managerial insights, and entrepreneurial

skills, preparing them for technical roles, leadership positions, and startup ventures.

7.3.2 Outcome-Based Education (OBE)

OBE ensures that the curriculum is designed to achieve predefined outcomes such as skills, competencies, and knowledge levels. This approach shifts the focus from traditional teaching to measurable learning outcomes, preparing students for industry needs and societal contributions. It aligns with NEP's emphasis on learner-centric education and continuous assessment for mastery of concepts. OBE philosophy is explained in details in chapter 3.

7.3.3 Multiple Entry-Multiple Exit (MEME)

The MEME framework allows students to join and exit academic programs at different stages, earning appropriate certification, diploma, or degree based on their completion level. This flexibility caters to diverse learner needs, supports lifelong learning, and provides resilience in adapting to changing career paths or personal circumstances. The details of MEME adopted by GPN is mentioned in table 7.3.

Table 7.3. Multiple Entry-Multiple Exit

Academic Level	Entry Qualification	Exit Qualification	National Credit Level (NCrF)
I Year Diploma Engineering	10 Grade (SSC)	Certificate of Vocation	3.5
II Year Diploma Engineering	I Yr. Diploma / As prescribed by AICTE/State Govt.	Diploma in Vocation	4.0

III Year Diploma Engineering	II Yr. Diploma Engineering	Diploma in Engineering	4.5

The National Credit Framework (NCrF) categorizes education into eight levels, with school education spanning levels 0 to 4. Students who complete Class 5 are placed at Level 1, those passing Class 8 at Level 2, and Class 10 at Level 3. Hence, upon completing three-year diploma in engineering, students reach Level 4.5 as mentioned in table 7.2.

7.4 Lateral Entry (As per AICTE/State Govt. Guidelines)

Lateral entry provisions enable diploma holders and other eligible candidates to enter higher semesters of degree programs, promoting vertical mobility in education. This feature, guided by AICTE and state policies, aligns technical education pathways, recognizing prior learning and practical experience as integral to academic progression.

7.5 Credit-based System

A credit-based system quantifies learning achievements, making the academic workload transparent and transferable. It supports flexible learning pathways, aids in credit accumulation and transfer, and aligns Indian education with global standards, thereby fostering student mobility and lifelong learning.

In the credit system, credits serve as formal recognition of a student's completion of prior learning that aligns with a specific qualification level. Under the NCrF framework, one credit corresponds to 30 notional learning hours.

Each semester, a student must earn a minimum of 20 credits, amounting to at least 40 credits per year, corresponding to 1,200

notional learning hours. However, students have the flexibility to earn more than the minimum required credits within a year as per NCrF framework.

To complete the Diploma in Engineering at GPN, students must earn a total of 128 credits. The credit distribution across semesters is as follows: Semester I – 20 credits, Semester II – 20 credits, Semester III – 22 credits, Semester IV – 22 credits, Semester V – 22 credits, and Semester VI – 22 credits, as detailed in the table 6.1 and the detailed program structure mentioned later on.

7.6 Industrial Training

Mandatory industrial training for 15 weeks bridges the gap between academic learning and real-world application. It immerses students in industry practices, enhances employability skills, and provides practical insights into their disciplines, aligning with NEP's focus on experiential and vocational learning.

As per the directives of the Directorate of Technical Education (DTE), industrial training as internship must have a duration of 16 weeks. In accordance with the AICTE internship policy, the proposed schedule is as follows:

i) 4 weeks during the summer vacation after the completion of the Second Semester Examination.

ii) 12 weeks from 16th May to 15th August following the Fourth Semester Examination.

7.7 Self-Study Learning & Its Assessment

Incorporating self-study components encourages independent learning, critical thinking, and time management skills. Structured

assessments ensure accountability and validate the knowledge gained, promoting a culture of self-driven education and lifelong learning as envisioned in NEP 2020.

Self-study learning hours are included in the credit calculation; however, they do not contribute to the faculty's workload. Nevertheless, faculty members should guide students during their self-study and conduct a summative assessment to evaluate their learning progress.

7.8 Inclusion of Spoken Tutorials and NPTEL Courses

The integration of Spoken Tutorials by IIT Mumbai and NPTEL courses provides access to high-quality, standardized online learning resources. These platforms enhance conceptual understanding and technical skills, supporting NEP's vision of leveraging technology for inclusive and equitable education.

Every student must register for the **"**Basics of Computer**"** course under IIT Bombay's Spoken Tutorial program during their course of study, as specified in the program structure. The course must be completed under the mentorship of department faculty. The related guidelines are mentioned elsewhere in this document.

A student may register for an NPTEL course with a minimum duration of 8 weeks as a generic elective course from any discipline. However, they must submit the completion certificate to acquire the credits specified in the program structure. For obtaining a minor diploma, students are required to complete three NPTEL courses from the same discipline.

7.9 One Skill Enhancement Course (SEC) in Every Semester

Including at least one SEC per semester ensures continuous skill development, making students industry-ready. These courses focus on technical, vocational, and soft skills, bridging the gap between theoretical knowledge and practical application. (Explained in 7.3.1 (5))

7.10 One Value Education Course (VEC) in Every Semester

VECs foster ethical awareness, social responsibility, and personal development. By embedding value-based education in every semester, the curriculum nurtures compassionate and socially conscious individuals, in line with NEP's holistic education goals. (Explained in 7.3.1 (6))

7.11 Generic Elective Courses

Offering multidisciplinary Generic Elective courses in the middle semesters allows students to explore interests beyond their core discipline. This flexibility fosters innovation, broadens perspectives, and supports the concept of a Minor Diploma, enriching the academic experience. (Explained in 7.3.1 (3))

7.12 Introduction of Notional Hours

Notional hours represent the total estimated time a student spends on all academic activities, including lectures, practical, assignments, and self-study. Establishing a minimum of 600 notional hours per semester ensures a well-rounded academic workload, fostering deeper engagement and comprehensive learning.

7.13 Award of Certificate/Diploma

As the Multiple-Entry Multiple-Exit (MEME) system is implemented at GPN, the awarding of certificates and diplomas is based on the percentage of marks obtained by students upon completing the total credits outlined in the program structure, as follows:

1. **Certificate in Vocation** – Based on the percentage of marks obtained in the first and second semesters, including the exit course.
2. **Diploma in Vocation** – Based on the percentage of marks secured in the third and fourth semesters, including the exit course.
3. **Diploma in Engineering** – Based on the percentage of marks achieved in the fifth and sixth semesters.

7.14 Conclusion

NEP 2020-aligned curriculum represents a paradigm shift in education, focusing on fostering critical thinking, practical skills, and holistic development. By incorporating flexibility, technology, and diverse learning opportunities, it empowers students to thrive in a rapidly changing world. Through its innovative features, this curriculum ensures that learners are equipped with the knowledge, skills, and values needed for personal growth, professional success, and societal contributions, fulfilling the vision of NEP 2020.

CHAPTER 8

Course Curriculum

The Model Course Curriculum for one course, developed by the CDC of GPN, is circulated among various programs for curriculum development. A workshop is organized to explain the contents of the curriculum, providing further insights into its structure and implementation for academic enhancement. The details are described below.

8.1 Basic Information

EE204H **2023 CURRICULUM**

Government of Maharashtra
GOVERNMENT POLYTECHNIC, NAGPUR
(An Autonomous Institute of Govt. of Maharashtra)
Near Mangalwari Bazar, Sadar, Nagpur-440001

COURSE CURRICULUM

Program	:	Diploma in Electrical Engineering
Course Category	:	DSC
Course Code	:	EE204H
Course Title	:	DC Machines and Transformers

Figure 8.1. Basic Information

8.1.1 Program

Government Polytechnic, Nagpur offers thirteen diploma engineering programs, with their respective abbreviations listed below.

Civil Engineering- CE

Mechanical Engineering- ME

Electrical Engineering- EE

Electronics and Telecommunication Engineering- EC

Packaging Technology- PK

Metallurgical Engineering- MT

Information Technology- IT

Automobile Engineering- AE

Computer Engineering- CM

Travel and Tourism- TR

Textile Manufacture- TX

Mechatronics Engineering- MK

Artificial Intelligence & Machine Learning- AI

8.1.2 Course Category

As per the National Education Policy 2020, the institute has adopted seven verticals as course categories, mentioned in 7.3.1.

8.1.3 Course Code

A unique method has been developed for assigning course codes to various courses, as illustrated in the figure 8.2.

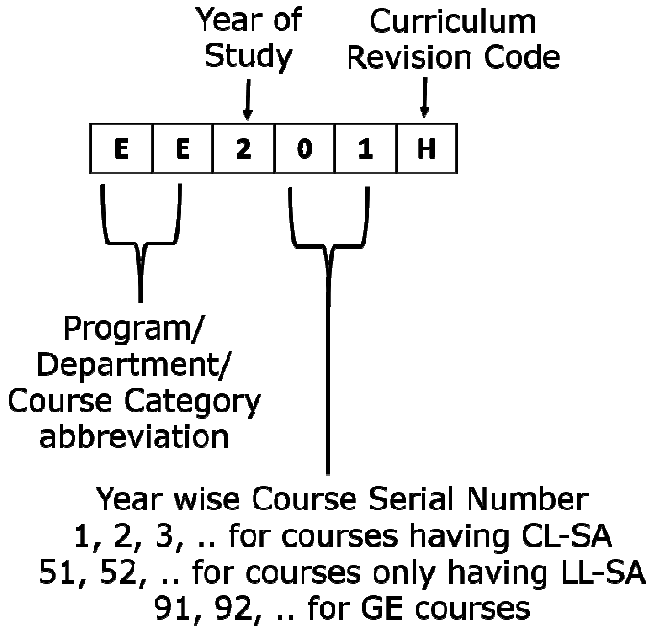

Figure 8.2. Course Code Details

Program codes are mentioned above, however department and other codes for common courses are as follows:

Departments:

English- EN

Mathematics- MH

Physics-PH

Chemistry-CH

Workshop-WS

Applied Mechanics-AM

Hotel Management- HM

Other Codes:

Value Education- VE

Internship/Management- IN

8.1.4 Course Title

The course title provides a concise and descriptive name that reflects the primary focus and objectives of the course. It serves as an identifier for students and educators, ensuring clarity and alignment with the course content and learning outcomes. A course is designed based on an industry-identified competency.

8.2 Rationale

The rationale of a curriculum explains the purpose and importance of the course or program. It outlines how the curriculum aligns with educational goals, addresses the needs of students, industry, and society, and supports the development of skills and knowledge. It serves as a foundation for curriculum design and implementation.

I Rationale:

This course deals with basics of DC machines and transformers. Students will learn to choose the right machines and transformers for different needs. They'll able to differentiate between special and conventional transformers. These are crucial in power systems for generating, transmitting, and distributing electricity. Students will apply this knowledge in studying courses like power system management, equipment operation, and maintenance. They'll use these skills in roles like supervisors, controllers, and technicians..

Figure 8.3. Rationale

8.3 Industry-identified competency

Industry-identified competencies in a curriculum refer to the specific skills, knowledge, and abilities that are recognized as essential by industry professionals. These competencies ensure that students are equipped with practical, relevant expertise to meet the demands of the workforce, fostering employability and bridging the gap between academic learning and real-world applications.

II Industry Identified Competency:

The Student will be able to do in Industry at entry level:

Operate and maintain DC machine and transformers for electrical systems.

Figure 8.4. Industry-identified Competency

8.4 Course Outcomes (COs)

Course Outcomes (COs) are considered the "building blocks" of the Outcome-Based Education (OBE) system. They are measurable statements that define the knowledge, skills, and abilities students are expected to achieve by the end of the course. COs are aligned with Program Outcomes (POs) and are linked to assessments that evaluate

student performance. Typically, every course has six COs, and these outcomes are closely related to the desired graduate attributes.

In OBE, Bloom's Taxonomy plays a significant role in shaping COs, focusing on higher-order thinking skills rather than just recalling facts. COs are written at higher levels of learning, ensuring that students can apply, analyze, and synthesize information. They are based on all domains of learning—cognitive, psychomotor, and affective—to achieve a comprehensive set of POs. Each CO begins with an action verb, emphasizing active learning.

III Course Outcomes (COs):

After completing this course students will be able to:

CO1: **Select** the suitable DC generator as per requirement.

CO2: **Suggest** the suitable D.C motor on the basis of applications.

CO3: **Analyse** different parameters obtained from various tests on transformer.

CO4: **Recommand** special transformer for perticular application.

CO5: **Suggest** the suitable three-phase transformer for various applications.

CO6: **Operate** single-phase and three-phase transformers in parallel for load sharing.

Figure 8.5. Course Outcomes

Course Outcomes (COs) are designed based on industry-identified competencies and are specified for each unit.

Example COs:

- "Analyze electrical circuits to identify faults" (Cognitive Domain).

- "Design and build a simple electrical prototype" (Psychomotor Domain).
- "Practice electrical circuits for lighting" (Affective Domain).

8.5 Learning Scheme

Each curriculum is designed for 15 weeks, and for calculations under the National Credit Framework (NCrF), 30 notional learning hours are equivalent to one credit. For instance, if a course involves a total of 6 learning hours per week, this translates to 90 notional hours over the duration of the course, resulting in a total of 3 credits.

As per National Education Policy 2020, the total outcome-based learning hours for credits shall, subject to assessment, include: Classroom Learning (CL), Tutorial Learning (TL)/Laboratory Learning (LL), and Self-study Learning (SL).

8.5.1 Classroom Learning (CL)

Classroom learning is a structured educational process that occurs in a formal setting, typically led by an instructor or teacher. It focuses on the delivery of theoretical knowledge and conceptual understanding.

8.5.2 Laboratory Learning (LL)

Laboratory learning provides hands-on experience to reinforce theoretical concepts through practical application. It is essential for technical and engineering education.

8.5.3 Tutorial Learning (TL)

Tutorial Learning (TL) emphasizes interactive sessions, allowing students to clarify concepts, engage in discussions, and solve problems with personalized guidance.

8.5.4 Self-Study Learning (SL)

Self-study is a personalized learning process where students take initiative to acquire knowledge independently. It complements classroom and laboratory learning.

IV Learning Scheme:

Classroom Learning (CL)	Tutorial Learning (TL)	Laboratory Learning (LL)	Self-Study Learning (SL)	Notional Learning Hours (NLH)	Credits
3	-	2	1	6	3

Figure 8.6. Learning Scheme

8.6 Assessment Scheme

Assessment scheme consists of formative and summative assessment as specified in respective curriculum.

V Assessment Scheme:

Classroom Learning				Tutorial/Laboratory Learning				Self-Study Learning	
FA	SA	Total		FA		SA		SA	
Max	Max	Max	Min	Max	Min	Max	Min	Max	Min
30	70	100	40	25	10	25	10	25	10

Figure 8.7. Assessment Scheme

8.6.1 Formative Assessment (FA)

Formative assessment is a continuous evaluation process aimed at monitoring student learning and providing ongoing feedback to improve teaching and learning.

8.6.2 Summative Assessment (SA)

Summative assessment evaluates student learning at the end of a course, unit, or academic period. It focuses on measuring outcomes against predefined standards.

8.7 Classroom Learning Content

Classroom learning content is structured into five or six units, each comprising topics and subtopics. Specific Learning Outcomes (SLOs) in the cognitive domain are defined based on the Course Outcomes (COs) and learning content. Action verbs from higher levels of the cognitive domain—Apply, Analyze, Evaluate, and Create—are utilized to align the SLOs with the Course Outcomes (COs).

8.7.1 Specific Learning Outcomes

Specific Learning Outcomes (SLOs) are defined as "statements describing what students are expected to achieve as a result of a learning activity," such as at the end of a unit, chapter, or practical session. SLOs should represent assessable and measurable knowledge, skills, abilities, or attitudes that students acquire by the conclusion of the sub-topic or practical.

VI Classroom Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Cognitive Domain)		Topics and Sub-topics		Aligned Cos
UNIT I: DC Generator	1a	Select the laws suitable for dc machines operation	1.1	Introduction to DC and AC.Machines, types of DC and AC machines, Principle of DC motor and DC Generator,Fleming's Right hand rule, Flemings Left hand rule.	CO1
	1b	Suggest the materials used for given parts of dc machines with justification	1.2	Construction of DC machines,Different parts of D.C.Machines and their functions, Different materials used for the parts of DC machines.	
	1c	Calculate EMF induced in DC generator on the given data.	1.3	Types of Armature windingLap and Wave windings, EMF equation.Calculate the emf induced in the generator	
	1d	Select the suitable DC generator as per given requirement	1.4	Symbolic representation of a generator,Types of DC generator and Load characteristics of separetly excited and self excited DC generators, Various losses inDC generator. efficiency of generator (No Numericals) and their applications.	

Figure 8.8. Classroom Learning Content

8.8 Laboratory Learning Content

Laboratory learning content is organized into five or six units, with all Specific Learning Outcomes (SLOs) focused on the psychomotor domain at higher levels. These SLOs are aligned with the Course Outcomes (COs) to develop practical skills as per industry-identified

competency. Each SLO will be assessed formatively, and summative assessment will be conducted using rubrics.

VII Laboratory Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Psychomotor Domain)		Hours	Aligned COs
I	1	Identify different parts and windings of DC machine.	2	CO1
I	2	Find the value of critical resistance of DC shunt generator by plotting OCC	2#	CO1
I	3	Perform load test on DC shunt generator.Plot internal and external characteristics of DC shunt generator	2#	CO1

Figure 8.9. Laboratory Learning Content

8.9 Self-Study Learning (SLO in Cognitive / Psychomotor / Affective Domain)

VIII Self-Study Learning (SLO in Cognitive/Psychomotor/Affective Domain)

1. Prepare a microproject on small dc generatorand prepare report.
2. Draw the constructional diagram of DC machine showing various parts and write their functions along with materials used for the different parts.prepare report.

Figure 8.10. Self-Study Learning Content

Self-study learning content is structured into 10 to 15 activities, with all Specific Learning Outcomes (SLOs) targeting higher levels of the Cognitive, Psychomotor, or Affective domains. Learners will select and complete one activity under the guidance of a faculty mentor. Summative assessment will be conducted by the faculty using rubrics.

8.10 Specification Table for Classroom Learning Assessment

The specification table serves as a blueprint for designing a valid question paper. In the curriculum, it is included to guide both question paper setting and student preparation. The table highlights level-wise cognitive process dimensions across three levels: Remember (R), Understand (U), and Apply/Higher Level (A).

The suggested distribution of levels is as follows: Remember (R) – 20%, Understand (U) – 30%, and Apply/Higher Level (A) – 50%.

IX Specification Table for Classroom Learning Assessment:

Unit No.	Units	Classroom Learning Hours	C/O	Levels from Cognition Process Dimension			Total Marks
				R	U	A	
1	DC Generator	5	C	02	04	00	06
			O	00	00	06	06
2	D.C. Motor	10	C	02	04	06	12
			O	02	04	04	10
3	Single phase transformer	8	C	06	04	06	16
			O	04	04	00	8
4	Special transformer	6	C	00	08	00	08
			O	02	04	00	06
5	Three phase transformer	10	C	02	04	10	16
			O	00	04	00	04
6	Parallel operation of transformers	6	C	02	04	06	12
			O	00	00	06	06
Total		45	C	14	28	28	70
			O	8	16	16	40

*C - Compusory O - Optional
*R – Remember U – Understand A – Analyze / Apply

Figure 8.11. Specification Table

8.11 Question Paper Format for Summative Assessment (SA)

The Question Paper Profile (QPP) is a tool that facilitates the implementation of e-governance in the question paper-setting process. By using QPP along with a question bank for each component, a question paper can be generated through a computer program. QPP serves as a ready reckoner for setters, enabling them to create questions across different cognitive domain levels and topics. It significantly reduces the time required to prepare printed question papers for classroom learning summative assessments.

X Question Paper Format for Summative Assessment (SA):

Q. No.	Bit 1	Bit 2	Bit 3	Bit 4	Bit 5	Bit 6	Bit 7	Options	
	TLM	TLM	TLM	TLM	TLM	TLM	TLM	C	O
1	1R2	2R2	3R2	5R2	6R2	2R2	4R2	5	7
2	2U4	1U4	3R4	4U4	3R4			3	5
3	3U4	4U4	5U4	5U4	2A4			3	5
4	4U4	6U4	5A4	2U4	3U4			3	5
5	3A6	2A6	1A6					2	3
6	5A6	6A6	6A6					2	3

*T- Unit/Topic Number L- Level of Question M- Marks
*R – Remember U – Understand A – Analyze / Apply
*1R2 means Unit Number No- 1, Level of Question –Remember, Marks – 2 Marks

Figure 8.12. Question Paper Profile

8.12 Scheme of Laboratory Formative Assessment (FA)

A maximum of four criteria are defined in the curriculum for the formative assessment of laboratory learning. Each SLO will be

assessed by faculty using rubrics, which are based on the criteria outlined in the curriculum.

XI Scheme of Laboratory Formative Assessment (FA):

S.N.	Criteria	Max. Marks
1	Drawing circuit diagram, selection of equipment	5
2	Performance	10
3	Calculation, Result, Drawing Graphs (if any)	5
4	Viva Voce	5
	TOTAL	25

Figure 8.13. Scheme of Laboratory Formative Assessment

8.13 Scheme of Self-Learning Summative Assessment (SA)

A maximum of four criteria are defined in the curriculum for the summative assessment of self-study learning. The activity performed by the learner will be evaluated by the faculty using rubrics, based on the criteria specified in the curriculum.

XII Scheme of Self-Learning Summative Assessment (SA):

S.N.	Criteria	Max. Marks
1	Drawing circuit diagram, selection of equipment, survey	5
2	Performance, collection of literature	10
3	fabrication, Calculation, Result, Drawing Graphs (if any)	5
4	Viva Voce	5
	TOTAL	25

Figure 8.14. Scheme of Laboratory Formative Assessment

8.14 COs-POs/PSOs Mapping Matrix

A curriculum map helps identify the program's strengths (attributes widely addressed) and gaps (attributes addressed by only a few learning experiences). The simplest form of a curriculum map is a matrix, where the rows represent learning experiences (Course Outcomes), and the columns represent Program Outcomes (or Graduate Attributes). The seven Program Outcomes for diploma engineering courses, as defined by the National Board of Accreditation, serve as the columns. The strength of mapping is categorized into three levels: Low (1), Medium (2), and Strong (3).

CO-PO mapping is conducted by a group of faculty members using the method established by the Curriculum Development Cell.

XIII COs-POs/PSOs Mapping Matrix:

Course Outcomes	Program Outcomes							Program Specific	
	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PSO1	PSO2
CO1	3	-	-	3	-	2	3	-	-
CO2	3	-	-	3	-	2	3	-	-
CO3	3	-	-	3	-	2	3	-	-
CO4	3	-	-	3	-	-	3	-	-
CO5	3	-	-	3	-	-	3	-	-
CO6	3	-	-	3	-	-	3	-	-

Figure 8.15. COs-POs/PSOs Mapping Matrix

8.15 Textbooks, BIS Codes References

The reference books, textbooks, and standards needed for the curriculum content are provided as resources for both students and faculty. Only standard books with ISBN numbers are given priority in the curriculum document.

XIV Textbooks, BIS Codes References:

S.N.	Title	Author, Publisher, Edition and Year of Publication	ISBN Number
1	Electrical Machines	S.K. Bhattacharya, The McGraw Hill companies, Seventh Reprint, 2011.	13:978-007-0669215 10:0-07-066921-X
2	Principle of Electrical Machines	V K Mehta, Rohit Mehta, S. Chand Publishing, 2nd Edition,2002	9788121921916

Figure 8.16. Textbooks, BIS Codes References

8.16 e-References

E-references are included in the curriculum to serve as valuable resources for both students and faculty. Priority is given to standard and credible e-references to ensure quality and reliability. These references are carefully selected to enhance students' learning experience and support their academic growth.

XV e-References:

1. http://nptel.ac.in/courses/108108076/1 , accessed on 29th April 2024
2. https://www.youtube.com/watch?v=-xebh8wU8gY accessed on 29th April 2024

8.17 List of Major Equipment/Machineries with Specification

The document includes a detailed list of major equipment and instruments necessary for conducting practical exercises aimed at developing psychomotor skills. The listed equipment and instruments are integral to facilitating effective practical sessions, enabling students to gain proficiency and confidence in applying theoretical concepts to real-world scenarios.

XVI List of Major Equipment/Machineries with Specification:

1. Auto transformer (Dimmerstat), single-phase, Input-240 V, Output 0-270 V,
2. Auto transformer (Dimmerstat), three-phase, Input-440 V, Output 0-440 V
3. D.C. Shunt, Series and Compound Generators, Voltage rating 220 Volts,
4. D.C. Shunt and Series Motors, Voltage rating 220 Volts, Power rating 2 KW

Figure 8.18. List of Major Equipment/Machineries

8.18 List of Industry Experts and Faculties who contributed for this curriculum

The document includes a list of experts and faculty members who contributed to the development of the curriculum. Their valuable inputs and expertise have ensured the curriculum's relevance and quality. The document is authenticated with the signatures of the Chairman and Member Secretary of the Program Board of Studies (PBOS), underscoring its credibility and approval.

XVII List of Industry Experts and Faculties who contributed for this curriculum:

S.N.	Name	Designation	Institute / Industry
1	Dr. M.B.Daigavane	Principal	Government Polytechnic, Nagpur
2	Dr.P. M.Daigavane	H.O.D. Electrical Engineering, Academic Expert.	G.H.Raisoni College of Engineering, Nagpur
3	Mrs. Divya Piprode	Sr. Engineer, Industry Expert	PGCIL, Nagpur
4	Mr. M.N. Gawande	Lecturer in Electrical Engineering, MSBTE Nominee.	Government Polytechnic, Gondia
5	Dr G.V.Gotmare	I/C HoD, Electrical Engineering	Government Polytechnic, Nagpur
6	Mrs. A. A. Alegaonkar	Lecturer in Electrical Engineering, Course Incharge	Government Polytechnic, Nagpur

(Dr.G.V.Gotmare)
HOD & Chairman PBOS,

(Dr. G. V. Gotmare)
Member Sectretary PBOS,

CHAPTER 9

Curriculum Document

Detailed curriculum document of Diploma in **Metallurgical Engineering** is given below.

9.1 Vision of Institute

To become a Center of Excellence, providing quality technical education and training

9.2 Mission of Institute

The mission of Government Polytechnic, Nagpur is-

1. To frame institutional policies for effective implementation of teaching learning process
2. To inculcate values and ethics for life-long learning through curricular, co-curricular and extra-curricular activities
3. To develop facilities and services for academic excellence
4. To enhance the skills of faculties and staff through industry institute collaboration.

9.3 Vision of Program

Vision of the Metallurgical Engineering Program:

"To produce excellent, self motivated, creative and ethical metallurgical technicians for industries and society."

9.4 Mission of Program

Mission of the Metallurgical Engineering Program:

M1: To develop and deliver quality academic programs in emerging

field of metallurgical engineering to empower the students to meet industrial needs with environmental concern

M2: To adopt the best instructive methods to maximize knowledge transfer

M3: To provide the best facility, infrastructure and environment to the students and faculty members, creating an ambience conducive for excellence in metallurgical engineering education.

M4: To impart quality education to inculcate moral values ,professional ethics and entrepreneurial qualities

.

9.5 Program Educational Objectives (PEOs)

The Program Educational Objectives of (PEOs) Metallurgical Engineering Program are:

PEO1: To provide strong background of science and humanities in order to use these tools in Metallurgical engineering.

PEO2: To develop ability to demonstrate technical and administrative competence.

PEO3: To develop innovative ideas of recent technology for benefits of society with environmental concern .

PEO4: To attain professional excellence through life long learning and produce supervisors who ensure ethical and moral behaviour

PEO5: To develop the qualities of Entrepreneur and professional leader

9.6 Program Outcomes (POs)

PO1: Basic and Discipline specific knowledge: Apply knowledge of basic mathematics, science and engineering fundamentals and engineering specialization to solve the engineering problems.

PO2: Problem analysis: Identify and analyse well-defined engineering problems using codified standard methods.

PO3: Design/ development of solutions: Design solutions for well-defined technical problems and assist with the design of systems components or processes to meet specified needs.

PO4: Engineering Tools, Experimentation and Testing: Apply modern engineering tools and appropriate technique to conduct standard tests and measurements.

PO5: Engineering practices for society, sustainability and environment: Apply appropriate technology in context of society, sustainability, environment and ethical practices.

PO6: Project Management: Use engineering management principles individually, as a team member or a leader to manage projects and effectively communicate about well-defined engineering activities.

PO7: Life-long learning: Ability to analyse individual needs and engage in updating in the context of technological changes.

9.7 Program Specific Outcomes (PSOs)

PSO1: Select appropriate test method for inspection of castings and other metallurgical products

PSO2: Engage in preparing charge for producing quality steel

9.8 Mapping of Vision, Mission, PEOs, POs, PSOs

30	Design and develop new alloys for specific	41	30	15	4	90	3.2	30

	applications.							
31	Implement quality assurance processes in metallurgy.	49	23	12	6	90	3.19047619	31
32	Optimize metallurgical processes for efficiency.	49	23	12	6	90	3.166666667	32
33	Manage budgets and control costs in metallurgical projects.	38	31	18	3	90	3.166666667	33
34	Collaborate effectively within multidisciplinary teams.	37	34	16	3	90	3.166666667	34
35	Use computer simulations to model metallurgical processes	40	30	15	5	90	3.166666667	35
36	Use instrumentation for metallurgical measurements.	42	33	10	5	90	3.142857143	36
37	Develop safety management plans for metallurgical processes.	45	30	8	7	90	3.142857143	37
38	Manage metallurgical assets efficiently.	44	27	15	4	90	3.142857143	38
39	Apply mineral processing techniques.	33	39	14	4	90	3.122222222	39
40	Control and optimize foundry processes.	44	26	16	4	90	3.119047619	40
41	Use computer simulations to model metallurgical processes	41	29	16	4	90	3.119047619	41

42	Plan and execute metallurgical projects effectively.	47	27	10	6	90	3.119047619	42
43	Ensure compliance with metallurgical industry regulations.	46	26	13	5	90	3.119047619	43
44	Conduct preventive maintenance on metallurgical equipment.	40	29	14	7	90	3.095238095	44
45	Apply automation in metallurgical processes	43	26	15	6	90	3.095238095	45
46	Apply principles of physics to solve broad based relevant engineering problems..	32	38	15	5	90	3.077778	46
47	Respect cultural diversity in metallurgical projects.	42	23	20	5	90	3.071428571	47
48	Scale up metallurgical processes for industrial production.	41	29	16	4	90	3.071428571	48
49	Prepare accurate cost estimates for metallurgical projects.	40	28	16	6	90	3.047619048	49
50	Extract metals from ores and raw materials.	39	28	16	7	90	3.023809524	50
51	Apply the concept of Mathematics to solve industry-based technology problems..	30	35	21	4	90	3.011111111	51
52	Prepare engineering drawing using prevailing drawing instruments..	31	37	18	4	90	2.911111111	52
53	Use basic principles in	21	31	30	8	90	2.722222222	53

	electrical engineering for metallurgical applications.							
54	Use electronic components and circuits for metallurgical applications..	19	28	29	14	90	2.577777778	54

Technical Skills Required for Diploma in Metallurgical Engineering

S.N.	Technical Skills (What diploma holders will be able to do in the industry at entry level) Legends: ME-Most Essential, E-Essential, D-Desirable, NR-Not Required	ME	E	D	NR	Total	Score	Rank
1	Demonstrate the ability to conduct metallurgical experiments and tests, encompassing material characterization, analysis, and sample preparation.	61	18	7	4	90	3.611111111	1
2	Apply skills in metal casting processes, such as sand casting and investment casting, to produce metal components and parts.	59	22	5	4	90	3.511111111	2
3	Utilize competence in heat treatment processes, like annealing, quenching, and tempering, to modify the properties of metals and alloys.	61	16	7	6	90	3.466666667	3
4	Utilize microscopy techniques to examine the microstructure of metals and alloys, assessing their	58	20	7	5	90	3.455555556	4

	quality and properties.							
5	Apply experience in various welding and joining methods, including arc welding, gas welding, and laser welding, for metal fabrication.	57	21	8	4	90	3.455555556	5
6	Employ knowledge of NDT techniques, such as ultrasonic testing and radiographic testing, to inspect materials without causing damage.	55	22	10	3	90	3.433333333	6
7	Demonstrate proficiency in identifying and preventing corrosion in metals through protective coatings and materials selection.	55	21	10	4	90	3.411111111	7
8	Utilize skills to analyze and determine the causes of material failures, including fractures, cracks, and wear.	53	23	10	4	90	3.357142857	8
9	Apply competence in optimizing metallurgical processes for efficiency and quality, particularly in manufacturing and production settings.	54	22	8	6	90	3.357142857	9
10	Employ the ability to establish and implement quality control measures to ensure the integrity and consistency of metallurgical products.	50	25	12	3	90	3.355555556	10

11	Utilize experience in using advanced instrumentation, such as spectrometers and scanning electron microscopes, for material analysis.	52	23	11	4	90	3.333333333	11
12	Apply knowledge of metal forming processes, including forging, rolling, and extrusion, to shape metals into desired forms.	54	19	12	5	90	3.30952381	12

9.10 Courses Identification

Courses are formed based on feedback obtained from alumni and industries, industry identified competencies finalized in search conference, and identified gaps previous curriculum, NEP and AICTE guidelines and institute policy framed by ILC. The following table shows various courses formed based on identified competencies.

Table 9.4. Courses Identification from Identified Competencies.

S.N.	Competencies (What diploma holders will be able to do in the industry at entry level)	Rank based on Industry Feedback	Name of Course to be introduced in Curriculum	Course Category DSC/DSE/ SEC/AEC/ VEC/INP etc.	Semester of the course
1	Select appropriate materials for engineering applications.	1	Selection of Materials	DSC	VI
2	Perform heat treatment processes to modify material properties.	2	Heat Treatment	DSC	V
3	Use various metallurgical processes, including extraction and refining.	3	Non ferrous Metallurgy	DSC	VI
4	Use computers for documentation, presentation, analyse data and Internet services	4	Basics of Computer	SEC	I
5	Analyze and test the mechanical properties of materials.	5	Testing of Materials	DSC	IV
6	Perform non-destructive testing to evaluate material integrity.	6	Testing of Materials	DSC	IV
7	Implement quality control processes in metallurgical processes	7	Industrial Management	INP	VI
8	Conduct metallurgical analysis and testing.	8	Testing of Materials	DSC	IV
9	Manage metallurgical testing laboratories.	9	Testing of Materials	DSC	IV
10	Perform casting and foundry operations.	10	Foundry Technology	DSC	II
11	Apply critical thinking and problem-solving skills to metallurgical challenges.	11	Mechanical Metallurgy	DSC	V
12	Demonstrate leadership qualities in metallurgical project management.	12	Entrepreneurship and Start up	INP	VI
13	Conduct metallurgical	13	Testing of Materials	DSC	IV

	testing and inspection procedures.				
14	Use different engineering tools for performing shop floor activities.	14	Metallurgical Workshop	SEC	III
15	Apply recycling and sustainable practices in metallurgy.	15	Environmental Sustainability	VEC	IV
16	Manage metallurgical plant operation efficiently.	16	Entrepreneurship and Start up	INP	VI
17	Assess and mitigate corrosion in materials.	17	Corrosion Engineering	DSE	V
18	Apply metal forming and shaping techniques.	18	Mechanical Metallurgy	DSC	V
19	Perform heat treatment processes on alloys.	19	Alloy steel	DSE	VI
20	Prioritize safety in metallurgical practices.	20	Entrepreneurship and Start up	INP	IV
21	Communicate technical information clearly and effectively.	21	Business Communication	AEC	VI
22	Analyze metallurgical data and generate reports.	22	Capstone Project	INP	VI
23	Designate and specify materials for various applications.	23	Selection of materials	DSC	VI
24	Investigate and address material and metallurgical failures.	24	Testing of materials	DSC	IV
25	Assess and mitigate the environmental impact of metallurgical processes.	25	Environment Sustainability	VEC	IV
26	Adapt to evolving metallurgical technologies and innovate in processes	26	Metallurgical design and drawing	SEC	V
27	Commit to lifelong learning and professional development.	27	Advanced Personality Development	VEC	II
28	Use advanced techniques like electron microscopy for material analysis.	28	Physical Metallurgy	DSC	IV

29	Work with welding and joining technologies. .	29	welding Technology	DSE	IV
30	Design and develop new alloys for specific applications.	30	Alloy Steel	DSC	IV
31	Implement quality assurance processes in metallurgy.	31	Entrepreneurship and Start up	INP	VI
32	Optimize metallurgical processes for efficiency.	32	Metallurgical Thermodynamics	DSC	III
33	Manage budgets and control costs in metallurgical projects.	33	Industrial Management	INP	V
34	Collaborate effectively within multidisciplinary teams.	34	Industrial Management	INP	V
35	Use computer simulations to model metallurgical processes	35	Basics of computer	AEC	I
36	Use instrumentation for metallurgical measurements.	36	Testing of materials	DSE	VI
37	Develop safety management plans for metallurgical processes.	37	Industrial management	INP	V
38	Manage metallurgical assets efficiently.	38	Industrial Management	INP	V
39	Apply mineral processing techniques.	39	mineral Dressing	DSC	III
40	Control and optimize foundry processes.	40	Modern Foundry Technology	DSC	VI
41	Use computer simulations to model metallurgical processes	41	Engineering Graphics	SEC	II
42	Plan and execute metallurgical projects effectively.	42	Capstone Project	SEC	IV
43	Ensure compliance with metallurgical industry regulations.	43	Applied Physics	DSC	II
44	Conduct preventive maintenance on metallurgical equipment.	44	Industrial management	INP	V
45	Apply automation in	45	Industrial	INP	V

	metallurgical processes		management		
46	Apply principles of physics to solve broad based relevant engineering problems..	46	Applied Physics	DSC	II
47	Respect cultural diversity in metallurgical projects.	47	Indian Constitution	VEC	VI
48	Scale up metallurgical processes for industrial production.	48	Industrial management	INP	V
49	Prepare accurate cost estimates for metallurgical projects.	49	Industrial management	INP	V
50	Extract metals from ores and raw materials.	50	Non Ferrous Metallurgy	DSC	II
51	Apply the concept of Mathematics to solve industry-based technology problems..	51	Applied Mathematics	DSC	II
52	Prepare engineering drawing using prevailing drawing instruments..	52	Engineering Graphics	SEC	II
53	Use basic principles in electrical engineering for metallurgical applications.	53	Generic Elective	GE	III
54	Use electronic components and circuits for metallurgical applications..	54	Generic Elective	GE	IV

9.11 Program Structure

The program structure of the Metallurgical Engineering program is developed as described previously and is given in appendix.

Appendix I
Curriculum

Program Structure

Government Polytechnic, Nagpur

Diploma in Metallurgical Engineering

NEP 2020 Align Curriculum 2023 Program Structure

Semester: First

SN	Course Code	Course Title	Course Category	Learning Scheme (Hours/Week)				Notional Hours/ Week (Total Notional Hours)		Credits	Assessment Scheme (Marks)						Total Marks
											CL		TL/LL		SL		
				CL	TL	LL	SL	NLH		Cr	SA	FA	SA	FA	SA		
1	MH101H	Basic Mathematics	DSC	4	2	-	2	8	(120)	4	70	30	-	25	25		150
2	CH101H	Applied Chemistry	DSC	4	-	2	2	8	(120)	4	70	30	25	25	25		175
3	AM101H	Engineering Mechanics	DSC	3	-	2	1	6	(90)	3	70	30	25	25	25		175
4	EN101H	Communication Skills	AEC	2	-	2	2	6	(90)	3	70	30	25	25	25		175

(An Autonomous Institute of Govt. of Maharashtra)
Near Mangalwari Bazar, Sadar, Nagpur-440001

COURSE CURRICULUM

Program	:	Diploma in CE/ME/EE/EC/CM/IT/AI/PK/MT/MK/TX
Course Category	:	DSC
Course Code	:	MH101H
Course Title	:	Basic Mathematics

I Rationale:

Mathematics is the core course and plays a crucial role in diploma programme. This Basic course of mathematics is a foundations of Engineering which will help in developing compitency, logical thinking, enhance qualitative literacy analytical thinking which are valuable for lifelong learning and professional growth. Also Basic course of mathematics is being develop the requisite course outcomes in most of the engineering programme and thereby enhance employability. It will help to apply the principles of basic mathematics to solve related technological problems. Hence the course provides the insight to analyse engineering problems scientifically using logarithm, partial fraction, determinant, matrices, trigonometry and statistics.

II Industry Identified Competency:

The Student will be able to do in Industry at entry level:

Apply the concept of Mathematics to solve industry-based technological problems.

III Course Outcomes (COs):

After completing this course students will be able to:

CO1: **Apply** Algebra, Laws of Logarithm, and change of base of logarithm to solve engineering problems.

CO2: **Resolve** proper fraction improper fraction into partial fraction.

CO3: **Apply** matrix method to solve simultaneous equation of Two and three variables in engineering problems.

CO4: **Use** concept of Allied Angles, Compound angles, Multiple and sub-multiples Angles to solve engineering problems.

CO5: **Use** the principle values of inverse trigonometric function, properties to solve the examples of inverse Trigonometric function.

CO6: **Use** the measures of central tendencies and measures of dispersion in decision making.

IV Learning Scheme:

Classroom Learning (CL)	Tutorial Learning (TL)	Laboratory Learning (LL)	Self-Study Learning (SL)	Notional Learning Hours (NLH)	Credits
4	2	-	2	8	4

V Assessment Scheme:

Classroom Learning				Tutorial/Laboratory Learning				Self-Study Learning	
FA	SA	Total		FA		SA		SA	
Max	Max	Max	Min	Max	Min	Max	Min	Max	Min
30	70	100	40	25	10	-	-	25	10

VI Classroom Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Cognitive Domain)		Topics and Sub-topics		Aligned Cos
UNIT I: Logarithm	1a	Evaluate the value of given Logarithm without using calculator.	1.1	Logarithm:-Concept of Logarithm	CO1
	1b	Solve the given logarithm by Using Laws of Logarithm.	1.2	Rules And Laws of Logarithm; Addition, Subtraction, Multiplication, Division And Change of Base Formula.	
	1c	Identify natural and common Logarithm.	1.3	Concept of natural & common Logarithm.	
UNIT II: Partial Fraction	2a	Identify the given rational fraction is proper or improper fraction.	2.1	Concept of rational fraction, proper, improper fraction and partial fraction.	CO2
	2b	Resolve the given proper fraction into partial fraction.	2.2	Resolving proper fraction into partial fraction. Denominator containing non- repeated linear factors, Denominator containing repeated linear factors, Denominator containing irreducible non repeated quadratic factors	
	2c	Resolve the given improper Fraction into partial fraction.	2.3	Resolving improper fraction into partial fraction.	

UNIT III: Determinant & Matrix	3a	Find the value of given determinant of order 2 and 3.	3.1	Concept of determinant ,order of determinant, Expansion& Evaluation of determinant of order 2 and 3.	CO3
	3b	Find inverse of given matrix.	3.2	Concept of matrix, Types of matrices, Algebra of matrices Transpose of matrix , ad-joint, singularity of matrix and inverse of matrix	
	3c	Solve the given simultaneous equation in two and three variables.	3.3	Solution of system of linear equations two and three variables by inverse matrix method	
UNIT IV: Trigonometry	4a	Use fundamental identities to solve the given Trigonometric relation.	4.1	Fundamental identities, Trigonometric ratios of any angle.	CO4
	4b	Apply the concept of allied angle , compound angle, multiple angle (2θand 3θ) sub-multiple angle (θ/2),to solve the given trigonometric relation	4.2	Trigonometric ratios of allied angles, compound angles, multiple and sub-multiple angles (without proof)	
	4c	Apply Factorization, De Factorization formulae to solve the given trigonometric relations.	4.3	Factorization and de-factorization formulae (without proof).	
UNIT V: Inverse Trigonometric Function	5a	Find the principle value the given Inverse trigonometric functions.	5.1	Concept of inverse trigonometric functions, Principle values of inverse Trigonometric functions.	CO5
	5b	Solve the given inverse	5.2	Properties of inverse Trigonometric functions.	
	5c	Evaluate the value of given Inverse-trigonometric functions.	5.3	Relation between inverse trigonometric functions	
	6a	Find mean or Combined Mean of given Statistical data.	6.1	Measures of central tendency Mean (only), & Combined mean.	

UNIT VI: Statistics	6b	Find the Range, Co-efficient of Range, Mean Deviation, Standard Deviation of given Statistical data.	6.2	Measures of dispersion:- Range , mean deviation , standard deviation of Discrete, Grouped & Ungrouped Data.	CO6
	6c	Find variances, co-efficient of variation of given Statistical data.	6.3	Variance and coefficient of variation, of Discrete, Grouped & Ungrouped Data.	
	6d	Check the Consistency & Reliability of given sets of data.	6.4	Comparison of two sets of observations, Consistency & Reliability.	

VII Laboratory Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Psychomotor Domain)		Hours	Aligned COs
I	1	Evaluate the value of given logarithm without using calculator	2#	CO1
I	2	Solve simple problems of Logarithm based on laws of logarithm, change base Formulas. Identify the given logarithm is Common Logarithm Or Natural Logarithm.	2#	CO1
II	3	Identify the given Rational Fraction is proper fraction or improper fraction. Resolve improper fraction into Partial fraction.	2#	CO2
II	4	Resolve into partial fraction using linear non-repeated, repeated, and irreducible quadratic factors.	2#	CO2
III	5	Evaluate the given Determinant of order 2 and 3 by expansion method.	2#	CO3
III	6	Solve elementary problems on Algebra of matrix for branch specific related with engineering application.	2#	CO3
III	7	Verify the given properties of transpose of matrix.	2#	CO3
III	8	Find adjoint of matrix and inverse of matrix.	2#	CO3
III	9	Solve the given simultaneous equation of order 2 and 3.	2#	CO3
IV	10	Verify the given trigonometric Identities, Relations by using Trigonometric Ratios.	2#	CO4
IV	11	Verify the given trigonometric Identities, Relations by using allied angle and compound angle formulas.	2#	CO4
IV	12	Verify the given trigonometric Identities, Relations by using multiples angle and sub-multiples angle formulas.	2#	CO4
IV	13	Verify the given trigonometric Relations by using factorization and De-factorization formulas.	2#	CO4
V	14	Find the principle values of inverse trigonometric function.	2#	CO5
V	15	Verify the given inverse trigonometric Relations by using properties of inverse trigonometric function.	2#	CO5
VI	16	Find the mean of any given data, and find the combined mean given two sets of data.	2#	CO6

VI	17	Find the range, co-efficient of range of the given grouped and un-grouped data.	2#	CO6
VI	18	Calculate the mean, standard deviation of grouped and un-grouped data related to the engineering problems.	2#	CO6
VI	19	Calculate the variance, co-efficient of variances grouped and un-grouped data related to the engineering problems.	2#	CO6
VI	20	Justify the consistency and Reliability of two given sets.	2#	CO6

Note: # Compulsory

VIII Self-Study Learning (SLO in Cognitive/Psychomotor/Affective Domain)

1. Verify the complicated calculation by logarithm and calculator.
2. Prepare a chart of Rules, Laws of Logarithm.
3. Convert the given improper fraction into proper fraction and resolve into partial fraction.
4. Solve simultaneous equation in two variables by matrix inversion method and write mathematical programming related with engineering field.
5. Prepare the list of Trigonometric formulas and inverse trigonometric formulas.
6. Represent trigonometric ratios, logarithmic function graphically and interpret the Result.
7. Collect the data from market, class test marks in your class or from two groups then find the mean.
8. Compare the any two cricket players by using consistency and reliability.
9. Calculate mean Deviation, standard deviation, co-efficient of variance of any given data.
10. Find the number of unknown variables in two groups if the combined mean is given.

IX Specification Table for Classroom Learning Assessment:

COURSE CURRICULUM

Program	:	DIPLOMA IN ME/AE/CE/EE/EC/PK/MT/TX/IT/CM/AIML/MK
Course Category	:	DSC
Course Code	:	CH101H
Course Title	:	Applied Chemistry

I Rationale:

Chemistry is the basic science which is essential to all engineering courses. For an engineer, the usage of equipment's and instruments would require knowledge of chemical substances, their composition and properties. This course describes the basic facts, concepts & principles for the understanding of basic elementary knowledge related to all engineering fields. Chemistry subject knowledge also aims to bridge the theoretical concepts and their practical engineering applications, thus highlighting the role of chemistry in the field of engineering. This will be gateway for development of reasoning capacity of students and understanding new technology as well.

II Industry Identified Competency:

The Student will be able to do in Industry at entry level:

Apply principles of chemistry to solve broad based relevant engineering problems.

III Course Outcomes (COs):

After completing this course students will be able to:

CO1: **Analyse** the Bonding-type in a compounds and application of catalyst in industries.

CO2: **Select** metal and nonmetal materials for industrial applications.

CO3: **Analyse** engineering materials on the basis of properties and applications.

CO4: **Apply** the concept of Electrochemistry to solve engineering and industrial problems.

CO5: **Solve** metal-corrosion problems using relevant preventive methods.

CO6: **Analyse** different type of energy sources for sustainable development.

IV Learning Scheme:

Classroom Learning (CL)	Tutorial Learning (TL)	Laboratory Learning (LL)	Self-Study Learning (SL)	Notional Learning Hours (NLH)	Credits
4	-	2	2	8	4

V Assessment Scheme:

Classroom Learning				Tutorial/Laboratory Learning				Self-Study Learning	
FA	SA	Total		FA		SA		SA	
Max	Max	Max	Min	Max	Min	Max	Min	Max	Min
30	70	100	40	25	10	25	10	25	10

VI Classroom Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Cognitive Domain)		Topics and Sub-topics		Aligned Cos
UNIT I: Chemical Bonding and Catalysis	1a	Classify valence electrons and type of bond in given compounds.	1.1	Indian Chemistry: Philosophy of atom by Acharya Kanad. Valency: Octet Rule, Duplet Rule, Definition & types of valences (Electrovalence & Covalence), types of bond electrovalent, Covalent, Co-ordinate)	CO1
	1b	Formulate given molecule on the basis of given type.	1.2	Formation of Electrovalent e.g., NaCl, $CaCl_2$, MgO, Formation of Electrovalent e.g., NaCl, $CaCl_2$, MgO, Formation of Covalent Compounds CO_2, NH_3, N_2 Formation of coordinate compound e.g. (NH_4^+), (H_3O^+)	
	1c	Differentiate between Electrovalent and Covalent compound on basis of given properties.	1.3	Distinction between Electrovalent & Covalent compounds (Properties-Formation, Melting point, Boiling point, Type of bond, Solubility, Strength of bond).	

UN	1d	Select the relevant catalyst-type for given application.	1.4	Catalysis: Definitions of Catalyst, Types of Catalyst, Positive Catalyst, Negative Catalyst, Auto-catalyst, Definitions of catalysis, Types of catalysis (Homogeneous, Heterogeneous) Industrial Applications of Catalyst.	
UNIT II: Metallurgy, Alloy and Polymer	2a	Draw the flow chart of metal extraction process with given terms in metallurgy.	2.1	Metallurgy: Definitions of terms used in metallurgy - Minerals, Ore, Gangue, Flux, Slag. Definition of metallurgy, flow chart of Metal extraction process (Crushing, Concentration (physical and chemical), reduction, Refining.	CO2
	2b	Select proper alloy for given application or vice versa.	2.2	Definition of alloy, purposes of alloy formation, Types of alloys (Ferrous alloy and Nonferrous alloy) Composition properties and application of High-speed steel, Magnetic steel, Duralumin, Woods metal.	
	2c	Distinguish between Thermosoftening and Thermosetting plastics on given points.	2.3	Polymer (Plastic): Definition o fpolymer, types opolymer and difference of Thermosoftening and Thermosetting plastics (Properties-Formation, Structure, Molecular weight, Heating effect, Reclaiming, Chemical bonding, Nature, Solubility).	
	2d	Select the given Plastic Polymer for Industry application.	2.4	Formation of Plastic by Addition polymerization of Polyethylene, Polystyrene. Formation of Plastic by Condensation process of Bakelite plastic, Nylon (6, 6).	
	2e	Use given Thermal insulators in industry on their characteristics.	2.5	Insulating material: Characteristics of Thermal insulators. Preparation, Properties & Applications of Thermocol & Glass wool.	

UNIT III: Engineering Materials	3a	Illustrate functions & characteristics of given Lubricants, for different types of machines.	3.1	Lubricants : Definition, Types of Lubricants, Functions of Lubricants. Characteristics of Lubricants- Viscosity, Viscosity Index ,Volatility,Oiliness, Cloud and Pour point, lash and Fire point, Acid value. Selection of Lubricant for various types of machines such as I.C engine, Gear system, Cutting tools, Delicate and Sewing machines, Tractors and Rollers.	CO3
	3b	Detect the adverse effects of hard water as per given industry.	3.2	Water: Types of impurities in natural water. Definitions of hard and soft water, types of hardness, Unit of ardness (ppm) Adverse effects of hard water in Industries-Paper industry, Textile industry, Dyeing industry, Sugar industry.	
	3c	Select relevant water treatment process for removal of given impurities.	3.3	Potable water treatment: Sedimentation , Coagulation, Filtration, Sterilization (Chlorination method).	
	3d	Relate given properties and applications of Cement and Lime as a construction material.	3.4	Cement & Lime: Portland cement: Definition, chemical composition. Special Cements: Properties and Application of Water proofing cement, Super sulphate cement. Lime: Composition, Properties and Uses of Fat lime, Lean lime.	
d Batteries	4a	Interpret the given terms involved in Electrochemistry.	4.1	Basic concepts of electrolysis: Atoms, Ions, Electrolyte, conductivity of electrolytes, type of electrolyte- strong and weak electrolyte. Ionization and electrolytic dissociation, Arrhenius theory of electrolytic dissociation, degree of ionization, factors affecting degree of ionization.	

UNIT IV: Electrochemistry,cells and	4b	Solve engineering problems using Faraday's law of electrolysis.	4.2	Electrolysis : Faraday's laws of electrolysis: Faraday's First and Second law (Statement and mathematical expression, numericals) Application of electrolysis: Electroplating Silver.	CO4
	4c	Calculate the pH/pOH of solutions with given concentration.	4.3	pH and pOH: Definition of pH, pOH, pH scale, numerical.	
	4d	Use of given cells and batteries in Engineering field.	4.4	Electrochemical cells/ batteries: Basic concepts: cell, attery, distinction between Primary cell (e.g. Dry cell) and secondary cells (e.g. Ni-Cd cell) Fuel cell: Definition, construction, working, advantages, limitations and applications of Hydrogen-oxygen fuel cell.	
UNIT V: Corrosion	5a	Identify the given types of oxide film & its effect on corrosion.	5.1	Definition of corrosion, Types of corrosion, mechanism of Atmospheric corrosion. Effect of oxide film on atmospheric corrosion. Factor effecting atmospheric corrosion.	CO5
	5b	Analyse mechanism of given type of corrosion.	5.2	Immersed Corrosion or Electrochemical Corrosion, definition, types and mechanism (Hydrogen evolution and oxygen absorption).	
	5c	Select different corrosion protection methods and its use in given situation.	5.3	Application of Protective Coatings like metallic coating by - Galvanizing, Tinning, Sherardizing, Metal Spraying, Metal Cladding. Non-metallic coating: Paint - Characteristics, constituents of Paint and their functions.	
trol	6a	Compare types of Fuel on given points.	6.1	Energy: Definitions of a fuel, Classification of fuels with suitable examples, Characteristics of a good fuel, Calorific value and Ignition temperature, Comparison between Solid, Liquid, Gaseous fuels based on their properties.	

UNIT VI: Energy and Pollution Con	6b	Analyse components of fuel by proximate analysis.	6.2	Classifications of fuel: Solid fuels: analysis of solid fuels- Proximate analysis for determination of moisture, volatile matter, ash and fixed carbon, significance of Proximate analysis.	CO6
	6c	Describe the properties and uses of given solid, liquid and gaseous fuel.	6.3	Liquid fuels: Bio diesel - properties, applications. Gaseous fuels: Composition, properties, applications of LPG, CNG.	
	6d	Select proper pollution control methods for sustainable development.	6.4	Pollution control: Definition of pollution – Types of pollution (Air, water pollution) 3R Concept, recycling of plastic. E waste management, sustainable development– significance of Wind Energy, Solar Energy.	

VII Laboratory Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Psychomotor Domain)		Hours	Aligned COs
I	1	Explore the chemistry laboratory.	2#	CO1
I	2	Analyse basic and Acidic Radicals of known salt solution-1 (Confirmatory Test) using qualitative analysis method for compound composition.	2#	CO1
I	3	Analyse basic and Acidic Radicals of known salt solution-2 (Confirmatory Test) using qualitative analysis method for compound composition.	2#	CO1
I	4	Analyse basic and Acidic Radicals of known salt solution-3 (Confirmatory Test) using qualitative analysis method for compound composition.	2#	CO1
II	5	Find the quality of alloy by determining the percentage of Iron in given steel sample by Redox titration.	2	CO2
II	6	Prepare Phenol formaldehyde resin used in manufacturing of Bakelite Plastic, for Polymer industries.	2#	CO2
III	7	Analyse Total hardness (permanent and temporary) of given sample of water by EDTA method, for various industries.	2#	CO3
III	8	Calculate the percentage of calcium content in cement, for different constructional purposes.	2#	CO3
III	9	Estimate the acid value of lubricant by KOH, for various machines. OR Find out the quality of lubricant, by calculating coefficient of viscosity using Ostwald's Viscometer.	2	CO3
IV	10	Detect the nature of given solution by finding its pH value by using pH meters.	2#	CO4
IV	11	Find the Electrochemical equivalent (ECE) of copper,for cell manufacturing industries.	2#	CO4
V	12	Compare the rate of corrosion (Al-strip) with respect to given media for prevention of metal corrosion.	2#	CO5
V	13	Calculate the strength of given Hydrochloric acid solution by titrating it against sodium hydroxide solution to control rate of corrosion.	2#	CO5

VI	14	Categorize the given paint samples by finding thinner content in it, for various Paint industries.	2#	CO6
VI	15	Estimate the percentage of moisture and ash content in the given coal sample by proximate analysis, for power generation.	2	CO6

Note: # Compulsory

VIII Self-Study Learning (SLO in Cognitive/Psychomotor/Affective Domain)

1. Collect information by library survey regarding biography/ valuable contribution in Chemistry of any one Indian Chemist.
2. Construct a model of any one ionic /covalent/co-ordinate compounds.
3. Compare the role of given types of catalysts (positive/negative/auto) in different chemical reactions.
4. Categorize given types of alloy by collecting various metal alloy samples.
5. Construct a model of Concentration/reduction/refining process in metal extraction.
6. Collect information by library survey regarding engineering material used in various industries.
7. Analyse different samples of Cement/Lime/Water/Lubricants according to given properties.
8. Compare different chlorinating agent of Sterilization of potable water at domestic level.
9. Categorize various types of Cells by market survey method.
10. Collect various types of corroded metal sample.
11. Compare rate of corrosion process between ferrous and aluminium metals.
12. Prepare a chart construction of Hydrogen-Oxygen Fuel Cell.
13. Compare the type of fuels according to given properties.
14. Prepare a method of recycling of plastic, to sustain environment.
15. Analyse the PUC report (gas analyser method) of vehicle, to sustain environment.

COURSE CURRICULUM

Program	:	Diploma in CE/ME/PK/MT/MK/TX
Course Category	:	DSC
Course Code	:	AM101H
Course Title	:	Engineering Mechanics

I Rationale:

Study of this course develops understanding of effect of force on a body. It helps in analytical and graphical solutions to problem related to forces acting on body. It also helps in understanding concept and application of Equilibrium, friction, centroid and centre of gravity. Study of simple machines gives idea about input, output, efficiency and friction of machine. Study of this course is very useful at higher level like strength of materials, Mechanics of Structure, Design of Structures etc.

II Industry Identified Competency:

The Student will be able to do in Industry at entry level:

Apply the principles of engineering mechanics to solve engineering problems.

III Course Outcomes (COs):

After completing this course students will be able to:

CO1: **Select** the relevant simple lifting machine for given purpose.

CO2: **Apply** various theorems to find the resultant of system of forces.

CO3: **Apply** law of equilibrium on different bodies.

CO4: **Locate** Centre of gravity and Centroid in various sections.

CO5: **Analyze** concept of friction in various conditions.

IV Learning Scheme:

Classroom Learning (CL)	Tutorial Learning (TL)	Laboratory Learning (LL)	Self-Study Learning (SL)	Notional Learning Hours (NLH)	Credits
3	-	2	1	6	3

V Assessment Scheme:

Classroom Learning				Tutorial/Laboratory Learning				Self-Study Learning	
FA	SA	Total		FA		SA		SA	
Max	Max	Max	Min	Max	Min	Max	Min	Max	Min
30	70	100	40	25	10	25	10	25	10

VI Classroom Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Cognitive Domain)		Topics and Sub-topics		Aligned Cos
UNIT I: Simple lifting Machine	1a	Compare given machines on the basis of given points.	1.1	Concept of simple lifting machine, uses of machine, definition of load, effort, mechanical advantage, velocity ratio, efficiency of Machines, reversible and non-reversible machines.	CO1
	1b	Determine given terms of simple lifting machine.	1.2	Ideal machine, friction in machine, law of machine, maximum Mechanical advantage and efficiency.	
	1c	Determine velocity ratios, efficiency and law of various machines for given data.	1.3	Velocity ratios of Simple Axle and Wheel, Differential axle wheel, Single Purchase & Double purchase crab winch, Simple Screw Jack, Weston's Differential pulley block, Geared pulley block, Two Sheaves and Three Sheaves pulley block, Worm and Worm wheel.	
	2a	Classify given terms related to Engineering Mechanics.	2.1	Significance of engineering mechanics, necessity and Classification of engineering mechanics.	

UNIT II: Forces	2b	Classify the given units of scalar and vector quantity.	2.2	Definitions: Space, time, particle, body, rigid body, mass, weight, scalar and vector quantity. Units of measurement, Fundamental units and derived units.	CO2
	2c	Describe given terms related to force.	2.3	Concept of force, definition of force, unit of force, effects of force, Characteristics of force.	
	2d	Identify the given force system and effect of a force.	2.4	System of forces. Principle of transmissibility of force.	
	2e	Resolve and find resultant of force/force system.	2.5	Composition of forces & Resolution of forces (Two dimensional), Orthogonal and Non-Orthogonal components of a force. Resultant force. Resultant of concurrent, non-concurrent and parallel forces, Law of parallelogram of forces: limitations and its applications.	
	2f	Apply Varignon's theorem based on given data.	2.6	Definition of moment, sign convention of moments, types of moments. Law of moment, definition of couple, types of couple, properties of couple, Varignon's theorem of moment and its application.	
	2g	Calculate Resultant force on the basis of given data by graphical method.	2.7	Introduction to graphic statics, graphical representation of force, Bow's notation, Space diagram, force diagram, polar diagram & funicular polygon.	
librium	3a	Determine given term related to equilibrium unknown forces using given methods.	3.1	Equilibrium and Equilibrant. Free body and free body diagram. Analytical and graphical condition of equilibrium.	
	3b	Determine unknown force in the given situation using Lami's theorem.	3.2	Lami's Theorem: limitations and its application.	

UNIT III: Equi	3c	Describe given terms related to Beam, load and supports with examples.	3.3	Equilibrium of concurrent, non-concurrent and parallel forces. Beam, span, type of beams, type of supports, types of loading: point load and Uniformly Distributed Load.	CO3
	3d	Determine reactions in the given type of beam by given method.	3.4	Analytical and Graphical method to calculate reactions at support for point load and Uniformly Distributed Load on simply supported and overhanging beams.	
UNIT IV: Centroid & Centre of gravity	4a	Determine centroids of given plain regular figures.	4.1	Centroid and centre of gravity, difference between centroid and centre of gravity. Locating centroid of regular figures such as triangle, rectangle, circle, Semi circle, quarter circle. (Formula only)	CO4
	4b	Calculate centroid of the given compound plain lamina.	4.2	Centroid of compound figures, having combination of two different geometric areas only.	
	4c	Determine the centre of gravity of given solid bodies.	4.3	Centre of gravity of solid bodies like cuboid, cylinder, cone, sphere and hemisphere.	
	4d	Determine centre of gravity of given compound solids.	4.4	Centre of gravity of compound bodies having combination of only two different geometric shapes.	
UNIT V: Friction	5a	Calculate given terms related to friction.	5.1	Friction and its importance in engineering, types of friction, laws of friction, limiting equilibrium, limiting friction, co-efficient of friction, angle of friction, angle of repose, relation between co-efficient of friction and angle of friction.	CO5
	5b	Determine the friction force in the given situation of frictional bodies.	5.2	Equilibrium of bodies on horizontal plane subjected to force parallel and inclined to the plane. Body resting on inclined plane subjected to force parallel to the plane. (Excluding ladder friction).	

VII Laboratory Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Psychomotor Domain)		Hours	Aligned COs
I	1	Determine M.A., V.R., Efficiency of and law of machine for simple /Differential Axle and Wheel.	2#	CO1
I	2	Determine M.A., V.R., Efficiency and law of machine for Simple Screw Jack.	2#	CO1
I	3	Determine M.A., V.R., Efficiency and law of machine for Two Sheave Or three sheave Pulley Block.	2#	CO1
I	4	Determine M.A., V.R., Efficiency and law of machine for Single purchase Crab Or Double purchase Crab.	2	CO1
I	5	Determine M.A., V.R., Efficiency and law of machine for Worm and Worm Wheel.	2	CO1
II	6	Use Force table to determine resultant of concurrent force system using law of Polygon of forces.	2#	CO2
II	7	Determine Forces in the members of jib crane.	2#	CO2
II	8	Determine resultant of co-planer concurrent forces by graphical method. (Problem I)	2#	CO2
II	9	Determine resultant of co-planer concurrent forces by graphical method. (Problem II)	2#	CO2
II	10	Determine resultant of co-planer non-concurrent forces by graphical method. (Problem I)	2	CO2
II	11	Determine resultant of co-planer non-concurrent forces by graphical method. (Problem II)	2	CO2
III	12	Apply lamis theorem to determine unknown force.	2#	CO3
III	13	Determine support reactions for simply supported beam.	2#	CO3
III	14	Determine beam reactions for Vertical Point Load and UDL by Graphical method. (Problem I)	2	CO3
III	15	Determine beam reactions for Vertical Point Load and UDL by Graphical method. (Problem II)	2	CO3
IV	16	Locate the centroid of plane lamina by method of suspension.	2#	CO4
V	17	Determine co-efficient of Friction between different surfaces such as Wood and wood, Wood and glass, Wood and metal.	2#	CO5

Note: # Compulsory

VIII Self-Study Learning (SLO in Cognitive/Psychomotor/Affective Domain)

1. Collect five different photographs indicating concurrent, parallel, general force system in equilibrium.
2. Prepare table showing type of machine and related industrial application.
3. Collect five different situations where Law of moments plays important role.
4. Prepare models representing different types of supports.
5. Illustrate situations wherein friction is essential and not essential.
6. Prepare models in the form of geometrical figures and solids and locate centroid and center of gravity of them.

IX Specification Table for Classroom Learning Assessment:

Unit No.	Units	Classroom Learning Hours	C/O	Levels from Cognition Process Dimension			Total Marks
				R	U	A	
1	Simple lifting Machine	7	C	02	04	04	10
			O	00	04	04	8

COURSE CURRICULUM

Program	:	Diploma in CE/ME/EE/EC/AE/CM/IT/AIML/MC/PK/MT/TX/TR
Course Category	:	DSC
Course Code	:	EN101H
Course Title	:	Communication Skills

I Rationale:

Communication and proficiency in language grants an access to communicate on global platform. This course focuses on enhancing language skills like reading, listening, speaking and writing. Proficiency in English language enables a student to make connection with people around through effective communication. In engineering domain, excellence in English language enables a technician to pursue professional career and holistic development as an individual to stand strongly in the society.

II Industry Identified Competency:

The Student will be able to do in Industry at entry level:

Formulate English language into meaningful structures and assess the given information.

III Course Outcomes (COs):

After completing this course students will be able to:

CO1: **Formulate** grammatically correct sentence structures and incorporate appropriate use of vocabulary.

CO2: **Interpret** the text and appreciate literature.

CO3: **Enhance** ability to comprehend text and observe the rules of effective writing.

CO4: **Apply** communicative principles in daily activities.

CO5: **Construct** logical and meaningful sentence structures.

CO6: **Elaborate** thoughts and ideas constructively.

IV Learning Scheme:

Classroom Learning (CL)	Tutorial Learning (TL)	Laboratory Learning (LL)	Self-Study Learning (SL)	Notional Learning Hours (NLH)	Credits
2	-	2	2	6	3

V Assessment Scheme:

Classroom Learning				Tutorial/Laboratory Learning				Self-Study Learning	
FA	SA	Total		FA		SA		SA	
Max	Max	Max	Min	Max	Min	Max	Min	Max	Min
30	70	100	40	25	10	25	10	25	10

VI Classroom Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Cognitive Domain)		Topics and Sub-topics		Aligned Cos
UNIT I: Application of Grammar & Vocabulary Building	1a	Use Tenses as per given situation.	1.1	Tenses: Present tense, past Tense, Future Tense and Sub types, identification and modification as per instruction.	CO1
	1b	Change the narration of given sentences.	1.2	Narration: Types of Sentence: Assertive, Imperative, Interrogative, Exclamatory. Change into Direct Speech and Indirect Speech.	
	1c	Use words effectively in given sentences.	1.3	Applying Synonyms, Antonyms, Homophones, Homonyms in given situations as per instructions.	
	1d	Enhance the understanding of word formation.	1.4	Replace a group of words/phrases with One Word Substitution.	
	1e	Construct effective sentences using idioms and phrases.	1.5	Enlist Idioms & Phrases with their meanings, make sentences using idiom and phrases.	

UNIT II: Prose	2a	Inculcate the habits to make good impression.	2.1	Abstract Summary of Dale Carnegie: Six Ways to Make People Like You-By Dale Carnegie. Read the text: Understand the 6 ways suggested by the writer. Elaborate the points using real examples. Suggest more ways that help create good impression. Display behavioral changes in yourself.	CO2
	2b	Incorporate positive attitude.	2.2	When Life Gave Me Lemons-By Rashmi Raj: Improve reading skills. Identify the important characters of the story. Associate the situation of the characters with your life. Apply the attitude suggested by the writer. Highlight the moral of the story.	
	2c	Reflect on thoughts, feelings and experiences.	2.3	Two Gentlemen of Verona- By A. J. Cronin: Read the text with correct intonations. Summarize the story in your own words. Highlight new words and write their synonyms and antonyms. Perform the story in a dramatic manner. Write a critical review.	
UNIT III: Comprehension of Seen & Unseen Passages	3a	Prioritize IQ, EQ and SQ for career building.	3.1	Be Remarkable- Naren: Read, interpret and apply the acquired principles in real life.	CO3
	3b	Enhance abilities to stand in job market.	3.2	Employers Look for Potential Employees- By Manish Sabharwal: Acquire the necessities of professional world and implement them for career building.	
nunicative Skills	4a	Recognize the need of effective communication.	4.1	Introduction of communication process/cycle, definition of communication, elements of communication. Acquire the manner in which communication is conducted.	CO4

UNIT IV: Comm	4b	Recognize communication barriers.	4.2	Introduction to types of communication barriers, develop a way in which barriers to communication can be minimized so as to ensure effective interactions.	CO4
UNIT V: Writing Skills	5a	Formulate paragraphs with synchronized sentence structure on the given situation/topic.	5.1	Paragraph Writing: Structure of paragraph writing, Types of Paragraphs, Expansion of Ideas.	CO5
	5b	Develop articulation of thoughts and ideas into logical structure.	5.2	Speech Writing: : Structure of speech writing, principles of speech writing, Welcome Speech, Introducing the Guests, Vote of Thanks.	
	5c	Summarize the given information and ideas.	5.3	Note Making: Scanning and skimming of text, identifying key words in the given text, comprehend the central idea and write the gist of given text.	
UNIT VI: Speaking Skills	6a	Draft dialogues logically.	6.1	Principles of dialogue writing, format of dialogue writing, identify formal and informal conversational situations in day to day life, develop and draft dialogues on given situation.	CO6
	6b	Compose sentences to present self and others impressively.	6.2	Identify personality traits and achievements of self and others, draft the information into an effective coherent structure.	
	6c	Develop sentence structure to ask, refuse and give permission.	6.3	Asking, Giving and Refusing Permission, identify formal and informal conversational situations in day to day life, develop and draft dialogues on given situation.	

6d	Develop dialogues to practice language skills in a structured and a meaningful way.	6.4	Inquiries and Information, identify formal and informal conversational situations in day to day life, develop and draft dialogues on given situation.

VII Laboratory Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Psychomotor Domain)		Hours	Aligned COs
I	1	Perform Tense Busters- All levels (Language lab/Worksheets on 12 tenses).	2#	CO1
I	2	Change the narration (20 sentences from Direct into Indirect Speech).	2#	CO1
I	3	Use dictionary for vocabulary building (solve worksheet on synonyms & antonyms, homophones, homonyms & one word substitution).	2#	CO1
I	4	Enrich word power (construct 20 effective sentences using frequently used phrases & idioms).	2	CO1
II	5	Express views and counter-views based on given text.	2	CO2
II	6	Expand the idea given in a logical and structured manner.	2#	CO2
III	7	Comprehend seen passages (comprehend any three topics from unit 2/3).	2	CO3
III	8	Comprehend unseen passages (comprehend any two unseen passages).	2#	CO3
IV	9	Identify the various elements of communication in the given situation (formal/informal) and draw a communication cycle.	2#	CO4
IV	10	Identify the barriers to communication in the given situation (formal/informal) and suggest means to minimise it.	2#	CO4
IV	11	Demonstrate through role play, skills of a good communicator like news reader, commentator, RJ, announcers etc.	2	CO4
V	12	Write a paragraph on given topic (write 3 paragraphs of about 75 words on given topics).	2#	CO5
V	13	Write a book review of a book by renowned Indian author.	2#	CO5
VI	14	Introduce self and others impressively (practice self-introduction/introduction of others in formal situation).	2#	CO6
VI	15	Prepare and present speech (draft & present a speech to introduce the guests and vote of thanks speech of any departmental/institute event).	2#	CO6
VI	16	Compose & Practice conversation (compose and practice dialogues on given formal and informal situation/Role play).	2	CO6

Note: # Compulsory

VIII Self-Study Learning (SLO in Cognitive/Psychomotor/Affective Domain)

1. Make a list of synonyms and antonyms frequently used in spoken English (minimum 50).
2. Enlist frequently used 30 idioms, write their meanings and make sentences using them.
3. Prepare a report on Teachers' Day/Engineers' Day celebrated in your college.
4. Read a moral based story book and write a review.
5. Enlist any 50 frequently used homophones and homonyms.
6. Write a short story (in about 150 words) using past tense.
7. Write five sentences each in simple present, simple past and simple future tense .
8. Take a sentence in simple present tense and convert into remaining 11 tenses.
9. Formulate 15 words each with prefixes – dis,mis,im,en, un, anti and formulate 15 words each with suffixes – able,ful, less, ment, tion.
10. Interview a renowned personality around you and draft an interview in dialogue format.
11. Prepare a vlog on an event celebration (planning, preparation and execution).
12. Listen a audio lecture of an Indian speaker and summarize it.
13. Interact with and collect monthly budget from three households and compare and contrast them
14. Write a diary noting down your daily activities for a specified period of time.
15. Visit and write a report on a place of interest (Railway museum, Ajab Bangla, Raman Science center).

IX Specification Table for Classroom Learning Assessment:

COURSE CURRICULUM

Program	:	Diploma in ME/MT/PK
Course Category	:	SEC
Course Code	:	WS151H
Course Title	:	Engineering Workshop Practice

I Rationale:

Workshop practice is an engineering science course. The knowledge of this course is essential for technician to perform his/her duties in Industry. Students are able to perform various operations using hand tools equipment's and machineries in various shops. Working in workshop develops the attitude of group working and safety awareness. This course provides industrial environment in the educational institute.

II Industry Identified Competency:

The Student will be able to do in Industry at entry level:

Use workshop tools and machinaries for engineering applications.

III Course Outcomes (COs):

After completing this course students will be able to:

CO1: **Prepare** utility jobs involving carpentry operations.

CO2: **Prepare** various welding joints.

CO3: **Prepare** job using different tools in fitting shop.

CO4: **Performs** various smithy operations.

CO5: **Perform** various operations of plumbing.

CO6: **Produce** utility jobs involving sheet metal operations.

IV Learning Scheme:

Classroom Learning (CL)	Tutorial Learning (TL)	Laboratory Learning (LL)	Self-Study Learning (SL)	Notional Learning Hours (NLH)	Credits
-	-	4	-	4	2

-	-	-	-	50	20	50	20	-	-

VI Classroom Learning Content:

VII Laboratory Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Psychomotor Domain)		Hours	Aligned COs
Unit I: Carpenrty Shop	1	Identify fire extinguisher according to their specification.	2#	CO1
	2	Perform mock drill session in group of minimum 10 students for extinguishing fire.	2#	CO1
	3	Identify the various hand tools, machine Tools and equipment used in Carpentry Shop. Draw the sketches; write specifications, details, applications and safety rules of above tools.	2	CO1
	4	Observe demonstration of carpentry operation involve measuring, marking, cutting, planning and assembly with fabrication part.	2#	CO1
	5	Utility Job 1: Prepare utility job like desk bench top fitting and top for stools fitting jobs involving related carpentry operations as per given drawing. (Job to be prepared by group of 2 to 4 students depending on volume of work). Perform marking operation as per drawing.	2#	CO1
	6	Utility Job 1: (Contd.) Perform cutting and planning operations as per drawing.	2#	CO1
	7	Utility Job 1: (Contd.) Perform top fitting, teak wood bidding fitting and finishing/assembly operations as per drawing.	2#	CO1

Unit II: Welding Shop	8	Practice different safety rules in welding shop as per given instruction. Identify hand tools, machine Tools and equipment's used in Welding Shop. Draw the sketches; write specifications, details, applications and safety rules of above tools.	2#	CO2
	9	Prepare lap joint or but joint using gas welding as per given drawing (individually).	2#	CO2
	10	Utility Job 2: Prepare utility job (like stool, benches, tables or similar jobs) involving arc welding and artificial wood as per given drawing (Job to be prepared by group of 2 to 4 students depending on volume of work). Perform measuring and marking operations as per drawing.	2#	CO2
	11	Utility Job 2: (Contd.) Perform cutting and edge preparation operations as per drawing.	2#	CO2
	12	Utility Job 2: (Contd.) Perform welding and finishing operations as per drawing.	2#	CO2
Unit III: Fitting Shop	13	Identify hand tools, machine Tools and equipment's used in Fitting Shop. Draw the sketches; write specifications, details, applications and safety rules of above tools.	2	CO3
	14	Individual Job 1: Prepare job involving various fitting operations as per given drawing. Perform filing operation as per drawing.	2#	CO3
	15	Individual Job 1: (Contd.) Perform marking and Punching operation as per drawing.	2#	CO3
	16	Individual Job 1: (Contd.) Perform sawing and drilling operation as per drawing.	2#	CO3
	17	Individual Job 1: (Contd.) Perform tapping and finishing/assembly operation as per drawing.	2#	CO3
: Smithy Shop	18	Identify the various hand tools, machine Tools and equipment used in Smithy Shop. Draw the sketches; write specifications, details, applications and safety rules of above tools.	2	CO4
	19	Individual Job 2: Prepare job like "L" hook involving related smithy operations. Perform marking and cutting operations as per drawing.	2#	CO4

Unit IV	20	Individual Job 2: (Contd.) Do preparation of fire in electric furnace. Perform heating, holding and bending of material.	2#	CO4
	21	Individual Job 2: (Contd.) Perform finishing operation as per drawing.	2#	CO4
Unit V: Plumbing Shop	22	Identify the various hand tools, machine Tools and equipment used in Plumbing Shop. Draw the sketches; write specifications, details, applications and safety rules of above tools.	2	CO5
	23	Individual Job 3: Prepare “T” Joint involving related plumbing operations.	2#	CO5
	24	Individual Job 4: Prepare "Elbow" Joint involving related plumbing operations.	2#	CO5
	25	Prepare bill of material for given pipeline layout (individually).	2	CO5
Unit VI: Sheet Metal Shop	26	Identify the various hand tools, machine Tools and equipment used in Sheet Metal Shop. Draw the sketches; write specifications, details, applications and safety rules of above tools.	2#	CO6
	27	Utility Job 3: (Contd.) Perform edging and end curling as per given drawing.	2#	CO6
	28	Utility Job 3: (Contd.) Perform lancing, soldering and riveting operations as per given drawing.	2#	CO6
	29	Utility Job 3: (Contd.) Perform finishing/assembly operations as per given drawing.	2#	CO6

XVI List of Major Equipment/Machineries with Specification:

1. Circular Saw Machine, Diameter of saw blade 200 mm, Maximum Depth of Cut 50 mm, Table Size -350 x 450 mm, Table Tilting - 450
2. Bench Drilling machine (upto 13 mm drill cap.) with ½ H.P. Motor, 1000 mm height
3. Power Saw machine 350 mm mechanical with 1 HP Motor & all Accessories.
4. Bench Grinder 200 mm Grinding Disc diameter 200 mm. with 25 mm. bore 32 mm. with ½HP/1HP Motor.
5. Welding machine 20 KVA 400A welding current 300A at 50, 100, 200, 250, 300 with std. Accessories and Welding Cable 400 amp. ISI with holder
6. Oxygen and acetylene gas welding and cutting kit with cylinders and regulators.
7. Pipe Bending Machine
8. Portable Hammer Drill Machine 0-13 mm A.C. 230 V, 2.5Amp, Pistol type, having different types of bits
9. Sheet Bending Machine
10. Sheet Cutting Machine

COURSE CURRICULUM

Program	:	Diploma in CE/ME/EE/EC/PK/MT/TX/IT/CM/AE/AI/MK/TR
Course Category	:	SEC
Course Code	:	CM151H
Course Title	:	Basics of Computers

I Rationale:

Computer is an essential tool that we cannot avoid as it plays an important role in our day to day life, especially in the present scenario. Basics of Computer course starts with the basic computer skills, learning basic application software tools, Understanding Computer Hardware, Basic Internet awareness. This course will be taken online under spoken tutorial courses IIT, Bombay.

II Industry Identified Competency:

The Student will be able to do in Industry at entry level:

Use computer for Documentation, Presentation, Analyse data and different internet services.

III Course Outcomes (COs):

After completing this course students will be able to:

CO1: **Apply** the basics of computer fundamentals.

CO2: **Install** and configure printer setting.

CO3: **Identify** Basic Internet skills.

CO4: **Recognize** various email components.

CO5: **Illustrate** the use of google drive.

IV Learning Scheme:

Classroom Learning (CL)	Tutorial Learning (TL)	Laboratory Learning (LL)	Self-Study Learning (SL)	Notional Learning Hours (NLH)	Credits
-	-	2	2	4	2

V Assessment Scheme:

Classroom Learning				Tutorial/Laboratory Learning				Self-Study Learning	
FA	SA	Total		FA		SA		SA	
Max	Max	Max	Min	Max	Min	Max	Min	Max	Min
-	-	-	-	25	10	25	10	25	10

VI Classroom Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Cognitive Domain)	Topics and Sub-topics	Aligned Cos

VII Laboratory Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Psychomotor Domain)		Hours	Aligned COs
I	1	Identify various Input/output devices of computer.	2#	CO1
I	2	Connect the various components of computer.	2#	CO1
II	3	Connect printer to computer and apply its setting.	2#	CO2
II	4	Configure the setting of printer and print the test page.	2#	CO2
II	5	Apply page layout features such as Themes, page background, paragraph,page setup. Create multicolumn page. Use different options to print the documents	2#	CO2
III	6	Use internet for different web services.	2	CO3
III	7	Create a new google account and login to gmail account.	2#	CO3
III	8	Write and compose an email to given email account.	2#	CO3
III	9	Send an email to given recipients.	2#	CO3
III	10	Use mail merge with options.	2	CO3
IV	11	Compose and attach files to e-mails.	2#	CO4
IV	12	Share of files and folders using google drive.	2#	CO4
IV	13	Insert a photo or link into an email and about the compose window options.	2	CO4
V	14	Create , open and edit worksheet.	2#	CO5
V	15	Apply Page setup and print options for worksheet to print the worksheet.	2#	CO5
V	16	Prepare a slide presentation and apply design theme to given presentation.	2#	CO5
V	17	Add new slides and insert pictures/images, shapes on presentation.	2#	CO5
V	18	Add table and charts in the slides.	2#	CO5
V	19	Create a word document and use different option on document.	2#	CO5

Note: # Compulsory

VIII Self-Study Learning (SLO in Cognitive/Psychomotor/Affective Domain)

1. Prepare a document on Report of Various Printer types.
2. Prepare Notes using Document/Office.
3. Prepare Study Report using Document/Office.
4. Prepare Playbill (salary statement, tax statement) using spreadsheet.
5. Prepare a time table using Spreadsheet
6. Prepare student Mark sheet using spreadsheet.
7. Prepare presentation for advertisement.
8. Prepare presentation of your Branch/Department.
9. Prepare presentation of Study Report.
10. Prepare presentation on Various Components of Computer.
11. Prepare Google Form in Drive and share.

IX Specification Table for Classroom Learning Assessment:

X Question Paper Format for Summative Assessment (SA):

-----NA-----

XI Scheme of Laboratory Formative Assessment (FA):

S.N.	Criteria	Max. Marks
1	selection of proper tool,execution	5
2	Complete the practical in stipulated time	10
3	Performance	5
4	Viva Voce	5
	TOTAL	25

XII Scheme of Self-Learning Summative Assessment (SA):

S.N.	Criteria	Max. Marks
1	Selection of Topic	5
2	Content of Report/Assignment	10
3	Submission of Report	5
4	Viva Voce	5
	TOTAL	25

COURSE CURRICULUM

Program	:	Diploma in CE/ME/EE/EC/CM/IT/MT/PK/AE/TR/TX/ MK/AI
Course Category	:	VEC
Course Code	:	VE151H
Course Title	:	Integrated Personality Development

I Rationale:

This course aligns with the National Education Policy by fostering holistic development in engineering students, emphasizing values, resilience, and personal growth. It builds essential life skills such as leadership, effective communication, project management, and national pride, enhancing students' adaptability in both personal and professional settings. Through diverse learning experiences, students gain practical insights and develop a balanced, informed perspective essential for responsible, impactful careers.

II Industry Identified Competency:

The Student will be able to do in Industry at entry level:

Demonstrate leadership, effective communication, project management, and resilience in professional and personal environments.

III Course Outcomes (COs):

After completing this course students will be able to:

CO1: **Enhance** personal growth by mastering thought-processes, building productive habits, and managing social media impact.

CO2: **Develop** inspiration from Indian icons by applying lessons from their resilience, values, and leadership qualities.

CO3: **Enhance** communication skills by actively listening and bridging generational gaps to strengthen family connections.

CO4: **Build** resilience by adopting a positive outlook, learning from failures, and embracing faith in daily life.

CO5: **Foster** national pride by exploring, researching, and sharing insights about India’s rich historical heritage.

CO6: **Develop** professional skills by building networks, adopting leadership qualities, and practicing effective project management.

IV Learning Scheme:

Classroom Learning (CL)	Tutorial Learning (TL)	Laboratory Learning (LL)	Self-Study Learning (SL)	Notional Learning Hours (NLH)	Credits
-	-	2	2	4	2

V Assessment Scheme:

Classroom Learning				Tutorial/Laboratory Learning				Self-Study Learning	
FA	SA	Total		FA		SA		SA	
Max	Max	Max	Min	Max	Min	Max	Min	Max	Min
-	-	-	-	25	10	25	10	25	10

VI Classroom Learning Content:

VII Laboratory Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Psychomotor Domain)		Hours	Aligned COs
UNIT I: Remaking Yourself	1	**Restructuring Yourself:** Develop intellectual, physical, emotional, and spiritual quotients by learning six powerful thought-processes.	2#	CO1
	2	**Power of Habit:** Develop good habits in life by undergoing a study of how habits work, the habits of successful professionals, and the practical techniques.	2#	CO1
	3	**Handling social media:** Learn how social media can become addictive and imbibe simple methods to take back control.	2#	CO1
UNIT II: Learning from Legends	4	**Sachin Tendulkar and Ratan Tata:** Learn from the inspirational lives of India's two legends, Sachin Tendulkar and Ratan Tata & implement lessons through related case studies.	2#	CO2
	5	**A.P.J. Abdul Kalam:** Learn from Dr Kalam's inspirational life displayed legendary qualities such as Dare to Dream, Work Hard, Get Good Guidance, Humility, and Use Your Talents for the Benefit of Others.	2#	CO2

UNIT III: From House to Home	6	**Active Listening & Understanding:** Learn to listen with eyes, ears, mind, and heart, for academic progress and communications.	2#	CO3
	7	**Bonding the Family:** Overcome the generation gap and connect with their family more.	2#	CO3
UNIT IV: Facing Failures	8	**Welcoming Challenges:** Learn to face difficulties through a positive perspective, through the study of successful figures such as Disney, Lincoln and Bachchan.	2#	CO4
	9	**Significance of Failures:** Acquire constructive skills to understand failure as formative learning experiences.	2#	CO4
	10	**Power of Faith:** Learn the power and necessity of faith in our daily lives.	2#	CO4
UNIT V: My India My Pride	11	**Our Nation:** Learn the importance of studying India's glorious past so that they could develop a strong passion and pride for our nation.	2#	CO5
	12	**India's Glorious Past:** Develop a deeper interest in India's glorious past by appreciating the need to read about it, research it, write about it, and share it.	2#	CO5
UNIT VI: Soft Skills	13	**Networking & Leadership:** Learn the means of building a professional network and developing a leadership attitude.	2#	CO6
	14	**Project Management:** Learn the secrets of project management through the Akshardham case study and practice project management skills through an activity relevant to student life.	2#	CO6

Note: # Compulsory

VIII Self-Study Learning (SLO in Cognitive/Psychomotor/Affective Domain)

1. Perform Selfless Service - Seva: Learn the benefits of performing seva and prepare report showing evidences.

IX Specification Table for Classroom Learning Assessment:

X Question Paper Format for Summative Assessment (SA):

XI Scheme of Laboratory Formative Assessment (FA):

S.N.	Criteria	Max. Marks
1	Content Understanding	10
2	Readability	5
3	Completeness	5
4	Viva voce	5
	TOTAL	25

XII Scheme of Self-Learning Summative Assessment (SA):

S.N.	Criteria	Max. Marks
1	Originality of work	5
2	Organization and Writing	5
3	Use of Evidence	5
4	Viva voce	10
	TOTAL	25

Semester II

Government of Maharashtra
GOVERNMENT POLYTECHNIC, NAGPUR
(An Autonomous Institute of Govt. of Maharashtra)
Near Mangalwari Bazar, Sadar, Nagpur-440001

COURSE CURRICULUM

Program	:	Diploma in MT
Course Category	:	DSC
Course Code	:	MT102H
Course Title	:	Foundry Technology

I Rationale:

The Foundry Technology course is crucial for Diploma in Metallurgy students in India as it equips them with essential skills in casting, molding, and metal shaping techniques. With India's growing manufacturing sector, this knowledge enables students to meet industry demands for quality metal products. The course strengthens their understanding of material properties, production processes, and design, fostering a practical approach to solving real-world engineering challenges in foundries and related industries..

II Industry Identified Competency:

The Student will be able to do in Industry at entry level:

Produce casting for various industrial applications

III Course Outcomes (COs):

After completing this course students will be able to:

CO1: **Identify** pattern and pattern materials.

CO2: **Prepare** cores for various applications.

CO3: **Prepare** Moulds for various applications.

CO4: **Prepare** gating and risering system for moulding and casting.

CO5: **Produce** castings of different metals/alloys for various applications.

CO6: **Perform** various post casting operations.

IV Learning Scheme:

Classroom Learning (CL)	Tutorial Learning (TL)	Laboratory Learning (LL)	Self-Study Learning (SL)	Notional Learning Hours (NLH)	Credits
3	-	2	1	6	3

V Assessment Scheme:

Classroom Learning				Tutorial/Laboratory Learning				Self-Study Learning	
FA	SA	Total		FA		SA		SA	
Max	Max	Max	Min	Max	Min	Max	Min	Max	Min
30	70	100	40	25	10	25	10	25	10

VI Classroom Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Cognitive Domain)		Topics and Sub-topics		Aligned Cos
UNIT I: Pattern and Pattern Making	1a	Classify manufacturing processes for production of various components	1.1	Various manufacturing processes,Steps involved in Making a Casting.Advantages of metal casting,Applications of Metal Casting.	CO1
	1b	Compare patterns and casting on give points	1.2	Different sections of a Foundry, types of Foundry Function of pattern, Difference between pattern and casting.	
	1c	Prepare pattern using pattenr allowances	1.3	Choice of Pattern materials, types of pattern materials. Types of patterns.	
	1d	Follow steps involved in pattern layout and pattern construction for making pattern	1.4	Pattern allowances,Steps involved in pattern layout and pattern construction.	
	1e	Identify patterns based on ISI colouring code	1.5	ISI coloring code on pattern,Core print fillet on pattern.	

UNIT II: Core and Core Making	2a	Construct various core boxes.	2.1	Function of core, core applications,Core sand propertie, Core sand ingredients, Core materials,core sand mixture, core making procedure types of core, Core prints.	CO2
	2b	Utilize various core baking machines to prepare cores	2.2	Core making machines, core baking and machining operations on cores.Core shifting and Chaplet, Core applications,Construction of core box	
UNIT III: Mould and Mould Making	3a	Identify ingridents for given Moulding sands	3.1	Functions of mould,Mould materials-sand, binder, water, additives, etc,Types of Moulding sands and their Properties	CO3
	3b	Illustrate hand moulding tools in preparing of sand moulds.	3.2	Mould surface coating, Mould Coat Testing,Moulding sand preparation and conditioning – a.Objectives of sand preparation,b. Steps for sand preparation,c. Working of sand Muller. Sand reclamation.	
	3c	Perform various tests on sand to check its properties.	3.3	Sand control tests-a. Moisture content test b.Clay content test,c.Grain fineness test d.Permeability test e.Hot Strength test.	
	3d	State various steps involved in mould making.	3.4	Moulding processes, Methods of ramming Moulding boxes Steps involved in mould making, mould making machines, Moulding methods, hand Moulding tools, Types of mould, venting of moulds, Mould -metal reaction, Typical green and dry sand composition for Cast Iron and steel.	

UNIT IV: Solidification of Casting ,Gating and Risering	4a	Identify means to achieve directional solidification.	4.1	Concept of solidification of metals, nucleation & growth, mechanism of Dendrite formation.Progressive and Directional solidification and control of solidification to obtain sound casting.Means to achieve directional solidification.	CO4
	4b	Select proper gating system for sound casting	4.2	GATING system: - function of each component of the gating system. Types of gates, pressurized and unpressurised gating systems Elimination of slag and dross	
	4c	Estimate the Riser Efficiency for effective casting practice	4.3	RISER - Function of risers, types of riser, riser and directional solidification, increasing riser efficiency	
UNIT V: Melting Practice	5a	Classify Furnaces for melting ferrous and non-ferrous metals.	5.1	Furnaces for melting ferrous and non-ferrous metals	CO5
	5b	Identify differnts parts of cupola furnace	5.2	Cupola – Construction, Various operations, Zones of Cupola, Charge calculations, Numericals based on design of cupola	
	5c	Identify differnts parts of Electric Arc furnace	5.3	Electric Arc furnace- working principle, advantages disadvantages and applications	
	5d	Identify differnts parts of Induction furnace	5.4	Induction furnace - working principle, advantages ,disadvantages and applications	
	5e	Classify Crucible furnacess used in metallurgical industries	5.5	Crucible furnaces-types, working principle, advantages, disadvantages and applications	

UNIT VI: Post Casting Treatments	6a	Identify Post Casting Operations to get sound castings.	6.1	Post casting operations: a.Fettling, b.Removal of cores, c.Cleaning of casting, surfaces d. Shot blasting, e.Sand blasting, e. Tumbling barrel.	CO6
	6b	Compare given surface treatments	6.2	Finishing of castings:Diferent finishing operations carried out on casting,Surface Treatment of castings,Heat treatment of Castings, Stress Relieveing /Recrystallization of castings.	

VII Laboratory Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Psychomotor Domain)		Hours	Aligned COs
I	1	Drawing/Sketching of various Foundry tools	2#	CO1
II	2	Prepare a core for various applications	2#	CO2
III	3	Prepare a Mould for various applications	2#	CO3
III	4	Prepare Moulding sand with proper sand ingridents	2#	CO3
III	5	Determine Moisture content in Moulding sand by Infra-red bulb method	2	CO3
III	6	Determine A.F.S. fineness No. of sand.	2#	CO4
III	7	Determine the amount of clay content in moulding sand.	2#	CO5
IV	8	Prepare Mould for given casting.	2#	CO4
IV	9	Prepare a gating and risering system for moulding and casting for given industrial application. (Part I)	2#	CO4
IV	10	Prepare a gating and risering system for moulding and casting for given industrial application. (Part II)	2#	CO4
V	11	Perform melting operation for Aluminium alloys. (Part I)	2#	CO5
V	12	Perform melting operation for Aluminium alloys. (Part II)	2#	CO5
V	13	Perform melting operation for Aluminium alloys. (Part III)	2	CO5
VI	14	Perform various post casting operations on Aluminium Casting. (Part I)	2#	CO6
VI	15	Perform various post casting operations on Aluminium Casting. (Part II)	2	CO6

Note: # Compulsory

VIII Self-Study Learning (SLO in Cognitive/Psychomotor/Affective Domain)

1. Prepare a report on foundry/casting practises world wide and submit the report.
2. Prepare report on various hand Moulding tools ,equipments and machineries used in foundry and submit
3. Prepare comparative charts on various finishing operations on castings.submit a report on it
4. Collect various types of pattern materials and submit a report on it
5. Prepare a report on electrical energy consumption used in melting furnaces
6. Prepare comparative charts for differents types of patterns used in foundry
7. Prepare poster on various Furnaces used for melting ferrous and non-ferrous metals.
8. Prepare comparative charts for differents tests carried on moulding sand
9. Prepare model of cupola furnace and write a report on it
10. Perform internet survey for automotive and aircraft,rockets and space components made by foundry/casting process and submit a report on it
11. Perform market survey of different thermocouples and submit a report on it
12. Perform market survey of different pyrometers and submit a report on it
13. Prepare a report based on currriculum and submit the report

IX Specification Table for Classroom Learning Assessment:

Unit No.	Units	Classroom Learning Hours	C/O	Levels from Cognition Process Dimension			Total Marks
				R	U	A	
1	Pattern and Pattern Making	8	C	02	08	06	16
			O	02	00	00	2
2	Core and Core Making	6	C	02	04	00	6

COURSE CURRICULUM

Program	:	Diploma in CE/ME/EE/EC/MK/IT/CM/MT/PK/AE/TX/MK/AIML
Course Category	:	DSC
Course Code	:	PH101H
Course Title	:	Applied Physics

I Rationale:

Physics is the foundation of engineering and technology which help to develope the ability of technical skills for those students who wish to pursue higher study in engineering field. Without the concept and application of physics there cannot be technology development. Study of physics develops the ability of problem solving, logical thinking and also the ability to think intellectually. Fundamental principle and scientific knowledge of physics is used for technology innovation to develop new surrounding that benefits new mankind which is important to society and nature, making everything easier around us.

II Industry Identified Competency:

The Student will be able to do in Industry at entry level:

Apply

III Course Outcomes (COs):

After completing this course students will be able to:

CO1: **Determine** physical quantities using proper measuring instruments.

CO2: **Solve** fundamental engineering problems using law of electricity and magnetism.

CO3: **Apply** the fundamental principles of heat and optics for engineering applications.

CO4: **Apply** principles of wave motion, acoustics and radioactivity for engineering applications.

CO5: **Use** LASER, X-rays and photoelectric cell for industry applications.

CO6: **Use** nanotechnology and Non-Destructive Testing (NDT) for various applications in engineering field.

IV Learning Scheme:

Classroom Learning (CL)	Tutorial Learning (TL)	Laboratory Learning (LL)	Self-Study Learning (SL)	Notional Learning Hours (NLH)	Credits
4	-	2	2	8	4

V Assessment Scheme:

Classroom Learning				Tutorial/Laboratory Learning				Self-Study Learning	
FA	SA	Total		FA		SA		SA	
Max	Max	Max	Min	Max	Min	Max	Min	Max	Min
30	70	100	40	25	10	25	10	25	10

VI Classroom Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Cognitive Domain)		Topics and Sub-topics		Aligned Cos
UNIT I: General Properties of Matter	1a	Estimate the error in the measurement for a given data.	1.1	Errors, Type of error, instrumental, systematic, and random error, Estimation of error, Absolute, Relative and Percentage error.	CO1
	1b	Calculate Least Count (LC) and range of given instruments.	1.2	Ancient Indian Astronomical Instrument: water clock (Ghati Yantra), Gnomon (Shanku), Crossed Staff (Yasti Yantra). Modern measuring instruments: Least count and range of Vernier caliper, outside micrometer screw gauge and travelling microscope.	
	1c	Compare deformation in given bodies by the action of external deforming force.	1.3	Elasticity, Plasticity, Rigidity. Stress and Strain with their types, Elastic Limit, Hook's Law, Types of modulus of Elasticity, Stress-Strain curve, Applications of elasticity, Numerical based on above.	

	1d	Determine the coefficient of viscosity of the given fluid using the law of viscosity for given data.	1.4	Viscous force, Definition of viscosity, Newton's law of viscosity, Stoke's law, (Statement and formula only), Coefficient of viscosity and S.I. unit. Types of flow of liquid, Reynold's number, Terminal velocity and Application of viscosity.	
UNIT II: Basic Electricity	2a	Calculate the force of attraction or repulson between two charges for a given data.	2.1	Concept of charge, Coulomb's inverse square law, Electric field, Electric field intensity, potential and potential difference, Numerical based on Coulomb's inverse square law, Electric field intensity.	CO2
	2b	Solve problems based on Magnetic field intensity and Magnetic flux.	2.2	Magnetic field and magnetic field intensity and its units, magnetic lines of force, magnetic flux.	
	2c	Apply the law of series and parallel combination to the given electrical circuit.	2.3	Ohm's law, specific resistance, laws of series and parallel combination of resistance, calculation of resultant resistance of given resistances in series and parallel combination, Heating effect of electric current, Joule's Law, Numerical based on above.	
	2d	Differentiate materials on the basis of given energy band diagram.	2.4	Conductors, Insulators and Semiconductors, Energy bands, intrinsic and extrinsic semiconductors	
d Fiber Optics	3a	Select the modes of transmission of heat for given materials.	3.1	Heat and Temperature: Heat, temperature, Absolute zero temperature, different temperature scale, Three modes of transmission of heat. Good and bad conductor of heat with examples, Law of thermal conductivity and S.I. units.	

UNIT III: Thermometry an	3b	Determine given parameters of gas by applying gas laws.	3.2	Boyle's law, Charle's law, Gay Lussac's law, General gas equation, Applications of gas laws and calculation of pressure, volume or temperature using gas laws.	CO3
	3c	Differentiate different type of optical fibre with their application.	3.3	Reflection, Refraction, Snell's law, Optical fiber, Structure of optical fiber, Principle of Optical fiber-Total Internal Reflection, Type of optical fibre and applications of Optical Fiber.	
UNIT IV: Wave Motion and Radioactivity	4a	Classify the given types of waves by their characteristics.	4.1	Definition of wave motion, amplitude, period, frequency & wavelength, relation between velocity, frequency & wavelength. Progressive wave, Stationary waves, longitudinal and transverse wave. Node, Antinode. Ultrasonic wave, Properties, and application.	CO4
	4b	Calculate velocity of sound with end correction on given data.	4.2	Definition of resonance with example. Formula for velocity of sound with end correction, calculation of velocity of sound with the help of resonance tube.	
	4c	Compare the properties of radioactive rays on the basis of given parameters.	4.3	Radioactivity, α, β and γ rays and their Properties, Advantages, and disadvantages of Radioactivity.	

UNIT V: Modern Physics (Photoelectricity, LASER, X-Rays)	5a	Calculate work function, energy, threshold frequency and threshold wavelength for a given data.	5.1	Photon, properties of photons, Planck's hypothesis, Threshold frequency, threshold wavelength and Stopping potential. Work function, Photoelectric effect with characteristics properties. Principle, Construction and working of Photoelectric cell with applications. Einstein's photoelectric equation. (Numerical based on above)	CO5
	5b	Apply the fundamental concepts of LASER in given engineering fields.	5.2	Properties of laser, Types of laser, absorption, spontaneous and stimulated emission. Definition of Pumping and its type, Population inversion, Metastable state. Applications of LASER in Engineering and biomedical field.	
	5c	Describe the production of X-rays of the given materials with properties and applications.	5.3	Introduction to X-rays, Properties of X -rays, production of X-ray using Coolidge tube. Applications of X-rays in Engineering, medical and scientific field.	
UNIT VI: Nanotech-nology and Non Destructive Testing.	6a	Calculate surface area per volume ratio of given objects.	6.1	Definition of nanoscale, nano-meter, nanoparticle, determination of surface area per volume ratio of objects, application of nanotechnology in Engineering and Technology, medical, cosmetics, environmental, space and defence.	CO6
	6b	Compare DT and NDT methods on the basis of given points.	6.2	Non-Destructive Testing (NDT), comparison of DT and NDT, Various NDT methods used, Criteria for the selection of NDT method, Merits and Demerits of NDT.	

VII Laboratory Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Psychomotor Domain)		Hours	Aligned COs
I	1	Identify the various instruments used in Physics laboratory and follow precautionary measures.	2#	CO1
I	2	Measure the outer diameter of a cylindrical body by Vernier Calliper.	2#	CO1
I	3	Calculate the diameter of a small spherical body by Outside micrometer screw gauge.	2#	CO1
I	4	Calculate the value of Young's modulus of elasticity of given wire.	2#	CO1
I	5	Determine the coefficient of viscosity of given fluids by Stoke's method.	2	CO1
II	6	Calculate mechanical equivalent of heat, J by electrical method.	2#	CO2
II	7	Use magnetic compass to draw the magnetic lines of forces of bar magnet.	2#	CO2
II	8	Calculate the resultant resistance of given resistances in series combination.	2#	CO2
II	9	Calculate the resultant resistance of given resistances in parallel combination.	2#	CO2
III	10	Analyze the effect of volume on pressure at constant temperature.	2#	CO3
III	11	Calculate critical angle of incidence for a given glass slab to verify total internal reflection phenomenon.	2	CO3
IV	12	Determine inner diameter of resonance tube using Vernier Calliper.	2#	CO4
IV	13	Find the velocity of sound with the help of resonance tube.	2#	CO4
V	14	Find the angle of divergence of Laser beam.	2	CO5
VI	15	Calculate the surface area (SA), volume (V) and SA/V of an object and measure dimensions required for it.	2#	CO6

VIII Self-Study Learning (SLO in Cognitive/Psychomotor/Affective Domain)

1. Collect different solid materials. Classify them into elastic, plastic and rigid bodies on the basis of Hooke's law and prepare a report on it.
2. Collect viscous liquids and prepare a working model to differentiate the liquids on the basis of viscosity.
3. Prepare a prototype vernier caliper of desire least count using card sheet.
4. Prepare model of heating effect of electric current on aluminium and nichrome wire.
5. Prepare model of series and parallel resistances using household materials.
6. Perform comparative analysis of series and parallel combination of resistances using LED, resistor and connecting wires.
7. Prepare demonstrative model of simple electromagnet by using law of electricity and magnetism.
8. Plot the magnetic lines of forces for U-shaped magnet using magnetic compass.
9. Construct a simple ON-OFF Circuit on breadboard using semiconducting devices.
10. Prepare model to demonstrate magnetic lines of forces of different types of magnets.
11. Prepare a report on conducting and non-conducting material and differentiate good conductor and bad conductor among the collected material such as metal and plastic etc.
12. Collect different conducting and non-conducting materials and construct ON OFF circuit using resistors, LED, connecting wires to differentiate good and bad conductors within the collected materials.
13. Prepare a working model to demonstrate Total Internal Reflection (TIR) by using water and diode laser.
14. Prepare a simple model of projector using fundamental principle of optics.
15. Use diode LASER to differentiate LASER with ordinary source of light.

COURSE CURRICULUM

Program	:	Diploma in MT
Course Category	:	DSC
Course Code	:	MT101H
Course Title	:	Basic Metallurgy

I Rationale:

Basic Metallurgy mainly deals with basic topics required for the understanding of metallurgical subject. This course is a collection of widely different basic topic such as pyrometry, fuels, refractories, conceptual understanding of structure of solid material, their properties and uses.

II Industry Identified Competency:

The Student will be able to do in Industry at entry level:

Apply fundamental concepts in metallurgical applications.

III Course Outcomes (COs):

After completing this course students will be able to:

CO1: **Draw** different planes and direction for crystal structures.

CO2: **Select** pyrometers for various applications.

CO3: **Inspect** refractories by conducting various tests.

CO4: **Analyze** coal for metallurgical applications.

CO5: **Select** appropriate liquid and gaseous fuels.

CO6: **Sequence** stages of operation of various Furnaces.

IV Learning Scheme:

Classroom Learning (CL)	Tutorial Learning (TL)	Laboratory Learning (LL)	Self-Study Learning (SL)	Notional Learning Hours (NLH)	Credits
3	-	2	1	6	3

V Assessment Scheme:

Classroom Learning				Tutorial/Laboratory Learning				Self-Study Learning	
FA	SA	Total		FA		SA		SA	
Max	Max	Max	Min	Max	Min	Max	Min	Max	Min
30	70**	100	40	25	10	25	10	25	10

**Online Objective Type

VI Classroom Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Cognitive Domain)		Topics and Sub-topics		Aligned Cos
UNIT I: Crystal structure	1a	Identify different crystal structures.	1.1	Types of Crystal structures-simple cubic structure, BCC, FCC, HCP, number of atoms per unit cell, packing factors, co-ordination numbers.	CO1
	1b	Formulate no of atoms per unit cell for different crystal structure.	1.2	Imperfections in crystals-point, line, surface,etc.	
	1c	Compare various imperfections in crystal.	1.3	Miller indices for planes and directions- Numericasl based on miller indices for planes and direction.	
	1d	Draw planes and directions for given crystal structure using miller indices.	1.4	Allotropy-definition, examples.	
	1e	Identify given structures of non metals.	1.5	Structures of non metals - silicates, carbon, glasses and Polymer.	

UNIT II: Pyrometry	2a	Compare Thermometry with pyrometry.	2.1	Thermometry and pyrometry, High temperature scales ,Primary and secondary standards.	CO2
	2b	Use various laws in pyrometry and thermometry.	2.2	Principles of thermometry-Seeback effect,Peltiers and Thompson effect.	
	2c	Identify given thermocouples and Temperature controllers.	2.3	Thermocouples: composition, temperature ranges, environmental conditions, preparation and calibration of thermocouples and Temperature controllers.	
	2d	Select pyrometers for various applications.	2.4	Pyrometers: black-body-radiation laws, Emissivity,Optical, Radiation and Resistance pyrometers. Applications of different pyrometer.	
UNIT III: Refractory materials	3a	Classify Refractories.	3.1	Refractory – definition, general properties of refractories.	CO3
	3b	Sequence steps involved in manufacturing of refractory.	3.2	Classifications of refractory and general steps involved in manufacturing of refractory.	
	3c	Identify given refractories.	3.3	Properties, composition and applications of fire clay, silica, magnetite, chromite, carbon.	
	3d	Select special refractories for given indistrial applications	3.4	Properties, composition and applications of special refractories like insulating materials, fused silica, alumina and zirconia.	
	3e	Inspect refractories by conducting various tests.	3.5	Inspection of refractories-Tests on refractories to measure its Strength, porosity, refractoriness, etc	

UNIT IV: Solid fuels	4a	Classify given fuels.	4.1	Definition and Classification of fuels, Occurrence of coal with reference to Indian conditions, Classification of coals, properties of Indian coa Coking and non- coking coal.	CO4
	4b	Compare coking and non coking coal on given points	4.2	Uses of pulverized and briquetted coal or coke.	
	4c	Analyze coal for metallurgical applications.	4.3	Coal Analysis- Proximate and ultimate analysis.	
	4d	Compare given carbonization processs on given points.	4.4	Carbonization of coal- low temperature and high temperature.Coke oven and its Bi-products.	
UNIT V: Liquid and gaseous fuels	5a	Report important properties and uses of Liquid fuels.	5.1	Liquid fuels - important properties and uses of Liquid fuels.	CO5
	5b	Compare different fuels on given points.	5.2	Crude petroleum oil and their refining.	
	5c	Identify given type of gaeous fuel.	5.3	Gaseous fuels - compositio, properties and uses of Natural Gas, Blast furnace Gas, Coke oven gas, and Liquefied Petroleum gases and comparison of different gaseous fuels.	
	5d	Select appropriate liquid and gaseous fuels for given industrial application.	5.4	Production of producer and water gas.	
UNIT VI: Furnaces	6a	Classify furnaces used in metallurgical industries.	6.1	Furnaces: classification types , sketches and applications of following furnaces used in metallurgical industries: muffle furnace, Reverberatory, Crucible, Salt bath, Pit furnace. Factors affecting furnace Efficiency.	CO6

VII Laboratory Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Psychomotor Domain)		Hours	Aligned COs
I	1	Draw different cubic structures along with their planes and directions	2#	CO1
I	2	Measure the temperature using radiation pyrometer	2#	CO1
I	3	Test different properties of refractories	2	CO1
II	4	Carry out proximate analysis of Coal	2#	CO2
II	5	Determine total Moisture (TM) of coal	2#	CO2
II	6	Determine Volatile Matter of Coal.	2#	CO2
II	7	Determine Ash Content of Coal.	2#	CO2
II	8	Determine Calorific value of solid fuels.	2#	CO2
III	9	Determine Calorific value of liquid fuels.	2#	CO3
III	10	Determine Calorific value of gaseous fuels.	2	CO3
IV	11	Measure the Viscosity of Oil	2#	CO4
IV	12	Measure flash point of fuels	2#	CO4
IV	13	Measure fire point of fuels	2	CO4
V	14	Identify various parts of Muffle furnace	2#	CO5
V	15	Operate muffle furnace.	2	CO5
V	16	Draw sketches of reverberatory, crucible salt bath, pit furnace	2	CO5
VI	17	Determination of Sulphur Content.	2	CO6
VI	18	Determination of Fixed Carbon.	2#	CO6

Note: # Compulsory

VIII Self-Study Learning (SLO in Cognitive/Psychomotor/Affective Domain)

1. Prepare a model/poster for SC, BCC, FCC, HCP Crystal structure.
2. Prepare report on Current status of metallurgical coal in India.
3. Prepare a comparative chart of various types refractories and their applications. and submit a report on it
4. Prepare a report on various types of refractories and submit a report on it
5. Prepare comparactive charts for packing efficiency of various crystal structures
6. Prepare chaart showing comparision of various thermocoúples and pyrometers
7. Prepare model of any one metallurgical furnace
8. Draw vrious miller indees for plane and direction in simple cubic structure and subit a report on it

IX Specification Table for Classroom Learning Assessment:

Unit No.	Units	Classroom Learning Hours	C/O	Levels from Cognition Process Dimension			Total Marks
				R	U	A	
1	Crystal structure	8	C	02	06	06	14
			O	0	0	0	0
2	Pyrometry	8	C	02	06	04	12

COURSE CURRICULUM

Program	:	Diploma in MT
Course Category	:	DSC
Course Code	:	MT102H
Course Title	:	Foundry Technology

I Rationale:

The Foundry Technology course is crucial for Diploma in Metallurgy students in India as it equips them with essential skills in casting, molding, and metal shaping techniques. With India's growing manufacturing sector, this knowledge enables students to meet industry demands for quality metal products. The course strengthens their understanding of material properties, production processes, and design, fostering a practical approach to solving real-world engineering challenges in foundries and related industries..

II Industry Identified Competency:

The Student will be able to do in Industry at entry level:

Produce casting for various industrial applications

III Course Outcomes (COs):

After completing this course students will be able to:

CO1: **Identify** pattern and pattern materials.

CO2: **Prepare** cores for various applications.

CO3: **Prepare** Moulds for various applications.

CO4: **Prepare** gating and risering system for moulding and casting.

CO5: **Produce** castings of different metals/alloys for various applications.

CO6: **Perform** various post casting operations.

IV Learning Scheme:

Classroom Learning (CL)	Tutorial Learning (TL)	Laboratory Learning (LL)	Self-Study Learning (SL)	Notional Learning Hours (NLH)	Credits
3	-	2	1	6	3

V Assessment Scheme:

Classroom Learning				Tutorial/Laboratory Learning				Self-Study Learning	
FA	SA	Total		FA		SA		SA	
Max	Max	Max	Min	Max	Min	Max	Min	Max	Min
30	70	100	40	25	10	25	10	25	10

VI Classroom Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Cognitive Domain)		Topics and Sub-topics		Aligned Cos
UNIT I: Pattern and Pattern Making	1a	Classify manufacturing processes for production of various components	1.1	Various manufacturing processes,Steps involved in Making a Casting.Advantages of metal casting,Applications of Metal Casting.	CO1
	1b	Compare patterns and casting on give points	1.2	Different sections of a Foundry, types of Foundry Function of pattern, Difference between pattern and casting.	
	1c	Prepare pattern using pattenr allowances	1.3	Choice of Pattern materials, types of pattern materials. Types of patterns.	
	1d	Follow steps involved in pattern layout and pattern construction for making pattern	1.4	Pattern allowances,Steps involved in pattern layout and pattern construction.	
	1e	Identify patterns based on ISI colouring code	1.5	ISI coloring code on pattern,Core print fillet on pattern.	

UNIT II: Core and Core Making	2a	Construct various core boxes.	2.1	Function of core, core applications,Core sand propertie, Core sand ingredients, Core materials,core sand mixture, core making procedure types of core, Core prints.	CO2
	2b	Utilize various core baking machines to prepare cores	2.2	Core making machines, core baking and machining operations on cores.Core shifting and Chaplet, Core applications,Construction of core box	
UNIT III: Mould and Mould Making	3a	Identify ingridents for given Moulding sands	3.1	Functions of mould,Mould materials-sand, binder, water, additives, etc,Types of Moulding sands and their Properties	CO3
	3b	Illustrate hand moulding tools in preparing of sand moulds.	3.2	Mould surface coating, Mould Coat Testing,Moulding sand preparation and conditioning – a.Objectives of sand preparation,b. Steps for sand preparation,c. Working of sand Muller. Sand reclamation.	
	3c	Perform various tests on sand to check its properties.	3.3	Sand control tests-a. Moisture content test b.Clay content test,c.Grain fineness test d.Permeability test e.Hot Strength test.	
	3d	State various steps involved in mould making.	3.4	Moulding processes, Methods of ramming Moulding boxes Steps involved in mould making, mould making machines, Moulding methods, hand Moulding tools, Types of mould, venting of moulds, Mould -metal reaction, Typical green and dry sand composition for Cast Iron and steel.	

UNIT IV: Solidification of Casting ,Gating and Risering	4a	Identify means to achieve directional solidification.	4.1	Concept of solidification of metals, nucleation & growth, mechanism of Dendrite formation.Progressive and Directional solidification and control of solidification to obtain sound casting.Means to achieve directional solidification.	CO4
	4b	Select proper gating system for sound casting	4.2	GATING system: - function of each component of the gating system. Types of gates, pressurized and unpressurised gating systems Elimination of slag and dross	
	4c	Estimate the Riser Efficiency for effective casting practice	4.3	RISER - Function of risers, types of riser, riser and directional solidification, increasing riser efficiency	
UNIT V: Melting Practice	5a	Classify Furnaces for melting ferrous and non-ferrous metals.	5.1	Furnaces for melting ferrous and non-ferrous metals	CO5
	5b	Identify differnts parts of cupola furnace	5.2	Cupola – Construction, Various operations, Zones of Cupola, Charge calculations, Numericals based on design of cupola	
	5c	Identify differnts parts of Electric Arc furnace	5.3	Electric Arc furnace- working principle, advantages disadvantages and applications	
	5d	Identify differnts parts of Induction furnace	5.4	Induction furnace - working principle, advantages ,disadvantages and applications	
	5e	Classify Crucible furnacess used in metallurgical industries	5.5	Crucible furnaces-types, working principle, advantages, disadvantages and applications	

UNIT VI: Post Casting Treatments	6a	Identify Post Casting Operations to get sound castings.	6.1	Post casting operations: a.Fettling, b.Removal of cores, c.Cleaning of casting, surfaces d. Shot blasting, e.Sand blasting, e. Tumbling barrel.	CO6
	6b	Compare given surface treatments	6.2	Finishing of castings:Diferent finishing operations carried out on casting,Surface Treatment of castings,Heat treatment of Castings, Stress Relieveing /Recrystallization of castings.	

VII Laboratory Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Psychomotor Domain)		Hours	Aligned COs
I	1	Drawing/Sketching of various Foundry tools	2#	CO1
II	2	Prepare a core for various applications	2#	CO2
III	3	Prepare a Mould for various applications	2#	CO3
III	4	Prepare Moulding sand with proper sand ingridents	2#	CO3
III	5	Determine Moisture content in Moulding sand by Infra-red bulb method	2	CO3
III	6	Determine A.F.S. fineness No. of sand.	2#	CO4
III	7	Determine the amount of clay content in moulding sand.	2#	CO5
IV	8	Prepare Mould for given casting.	2#	CO4
IV	9	Prepare a gating and risering system for moulding and casting for given industrial application. (Part I)	2#	CO4
IV	10	Prepare a gating and risering system for moulding and casting for given industrial application. (Part II)	2#	CO4
V	11	Perform melting operation for Aluminium alloys. (Part I)	2#	CO5
V	12	Perform melting operation for Aluminium alloys. (Part II)	2#	CO5
V	13	Perform melting operation for Aluminium alloys. (Part III)	2	CO5
VI	14	Perform various post casting operations on Aluminium Casting. (Part I)	2#	CO6
VI	15	Perform various post casting operations on Aluminium Casting. (Part II)	2	CO6

Note: # Compulsory

VIII Self-Study Learning (SLO in Cognitive/Psychomotor/Affective Domain)

1. Prepare a report on foundry/casting practises world wide and submit the report.
2. Prepare report on various hand Moulding tools ,equipments and machineries used in foundry and submit
3. Prepare comparative charts on various finishing operations on castings.submit a report on it
4. Collect various types of pattern materials and submit a report on it
5. Prepare a report on electrical energy consumption used in melting furnaces
6. Prepare comparative charts for differents types of patterns used in foundry
7. Prepare poster on various Furnaces used for melting ferrous and non-ferrous metals.
8. Prepare comparative charts for differents tests carried on moulding sand
9. Prepare model of cupola furnace and write a report on it
10. Perform internet survey for automotive and aircraft,rockets and space components made by foundry/casting process and submit a report on it
11. Perform market survey of different thermocouples and submit a report on it
12. Perform market survey of different pyrometers and submit a report on it
13. Prepare a report based on currriculum and submit the report

IX Specification Table for Classroom Learning Assessment:

Unit No.	Units	Classroom Learning Hours	C/O	Levels from Cognition Process Dimension			Total Marks

COURSE CURRICULUM

Program	:	Diploma in CE/ME/EE/EC/AE/CM/IT/AIML/MC/PK/MT/TX/TR
Course Category	:	DSC
Course Code	:	EN151H
Course Title	:	Business Communication

I Rationale:

Professional Communication is essential for smooth and efficient functioning of any industry or business. The drafting skills and application of business communication principles are essential for engineering professionals. It plays a vital role to help professionals instruct, guide and motivate peers/ subordinates to achieve desired goals at work place. Strong Communication skills contribute to career growth and opportunities. This course focuses to enrich the professional communication skills for effective presentation both in written and oral forms at workplace.

II Industry Identified Competency:

The Student will be able to do in Industry at entry level:

Communicate technical information clearly and effectively.

III Course Outcomes (COs):

After completing this course students will be able to:

CO1: **Communicate** effectively(oral/written) in formal situations.

CO2: **Develop** and exhibit language skills in professional interactions.

CO3: **Write** job application with resume/CV and compose effective e-mails.

CO4: **Draft** official letters.

CO5: **Draft** business correspondence with minimal errors.

CO6: **Organize** formal meetings and maintain official records.

IV Learning Scheme:

Classroom Learning (CL)	Tutorial Learning (TL)	Laboratory Learning (LL)	Self-Study Learning (SL)	Notional Learning Hours (NLH)	Credits
2	-	2	-	4	2

V Assessment Scheme:

Classroom Learning				Tutorial/Laboratory Learning				Self-Study Learning	
FA	SA	Total		FA		SA		SA	
Max	Max	Max	Min	Max	Min	Max	Min	Max	Min
-	-	-	-	25	10	25	10	-	-

VI Classroom Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Cognitive Domain)		Topics and Sub-topics		Aligned Cos
UNIT I: Types of communication	1a	-	1.1	Professional communication - Definition, importance, relevance.	CO1
	1b	-	1.2	Principles/7 C's of Professional communication: Clarity, Conciseness, correctness, coherent, concrete, courteous and complete.	
	1c	-	1.3	Types of communication- Verbal: Written - oral, formal - informal, internal –external, vertical – upward, downward, horizontal, diagonal and Non-verbal.	
	1d	-	1.4	Non-verbal communication – body language: gestures, postures, eye contact, facial expression. Non-verbal codes - dress and appearance, colors, sounds, signs, proxemics, chromatics, artifacts.	

UNIT II: Communication in Practice	2a	-	2.1	Receptive Productive Skills: Receptive language skills- Listening and reading, importance, Difference between listening & Hearing, Types of listening a) Active listening b) Passive listening c) Selective listening, tips to improve receptive skills, qualities of a good listener, scanning & skimming a text, tips to improve receptive skills.	CO2
	2b	-	2.2	Productive language skills- speaking and writing, importance, how receptive skills help to develop productive skills, tips to improve productive skills.	
	2c	-	2.3	Techniques of Note taking, Types of notes taking-Mind Mapping, Flowcharts.	
UNIT III: Formal Drafting	3a	-	3.1	Drafting Letters: Importance of formal drafting, parameters of formal drafting.	CO3
	3b	-	3.2	Job application -Format Resume writing- Differentiate between CV, Bio data and Resume. Leave application: format, use of appropriate language.	
UNIT IV:	4a	-	4.1	Official Drafting: Notice & Circular - difference between notice & circular, purpose of drafting, tips to draft in precise language.	CO4
	4b	-	4.2	Email: Email etiquettes, drafting- email with proper salutation, subject line, cc, bcc, attachments	

UNIT V: Business letters	5a	-	5.1	Business Letters: Enquiry letter and Order letter: format, use of technical language, reply to enquiry and order letter.	CO5
	5b	-	5.2	Complaint letter: format, use of polite language, reply to complaint letter.	
UNIT VI: Minutes & Report Writing	6a	-	6.1	Agenda, Minutes & Report Writing: Preparing checklist to organize official meeting, Drafting agenda: format, sequence of activities.	CO6
	6b	-	6.2	Drafting minutes of meeting: Importance, format, identifying important happenings.	
	6c	-	6.3	Report writing: Investigation /Survey report: format, purpose, techniques.	

VII Laboratory Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Psychomotor Domain)		Hours	Aligned COs
I	1	Enlist advantages and limitations of written/oral communication. Prepare a case study on limitations of written/oral communication and suggest remedies for the same.	2#	CO1
I	2	Undertake a role play/group discussion using suitable body language and non-verbal codes of communication.	2	CO1
I	3	Give a presentation / Seminar using 7 C's of Communication.	2#	CO1
II	4	Listen to motivational audios in the language lab and make notes of it.	2	CO2
II	5	Draw flow chart and mind map for any topic related to the curriculum.	2#	CO2
III	6	Draft a leave application letter to an authority following the rules of drafting.	2#	CO3
III	7	Prepare a Job Application in response to an advertisement following the steps of official drafting.	2#	CO3
III	8	Prepare a Resume highlighting the academic and professional details of the individual.	2#	CO3
IV	9	Draft notices for the organization and events mentioned. (04-topics)	2#	CO4
IV	10	Draft Circulars for the organization and events mentioned (04-topics).	2	CO4
IV	11	Type formal E-mails using email etiquette (04-topics).	2#	CO4
V	12	Draft an Enquiry and order letter for the organization as a designated authority.	2#	CO5
V	13	Draft a complaint letter for various situation (02-topics).	2#	CO5
VI	14	Participate in Group Discussion.	2#	CO6
VI	15	Face mock interview arranged by your teacher.	2#	CO6
VI	16	Write a detailed report on investigation/survey.	2	CO6

Note: # Compulsory

COURSE CURRICULUM

Program	:	Diploma in MT
Course Category	:	SEC
Course Code	:	ME155H
Course Title	:	Engineering Graphics

I Rationale:

Engineering graphics is a non-verbal and graphical language to communicate ideas, instructions and facts with each other clearly and without ambiguity while carrying out engineering jobs on the sites, shop floor etc. It describes the fundamentals, facts, concepts, principles and techniques of Engineering Graphics. The course illustrates techniques of drawing in an engineering field. It helps to develop the idea of visualizing the actual object or part on the basis of drawings and blue prints. This course is useful in developing drafting and sketching skills of the student. This preliminary course aims at building a foundation for the further course in drawing and other allied courses.

II Industry Identified Competency:

The Student will be able to do in Industry at entry level:

Prepare engineering drawings using prevailing drawing standards and instruments.

III Course Outcomes (COs):

After completing this course students will be able to:

CO1: **Select** and construct appropriate drawing scales and use drawing instruments & Apply IS SP-46 2011 for engineering drawing.

CO2: **Draw** various engineering curves.

CO3: **Covert** isometric projections into orthographic projections.

CO4: **Visualize** three dimensional objects and draw isometric projections.

CO5: **Apply** knowledge of projections of points and solve the problems on projection of straight lines.

CO6: **Draw** freehand sketches of an engineering elements.

IV Learning Scheme:

Classroom Learning (CL)	Tutorial Learning (TL)	Laboratory Learning (LL)	Self-Study Learning (SL)	Notional Learning Hours (NLH)	Credits
-	-	4	-	4	2

V Assessment Scheme:

Classroom Learning				Tutorial/Laboratory Learning				Self-Study Learning	
FA	SA	Total		FA		SA		SA	
Max	Max	Max	Min	Max	Min	Max	Min	Max	Min
-	-	-	-	50	20	50	20	-	-

VI Classroom Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Cognitive Domain)	Topics and Sub-topics	Aligned Cos

VII Laboratory Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Psychomotor Domain)		Hours	Aligned COs
I	1	Draw lettering, numbers, conventions of lines and figure fordimensioning techniques as per IS SP-46. (Practical Sketch book)	2	CO1
I	2	Draw plain scale and diagonal scale from given data. (Practical Sketch book)	2#	CO1
I	3	Redraw given geometrical constructions. (Practical Sketch book)	2#	CO1
I	4	Apply dimensioning technique as per IS SP-46: 2011 to redraw given geometrical figures. (Sheet No. 1)	2#	CO1
II	5	Draw Engineering Curves - Conic Section - Parabola, Ellipse and Hyperbola by given methods. (Practical Sketch book)	2#	CO2
II	6	Draw Loci of Point by simple mechanism. (Practical Sketch book)	2#	CO2
II	7	Draw givben Conic Sections Engineering Curves and Loci of Point of simple mechanism. (Sheet No. 2)	2#	CO2
II	8	Draw Engineering Curves - Involute of pentagon, circle and Archimedian spial (tangent and normal) and its corrolaries. (Practical Sketch book)	2#	CO2
II	9	Draw Engineering Curves - Cycloidal Curves and Helix (tangent and normal) and its corrolaries. (Practical Sketch book)	2#	CO2
II	10	Draw given Involute, Helix and Cycloidal curves. (Sheet No. 3)	2#	CO2
III	11	Draw Orthographic Projection using third angle method of projection from given pictorial view. (Practical Sketch book)	2	CO3
III	12	Draw Orthographic Projection using third angle method of projection of given pictorial view (Part I). (Sheet No. 4)	2#	CO3
III	13	Draw Orthographic Projection using third angle method of projection of given pictorial view (Part II). (Sheet No. 4)	2#	CO3
III	14	Draw Orthographic Projection using first angle method of projection of given pictorial view. (Practical Sketch book)	2#	CO3

III	15	Draw Orthographic Projection using first angle method of projection of given pictorial view (Part I). (Sheet No. 5)	2#	CO3
III	16	Draw Orthographic Projection using first angle method of projection of given pictorial view (Part II). (Sheet No. 5)	2#	CO3
IV	17	Draw Isometric View of given orthographic view with plane surfaces & with cylindrical, slot, slanting surfaces . (Practical Sketch book)	2	CO4
IV	18	Draw Isometric View of given orthographic view with plane surfaces & with cylindrical, slot, slanting surfaces (Part I). (Sheet No 6)	2#	CO4
IV	19	Draw Isometric View of given orthographic view with plane surfaces & with cylindrical, slot, slanting surfaces (Part II). (Sheet No 6)	2#	CO4
IV	20	Draw Isometric Projection of given orthographic view with plane surfaces & with cylindrical, slot, slanting surfaces. (Practical Sketch book)	2	CO4
IV	21	Draw Isometric Projection of given orthographic view with plane surfaces & with cylindrical, slot, slanting surfaces (Part I). (Sheet No. 7)	2#	CO4
IV	22	Draw Isometric Projection of given orthographic view with plane surfaces & with cylindrical, slot, slanting surfaces (Part II). (Sheet No. 7)	2#	CO4
V	23	Draw Projections of straight lines using first angle method of projection (line inclined to one reference plane and parallel to the other–limited to both ends in first quadrant). (Practical Sketchbook)	2	CO5
V	24	Draw Projections of straight lines using first angle method of projection (line inclined to one reference plane and parallel to the other–limited to both ends in first quadrant) (Part I). (Sheet No. 8)	2#	CO5

V	25	Draw Projections of straight lines using first angle method of projection (line inclined to one reference plane and parallel to the other–limited to both ends in first quadrant) (Part II). (Sheet No. 8)	2	CO5
V	26	Draw Projections of straight lines using first angle method of projection (line inclined to one reference plane and parallel to the other–limited to both ends in first quadrant) (Part III). (Sheet No. 8)	2#	CO5
VI	27	Draw Free Hand Sketches of Types of screws threads–Vee and square threads, left hand and right hand thread. (Practical Sketch book)	2#	CO6
VI	28	Draw Free Hand Sketches of Bolts (square, hexagonal and Eyebolt), Nuts (square, hexagonal, wing, capstan, cap, flanged, ring and dome nut). (Practical Sketch book)	2#	CO6
VI	29	Draw Free Hand Sketches of Locking arrangement–lock or check nut, split pin, slotted nut, castle nut, swan nut and grooved nut. (Practical Sketch book)	2#	CO6
VI	30	Draw Free Hand Sketches of foundry tools. (Practical Sketch book)	2#	CO6

Note: # Compulsory. Use A2 Size drawing Sheet and A3 size Sketch Book. Theory componets should be covered in practical periods.

VIII Self-Study Learning (SLO in Cognitive/Psychomotor/Affective Domain)

IX Specification Table for Classroom Learning Assessment:

X Question Paper Format for Summative Assessment (SA):

XI Scheme of Laboratory Formative Assessment (FA):

S.N.	Criteria	Max. Marks
1	Neatness , cleanliness and line work on drawing sheet	10
2	Creation of given drawing with proper dimensioning	20
3	In time submission	10
4	Viva Voce	10
	TOTAL	50

XII Scheme of Self-Learning Summative Assessment (SA):

XIII COs-POs/PSOs Mapping Matrix:

COURSE CURRICULUM

Program	:	Diploma in CE/ME/EE/EC/CM/IT/MT/PK/AE/TR/TX/ MK/AI
Course Category	:	VEC
Course Code	:	VE152H
Course Title	:	Advance Personality Development

I Rationale:

This course equips students with essential life skills, focusing on well-being, leadership, interpersonal relationships, and citizenship. By integrating ancient wisdom, practical financial literacy, and teamwork skills, students develop a balanced and responsible outlook, supporting both professional success and personal fulfillment. This course aligns with holistic development goals in engineering education, fostering adaptability and resilience for real-world challenges.

II Industry Identified Competency:

The Student will be able to do in Industry at entry level:

Demonstrate resilience, teamwork, integrity, and financial literacy in professional and personal settings.

III Course Outcomes (COs):

After completing this course students will be able to:

CO1: **Enhance** personal well-being by setting goals, managing stress, avoiding addictions, and fostering a positive environment.

CO2: **Develop** effective leadership skills by embracing humility and applying mentor-guided solutions to daily challenges.

CO3: **Enhance** interpersonal relationships by practicing forgiveness in both personal and professional settings.

CO4: **Apply** ancient wisdom to effectively address and navigate modern-day challenges.

CO5: **Foster** responsible citizenship by cultivating values of integrity, loyalty, sincerity, and punctuality for national progress.

CO6: **Build** teamwork skills and financial literacy to achieve stability and harmony in professional and personal life.

IV Learning Scheme:

Classroom Learning (CL)	Tutorial Learning (TL)	Laboratory Learning (LL)	Self-Study Learning (SL)	Notional Learning Hours (NLH)	Credits
-	-	2	2	4	2

V Assessment Scheme:

Classroom Learning				Tutorial/Laboratory Learning				Self-Study Learning	
FA	SA	Total		FA		SA		SA	
Max	Max	Max	Min	Max	Min	Max	Min	Max	Min
-	-	-	-	25	10	25	10	25	10

VI Classroom Learning Content:

VII Laboratory Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Psychomotor Domain)		Hours	Aligned COs
UNIT I: Remaking Yourself	1	**Begin with the End in Mind:** Visualize future goals and structure lives through smart goals to give direction to achieve desired outcomes.	2#	CO1
	2	**Being Addiction-Free:** Explore the detrimental effects of addictions on one's health, personal life, and family life and learn how to take control of life by becoming addiction free.	2#	CO1
	3	**Stress Management:** Cope with current and future causes of stress.	2#	CO1
	4	**Better Health Better Future:** Maintain good health through regular exercise, healthy eating habits, and regular and sufficient sleep.	2#	CO1
	5	**Impact of Company:** Develop the ability to create a positive environment around yourself.	2#	CO1
UNIT II: Learning from Legends	6	**Leading Without Leading:** Explore a new approach to leadership, through humility.	2#	CO2
	7	**Words of Wisdom:** Gain practical insights by engaging with mentors to address real-life challenges faced in daily life.	2#	CO2

UNIT III: From House to Home	8	**Forgive & Forget:** Apply the knowledge of forgiveness in personal and professional life.	2#	CO3
UNIT IV: Facing Failures	9	**Timeless Wisdom for Daily Life:** Use ancient wisdom to solve modern-day challenges.	2#	CO4
UNIT V: My India My Pride	10	**Present Scenario:** Implement the transformation of India from a developing country into a developed country it is necessary to have a value-based citizen.	2#	CO5
	11	**An Ideal Citizen - 1:** Develop good values by exploring the values of responsibility and integrity to become value-based citizens.	2#	CO5
	12	**An Ideal Citizen - 2:** Develop values of loyalty, sincerity, and punctuality by trying to keep perfection in every small task and by looking at the bigger picture.	2#	CO5
UNIT VI: Soft Skills	13	**Teamwork & Harmony:** Learn the six steps of teamwork and harmony that are essential for students' professional and daily life.	2#	CO6
	14	**Financial Planning:** Develop a variety of practical financial skills to become financially stable throughout the future careers.	2#	CO6

Note: # Compulsory

VIII Self-Study Learning (SLO in Cognitive/Psychomotor/Affective Domain)

1. Perform Selfless Service - Seva: Apply previous lessons of seva, to analyse the case study of the Bhuj earthquake relief work or any other relief work.

IX Specification Table for Classroom Learning Assessment:

X Question Paper Format for Summative Assessment (SA):

XI Scheme of Laboratory Formative Assessment (FA):

S.N.	Criteria	Max. Marks
1	Content Understanding	10
2	Readability	5

Exit Course

I Year

Government of Maharashtra
GOVERNMENT POLYTECHNIC, NAGPUR
(An Autonomous Institute of Govt. of Maharashtra)
Near Mangalwari Bazar, Sadar, Nagpur-440001

COURSE CURRICULUM

Program	:	Diploma in CE/ME/EE/EC/CM/IT/AE/MT/PK/TX/MK/AI
Course Category	:	INP
Course Code	:	IN151H
Course Title	:	Internship (Basic Skills)

I Rationale:

Internship (Basic Skill) is a four-week immersive program designed for first-year diploma students, offering hands-on experience in an industrial setting. Guided by the principles of the National Education Policy (NEP), the course aims to bridge academic learning with industry expectations by fostering practical knowledge, workplace skills, innovation, and professional discipline. Emphasizing skill acquisition and teamwork, students maintain daily activity diaries and submit a comprehensive post-internship report, reflecting on their learning journey. This course serves as an exit option after the second semester, fulfilling the requirements for the award of the "Certificate in Vocation."

II Industry Identified Competency:

The Student will be able to do in Industry at entry level:

Work efficiently in an industrial environment.

III Course Outcomes (COs):

After completing this course students will be able to:

CO1: **Follow** safety guidelines, record measures, and act per industry standards.

CO2: **Collect** data from supervisors, analyze processes, and write concise reports.

CO3: **Follow** instructions, observe processes, and document daily industrial work clearly.

CO4: **Identify** and discuss problems, analyze causes, and suggest possible improvements.

CO5: **Compile** experiences, refine presentations, and prepare a professional internship report.

CO6: **Present** internship report and outcomes confidently, showing skills, technical knowledge, and clear communication.

IV Learning Scheme:

Classroom Learning (CL)	Tutorial Learning (TL)	Laboratory Learning (LL)	Self-Study Learning (SL)	Notional Learning Hours (NLH)	Credits
-	-	-	8	8	4

V Assessment Scheme:

Classroom Learning				Tutorial/Laboratory Learning				Self-Study Learning	
FA	SA	Total		FA		SA		SA	
Max	Max	Max	Min	Max	Min	Max	Min	Max	Min
-	-	-	-	-	-	-	-	50	20

VI Classroom Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Cognitive Domain)	Topics and Sub-topics	Aligned Cos

VII Laboratory Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Psychomotor Domain)		Hours	Aligned COs
I	1	Adhere to industrial safety practices by consulting the safety officer, recording safety procedures, noting the do's and don'ts, and following all instructions as per industry standards.	10#	CO1
II	2	Conduct an industrial process survey by gathering information through discussions with the assigned supervisor/officer, recording findings, and preparing a concise report.	10#	CO2
III	3	Work effectively in an industrial environment by following supervisor instructions, observing industrial processes, and maintaining a daily work diary.	60#	CO3
IV	4	Analyze industrial problems by discussing with supervisors and workers, identifying issues in systems or processes, and documenting the findings.	20#	CO4

V	5	Compile internship experiences into a clear, professional report and presentation; conduct practice sessions to enhance presentation skills and prepare documents as per faculty guidelines.	10#	CO5
VI	6	Present internship report and outcomes confidently to faculty and peers, demonstrating technical knowledge, communication skills, and clarity in conveying internship learnings.	10#	CO6

Note: # Compulsory

VIII Self-Study Learning (SLO in Cognitive/Psychomotor/Affective Domain)

1. Choose entrepreneurial activities resulting in start-up or undergo internship with industry/ NGO"s/ Government organizations/ Micro/ Small/ Medium enterprises to make ready for the industry.

IX Specification Table for Classroom Learning Assessment:

X Question Paper Format for Summative Assessment (SA):

(An Autonomous Institute of Govt. of Maharashtra)
Near Mangalwari Bazar, Sadar, Nagpur-440001

COURSE CURRICULUM

Program	:	Diploma in MT
Course Category	:	DSC
Course Code	:	MT201H
Course Title	:	Metallurgical Thermodynamics

I Rationale:

Metallurgical thermodynamics is crucial for a diploma in metallurgical engineering as it provides foundational knowledge on energy transformations, phase equilibria, and reaction mechanisms in metals and alloys. This understanding is essential for optimizing metallurgical processes, improving material properties, and innovating new materials, making it a vital component of the curriculum to meet industry demands and advance technological development in India.

II Industry Identified Competency:

The Student will be able to do in Industry at entry level:

Apply principle of metallurgical thermodyanamics in extractive metallurgy

III Course Outcomes (COs):

After completing this course students will be able to:

CO1: **Apply** knowledge of metallurgical thermodynamics

CO2: **Formulate** different laws of thermodynamics

CO3: **Draw** Ellingham diagrams

CO4: **Analyse** intersecting lines on Ellingham diagrams

CO5: **Calculate** enthalpy ,entropy & gibbs free energy for thermodynamic reactions

CO6: **Calculate** free energy of mixing in solutions

IV Learning Scheme:

Classroom Learning (CL)	Tutorial Learning (TL)	Laboratory Learning (LL)	Self-Study Learning (SL)	Notional Learning Hours (NLH)	Credits
4	-	-	2	6	3

V Assessment Scheme:

Classroom Learning				Tutorial/Laboratory Learning				Self-Study Learning	
FA	SA	Total		FA		SA		SA	
Max	Max	Max	Min	Max	Min	Max	Min	Max	Min
30	70	100	40	-	-	-	-	25	10

VI Classroom Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Cognitive Domain)		Topics and Sub-topics		Aligned Cos
UNIT I: Introduction	1a	Select given thermodynamic system	1.1	Definition of thermodynamics, scope of metallurgical	CO1
	1b	Identify various forms and sources of energy	1.2	Energy- concepts , properties, forms, and sources of energy	
	1c	Use various thermodynamic processes	1.3	Thermodynamic system and its classification, State of systems	
	1d	Compare given processes on given basis	1.4	Extensive and Intensive properties, equation of state,Thermodynamic processes: isobaric, isothermal, isochoric, adiabatic and polytropic.,Path and state functions, standard state,Thermodynamic equilibrium, reversible and irreversible processes	
dynamics	2a	Formulate expression for given law of thermodynamics	2.1	Statements and formulation of first law of thermodynamics Internal energy as a state property	

UNIT II: First law oF Thermoc	2b	Justify given reactions in thermodynamics	2.2	Heat capacity: specific heat at constant volume and constant pressure, relation between Cp and Cv.	CO2
	2c	Relate Cp and Cv	2.3	Enthalpy : definition and mathematical expression	
	2d	Derive mathematical expression of enthalpy	2.4	Thermo -chemistry: exothermic and endothermic reactions,Hess's law – statement and significance. calculation based on Hess's law	
UNIT III: Second law of Thermodynamics	3a	Calculate entropy for a thermodynamic reactions	3.1	Statement and mathematical expression of second law of thermodynamics	CO3
	3b	Formulate Helmoltz free energy and Gibbs free energy	3.2	Concept of entropy, entropy change associated with thermodynamic processes Calculation of entropy of the reaction	
	3c	Derive given law of thermodynamics	3.3	Significance of entropy. Combine statement of first and second law	
	3d	Illustrate Free energy in thermodynamics	3.4	Concept of Free energy, Expression of Helmoltz free energy and Gibbs free energy	
	3e	Jutify Change in free energy as criteria for deciding nature of process.	3.5	Change in free energy as criteria for deciding nature of process, Fugacity and activity	
UNIT IV: Third law of Thermodynamics	4a	Formulate Third law of thermodynamics	4.1	Statement of law and its significance,Zeroth law of thermodynamics and its significance	CO4
	4b	Evalulate equilibrium constant for a given chemical reactions	4.2	Free energy-temperature relation and relative stability of phases,Equilibrium constant for chemical reactions,Phase rule; statement and its Derivation	

UNIT V: Ellingham Diagrams	5a	Draw given Ellingham diagram.	5.1	General form of Ellingham diagram	CO5
	5b	Apply Ellingham diagram for reactions occurring in steel making	5.2	Oxide and sulphides Ellingham diagrams	
	5c	Identify various reaction lines on Ellingham diagram	5.3	Characteristics of Ellingham diagrams	
	5d	Select Ellingham diagram for particular reactions	5.4	Significance of diagrams-reduction and dissociation of oxides.	
	5e	Analyze Intersecting lines on Ellingham diagrams	5.5	Intersecting lines on Ellingham diagrams.	
UNIT VI: Solutions	6a	Compare vaious solutions	6.1	Ideal solution- activity coefficient	CO6
	6b	Evaluate free energy of mixing in solutions	6.2	Roult's law and Henry's law,Sievert's law and its significance	
	6c	Derive given Laws	6.3	Gibbs-Duhem Equation & Activity Laws and its significance	
	6d	Categorize the solutions in thermodynamics with justification	6.4	Free energy of Mixing & Regular Solutions and its significance	
	6e	Utilise and manage energy and waste heat in Metallurgical Thermodynamics	6.5	Energy Management in Metallurgical Thermodynamics: Energy Conversion and Utilization, Waste Heat Recovery, Energy Storage and Transmission, Process Optimization, Sustainability Practices	

VII Laboratory Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Psychomotor Domain)	Hours	Aligned COs

VIII Self-Study Learning (SLO in Cognitive/Psychomotor/Affective Domain)

1. Prepare a comparative chart for reversible and irreversible process in thermodynamics
2. Prepare report on various sources of energy
3. Carry out survey report for utilization of energy used various thermodynamic processes
4. Prepare micro project in industries applying principle of metallurgical thermodynamics
5. Prepare micro project based on curriculum
6. Analyze common issues in Metallurguical Thermodynamics processes and propose appropriate solutions
7. Prepare posters/comparative charts for different laws of Metallurgical thermodynamic.
8. Prepare posters/comparative charts for ellinghham diagram for oxides and sulphides
9. Prepare mini project on Ellingham diagram utilization in metallurgical industries

COURSE CURRICULUM

Program	:	Diploma in MT
Course Category	:	DSC
Course Code	:	MT202H
Course Title	:	Iron Making

I Rationale:

Iron making in a diploma in Metallurgical Engineering in India is vital due to the country's significant iron and steel industry. It offers employment opportunities, builds a foundation for further studies, and acquaints students with modern technologies and sustainable practices. Understanding iron making processes aligns students with industry needs, enhances their prospects for internships, and contributes to India's industrial growth and self-reliance

II Industry Identified Competency:

The Student will be able to do in Industry at entry level:

Exract iron from its ore using other raw materials.

III Course Outcomes (COs):

After completing this course students will be able to:

CO1: **Explore** the latest advancements and emerging technologies in the field of iron making.

CO2: **Evaluate** different raw materials required for iron production

CO3: **Construct** various parts of Blast furnace.

CO4: **Organize** Blast furnace operations

CO5: **Suggest** suitable remedies for Irregularities in Blast furnace operation

CO6: **Compare** various methods of sponge iron production.

IV Learning Scheme:

Classroom Learning (CL)	Tutorial Learning (TL)	Laboratory Learning (LL)	Self-Study Learning (SL)	Notional Learning Hours (NLH)	Credits
4	-	-	2	6	3

V Assessment Scheme:

Classroom Learning				Tutorial/Laboratory Learning				Self-Study Learning	
FA	SA	Total		FA		SA		SA	
Max	Max	Max	Min	Max	Min	Max	Min	Max	Min
30	70	100	40	-	-	-	-	25	10

VI Classroom Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Cognitive Domain)		Topics and Sub-topics		Aligned Cos
UNIT I: Development in iron making	1a	Report ancient iron making processes	1.1	Ancient Iron Making Processes primitive methods of iron extraction. Development of bloomery and early furnaces. Innovations during the Iron Age, Transition from bronze to iron tools and weapons.	CO1
	1b	Compare given iron making process on given points.	1.2	Development in Iron Making, Modern Iron Making, Alternative methods of Iron Making.	
l Burden Preparation	2a	Select iron ore for iron production by evaluating it using different parameter.	2.1	Source of iron- types of iron ores/minerals. Properties of iron ores. Reducibility of iron ore. Evaluation of iron Ore	
	2b	Select different raw materials for iron production	2.2	Fuels: Coke- Properties, and functions. Fluxes – types , Properties, functions and applications	

UNIT II: Raw Materials and	2c	Compare given agglomeration process on given points.	2.3	Beneficiation- Agglomeration – need, advantages and principle involved. Sintering - principle, techniques, advantages. Pelletization- principle, techniques (disc and drum pelletizer), advantages	CO2
	2d	Differentiate given burden distribution based on given parameters/points.	2.4	Burden Distribution- Types, characteristics, advantages	
UNIT III: Blast Furnace Construction	3a	Identify given parts of blast furnace.	3.1	Constructional details and functions of Blast Furnace parts- Hearth, Bosh, Stack, Bustle pipe, Tuyers.	CO3
	3b	Recommend suitable charging system	3.2	Burden charging systems- Types, characteristics, advantages	
	3c	Select proper refractories for blast furnace and hot blast stove.	3.3	Refractories used in blast furnace, Hot blast stove- construction, refractories used, working	
	3d	Justify use of given part of Gas cleaning plant.	3.4	Gas Cleaning Plant- functions and details of each part of Gas Cleaning plant	
UNIT IV: Blast Furnace Operation	4a	Sequence Operational steps of Blast furnace.	4.1	Working principle of blast furnace, Operation of blast furnace-different steps.	CO4
	4b	Illustrate chemical reactions in different zone of blast furnace	4.2	Chemical reactions at different zones in Blast Furnace, temperature profile in blast furnace	
	4c	Draw temperature profile in blast furnace.	4.3	Blast Furnace Products-– composition of Pig Iron, slag and gas.	
	4d	Report compositions of blast furnace products.	4.4	Productivity/efficiency of Blast Furnace.	
Trends in ace	5a	Suggest remedial measures for given irregularities in blast furnace operation.	5.1	Irregularities and their remedies in Blast furnace operations.	

UNIT V: Modern Blast Furna	5b	Analyze effects of irregularities on blast furnace operation.	5.2	Modern trends in Blast Furnace practice.	CO5
	5c	Compare mini blast furnace with blast furnace on given points.	5.3	Mini blast furnace.	
UNIT VI: Sponge Iron Production	6a	Illustrate reactions in DRI production.	6.1	Principle of Sponge Iron Production(DRI), Physical Chemistry of Sponge Iron Processes,Sponge Iron Making in India, Uses of Sponge Iron	CO6
	6b	Describe different methods of DRI Production.	6.2	Sponge Iron Making Processes– HyL Process, Midrex Process, Rotary Kiln Process,	
	6c	Select proper DRI production process for given conditions.	6.3	Green Iron Making: Technologies like hydrogen-based direct reduction and electrolysis-based iron-making processes	

VII Laboratory Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Psychomotor Domain)	Hours	Aligned COs

VIII Self-Study Learning (SLO in Cognitive/Psychomotor/Affective Domain)

1. Perform survey on iron making history and prepare report on it.
2. Collect various samples of raw materials required for iron making and prepare report.
3. Prpepare model of blast furncace and other accessories of blast furnace.
4. Perform market survey related to cost of various iron making raw materilas.
5. Draw schematic plat lay out of modern blast furnace showing variuos sections.
6. Prepare comparative charts of sintering and pelletizing with sketches.
7. Prepare model of any one DRI process
8. Draw schematic of Gas cleaning plant.
9. Draw schematic of Rotory Kiln and write its operation.
10. Review current status of iron production industries in india and prepare report.

COURSE CURRICULUM

Program	:	Diploma in MT
Course Category	:	DSC
Course Code	:	MT203H
Course Title	:	Powder Metallurgy

I Rationale:

Powder metallurgy is essential for a diploma in metallurgy in India as it enables the production of complex, high-precision components with minimal waste and cost. It aligns with industry demands in automotive, aerospace, and electronics, promoting material efficiency and sustainability. Including powder metallurgy in the curriculum prepares students for advanced manufacturing technologies and enhances their employability in diverse industrial sectors.

II Industry Identified Competency:

The Student will be able to do in Industry at entry level:

Design and develop new alloy for specific application using powder metallurgy technique**.**

III Course Outcomes (COs):

After completing this course students will be able to:

CO1: **Identify** powder metallurgy components.

CO2: **Select** various methods of powder manufacturing.

CO3: **Formulate** different tests to Measure various powder properties**.**

CO4: **Perform** compaction tecniques on powders produced**.**

CO5: **Perform** Sintering operation on powders produced**.**

CO6: **Formulate** method to produce special powder metallurgical products**.**

IV Learning Scheme:

Classroom Learning (CL)	Tutorial Learning (TL)	Laboratory Learning (LL)	Self-Study Learning (SL)	Notional Learning Hours (NLH)	Credits
3	-	2	1	6	3

V Assessment Scheme:

Classroom Learning				Tutorial/Laboratory Learning				Self-Study Learning	
FA	SA	Total		FA		SA		SA	
Max	Max	Max	Min	Max	Min	Max	Min	Max	Min
30	70	100	40	25	10	25+	10	25	10

VI Classroom Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Cognitive Domain)		Topics and Sub-topics		Aligned Cos
UNIT I: Introduction	1a	Compare given manufacturing processes	1.1	Principle of process, Applications,Comparison with other manufacturing process, Advantages and limitations, Classification of powder manufacturing methods	CO1
UNIT II: Production Of Metal Powder	2a	Select suitable powder manufacturing process for given application	2.1	Various powder manufacturing processes with description and characteristics :- a.Machining b.Crushing c.Milling d.Water and gas atomization e.Condensation f.Thermal decomposition g.Reduction method h.Electro deposition i.Sol – gel method	CO2
racteristics And Metal Powder	3a	Select suitable particle measurement techniques	3.1	Particle size, and its importance,Particle size measurement techniques and Methods of analysis:-a.Sieving Method b.Sedimentation Method,c.Elutriation Method	CO3

UNIT III: Cha Testing Of P	3b	Identify differnt types of powder particles	3.2	Particle characteristics:- Particle shape, Specific Surface, Apparent Density, Tap Density, Flow Rate, Green Density, Green Strength, Pressing Properties	
UNIT IV: Powder Conditioning And Compaction	4a	Identify different powder shaping techniques	4.1	Powder Conditioning – Preliminary Heat Treatment, Blending Process	CO4
	4b	Analyze the role of lubrication in tooling system in powder metallurgy process	4.2	Powder Compaction – Classification, Pressureless shaping technique	
	4c	Select suitable Compaction techniques for given powders	4.3	Cold pressure shaping technique – Die compaction, Die compaction technique, Isostatic Pressing, Explosive Forming, Powder Rolling, Cycle Compacting, Powder Extrusion	
	4d	Select suitable shaping technique for given powder	4.4	Pressure shaping technique with heat – Hot pressing, hot isostatic pressing, Sinter forging, Hot rolling	
	4e	Select suitable heat treatment for given powder metallurgy component	4.5	Powder Compaction - Role of lubrication, Tooling System Presses	
UNIT V: Sintering	5a	Select suitable Sintering Furnaces	5.1	Introduction, Stages of Sintering, Mechanism of Sintering, Liquid Phase Sintering, solid state sintering, spark sintering, activated sintering	CO5
	5b	Analyze the effects given sintering atmosphere in powder production process	5.2	Sintering Furnaces, Classification of Sintering Furnaces, Sintering Atmosphere, Advantages and disadvantages of sintering	
wder Metallurgical rials	6a	Select suitable Manufacturing method for given powder material	6.1	Bearing Materials – Types, Methods of production, Properties of Oil Impregnated Bearings	
	6b	Select suitable manufacturing methods to produce Tool material	6.2	Sintered Friction Materials – Manufacturing method, Properties, Formulation, Applications	

UNIT VI: Special Pc Mate	6c	Identify given type of bearing Material for particular application	6.3	Production of magnetic materials,Tool Materials – Production, Application	CO6
	6d	Apply Additive manufacuring for given powder metallurgical application	6.4	Additive Manufacturing (AM) in powder metallurgy and its application	

VII Laboratory Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Psychomotor Domain)		Hours	Aligned COs
I	1	Collect various metal powders and analyze its properties	2#	CO1
I	2	Perform filling operation for production of aluminum/copper/steel metal powder	2#	CO1
II	3	Perform grinding operation for production aluminum/copper/steel metal powder	2#	CO2
II	4	Perform machining operation for production of aluminum/copper/steel metal powder	2#	CO2
II	5	Produce metal powders of different metals using various powder production processes	2#	CO2
III	6	Determine Flow rate of metal powders	2#	CO3
III	7	Determine Apparent density metal powders	2#	CO3
III	8	Determine tap density of metal powders	2#	CO3
IV	9	Perform Separation of magnetic powder materials from other materials	2#	CO4
IV	10	Perform Compaction of metal powder	2#	CO4
V	11	Carry out Sintering of Compacts	2#	CO5
V	12	perform preliminary heat treatment for Powder metallurgy parts	2#	CO5
VI	13	Perform blending and mixing of various powder	2#	CO6
VI	14	seggragate different metal powder particles based on their size	2#	CO6
VI	15	seggragate different metal powder particles based on their shape	2	CO6
VI	16	seggragate different metal powder particles based on their colour	2	CO6

Note: # Compulsory

VIII Self-Study Learning (SLO in Cognitive/Psychomotor/Affective Domain)

1. Prepare survey on powder metallurg history and prepare report on it
2. Collect samples of different types of metal powders and prepare report on it
3. Perform market survey related to cost of various powder metallurgy components
4. Prepare a report on electrical energy consumption used in Production Of Metal Powder
5. Prepare micro project on given topic
6. Prepare report on role of lubricants in powder metallurgy techniques
7. Analyze common issues in powder metallurgy processes and propose appropriate solutions.
8. Prepare report on safety protocols during all practical activities in the powder manufacturing
9. Prepare model on any powder manufacturing technique
10. Prepare comparative charts for powder shaping techniques and write a report on it
11. Find tap density and apparent density of given powder based on given data
12. Prepare comparative charts on various powder metallurgical components

COURSE CURRICULUM

Program	:	Diploma in MT
Course Category	:	DSC
Course Code	:	MT204H
Course Title	:	Mineral Dressing

I Rationale:

Mineral/ore beneficiation is crucial for diploma students in Metallurgical Engineering in India to enhance resource efficiency, reduce waste, and ensure sustainable mining practices. This knowledge helps in optimizing the extraction of valuable minerals, improving economic viability, and minimizing environmental impact. Understanding advanced beneficiation techniques is essential for modern metallurgical processes and industry applications

II Industry Identified Competency:

The Student will be able to do in Industry at entry level:

Apply Mineral processing technique

III Course Outcomes (COs):

After completing this course students will be able to:

CO1: **Select** suitable Mineral/Ore dressing technique for specific application.

CO2: **Utilize** communition methods in mineral dressing

CO3: **Utilise** Flow sheet for ore beneficiation

CO4: **Perform** reduction of ore/mineral in Ball mill

CO5: **Perform** Magnetic separation of metals /alloys

CO6: **Perform** screening /sieving of dressed ore/metals

IV Learning Scheme:

Classroom Learning (CL)	Tutorial Learning (TL)	Laboratory Learning (LL)	Self-Study Learning (SL)	Notional Learning Hours (NLH)	Credits
3	-	2	1	6	3

V Assessment Scheme:

Classroom Learning				Tutorial/Laboratory Learning				Self-Study Learning	
FA	SA	Total		FA		SA		SA	
Max	Max	Max	Min	Max	Min	Max	Min	Max	Min
30	70	100	40	25	10	25+	10	25	10

VI Classroom Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Cognitive Domain)		Topics and Sub-topics		Aligned Cos
UNIT I: Introduction To Mineral Dressing:	1a	comment on status of mineral beneficiation industry in inda	1.1	Ores, Minerals and their properties, necessity and advantages. mineral dressing.- definition, objectives, advantages, Ore dressing.- definition, objectives ,advantages,Status of mineral beneficiation industry in India, Study of some representative practices with flow sheets	CO1
	1b	Identify factors affecting ore beneficiation	1.2	Ore beneficiation, Recovery ratio of concentration , flow sheets for ore beneficiation, Factors affecting ore beneficiation	
echniques	2a	Identify given Comminution methods	2.1	Classification of Comminution methods. Primary and secondary techniques, Size reduction units: crushing and Grinding, Reduction ratio, laws of Comminution	

UNIT II: Comminution Te	2b	Compare given crushers on basis of given points	2.2	Jaw crusher, Gyratory crusher, cone crusher - working principle, construction, advantages, disadvantages and applications. Their comparison	CO2
	2c	Compare given mills on basis of given points	2.3	Ball mill, Rod mill and pulveriser: working principle, construction advantages, disadvantages and applications. Their comparison	
UNIT III: Screening, Sizing And Classification	3a	Select screening and sizing Operations for given application	3.1	Principles units and performance, thickeners, hydro cyclones-thei working principle,application.Standards screening tests and graphical representation of results	CO3
UNIT IV: Gravity Concentration Methods	4a	Analyse the effect of given factors on jigging operation	4.1	Jigging- principles controlling factors in operation and selective applications	CO4
	4b	Analyse the effect of given factors on tabling operation	4.2	Tabling- principles controlling factors in operation and selective applications	
	4c	Analyse the effect of given factors Heavy media separation	4.3	Heavy media separation- principles controlling factors in operation and selective applications	
UNIT V: Froth Floatation	5a	Justify role of following given in flotation process	5.1	natural and artificial floatability, Collectors, frothers, depressors, activators and modifiers- their types and role in floatation process. Conditioning of process	CO5
	5b	Identify role of given factors on flotation process	5.2	Floatation units and variable affecting froth floatation Representative practices of sulphides non - sulphides and non metallic ores	

	5c	Suggest methods for Beneficiation of Low graphite ores	5.3	Beneficiation of Low graphite ores using Column flotation method	
UNIT VI: Magnetic And Electrostatic Separation	6a	Use suitable separator for given mineral dressing operation	6.1	Magnetic separator : working Principles of magnetic separator, construction operation advantages, disadvantages and applications. and units used in practice and examples for industry	CO6
	6b	Compare given separators based on given points	6.2	Electrostatic separator: working Principles of magnetic separator, construction , operation , advantages, disadvantages and applications,Comparison of magnetic and electrostatic separation	
	6c	Apply Biobeneficiation in given mineral dressing process	6.3	Recent Advancements: introduction to High-Intensity Magnetic Separators,Sensor-Based Ore Sorting,Bio-beneficiation	

VII Laboratory Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Psychomotor Domain)		Hours	Aligned COs
I	1	Identify types of ore (Part I)	2#	CO1
I	2	Perform size reduction of ores in jaw crusher	2#	CO1
II	3	Identify types of ore (Part II)	2#	CO2
II	4	Perform size reduction of ores in Rod mill	2#	CO2
III	5	Identify types of ore (Part III)	2#	CO3
III	6	Perform size reduction of ores in Ball mill	2#	CO3
III	7	Identify types of ore (Part IV)	2#	CO3
IV	8	Perform size reduction of ores in Roll crusher.	2#	CO4
IV	9	Carry out Froth flotation process.	2#	CO4
IV	10	Collect and separate different particles settled after froth flotation process	2#	CO4
V	11	Perform tabbling operations for screening and sizing operation of ores	2#	CO5
V	12	Collect and Classify the different sized particles obtained tabling operation	2#	CO5
V	13	Perform Jigging operations for screeningand sizing operation of ores	2	CO5
V	14	Collect and Classify the different sized particles obtained jigging operation	2	CO5
VI	15	Perform magnetic separation of ore/minerals.	2#	CO6
VI	16	Perform electrostatics separation of minerals/ores.	2#	CO6
VI	17	Perform beneficiation of low graphite ore using column flotation method	2#	CO6

Note: # Compulsory

VIII Self-Study Learning (SLO in Cognitive/Psychomotor/Affective Domain)

1. Prepare survey report on history of mineral dressing industries in india
2. Perform market survey on different ore/mineral dressing processes and write a report on it
3. Prepare poster/chart on different size, shape and size distribution of metal powders produced in communuition techniques
4. Prepare a report on electrical energy consumption used mineral /ore beneficiation process
5. Perform magnetic and electrostatic separation of minerals/ores and submit a report on it
6. Collect differnt types of ores /minerals and and prepare report on it
7. Perform internet survey for mineral/ore beneficiation used in metallyrgical industry worldwide and write a report on it
8. Prepare report based on curricullum and submit a report on it
9. Produce different types of metal powders using communuition techniques and submit a report on it
10. Perform electrostatic separation of minerals/ores for various application and submit a report on it

IX Specification Table for Classroom Learning Assessment:

Unit No.	Units	Classroom Learning Hours	C/O	Levels from Cognition Process Dimension			Total Marks
				R	U	A	
1	Introduction To Mineral Dressing:	8	C	04	04	00	8

COURSE CURRICULUM

Program	:	Diploma in MT
Course Category	:	SEC
Course Code	:	MT251H
Course Title	:	Metallurgical Workshop

I Rationale:

A metallurgical workshop offers crucial hands-on experience with metals and alloys, bridging theoretical knowledge and practical application. It enhances understanding of material properties, processing techniques, and quality control. This exposure is vital for developing skilled technicians, meeting the industry's growing demands, and fostering innovation. Such workshops prepare students for diverse career opportunities in India's expanding metallurgical sector.

II Industry Identified Competency:

The Student will be able to do in Industry at entry level:

Use different engineering tools for performing shop floor activities.

III Course Outcomes (COs):

After completing this course students will be able to:

CO1: **Follow** safety rules and regulations in different metallurgical workshop/labs.

CO2: **Identify** various tools and achines in metallurgical workshop.

CO3: **Operate** spinning lathe.

CO4: **Operate** power press and hydraulic press

CO5: **Prepare** jobs on machine in metallurgical workshop.

IV Learning Scheme:

Classroom Learning (CL)	Tutorial Learning (TL)	Laboratory Learning (LL)	Self-Study Learning (SL)	Notional Learning Hours (NLH)	Credits
-	-	4	-	4	2

V Assessment Scheme:

COURSE CURRICULUM

Program	:	Diploma in CE/ME/EE/AE/CM/TX/PK/MT/TR/AI/MK
Course Category	:	VEC
Course Code	:	VE252H
Course Title	:	Yog and Meditation

I Rationale:

The biggest challenge to student success is stress management, health management, sleep difficulties and depression. World Health Organization (WHO) emphasizes yog and meditation to prevent physical and mental stress. The prime objective of this course is a holistic development of mind and body by incorporating four primary components: physical exercises, breathing exercises, deep relaxation techniques and meditation. The daily practice of the course will prepare student to gain more physical, mental and emotional strength. This course supports the requirements of the National Education Policy (NEP).

II Industry Identified Competency:

The Student will be able to do in Industry at entry level:

Practice Yog and Meditation in daily life.

III Course Outcomes (COs):

After completing this course students will be able to:

CO1: **Improve** Physical strength, balance and flexibility.

CO2: **Enhance** concentration and retain memory.

CO3: **Increase** energy flow within body and develop positive attitude.

CO4: **Support** stress management, mental health and ensure quality sleep.

CO5: **Develop** healthy eating habits and physical & mental hygiene.

CO6: **Maintain** a balanced metabolism and boost immunity.

IV Learning Scheme:

Classroom Learning (CL)	Tutorial Learning (TL)	Laboratory Learning (LL)	Self-Study Learning (SL)	Notional Learning Hours (NLH)	Credits

Max	Max	Max	Min	Max	Min	Max	Min	Max	Min
-	-	-	-	25	10	25	10	25	10

VI Classroom Learning Content:

VII Laboratory Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Psychomotor Domain)		Hours	Aligned COs
I	1	Introduction to Yog (Anatomy of Body) and know importance of Yog. Measure weight & height. Calculate BMI (Body Mass Index).	1#	CO1
I	2	Practice Sharirsanchalan, Padasanchalan. Practice basic asana: Uttitvivekasana (Standing Poses :Minor Exercises of Hands and Leg).	1#	CO1
I	3	Repeat day two. Practice Sharirsanchalan of Back (Reclining poses: Minor excercise of Back). Practice Pavanamuktasana.	1#	CO1
I	4	Repeat day two & three. Practice Ashtanga Yog (Yama, Niyam, Asan, Pranayam, Pratyahar). Prepare a Diet Plan for self. Ashtanga Yog in details.	1#	CO1
I	5	Repeat day two, three & four. Practice Sharirsanchalan of Stomach and Bhuja.	1#	CO1
I	6	Repeat day two. Practice Standing Poses Asana: Tadasana,Vrukshasana, Trikonasan, Hastapadasan.	1#	CO1
I	7	Repeat day three. Practice Reclining Poses Asana:Pavanamuktasana,Noukasana. Sandhisanchalana of neck,heap,	1#	CO1
I	8	Repeat day seven. Practice Sandhisanchalana of neck & heap.	1#	CO1

I	9	Repeat day eight. Practice Reclining Poses Asanas: Setubandhasana,Chakrasana,Halasana.	1#	CO1
I	10	Repeat day five. Practice Seated Poses Asanas : Padmasana, Aakarnadhanurasana, Ardhtitali, Purnatitali.	1	CO1
I	11	Repeat day two. Practice 12 poses of Surya Namaskara slowly with pace.	1#	CO1
I	12	Repeat day two. Practice 12 poses of Surya Namaskara in continuation (maximum repeatation as per capacity)	1	CO1
I	13	Practice Sandhisanhalan of feet, neck, hands, joints eyes etc. Practice Seated Poses asanas :Padmasana, Pacchimottanasana, Vakrasana, Gomukhasana	1	CO1
II	14	Introduction of Pranayama and know its benefits. Practice Dirghashwasan, Anulom Vilom and Agnisara.	1	CO2
II	15	Repeat day fourteen. Practice Kapalbharti and Nadi Shodhan Pranayama.	1	CO2
II	16	Practice Sharirsanchalan. Repeat day fifteen. Practice 5 types of Nadi Shodana Pranayama.	1	CO2
II	17	Repeat Sharirsanchalana and day sixteen. Practice Shitali Pranayama, Sitakari Pranayama, Sadanta Pranayama.	1#	CO2
III	18	Repeat Sharirsanchalana. Practice basic Pranayamas. Introduction to Bandhas and know about Mulbandha, Jalandhar Bandha.	1	CO3
III	19	Repeat Sharirshanchalan and day eighteen. Practice Udiyana bandha and Maha bandha.	1	CO3
III	20	Repeat day sixteen. Practice Bhastrika Pranayam:type 1 and 2.	1	CO3
III	21	Repeat Sharirsanchalan and day 20. Practice Bhastrika Pranayam:type 3, 4 and 5.	1	CO3
IV	22	Repeat Sharirsanchalan and day 21. Practice Ujjaiyi Pranayam.	1#	CO4
IV	23	Repeat Sharirsanchalan and day 19, 20, 21 and 22. Practice Vyaghrasana.	1	CO4
IV	24	Repeat Sharirsanchalana and Suryanamaskara. Introduction to meditation and know about benefits of meditation. Practice concentration on Breathing (Inhalation & exhalation).	1#	CO4
V	25	Repeat day 24. Pratice Savasana (Relaxation Technique)	1#	CO5
V	26	Practice Sharirsahchalana. Know bout balancing techniques of body. Practice Mayurasana.	1	CO5
V	27	Repeat Sharirsanchalan and 12 poses of Suryanamaskara.	1	CO5

V	28	Introduction to Body Purification Method: Neti and know the steps & benefits of Neti.	1	CO5
VI	29	Practice Purification Method :Perform Neti,Jala Neti (Note: Should be done in the presence of guide)	1	CO6
VI	30	Measure weight. Recalculate BMI	1#	CO6

Note: # Compulsory

VIII Self-Study Learning (SLO in Cognitive/Psychomotor/Affective Domain)

1. Prepare a report on daily practice of yog and meditation by you. Attach Google tag photographs in the report.

COURSE CURRICULUM

Program	:	Diploma in CE/ME/EE/EC/CM/IT/AE/MT/PK/TX/MK/AI
Course Category	:	INP
Course Code	:	IN251H
Course Title	:	Basic Internship

I Rationale:

The Basic Internship course provides diploma students in engineering with a four-week summer vacation internship opportunity after the second semester. The internship encompasses various inter/intra-institutional activities aimed at skill development, innovation, and professional growth. Students engage in practical experiences within institutional settings and are evaluated based on their daily activities documented in a diary.

II Industry Identified Competency:

The Student will be able to do in Industry at entry level:

Apply theory, engage in diverse learning, develop soft skills, document, and present internship experiences.

III Course Outcomes (COs):

After completing this course students will be able to:

CO1: **Apply** theoretical knowledge in practical engineering challenges.

CO2: **Participate** in trainings, conferences, workshops, competitions, and institutional laboratories work to enhance learning.

CO3: **Develop** essential soft skills through training, workshops, conferences, competitions, and institutional laboratories work.

CO4: **Prepare** daily diaries and internship report for evaluation by faculty mentors.

CO5: **Present** internship report for evaluation by faculty mentors

IV Learning Scheme:

Classroom Learning (CL)	Tutorial Learning (TL)	Laboratory Learning (LL)	Self-Study Learning (SL)	Notional Learning Hours (NLH)	Credits
-	-	2	6	8	4

V Assessment Scheme:

Classroom Learning				Tutorial/Laboratory Learning				Self-Study Learning	
FA	SA	Total		FA		SA		SA	
Max	Max	Max	Min	Max	Min	Max	Min	Max	Min
-	-	-	-	-	-	-	-	50	20

VI Classroom Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Cognitive Domain)	Topics and Sub-topics	Aligned Cos

VII Laboratory Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Psychomotor Domain)		Hours	Aligned COs
I	1	Introduction to Real-World Engineering Challenges - Identify internship project area, Identify common engineering problems in related fields of engineering (Electrical, Civil, Computer etc.), Discuss with mentor on the importance of practical application of theoretical knowledge.	6#	CO1
I	2	Internship area Selection and Planning - Select internship area based on interests and skill sets, set objectives, define scope, and identify resources.	6#	CO1
I	3	Hands-On Internship Work - Work on selected area under the guidance of faculty mentor, provide regular feedback to mentor on progress of Internship and take guidance as needed.	30#	CO1

II	4	Participation in Training and Skill Enhancement - Participate in trainings/ conferences/ workshops/ competitions/ institutional laboratories work.	30#	CO2
III	5	Soft Skills Development - Attend sessions focused on developing essential soft skills such as communication, teamwork, and problem-solving, perfom role-playing exercises, group discussions, and interactive activities to enhance interpersonal skills.	18#	CO3
IV	6	Daily Diaries and Internship Report Preparation - Maintain daily diaries documenting their activities, challenges faced, and lessons learned during the internship.	10#	CO4
IV	7	Progress Review and Presentation Preparation - Compile internship experiences and outcomes into a comprehensive presentation, conduct practice sessions to refine presentation skills and ensure clarity and professionalism in delivery, Prepare internship report for submission to faculty mentors in prescribed format	10#	CO4
V	8	Internship Report Presentation - Present internship reports and Internship outcomes to faculty mentors and peers, Demonstrate presentation skills, technical knowledge, and Internship outcomes.	10#	CO5

Note: # Compulsory

VIII Self-Study Learning (SLO in Cognitive/Psychomotor/Affective Domain)

1. During the summer vacations, after the 2nd Semester, students are required to be involved in:
2. Inter/ Intra Institutional Activities viz; Training with higher Institutions; Soft skill training organized by Continuing Education Department.
3. Contribution at incubation/ innovation /entrepreneurship cell of the institute.
4. Participation conferences/ workshops/ competitions etc.
5. Learning at Departmental Lab/ Tinkering Lab/ Institutional workshop.
6. Working for consultancy/ research project within the institutes.
7. Join family business, (a declaration by a parent may be submitted directly to the Head of the Department.)

COURSE CURRICULUM

Program	:	Diploma in ME/EE/EC/CM/IT/PK/MT/AE/MK/TX/AI
Course Category	:	GE
Course Code	:	CE291H
Course Title	:	Civil Engineering Practices

I Rationale:

The engineering students should know the facts, concepts, principles and procedures in civil engineering. This course describes the basic knowledge related to civil engineering. It is very useful course for the students to visualize the Civil Engineering structures which helps to engineering students in their professional and personal life.

II Industry Identified Competency:

The Student will be able to do in Industry at entry level:

Use basic engineering Knowledge to solve the problems.

III Course Outcomes (COs):

After completing this course students will be able to:

CO1: **Identify** different types of buildings and their components.

CO2: **Identify** tools and Equipment used in construction activity.

CO3: **Identify** different components of Civil Engineering structures like Roads, Bridges, Railway Track.

CO4: **Identify** various components of Irrigation structures.

CO5: **Draw** flow diagram showing components of Water Supply Scheme & STP.

IV Learning Scheme:

Classroom Learning (CL)	Tutorial Learning (TL)	Laboratory Learning (LL)	Self-Study Learning (SL)	Notional Learning Hours (NLH)	Credits

**Online Objective Type

VI Classroom Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Cognitive Domain)		Topics and Sub-topics		Aligned Cos
UNIT I: Building Construction	1a	Identify the components of building with its function.	1.1	Components of Building - Foundation, Column, Beam, Plinth, DPC, Sill, Lintel, Chajja, Slab, Doors, Windows, Parapet, Stair.	CO1
	1b	Select the type of equipment for a given situation.	1.2	Tools & Equipments used - Hand tools; screwdrivers, brushes, trowels, wrenches, knives, crimpers, clamps, Trolleys etc. Power tools: Concrete mixers, saws, cutters, drills, grinders, guns, breakers, Concrete lift, vibrater, tower crane etc.	
	1c	Compare between load bearing and frames structure with given parameters.	1.3	Load bearing structures - Definition, Its components and use. Framed structure - Definition, Its components and use.	
/s	2a	Classify the roads.	2.1	Classification of roads (Nagpur plan and Lucknow plan), Urban Roads.	

UNIT II: Highway	2b	Identify the given cross section of road and its componenets.	2.2	Cross section of road showing its component as per IRC. Road margin, road formation, right of way, Kerbs.	CO2
	2c	Select the type of road in given situation.	2.3	Various technical terms- Camber, super elevation, curves, pavements and its types, road intersections.	
UNIT III: Bridge and Railway	3a	Identify the components of bridge with its functions.	3.1	Bridge - Definition, Component of Bridge and its function. Classification of bridges.	CO3
	3b	Mention the importance of given basic terms in bridge engineering	3.2	Basic terms: Scour, Afflux, Runoff, Economic Span, Clearance, and Freeboard.	
	3c	Mention the importance of given basic terms in bridge engineering	3.3	Rail track cross sections – standard cross section of Broad Gauge (BG) and Meter Gauge (M.G), Single and double line in cutting and embankment. Metro rail and Mono Rail – types, factors affecting selection.	
	3d	Select a rail gauge to be used under given situation with justification.	3.4	Component parts of Permanent ways - rails, sleepers, rail joints, ballast and fixtures.	
': Irrigation Engineering	4a	Justify the Scope and development of irrigation in India.	4.1	Definition of irrigation Concept, Necessity, Scope and development of irrigation in India. Hydrological Cycle, Types of irrigation schemes, single & multipurpose projects.	CO4
	4b	Classify irrigation scheme for given condition.	4.2	Crops and cropping seasons in Maharashtra- Kharif, Rabi, Hot weather & Perennial.	

UNIT IV	4c	Draw a labeled sketch of dams for given condition	4.3	Dams and its classification- Gravity and Earthen dams, their components, Bandhara, weirs, Barrages, Sprinkler and drip irrigation.	
UNIT V: Public Health Engineering	5a	Identify the impurities present in water and it's classification.	5.1	Surface and subsurface sources of water, water borne diseases, Impurities present in water and it's classification.	CO5
	5b	Identify the given units of water treatment plant.	5.2	Treatment of water, various units in Water Treatment Plant (WTP) and their function	
	5c	Identify the given units of sewage treatment plant and house drainage system.	5.3	House drainage system, sanitary fittings, Generation of wastewater. Treatment of waste water, its units and their functions.	

VII Laboratory Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Psychomotor Domain)		Hours	Aligned COs
I	1	Identify the various components of buildings with sketches / images.	02#	CO1
I	2	Prepare a report on tools and Equipment used in construction activity.	02#	CO2
I	3	Identify Load Bearing & Framed structures in the vicinity of area and prepare a report.	02#	CO1
II	4	Sketch the labeled cross section of roads mentioning various components and elements.	02#	CO3
II	5	Identify various types of roads in your area and prepare a report.	02#	CO3
III	6	Draw the labeled sketch of bridge mentioning functions of component parts.	02#	CO3
III	7	Identify various types of bridges in your area and prepare a report.	02#	CO3
III	8	Draw a labeled sketch of Railway Track mentioning the function of components.	02#	CO3
III	9	Identify various types of railway tracks in your area and prepare a report.	02#	CO3
IV	10	Identify various crops and cropping seasons in your area and prepare a report.	2	CO4
IV	11	Draw the sketches of various types of Dams with their circumstances .	02#	CO4
IV	12	Prepare a report on various methods of Irrigation.	02#	CO4
V	13	Draw flow diagram of water supply scheme & identify the various processes involved in it.	02#	CO5
V	14	Prepare a report on House drainage system.	02#	CO5
V	15	Draw flow diagram of sewage treatment plant & identify the various processes involved in it.	2	CO5

COURSE CURRICULUM

Program	:	Diploma in CE/EE/EC/AE/CM/IT/MK/AI/TX/PK/MT
Course Category	:	GE
Course Code	:	ME291H
Course Title	:	Elements of Mechanical Engineering.

I Rationale:

This course is generic elective course. This course describes elementary knowledge related to mechanical engineering, which are commonly used in any discipline of Engineering & Technology. This course will help the students to gain the basic knowledge of mechanical tools, power transmission, brakes, bearing, boiler, I. C. Engine, refregeration and air coditioning which will be helpful to them when they will go to the world of work.

II Industry Identified Competency:

The Student will be able to do in Industry at entry level:

Apply the Knowledge of Mechanical Engineering.

III Course Outcomes (COs):

After completing this course students will be able to:

CO1: **Identify** the components of transmition systems.

CO2: **Interpret** the working of braking systems and bearing.

CO3: **Recognize** the Engine parts and working of I.C.Engines.

CO4: **Interpret** the working of boilers along with their mountings and accessories

CO5: **Use** proper maintenance tools according to the situaion

CO6: **Interpret** the working of refrigeration and air conditionig.

VI Classroom Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Cognitive Domain)		Topics and Sub-topics		Aligned Cos
UNIT I: Power Transmission	1a	Suggest the application of given type of Belt drive.	1.1	Flat belt, V- belt, timing belt and its advantages & applications.	CO1
	1b	Suggest the application of given type of drive.	1.2	Chain drives, Rope drive Advantages & Disadvantages and applications.	
	1c	Justify the application of given type of Gear Drives.	1.3	Spur gear terminology, types of gears and gear trains, their selection for different application	
UNIT II: Brakes and Bearings.	2a	Identify the application of different types of brakes.	2.1	Function of brakes, types of brakes, Construction and working of i) shoe brake, ii) Band Brake, iii) Internal expanding shoe brake iv) Disc Brake. Various application of brakes.	CO2
	2b	Choose the proper Bearings for different conditions.	2.2	Bearings types - i) Simple Pivot, ii) Collar Bearing, iii) Conical pivot.	

UNIT III: Internal Combustion Engines	3a	Justify the need of given IC Engine .	3.1	Internal combustion engine: Necessity, Components and terminologies of I.C.engine. Classification & Fuels used for I.C. Engines, Applications of I.C. Engines.	CO3
	3b	Justify the use of given IC Engine for particular application	3.2	Construction, working principle & applications of Two stroke & four stroke engines. (Petrol & Diesel)	
	3c	Compare given types of engines on the basis of given parameters.	3.3	Comparison between: i)Two stroke & Four stroke engine ii) S.I. Enaine & C.I. Engine.	
UNIT IV: Boilers.	4a	Classify given types of boiler.	4.1	Classification of boilers fire tube boiler, water tube boiler advantages disadvantages.	CO4
	4b	Identify the different boiler Mountings and accessories.	4.2	Boiler Mountings and Accessories (Sketch, location and function)	
	4c	Identify the parts of La-Mount Boiler, Benson Boiler.	4.3	Construction and working of La-Mount Boiler, Benson Boiler.	
': Maintenance Tools	5a	Compare given type of tools on given points.	5.1	Cutting tools- files, drills, chisels, hacksaws- their types, specifications, applications & precautions while handling.	CO5
	5b	Justify the application of given maintenance tool.	5.2	Hammering tools- hammers, mallets- their types, specifications, applications & precautions while handling.	
	5c	Illustrate given maintenance tools with sketches.	5.3	Maintenance tools- screw drivers, pliers, spanners, wrenches- their types, specifications, applications & precautions while handling.	

UNIT V	5d	Identify the given Pneumatic tools.	5.4	Principle of working of Pneumatic tools, pneumatic tools like pneumatic drill and screw driver, air impact wrench, pneumatic staple gun,grease gun, brad nailer.	
	5e	Identify the given fasteners.	5.5	Fasteners (Nut, Bolt & Screws), their use and specification.	
UNIT VI: Refrigeration and Air conditioning System.	6a	Classify given type of Refrigeration system.	6.1	Clasification of Refrigeration system, vapour compresion system, Air absortion system. Construction and working of vapour compresion refrigeration system.	CO6
	6b	Identify application of Refrigeration system.	6.2	Various application of refrigeration in indusries.	
	6c	Identify the different components of air conditioning system.	6.3	Requirements of air conditioning systems. Working of Compressor, condenser, Expansion valve, Evaporator.	

VII Laboratory Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Psychomotor Domain)		Hours	Aligned COs
I	1	Identify various drives used in transmission system.	2#	CO1
II	2	Identify various types of brake.	2#	CO2
II	3	Identify various types of bearing.	2	CO2
II	4	Identify the parts of internal exponding brake.	2#	CO2
II	5	Identify the parts of disc brake .	2#	CO2
III	6	Identify the parts of I.C.Engine and run it.	2	CO3
III	7	Identify the parts of S.I..Engine and run it.	2#	CO3
III	8	Identify the difference between S.I. and C.I.Engine.	2#	CO3
IV	9	Identify the various type of boilers.	2#	CO4
IV	10	Identify various mountings of boiler.	2#	CO4
IV	11	Identify the parts of La-Mount Boiler.	2	CO4
V	12	Identify Fasteners (Nut, Bolt & Screws) and write its specifications.	2#	CO5
V	13	Identify various Cutting tools- files, drills, chisels, hacksaws- their types and write its specifications.	2#	CO5
VI	14	Identify different components of air conditioning systems.	2#	CO6
VI	15	Identify various components of vapour compression refrigeretion system.	2#	CO6

COURSE CURRICULUM

Program	:	Diploma in CE/ME/EC/CM/IT/AI/PK/MT/MK/TX/AE
Course Category	:	GE
Course Code	:	EE291H
Course Title	:	Electrical Generation, Transmission and Distribution

I Rationale:

This NEP-aligned multidisciplinary elective course equips diploma engineering students with essential knowledge in electrical engineering, covering fundamental concepts, principles, and procedures. It includes the basics of electrical generation, transmission, and distribution. This course offers a comprehensive foundation, fostering a well-rounded understanding crucial for various engineering disciplines, in line with the NEP's vision for holistic and interdisciplinary education.

II Industry Identified Competency:

The Student will be able to do in Industry at entry level:

Apply the Knowledge of basic electrical engineering.

III Course Outcomes (COs):

After completing this course students will be able to:

CO1: **Apply** basic laws of Electrical Engineering to solve basic DC circuits.

CO2: **Measure** various electrical quantities in AC circuit.

CO3: **Identify** various system in electrical power generation.

CO4: **Identify** various components in electrical power trasnmission system.

CO5: **Identify** various components in electrical distribution system.

IV Learning Scheme:

Classroom Learning (CL)	Tutorial Learning (TL)	Laboratory Learning (LL)	Self-Study Learning (SL)	Notional Learning Hours (NLH)	Credits
2	-	2	-	4	2

V Assessment Scheme:

Classroom Learning				Tutorial/Laboratory Learning				Self-Study Learning	
FA	SA	Total		FA		SA		SA	
Max	Max	Max	Min	Max	Min	Max	Min	Max	Min
30	70**	100	40	25	10	25	10	-	-

**Online Objective Type

VI Classroom Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Cognitive Domain)		Topics and Sub-topics		Aligned Cos
T I: Fundamentals of Electricity.	1a	Differentiate between given electrical parameters.	1.1	Concept of electric charge, current, voltage drop, EMF, potential difference, direction of current and their SI units. Resistance, unit of resistance, law of resistance (Factors affecting resistance), Effect of temperature on resistance, Ohms law.	CO1
	1b	Solve given electric circuit.	1.2	Resistance in series and parallel, properties of series circuit and parallel circuit, voltage distribution in series circuit, Current distribution in parallel circuit, equivalent resistance of series circuit, equivalent resistance of parallel circuit. Applications of series circuits and parallel circuits. Kirchhoff's current and voltage law.	

UNI	1c	Suggest the measuring instrument for measuring given electrical quantity.	1.3	Work, power, energy and their SI units, Relation between H.P and watts, Kwh and Kcal. Connection of ammeter, voltmeter and wattmeter in single phase AC circuit and its measurement.	
	1d	Compare given supply on a given parameter.	1.4	Concept of AC and DC supply comparison between AC and DC supply.	
UNIT II: AC Fundamentals	2a	Compare the given generation on basis of given points.	2.1	Generation of alternating voltage- single phase and three- phase.	CO2
	2b	Identify the different terminologies related to AC supply.	2.2	Equation of sinusoidal alternating voltage and current, important terminology such as- waveform, instantaneous value, cycle, time period, frequency, amplitude, Relation between time period and frequency, angular velocity and frequency, frequency and speed. Maximum, average and R.M.S. value of sinusoidal waveform, form factor and peak factor.	
	2c	Compare the given types of loads.	2.3	AC voltage applied to pure resistor, pure inductor, and pure capacitor. Concept of reactance, impedance and power factor, power in single phase circuit.	
	2d	Classify the different types of induced electromotive force.	2.4	Faraday's laws of electro-magnetic induction, Basic construction of transformer, Lenz's law, Fleming right hand rule, Induced EMF, statically induced EMF, dyanamically induced EMF, self-inductance, mutual-inductance.	
	2e	Compare the different types of induced EMF.	2.5	Dynamically and statically induced EMF, self and mutual induced Electromotive force and its inductances.	

UNIT III: Electrical Power Generation	3a	Identify the blocks of given power plants.	3.1	General layout, working and site selection of thermal power plant, hydroelectric power plant and nuclear power plant.	CO3
	3b	Identify different types of renewable energy sources.	3.2	Renewable energy sources- Solar Energy, wind Energy and its block diagram.	
	3c	Compare given power stations on the basis of given points.	3.3	Comparison between different generating stations with respect to sources of energy, site, initial cost, and running cost, pollution, efficiency, maintenance and stand by losses.	
UNIT IV: Electrical Power Transmission	4a	Classify transmission line on basis of given data.	4.1	Need of high voltage line, classification of transmission lines: on the basis of voltage and line length, single line diagram.	CO4
	4b	Compare different types of conductors.	4.2	Transmission Line Parameters, types of conductors (single and double circuits - solid, stranded and bundled conductors)	
	4c	Identify different effects related to transmission line.	4.3	Skin effect, Ferranti effect and Proximity effect.	
	4d	Suggest suitable components of given transmission line.	4.4	Conductors- desirable properties, types- copper, all aluminum (AAC), all-aluminum alloy. Line insulators: desirable properties of insulator materials, selection of material, types of insulators (For transmission and distribution lines), applications, causes of insulator failure.	
uition.	5a	Identify the different component of distribution line.	5.1	Introduction, feeders, distributor and service lines. Construction of overhead distribution lines, earth wire, guarding.	

UNIT V: Electrical Power Distrib	5b	Classify different distribution schemes on basis of given points.	5.2	Primary distribution systems & Secondary distribution systems, Types of different distribution schemes: Radial, ring mains and grid, layout, advantages, limitations & applications.	CO5
	5c	Identify given components of substation.	5.3	Introduction, classification of substations according to service & location, typical single line connection diagrams of substation layouts, 11 KV/0.415 KV pole mounted distribution substation.	

VII Laboratory Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Psychomotor Domain)		Hours	Aligned COs
I	1	Connect voltmeter, ammeter and wattmeter in electrical circuit.	2#	CO1
I	2	Measure the current, voltage and resistance with the help of multi-meter or tong tester.	2#	CO1
I	3	Calculate unknown resistance of DC series and parallel circuits.	2#	CO1
I	4	Calculate unknown parameter in electrical circuit using KCL & KVL.	2#	CO1
II	5	Calculate transformation ratio of single phase transformer.	2#	CO2
II	6	Find current response of pure resistive/ inductive/ capacitive circuit.	2	CO2
II	7	Measure power in single phase AC circuit.	2#	CO2
III	8	Identify the parts of nuclear fired thermal power plant after watching a video programme.	2#	CO3
III	9	Identify the parts hydroelectric power plant after watching a video programme.	2	CO3
III	10	Draw a schematic of micro hydro power plant.	2#	CO3
III	11	Identify the different components of solar PV system.	2#	CO3
IV	12	Identify different types of transmission and distribution line supports. Prepare report and draw it on sketch book.	2#	CO4
IV	13	Identify different types of overhead line insulators. Prepare report and draw it on sketch book.	2#	CO4
V	14	Prepare a visit report of 132 KV substation.	2	CO5
V	15	Prepare a visit report of 11 KV substation.	2#	CO5

Note: # Compulsory

COURSE CURRICULUM

Program	:	Diploma in CE/ME/EE/CM/IT/PK/AI/MT/MC/AE/TX
Course Category	:	GE
Course Code	:	EC291H
Course Title	:	Analog and Digital Electronics

I Rationale:

Analog and Digital Electronics form the foundation of modern electronic systems. Analog electronics deals with continuous signals and voltage levels, while digital electronics focuses on discrete signals and binary numbers. Students learn about to integrate analog and digital circuits to create electronic systems that meet specific requirement. Analog and Digital Electronics interface with various engineering disciplines. Students develop a multidisciplinary approach to problem solving and gain knowledge about electronic devices.

II Industry Identified Competency:

The Student will be able to do in Industry at entry level:

Apply the Knowledge of electronic components and circuits.

III Course Outcomes (COs):

After completing this course students will be able to:

CO1: **Select** given type of active and passive components for specific application.

CO2: **Choose** appropriate type of rectifier and filter.

CO3: **Select** given type of operational amplifiers.

CO4: **Implement** the basic logic gates using universal gates.

CO5: **Use** combinational and sequential logic circuits.

IV Learning Scheme:

Classroom Learning (CL)	Tutorial Learning (TL)	Laboratory Learning (LL)	Self-Study Learning (SL)	Notional Learning Hours (NLH)	Credits
2	-	2	-	4	2

Max	Max	Max	Min	Max	Min	Max	Min	Max	Min
30	70**	100	40	25	10	25	10	-	-

**Online Objective Type

VI Classroom Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Cognitive Domain)		Topics and Sub-topics		Aligned Cos
UNIT I: Active and Passive Components	1a	Identify the components from given types of components.	1.1	Active components - Definition and types, Passive components Definition and types	CO1
	1b	Classify the given types of passive components.	1.2	Passive components- Symbol, properties and applications of resistor, capacitor and inductor. Types of Resistors, Types of Capacitors, Types of Inductor	
	1c	Select given type of active component as per application.	1.3	Active components - Symbol of Diode and transistor. Diodes - Introduction and symbol of PIN diode, Varactor diode, Tunnel diode, Zener diode, LED a Photo diode.	
	1d	Interpret the working of given PN junction diode.	1.4	Diodes - Basic construction of PN junction diode, formation of PN junction, Depletion layer, Advantages, Disadvantages and applications.	

	1e	Choose given type of transistor.	1.5	Transistor - Basic construction of NPN and PNP transistor, Working principle, Advantages, Disadvantages and applications.	
UNIT II: Rectifiers and Filters	2a	Classify given type of rectifier.	2.1	Definition of rectifier.Types of rectifier–Half wave rectifier, Full wave center tapped rectifier, Full wave bridge rectifier.	CO2
	2b	Draw input and output waveforms of given rectifier.	2.2	Half wave rectifier– Circuit diagram, Waveforms, working principle, advantages and disadvantage.	
	2c	Choose given type of full wave rectifier as per requirement.	2.3	Full wave rectifier- Circuit diagram, Waveforms, working principle, advantages and disadvantages of center-tapped full wave rectifier and full wave bridge rectifier.	
	2d	Illustrate the working principle of given filter.	2.4	Definition and types of filter. Filters- Circuit diagram and working principle of series inductor, shunt capacitor, LC filter, PI filter.	
UNIT III: Operational Amplifiers	3a	Identify given symbol of operational amplifier.	3.1	Introduction to Op-amp, OP-amp symbol and terminals, Equivalent circuit.	CO3
	3b	Interpret the pin diagram and functions of given op-amp I.	3.2	Operational amplifier IC 741 – Pin diagram and pin function.	
	3c	Illustrate the working of given block diagram.	3.3	Block diagram of Operational amplifier and function of all stage.	
	3d	Select given type of operational amplifiers.	3.4	Circuit diagram and working principle of Inverting amplifier and Non Inverting amplifier.	
	3e	Select operational amplifier for given applications	3.5	Circuit diagram and working principle of Adder and subtractor	
: Gates	4a	Compare analog and digital systems on given points.	4.1	Introduction to digital signal, Advantages of Digital System over analog systems.	

UNIT IV: Number System and Logic	4b	Differentiate given number systems.	4.2	Number Systems: Different types of number systems Decimal, Binary, Octal, Hexadecil.	CO4
	4c	Identify given logic gates.	4.3	Logic gates: Basic gates – AND, OR, NOT gate. Derived Gates – NAND, NOR, EX- OR, EX-NOR gate.	
	4d	State the De Morgan's theorems.	4.4	De Morgan's theorems. Statement and Proof.	
	4e	Implement given basic logic gate using universal gates.	4.5	Universal Gates: NAND and NOR as Universal gate. Implementation of basic logic gates using NAND an NOR gate.	
UNIT V: Combinational and Sequential Circuits	5a	Design given K-maps.	5.1	Karnaugh Map representation of Logic Functions using Truth table (2 variables, 3 variables, 4 variables) Canonical SOP and POS and Don't Care condition.	CO5
	5b	Illustrate the working of given multiplexer and demultiplexer.	5.2	Multiplexers (MUX) and De-multiplexer (DEMUX): Block diagram, truth table, logic expression and logic diagram of 2:1, 4:1 MUX and 1:2,1:4 DEMUX.	
	5c	Distinguish given flip flops.	5.3	Flip Flops - S R Flip flop, JK flip flop, D-Type flip-flop, T-Type flip flop (Block diagram, truth table and logical expression and application.	
	5d	Select given shift register for specific applications.	5.4	Introduction to Registers, Types of Shift Registers, Applications of Shift register.	
	5e	Classify given types of counter.	5.5	Classification and applications of counter.	

VII Laboratory Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Psychomotor Domain)		Hours	Aligned COs
I	1	Identify various active and passive components.	2#	CO1
I	2	Test resistor, capacitor and inductor using digital multimeter and LCR-Q meter	2#	CO1
I	3	Test PN junction diodes using digital multimeter.	2#	CO1
I	4	Test transistors using digital multimeter.	2	CO1
II	5	Build the half wave rectifier circuit on breadboard and draw input-output waveforms.	2#	CO2
II	6	Build the full wave bridge rectifier circuit with PI filter on breadboard and draw input-output waveforms.	2#	CO2
III	7	Build inverting amplifier circuit on breadboard and observe input-output waveforms on CRO.	2#	CO3
III	8	Build non-inverting amplifier circuit on breadboard and observe input-output waveforms on CRO.	2#	CO3
IV	9	Test the behaviour of different logic gates by using truth table.	2#	CO4
IV	10	Assemble various basic gates using universal gates and relate it with truth table.	2#	CO4
V	11	Build and test the functions of MUX IC 74151.	2#	CO5
V	12	Build and test the functions of DEMUX IC 74155.	2#	CO5
V	13	Construct and test functions of D flip flop using IC 7476.	2#	CO5
V	14	Construct and test functions of T flip flop using IC 7476.	2	CO5

XVI List of Major Equipment/Machineries with Specification:

1. Digital Multi-meter.
2. Cathode ray oscilloscope- 0 to 30MHz.
3. Function Generator–0-5MHz.
4. Regulated Power Supply - 0-30 V
5. Photodiode, Varactor diode, Tunnel diode, Zener diode.
6. Logic Gates ICs (7400,7402,7404,7408,7432,7486)
7. Multiplexer and De multiplexer IC (74150,74151,74138,74139)
8. Flip Flops ICs (7472,7474,74H71,74L71)
9. Breadboard and LEDs

XVII List of Industry Experts and Faculties who contributed for this curriculum:

COURSE CURRICULUM

Program	:	Diploma in CE/ME/EE/EC/PK/MT/MC/AE/TX
Course Category	:	GE
Course Code	:	IT291H
Course Title	:	Applied Multimedia Techniques

I Rationale:

Multimedia provides the benefit of interactive learning. Multimedia is utilized in various fields including education, entertainment, communication, game design, and digital art, reflecting its broad impact on modern technology and media to create presentations and visualization extensively. This course aims to produce graduates with a versatile skill set, ready to tackle the challenges posed by multimedia-rich environments in various professional settings and also used in various fields like education, training, reference material, business presentations, advertising and documentaries.

II Industry Identified Competency:

The Student will be able to do in Industry at entry level:

Use various multimedia tools and software for various application.

III Course Outcomes (COs):

After completing this course students will be able to:

CO1: **Select** variety of multimedia tools and software for image editing efficiently.

CO2: **Use** vector graphics to design various tools like 2D,3D rendering images and logos orderly.

CO3: **Apply** the skills of multimedia presentation software to create user interfaces for improved user experiences.

CO4: **Apply** multimedia techniques for data visualization, effectively communicating complex information through interactive elements.

CO5: **Apply** the multimedia concepts for capturing photographs to provide improved visualization.

IV Learning Scheme:

Classroom Learning (CL)	Tutorial Learning (TL)	Laboratory Learning (LL)	Self-Study Learning (SL)	Notional Learning Hours (NLH)	Credits
2	-	2	-	4	2

V Assessment Scheme:

Classroom Learning				Tutorial/Laboratory Learning				Self-Study Learning	
FA	SA	Total		FA		SA		SA	
Max	Max	Max	Min	Max	Min	Max	Min	Max	Min
30	70	100	40	25	10	25	10	-	-

VI Classroom Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Cognitive Domain)		Topics and Sub-topics		Aligned Cos
UNIT I: Introduction	1a	Select the steps to install the GIMP.	1.1	Introduction to GIMP, overview of the software, installation and setup.	CO1
	1b	Select the different tools available on GIMP workspace.	1.2	Exploring the workspace: toolbars, panels and navigation tools: shortcuts keys, navigation control and dialog.	
	1c	Select the uses of Layers based on given point.	1.3	Explore the layers, using the zoom and hand tools.	
	1d	Select the different basic Image adjustments on given parameter.	1.4	Basic image adjustments, removing backgrounds using selection tools: rectangle select, ellipse select and free select.	
	1e	Specify the Advanced Background Removal Techniques.	1.5	Advanced Background Removal Techniques, Cropping, Resizing, and Rotating Images.	

UNIT II: Vector Graphics	2a	Compare the given features of vector graphics on given point.	2.1	Introduction to vector graphics: raster image (gif, png, jpg) and vector image (svg).	CO2
	2b	Identify the basics of given vector graphics software.	2.2	Overview of Blender software and Inkscape software.	
	2c	Select the vector graphics tools on given point.	2.3	Vector graphics tools: points, lines, curves, and shapes.	
	2d	Create a vector graphics image on the basis of given parameter.	2.4	Vector graphics image creation: design, choose a tool, create shapes edit and modify, save and export.	
	2e	Select the given tools for vector graphics based on given point.	2.5	2D and 3D rendering design in vector graphics.	
UNIT III: Presentation Software	3a	Analyse the multimedia presentation software.	3.1	Introduction: ppt, canva managing slides, templates and presentations.	CO3
	3b	Apply the dependencies and libraries of ppt.	3.2	Enable dependencies and slide Library of ppt, macros, cascade, slide sorter.	
	3c	Choose the tools for the given presentation.	3.3	Design layout, browse for themes, background styles and insertion- charts, clipart, tools-textbox, header footer.	
	3d	Use animation techniques on given points.	3.4	Using custom animations-transition sound and speed, video and images.	
	3e	Create the given multimedia presentation.	3.5	Protect presentation, adding and managing comments.	
Video Editing	4a	Analyse the given Audio and video Editing softwares.	4.1	Introduction of Audio/video: Color correction, audio post-production, voice altering effects, text and image tracking.	
	4b	Use given softwares for Audio and video Editing.	4.2	Overview of Audacity, Adobe Audition, and OBS (Open Broadcaster Software).	

UNIT IV: Audio and V	4c	Apply the given techniques for Audio Editing.	4.3	Audio Editing Techniques: trimming, adjusting volume, adding sound effects, waveform editing.	CO4
	4d	Apply the given techniques for video Editing.	4.4	Video Editing Techniques: color correction, color grading, cutaways, cutting on action.	
	4e	Apply Audio/video Editing softwares on the basis of given softwares.	4.5	Applications of Audio/video Editing softwares: adobe premier rush, cyber link powerdirector 365.	
UNIT V: Photography with Camera	5a	Analyse the basics of photography and camera on given scenario.	5.1	Introduction to photography: basics photography, working of camera: light, focus, record, shutter, process,n store and view.	CO5
	5b	Analyse the given functions of camera for photography.	5.2	Functions of camera: capturing images, storing images, controlling image quality and controlling motion.	
	5c	Classify the given techniques of given multimedia photography.	5.3	Techniques of basic photography: composition, Aperture, background, exposure, Histogram.	
	5d	Apply the given photography modes on camera.	5.4	Basic photography modes: auto mode, manual mode, program mode.	
	5e	Apply the given advanced modes on camera.	5.5	Advanced camera modes: Shutter-priority mode, shutter speed, ISO, Macro mode.	

VII Laboratory Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Psychomotor Domain)		Hours	Aligned COs
I	1	Install GIMP and explore various tools for editing of images.	2#	CO1
II	2	Design simple logos or icons using vector graphics software like Blender or Inkscape.	2#	CO2
II	3	Create raster and vector images using vector graphics software like Blender or Inkscape.	2#	CO2
III	4	Create custom animation-based presentation using transition speed and sound, images, and videos.	2#	CO3
III	5	Develop a presentation based on given dependencies and Libraries of the software.	2#	CO3
III	6	Develop a layout using theme, background styles etc. tools.	2#	CO3
III	7	Develop a multimedia presentation using software like Canva etc.	2#	CO3
IV	8	Install the open broadcaster software and explore various tools of it for audio and video editing.	2#	CO4
IV	9	Use Audio and video techniques for editing using OBS.	2#	CO4
IV	10	Use Audio and video techniques for editing using Adobe premier-rush or Cyberlink powerdirector 365.	2#	CO4
V	11	Use different functions of digital camera or smartphone to take photographs.	2#	CO5
V	12	Apply different modes digital camera or smartphone to click photographs for multimedia purposes.	2#	CO5
V	13	Apply advanced camera modes to edit photographs.	2	CO5
V	14	Create animated presentation based on real-world application using all dependencies and libraries of Microsoft Powerpoint presentation.	2	CO5
V	15	Prepare multimedia project using canva software based on real-world scenario.	2	CO5

VIII Self-Study Learning (SLO in Cognitive/Psychomotor/Affective Domain)

IX Specification Table for Classroom Learning Assessment:

Unit No.	Units	Classroom Learning Hours	C/O	Levels from Cognition Process Dimension			Total Marks
				R	U	A	
1	Introduction	6	C	02	04	04	10
			O	0	0	0	0

COURSE CURRICULUM

Program	:	Diploma in CE/ME/EE/CM/IT/PK/AIML/MK/AE/TX
Course Category	:	GE
Course Code	:	MT291H
Course Title	:	Foundry Technology

I Rationale:

A Foundry Technology course equips diploma students in India with essential skills in casting and metalworking, crucial for the manufacturing sector. It bridges the gap between theoretical knowledge and practical application, fostering expertise in metal production, quality control, and industrial processes. This specialization meets the growing demand for skilled professionals in automotive, aerospace, and infrastructure industries, driving economic growth and technological advancement

II Industry Identified Competency:

The Student will be able to do in Industry at entry level:

Perform casting and foundry operations

III Course Outcomes (COs):

After completing this course students will be able to:

CO1: **Use** various patterns in foundry

CO2: **Construct** various core bores

CO3: **Construct** Moulds and Patterns for castings

CO4: **Perform** various tests on moulding sand to find its suitability in foundry applications

CO5: **Produce** castings of different metals/alloys for various applications

IV Learning Scheme:

Classroom Learning (CL)	Tutorial Learning (TL)	Laboratory Learning (LL)	Self-Study Learning (SL)	Notional Learning Hours (NLH)	Credits
2	-	2	-	4	2

V Assessment Scheme:

Classroom Learning				Tutorial/Laboratory Learning				Self-Study Learning	
FA	SA	Total		FA		SA		SA	
Max	Max	Max	Min	Max	Min	Max	Min	Max	Min
30	70**	100	40	25	10	25	10	-	-

**Online Objective Type

VI Classroom Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Cognitive Domain)		Topics and Sub-topics		Aligned Cos
UNIT I: PATERN AND PATTERN MAKING	1a	Select suitable manufacturing process for given appliaction	1.1	Various manufacturing processes, Steps involved in Making a Casting. Advantages of metal casting, Applications of Metal Casting, Different sections of a Foundry, types of foundry Function of pattern, Difference between pattern and casting	CO1
	1b	Identify given ISI coloring code on pattern	1.2	various types of pattern materials. Types of patterns, Pattern allowances,Steps involved in pattern construction, ISI coloring code on pattern	
ORE AND CORE AKING	2a	Select proper core making machine for given application	2.1	Function of core, core applications, Core sand properties , Core sand ingredients	
	2b	Choose proper core sand ingredients for making of core	2.2	Core materials ,core sand mixture, Core making procedure , Types of core, Core prints	CO2

UNIT II: C M	2c	Choose proper Core making machines for making of core	2.3	Core making machines, core baking and machining operations on cores,Core shifting and Chaplet, Core applications, Construction of core box	
UNIT III: MOULD AND MOULD MAKING	3a	Select proper moulding sand for mold making	3.1	Functions of mould, Mould materials-sand, binder, water, additives, etc Types of Moulding sands and their Properties	CO3
	3b	Sequece correct steps in sand preperation.	3.2	Moulding sand preparation and conditioning (a) objectives of sand preparation (b) Steps for sand preparation (c) Working of sand Muller	
	3c	Choose proper sand control test for mould making.	3.3	Sand control tests- (a) Moisture content test (b) Clay content test (c) Grain fineness test	
	3d	Select proper steps in mold making	3.4	Steps involved in mould making, mould making machines, Moulding methods, hand Moulding tools,venting of moulds. Mould -metal reaction	
UNIT IV: SOLIDIFICATION OF CASTINGS	4a	Identify given types of solidification	4.1	Concept of solidification of metals	CO4
	4b	Select proper gating system to obtain sound casting	4.2	GATING system: - function of each component of the gating system pressurized and unpressurised ,RISER - Function of risers, types of riser	
MELTING PRACTICE	5a	Select Furnaces for melting ferrous and non-ferrous metals.	5.1	Furnaces for melting ferrous and non-ferrous metals	CO5
	5b	Identify given Zones of Cupola	5.2	Cupola – Construction, Various operations, Zones of Cupola, Crucible furnaces-types, working principle, advantages, disadvantages and applications	

UNIT V:	5c	Select proper post casting operation to get sound casting in foundry	5.3	Heat treatment of Castings-Stress Relieveing, Post casting operations: Fettling

VII Laboratory Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Psychomotor Domain)		Hours	Aligned COs
I	1	Identify various Foundry tools	2#	CO1
I	2	Identify various furnances used for melting operation	2#	CO1
II	3	Identify patterns for casting opertaion	2#	CO2
II	4	Identify moulds for casting opertaion	2#	CO2
III	5	Identify core boxes for making of castings	2#	CO3
III	6	Determine Moisture content in Moulding sand by Infra-red bulb method	2#	CO3
IV	7	Determine the amount of clay content in moulding sand..	2#	CO4
IV	8	Determine A.F.S. fineness No. of sand	2#	CO4
IV	9	Identify given metal scrap for melting operation	2#	CO4
IV	10	Perform melting operation for given metal/ alloys	2	CO4
V	11	Prepare proper molding sand by mixing , screening and sieving of given sand	2#	CO5
V	12	Colour given patterns as per ASTM colour coding	2#	CO5
V	13	Choose proper gating and risering system for given mould	2#	CO5
V	14	Select suitable post casting operation for finishinf of casting	2	CO5
V	15	Identify defects occured in casting	2#	CO5

Note: # Compulsory

COURSE CURRICULUM

Program	:	Diploma in CE/ME/EE/EC/IT/MT/PK/CM/AE/AI/MK
Course Category	:	GE
Course Code	:	TX291H
Course Title	:	General Textile Technology

I Rationale:

This course's goal is to identify the raw materials used in textiles, such as fibers, their sources, and their characteristics. The process of converting fiber into yarn and converting yarn into various fabric development. Since clothing and home furnishings account for a large portion of the family budget, therefore both customers looking to make smart fabric selections need to be knowledgeable about textiles. This course is designed for other program students to gain the knowledge of General textile Technology.

II Industry Identified Competency:

The Student will be able to do in Industry at entry level:

Identify different fibres used in Textile Industry.

III Course Outcomes (COs):

After completing this course students will be able to:

CO1: **Identify** different fiber end use application in textile.

CO2: **Identify** the different spun yarn end use application in woven fabric.

CO3: **Determine** the yarn count of spun yarn

CO4: **Identify** the processes for weaving.

CO5: **Evaluate** the characteristics of woven fabric

IV Learning Scheme:

Classroom Learning (CL)	Tutorial Learning (TL)	Laboratory Learning (LL)	Self-Study Learning (SL)	Notional Learning Hours (NLH)	Credits
2	-	2	-	4	2

FA	SA	Total		FA		SA		SA	
Max	Max	Max	Min	Max	Min	Max	Min	Max	Min
30	70**	100	40	25	10	25	10	-	-

**Online Objective Type

VI Classroom Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Cognitive Domain)		Topics and Sub-topics		Aligned Cos
UNIT I: Overview of Textile Industries	1a	Identify textile fibers based on their origin	1.1	Defination of textile Fiber, yarn and fabrics.Classification of textile fibers.Essential and Desirable Properties of Fiber, yarn and fabric	CO1
	1b	Select given textile fibre according to end uses.	1.2	Brief study of some important fibers with their special l characteristics and end uses- Cotton, Jute, linen,Silk, Wool, rayon, Polyster, Nylon, Acrylic, polypropylene and Polyethyelene.	
	1c	Identify the given fibre by given test.	1.3	Identification of textile fibres by different tests- Burning, Microscopic and solubility	

UNIT II: Textile process	2a	Select the different processes required for producing the given yarn.	2.1	Commonly used processes in making of a textile finished product. Various stages involved to convert the raw material into ring spun yarns or threads. Various stages involved to convert the raw material into openend yarns or threads.	CO2
	2b	Compare the given type of yarns on given points.	2.2	Ring spinning yarn manucaturing stages. Classification of textile yarns - spun yarn, carded yarn, combed yarn, woolen yarn, worsted yarn, monofilament yarn and multifilament yarn.	
UNIT III: Yarn quality parmeters	3a	Calculate the count of yarn with the given data.	3.1	Defination of yarn count. Yarn numbering system, Direct yarn numbering system and indirect yarn numbering system. Simple yarn count calculation in indirect and direct yarn numbering system.	CO3
	3b	Determine the characteristics of given yarn.	3.2	Yarn Twist- Direction of yarn twist, characteristics of single yarn and plied yarn. Types and Characteristics of novelty/fancy yarns.	
UNIT IV: Weaving process	4a	Prepare process flow chart for given types of fabric.	4.1	Defination of woven fabric. Preparatory Processes for Weaving - Winding ,warping, pirn winding, sizing and Drawing -in process.	CO4
	4b	Identify the given motions of weaving machine.	4.2	Types of weaving machines. Basic motions of the loom - brief working and defination of shedding motion, picking motion, beatup motion, take up motion, let-off motion, weft stop motion, warp stop motion and brake motion.	

UNIT V: Woven fabric structures	5a	Evaluate the characteristics of given types of fabric.	5.1	Classification of Woven Fabric. Specification Of Woven Fabrics. Importance of dobby weaves and jacquard weaves. Characteristics of shirting fabrics, suiting fabric, towel cloths and fuirnishing cloths	CO5
	5b	Analyse the weave of given fabric sample.	5.2	Fabric Weaves and Properties- Plain weave, rib weave, basket weave, twill weave, satin weave, sateen weave.	

VII Laboratory Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Psychomotor Domain)		Hours	Aligned COs
I	1	Draw the classification chart of textile fibres.	02#	CO1
I	2	Collect different fibre samples- cotton, wool, polyester, viscose, nylon and write their origin, properties and end uses.	02#	CO1
I	3	Identify the given textile fibre by suitable test.	2	CO1
II	4	Prepare passage of materials for yarn formation process of given spinning system.	02#	CO2
II	5	Draw the structure of different types of yarns with its characteristics.	02#	CO2
II	6	Identify different types of yarns.	02#	CO2
III	7	Identify different type of yarn count system .	02#	CO3
III	8	Calculate the count of yarn in given system from the given data.	02#	CO3
III	9	Identify the twist direction in given yarn.	02#	CO3
IV	10	Prepare passage of materials for given fabric formation.	02#	CO4
IV	11	Identify the given type of loom.	02#	CO4
IV	12	Draw daigram of different motion by observing the weaving machine.	2	CO4
V	13	Observe and write the characteristics of different types of fabric.	02#	CO5
V	14	Evaluate the given types of weaves.	2	CO5
V	15	Draw design , draft and peg plan of given weave.	02#	CO5

Note: # Compulsory

COURSE CURRICULUM

Program	:	Diploma in CE/ME/EE/EC/PK/MT/IT/CM/AI/MK/TX
Course Category	:	GE
Course Code	:	AE291H
Course Title	:	Basics of Automobile

I Rationale:

This course takes students through the working of automobiles from the basics. Students will learn about automobiles piece by piece, even without a any prior knowledge. This course provides an overview of the basic automobiles. It's designed for those seeking a career in the automotive industry or anyone who wants to learn about vehicle repairs.

II Industry Identified Competency:

The Student will be able to do in Industry at entry level:

Apply the knowledge of automobile systems for maintance of vehicle.

III Course Outcomes (COs):

After completing this course students will be able to:

CO1: **Prepare** vehicle layouts with chassis specification.

CO2: **Select** suitable engine for given automobile applications.

CO3: **Interpret** power flow diagrams of transmission systems.

CO4: **Select** suitable braking and steering systems for different applications.

CO5: **Service** the different wheels and tyres.

IV Learning Scheme:

Classroom Learning (CL)	Tutorial Learning (TL)	Laboratory Learning (LL)	Self-Study Learning (SL)	Notional Learning Hours (NLH)	Credits
2	-	2	-	4	2

V Assessment Scheme:

Classroom Learning				Tutorial/Laboratory Learning				Self-Study Learning	
FA	SA	Total		FA		SA		SA	
Max	Max	Max	Min	Max	Min	Max	Min	Max	Min
30	70**	100	40	25	10	25	10	-	-

**Online Objective Type

VI Classroom Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Cognitive Domain)		Topics and Sub-topics		Aligned Cos
UNIT I: Introduction to Automobile	1a	Classify the automobile on the given parameters.	1.1	Automobile: Definition, Classification of Automobiles, Major Components of Automobiles with their Function and Location Vehicle Layout: Definition Significance of Vehicle Layout	CO1
	1b	Identify the type of layout used in given vehicle.	1.2	Different types of Vehicle layouts(FEFWD, FERWD, RERWD, 4WD), Advantages, Disadvantages, Applications and Comparisons of Different types of vehicle layouts.	
	1c	Justify the significance of chassis and frame in given automobile.	1.3	Function of Chassis, Frame and Body: Requirement of Chassis, Frame and Body.	

UNIT II: Engine Systems	2a	Interpret the working of given engine.	2.1	Engine: definition, classification of engines, major parts of multicylinder engine with their location and function, engine terminology and nomenclature, working of four stroke SI engine, working of four stroke CI engine	
	2b	Identify the components of given system in engine.	2.2	Lubrication and Cooling system: Purpose of lubrication, types of lubrication systems, working of pressurized lubrication system. Purpose of cooling system, construction and working of engine air cooling, construction and working with major components of engine liquid cool system.	
	2c	Justify the significance of given battery.	2.3	Battery: Function and Requirements of Battery, Types of Battery, Principle of Lead Acid Battery. Ignition System: Function and Requirement of Ignition System, working and components with their function of distributor-less ignition System	CO2
	2d	Determine the requirements of given system.	2.4	Charging System: Function and Requirement of Charging System, Components of Charging System. Starting System: Function and Requirement of Starting System, Components of Starting System. Charging System: Function and Requirement of Charging System, Components of Charging System	

UNIT III: Automobile Transmissions Systems	3a	Justify the necessity of given clutch.	3.1	Function and Necessity of Clutch: Requirement of Clutch, Classification of Clutch, Working Principle of Clutch, Construction and Working of Single Plate (Coil Spring and Diaphragm).	CO3
	3b	Identify components of the given gear box.	3.2	Function and Necessity of Gear Box Manual Transmission: Classification of Gear Box, Construction and working of Constant Mesh and Synchro Mesh Gear Box. Automatic Transmission: Advantages & disadvantages, Components and their Function	
	3c	Classify the given givenr shaft of automobile.	3.3	Propeller Shaft Assembly: Function, Necessity and Types of Propeller Shaft, Function and necessity of Universal and Slip Joint	
	3d	Determine the Working principle of given differential in automobile.	3.4	Final Drive: Function and Necessity of Final Drive, Differential, Working principle Construction and Working of Differential	
	3e	Specify the types of axles in given automobile.	3.5	Axles: Significance of Live and Dead Axle, Function and Requirement of Front Axle, Types of (Front) Stub axle.	
Control System	4a	Differentiate between given brakes.	4.1	Automobile Braking System: Function and Requirement of Braking System: Principle of Braking, Basic Terms related to Braking (Stopping Distance, Braking Efficiency, Fading of Brakes) Types of Braking System: Layout, Construction, Working of Drum, Disc, Hydraulic and Air Brakes.	

UNIT IV: Automobile C	4b	Justify the significance of steering system in given automobile.	4.2	Automobile Steering System: Function and Requirements of Steering System: Basic Terms related to Steering(Steering Ratio, Turning Radius, Understeering and Oversteering), Basic Components of Steering Linkages. Necessity and Principle of Power Steering, working of hydraulic and electronic power steering. steering gear box: function and types	CO4
UNIT V: Automobile suspension, wheels and tyres	5a	Justify the significance of suspension system in given automobile.	5.1	Automobile Suspension System: Function and Requirement of Suspension System, Types and Constructional Features of Leaf Springs	CO5
	5b	Identify Components of given suspension system.	5.2	Function and Requirement of Independent Suspension System: Advantages of Front Wheel Independent Suspension, Shock Absorbers and Air Suspension: Layout, Construction and Working of Air Suspension.	
	5c	Justify the significance of wheel balancing and alignment.	5.3	Wheels, Rims and Tyres: Function, Necessity and Requirement of Wheel, Rim and Tyres: Factors affecting to Tyre Life, Tyre Wear and Rotation, Tyre Designation. Wheel Alignment and Balancing: Purpose of Wheel Alignment, Purpose of Wheel Balancing,	

VII Laboratory Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Psychomotor Domain)		Hours	Aligned COs
I	1	Prepare a layout of vehicle available in your Laboratory.	2#	CO1
II	2	Dismantle/Assemble and identify the components of single cylinder engine.	2	CO2
II	3	Dismantle/Assemble and identify the components of Multicylinder cylinder engine.	2#	CO2
II	4	Dismantle/Assemble and identify the components of engine lubrication system.	2	CO2
II	5	Dismantle/Assemble and identify the components of engine cooling system.	2	CO2
II	6	Dismantle/Assemble and identify the components of engine charging system.	2	CO2
II	7	Dismantle/Assemble and identify the components of engine Ignition system.	2#	CO2
II	8	Perform test on given battery and comment condition of it.	2#	CO2
III	9	Dismantle/Assemble and identify the components of manual gearbox.	2#	CO3
III	10	Dismantle/Assemble and identify the components of automatic transmission.	2	CO3
III	11	Dismantle/Assemble and identify the components of clutch.	2#	CO3
III	12	Dismantle/Assemble and identify the components of differential.	2#	CO3
III	13	Dismantle/Assemble and identify the components of propeller shaft.	2	CO3
III	14	Dismantle/Assemble and identify the components of axle and drive.	2	CO3
IV	15	Dismantle/Assemble and identify the components of steering system.	2#	CO4
IV	16	Dismantle/Assemble and identify the components of braking system.	2#	CO4
V	17	Dismantle/Assemble and identify the components of suspension system.	2	CO5
V	18	Perform puncture repair, replace spare tyre and identify the tyre wear.	2#	CO5
V	19	Perform wheel balancing and wheel alignment of given vehicle.	2#	CO5

COURSE CURRICULUM

Program	:	Diploma in CE/ME/EE/EC/IT/MT/TX/AE/CM/MK/AI
Course Category	:	GE
Course Code	:	PK291H
Course Title	:	Basics of Packaging Technology

I Rationale:

This course introduces the basics of packaging, covering its different levels and functions in business. Students will learn about various packaging materials and how demographics affect packaging choices. The course also includes an overview of testing and quality standards, helping students understand how to ensure packaging meets industry requirements. This foundational knowledge is useful for anyone interested in the broader aspects of packaging business.

II Industry Identified Competency:

The Student will be able to do in Industry at entry level:

Apply the knowledge of basics of packaging in various packaging applications

III Course Outcomes (COs):

After completing this course students will be able to:

CO1: **Identify** the levels of packaging.

CO2: **Identify** the technical and commercial functions of packaging.

CO3: **Identify** the various sectors of a packaging business**.**

CO4: **Identify** the packaging material and appreciate the demographic influence on packaging business.

CO5: **Identify** the testing and quality standards and perform the test.

IV Learning Scheme:

Classroom Learning (CL)	Tutorial Learning (TL)	Laboratory Learning (LL)	Self-Study Learning (SL)	Notional Learning Hours (NLH)	Credits

** Online Objective Type

VI Classroom Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Cognitive Domain)		Topics and Sub-topics		Aligned Cos
UNIT I: Introduction to Packaging Technology	1a	Justify the importance of packaging in supply chain.	1.1	Introduction; Definition and Importance of Packaging in supply chain, Evolution of Packaging.	CO1
	1b	Identify given segmentation of packaging industry	1.2	Indian packaging industry present scenerio; Key Players and Market Segmentation.	
	1c	Identify the given levels of packaging.	1.3	Levels of packaging: Primary, Secondary and Tertiary.	
	1d	Select the correct advantages and disadvantages of packaging.	1.4	Advantages of packaging to - Customer, retailer, distributor, handler, transporters, manufacturers, society, and nation. Disadvantages of packaging - Cost, Environmental Impacts; resource utilization, energy, toxicity, litter, solid waste, deception.	

UNIT II: Functional Considerations of Packaging	2a	Identify the technical functions of packaging from given options.	2.1	Functional Considerations of Packaging: Technical Functions - Containment, protection (against mechanical damages), preservation (against Physiochemical damages).	CO2
	2b	Identify the commercial functions of packaging from given options.	2.2	Commercial functions - Sanitation, unitization, communication (Human & Machine), dispersing & dispensing, pilferage deterrence, tampering evidence etc.	
UNIT III: The Packaging Business	3a	Identify the given sector of a packaging business.	3.1	The Packaging Business: a. Packaging material suppliers: Basic raw materials, materials for packaging. b. Converting of raw materials, converting of packaging materials. c. Ancillary Packaging materials. d. Packaging user industries; Food, Pharma and other.	CO3
ging Materials	4a	Identify packaging materials from given properties.	4.1	Overview of Packaging Materials; Wood, paper, plastics, glass, metals. Properties and Characteristics of Packaging Materials Selection Criteria for Packaging Materials. Emerging Trends in Sustainable Packaging Materials.	CO4

UNIT IV: Packa	4b	Select the correct point for demographic influence on packaging industry.	4.2	Demographic influence on packaging business; growing population, shifts in definition of household units, geographic redistribution, increase in number of working women, increase in number of single living, increase in number of two earner household.	CO4
UNIT V: Packaging Processes , testing and quality control.	5a	Identify the given packaging process.	5.1	Packaging Processes: Packaging Design Principles, Printing and Labeling Techniques, Forming and Filling Processes, and Sealing and Closing Techniques.	CO5
	5b	Identify the given testing standard.	5.2	Packaging Testing and Quality Control; Importance of Packaging Testing, Testing Standards and Methods, Testing and Quality control , Packaging Tests; durability, leakage, compression.	
	5c	Identify the given quality standard.	5.3	Quality standards in packaging business; quality management system, food safety management systems, Goods Manufacturing Practices. Food and Drug Administration (FDA)	

VII Laboratory Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Psychomotor Domain)		Hours	Aligned COs
I	1	Conduct a case study on Indian Packaging Industry: A current scenerio and write a report on it.	2#	CO1
I	2	Carry out group discussion to identify the levels of packaging; form groups, collect the samples, observe, study, search relevant information and write a report.	2#	CO1
II	3	Carry out group discussion to identify the Technical Functions of a given Packaging System. Form groups, collect the samples, observe, search relevant information and write a report.	2#	CO2
II	4	Conduct a case study on demographic influence on growth of packaging business. Take any one topic from; shifts in definition of household units, geographic redistribution, increase in number of working women, increase in number of single living, increase in number of two earner household. And write a report.	2#	CO2
II	5	Carry out a group discussion to identify the commercial functions of a given Packaging System; form groups, select a packaging system, observe and study it, collect information, brain storm and write a report.	2#	CO2
III	6	Carry out a case study on Exploring the Dynamics of the Indian Packaging Business and write a report.	2	CO3
IV	7	Perform CFB box packaging manually - erection, loading and sealing. Search and collect the information on unitization, styles of corrugated boxes and box sealing methods and materials.	2#	CO4
IV	8	Perform box compression test on a given sample.	2#	CO4
IV	9	Perform liquid filling by liquid volumetric filling machine (model/portable). Note the findings and observations.	2#	CO4
IV	10	Perform box filling, stapling, sealing, and shrink wrapping operations.	2#	CO4

IV	11	Perform box filling, sealing, automatic strapping and stretch wrapping operations.	2#	CO4
V	12	Carry out a case study on Functions of Food and Drug Administration.	2#	CO5
V	13	Identify the plastic by manual observation and handling the product. Write a report.	2	CO5
V	14	Draw a format related to testing of packaging material by reading the existing any one Indian Standard.	2#	CO5
V	15	Draw a format related to the quality standard by reading the existing any one standard from: quality management system/ food safety management systems/ Goods Manufacturing Practices/ Food and Drug Administration (FDA).	2	CO5

Compulsory

VIII Self-Study Learning (SLO in Cognitive/Psychomotor/Affective Domain)

COURSE CURRICULUM

Program	:	Diploma in CE/ME/EE/EC/MT/TX/AE/PK/MK
Course Category	:	GE
Course Code	:	CM291H
Course Title	:	Open Source Technologies

I Rationale:

Studying open-source tools like LaTeX, Canva, and Synfig provides a practical and cost-effective approach to develop essential skills for various professional and creative endeavors. LaTeX is used for document formatting, particularly in academic and scientific writing. Canva equips individuals with the ability to create visually appealing content for presentations, marketing materials, and social media, fostering creativity and design thinking. Synfig empowers users to produce animated multimedia content, supporting the growing demand for dynamic and engaging visual communication.

II Industry Identified Competency:

The Student will be able to do in Industry at entry level:

Apply the Knowledge to dvelop precise document with formatting, graphic design for visual communication, and animation creation for multimedia. content.

III Course Outcomes (COs):

After completing this course students will be able to:

CO1: **Design** an article using basic command of Latex.

CO2: **Use** Latex tags for Page formatting, tables, images, equations.

CO3: **Design** presentation using Latex Beamer.

CO4: **Create** Poster, Business Card,logo, invitation cards using Canva.

CO5: **Use** Synfig to design annimations.

IV Learning Scheme:

Classroom Learning (CL)	Tutorial Learning (TL)	Laboratory Learning (LL)	Self-Study Learning (SL)	Notional Learning Hours (NLH)	Credits
2	-	2	-	4	2

V Assessment Scheme:

Classroom Learning				Tutorial/Laboratory Learning				Self-Study Learning	
FA	SA	Total		FA		SA		SA	
Max	Max	Max	Min	Max	Min	Max	Min	Max	Min
30	70**	100	40	25	10	25	10	-	-

**Online Objective Type

VI Classroom Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Cognitive Domain)		Topics and Sub-topics		Aligned Cos
UNIT I: Introduction to Latex	1a	Chooose the correct document class to create a book in Latex a. Chapter b. Article c. Book d. Section	1.1	Installation of MikeTeX, Online Overleaf access, TEX and its offspring.	CO1
	1b	Select the syntax to divide the document in sections in latex. a. section{Name of section} b. document class{Section name} c. article{section} d. createSection {Name of section}	1.2	Creating a Title, Sections, Command names, and date arguments, Labelling Table of Contents.	
	1c	Identify the correct command to change the font colour. a. \textcolor b.\setcolor c. \color d. \fontcolor	1.3	Font Effects, Coloured Text, Font Sizes, Comments & Spacing Special Characters, Line breaking.	

	1d	Select the correct command to load packages in latex. a. \usepackage{} b. \setpackage{} c. \package{} d. \createpackage{}	1.4	Document Layout and Organization- Page Layout – Titles, Abstract Chapters, Sections, References, citation, Generating index, Loading packages.	
UNIT II: Page formatting in latex.	2a	Choose the correct option to create a numbered list in Latex. a. itemize b. enumerate c. ol d. ul	2.1	List-making environments, Table of contents, Adding tables, Figure handling , Adding Equations/mathematical expressions.	CO2
	2b	Select the command to set double column in Latex. a. \documentclass[twocolumn]{article} b. \[twocolumn]{article} c. \document[twocolumn]{article} d. \class[twocolumn]{article}	2.2	Parts of the document: Abstract, Chapters, Appendix, Paragraph formatting, Single and double column pages	
	2c	Select the command used to set the footer of a LaTeX document using the \texttt{fancyhdr} package. a)	2.3	Parts of the document: Customized head and foot lines, Page numbering, Fancy header	
	2d	Identify the LaTeX environment used to manually insert a bibliography when a bibliography management package not being used? a) \texttt{bibliography} b) \texttt{bibblock} c) \texttt{thebibliography} d) \texttt{biblio}	2.4	Inserting References: Inserting the Bibliography Styles.	

UNIT III: Latex Beamer	3a	Select beamer command to create a title page in a Beamer presentation. a) \texttt{\textbackslash maketitle} b) \texttt{\textbackslash titlepage} c) \texttt{\textbackslash beamer_title} d) \texttt{\textbackslash titlingpage}	3.1	Introduction to Beamer: The title page, Creating a table of contents, Adding effects ta a presentation.	CO3
	3b	Identify beamer command to change the font for the entire document to a specific size and style. a) \texttt{\textbackslash setfont{}} b) \texttt{\textbackslash usefont{}} c)	3.2	Highlighting important sentences/words. Fonts: Font sizes, Font types , Using Beamer's Fonts, Setting Beamer's Fonts. Columns	
	3c	Select package to be included to handle images in LaTeX. a) \texttt{\textbackslash usepackage{graphicx}} b) \texttt{\textbackslash usepackage{graphics}} c) \texttt{\textbackslash usepackage{imagex}} d) \texttt{\textbackslash usepackage{imaging}}	3.3	Adding tables, mathematical expressions, images to presentations.	

	3d	Choose the correct option to set the color theme to "dolphin" to match the "Berkeley" theme in Beamer presentation. a) \texttt{\textbackslashuse theme{Berkeley}\ textbackslash setcol ortheme{dolphin}} b) \texttt{\textback slash settheme {Berkeley} \textback slash usecolor theme{dolphin}} c) \texttt{\textback slash usetheme{Ber keley}\textbackslashus ecolortheme{dolphin} } d) \texttt{\textbacks lash usetheme {Berk eley}\textbackslashc olortheme{dolphin}}	3.4	Themes and colorthemes: Berkeley theme, Copenhagen theme, Using a colortheme.	
	4a	Identify the primary purpose of Canva templates. a) To download images b) To provide pre-designed layouts for various types of design projects c) To create animations d) To write code	4.1	Logging / Setup Canva Account, Layouts & Templates, the pre-designed layouts, Downloading the work.	

UNIT IV: Basics of Canva	4b	Select the purpose of shapes in Canva designs. a) To create text boxes b) To add visual elements and structure to a design c) To replace photos d) To write code	4.2	Working with text, Photo backgrounds & Shapes, Illustrations, icons and lines, Adding pages to a design.	CO4
	4c	Identify the correct option to add text to a Canva design. a) By clicking on the "Photos" section b) By selecting the "Text" tab and choosing a text box c) By uploading a text file d) By using the "Elements" section	4.3	Adding Images, photo filters, Text features, adding Charts, Album cover.	
	4d	Select is the purpose of a YouTube thumbnail. a) To summarize the video content in a single image b) To attract viewers and increase click-through rates c) To provide additional information about the video d) To create a playlist of videos	4.4	Youtube thumbnail, Twitter header, Facebook post, Ebook cover.	
	4e	Select the feature to add transitions between slides in Canva. a) Animation effects b) Slide sorter c) Background music d) Presenter view	4.5	Documents, Data and charts, Presentation slides.	

UNIT V: Itroduction to Synfig	5a	Select is the correct primary purpose of Synfig. a) Creating 3D animations b) Editing images c) Designing logos d) Producing 2D animations	5.1	Overview of Synfig, Installation of Synfig, Explore the user interface, keyframes.	CO5
	5b	Select the correct panel in Synfig to import and manage images. a) Toolbox b) Parameters c) Canvas d) Layer panel	5.2	Introduction to Layers, Using Pictures In Synfig, including the canvas, toolbox, and layer panel.	
	5c	Identify type of animation in Synfig to create movement in a shape that resembles a celestial object. a) Star animation b) Plant animation c) Basic bone animation d) Logo animation	5.3	Creating Animation Using Synfig: Logo animation, Cutout animation, Underwater annimation, Bouncing ball annimation, Creating star annimation, Plant annimation, Basic bone annimation.	
	5d	Choose the correct text animation option in Synfig to make the text appear as if it is being typed out letter by letter. a) Typewriter b) Write c) Scroll d) Fade In	5.4	Adding text to annimation, text annimation options.	

VII Laboratory Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Psychomotor Domain)		Hours	Aligned COs
I	1	Install Latex and Create a simple document using LaTeX.	2#	CO1
I	2	Design a simple LaTeX document with a title, author, date and add differnt font styles, sizes, and colors. Divide the document into sections and subsections. Add a table of contents and ensure it is updated correctly.	2	CO1
II	3	Develop ordered and unordered lists, nest the lists and customize the list symbols using Latex. Create a Latex document and insert images into the document.	2#	CO2
II	4	Create a Latex document and add a table with rows and columns,add captions. Design a Latex document with Mathematical expression, Equations and Formulas using inline and display math modes. Explore various mathematical symbols and notations. Experiment with complex mathematical equations and formulas. Utilize environments like `align` for multiline equations.	2#	CO2
II	5	Design a Latex document. Add citations to your document using the BibTeX or BibLaTeX system.Create a bibliography section and reference external sources.	2	CO2
II	6	Develop a Latex doument. Add lists of figures and tables. Ensure proper numbering and referencing.Use labels and cross-references for sections, equations, and figures. Verify that references are updated correctly.	2#	CO2
III	7	Create a simple Beamer presentation. Add multiple slides with titles and subtitles. Experiment with different slide themes.	2#	CO3
III	8	Create a simple Beamer presentation with a title, author, and date. Use the `frame` environment to add a slide. Add multiple slides with titles and subtitles. Experiment with different slide themes.	2	CO3
III	9	Insert Images and Tables in Beamer slides.Adjust the size and positioning of images. Create simple tables with rows and columns.Add headers and customize table styles.	2#	CO3

IV	10	Create a Canva account and explore the basic features of the platform. Familiarize with the dashboard and layout options. Design a social media post for a fictional event or promotion. Use Canva's templates, elements, and text tools.	2#	CO4
IV	11	Design an eye-catching Posters using Canva for a school event or project. Experiment with different fonts, colors, and layouts.	2#	CO4
IV	12	Design a canva poster, insert Photo, Enhance a photo using Canva's photo editing tools. Add filters, adjustments, and overlays.	2#	CO4
V	13	Install Synfig on computer. Explore the user interface, including the canvas, toolbox, and layer panel. Draw a simple shape (e.g., a circle or square) and animate its movement across the canvas.Experiment with keyframes to create basic animations.	2#	CO5
V	14	Create a simple Synfig application, Import external images (e.g., PNG, JPEG) into Synfig. Explore techniques for scaling, rotating, and animating imported images.	2#	CO5
V	15	Design Text Animation using Synfig: - Add text to the animation and explore text animation options. - Animate text appearing, moving, or changing color.	2#	CO5

Note: # Compulsory

VIII Self-Study Learning (SLO in Cognitive/Psychomotor/Affective Domain)

1. Not Applicable.

COURSE CURRICULUM

Program	:	Diploma in CE/ME/EE/EC/AE/TX/CM/IT/AI/PK/MT
Course Category	:	GE
Course Code	:	MK291H
Course Title	:	Basic Mechatronics

I Rationale:

This curriculum includes basic concepts, principle of working and applications of various electronics and mechanical components that are being used for developing various circuits in industry. This curriculum is essential to provide students with a brief foundational knowledge in this interdisciplinary field. Mechatronics combines mechanical engineering, electronics, computer science, and control engineering to create innovative and efficient systems. This course enables diploma engineer to use various basic electronic and mechanical components for specific applications.

II Industry Identified Competency:

The Student will be able to do in Industry at entry level:

Integrate electronics and mechanical components to create functional mechatronics systems, such as robotics and automated machinery.

III Course Outcomes (COs):

After completing this course students will be able to:

CO1: **Select** specific basic electronics component for given electronics applications.

CO2: **Design** a logic circuit using various digital electronics components.

CO3: **Select** various transducers and sensors for different mechatronics based applications.

CO4: **Interface** microcontroller with peripheral devices.

CO5: **Use** actuators for various mechatronics based applications.

IV Learning Scheme:

Classroom Learning (CL)	Tutorial Learning (TL)	Laboratory Learning (LL)	Self-Study Learning (SL)	Notional Learning Hours (NLH)	Credits
2	-	2	-	4	2

Max	Max	Max	Min	Max	Min	Max	Min	Max	Min
30	70**	100	40	25	10	25	10	-	-

**Online Objective Type

VI Classroom Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Cognitive Domain)		Topics and Sub-topics		Aligned Cos
UNIT I: Basic Electronics	1a	Select the relevant diode for given application	1.1	PN junction diode: Symbol, Construction, working principle, V-I characteristics and applications, Special purpose diodes - Zener diode, LED, Photodiode (Symbol, working principle and applications)	CO1
	1b	Select the transistor for given application	1.2	NPN and PNP transistor: Symbol, Construction, Operating principle, Input-output characteristics, Operating regions of transistor, Applications of transistor as a switch, as an amplifier-circuit diagram and working principle	
	1c	Identify given blocks of regulated power supply with their functions.	1.3	DC regulated power supply: Need and block diagram. Regulators: Need for voltage regulators in power supplies, working of voltage regulator using Zener Diode	

UNIT II: Digital Electronics	2a	Convert the given number into specified number system	2.1	Introduction to digital systems: Number systems - binary, decimal, octal and hexadecimal conversion of one number system to other.binary addition and subtraction	CO2
	2b	Identify symbols and truth tables of given logic gates.	2.2	Logic Gates, Classification of gates: NOT, AND, OR, symbols, truth table, logic equations, universal logic gates - NOR, NAND, symbols, truth table, basic logic gates using universal gates, Exclusive OR/NOR gates	
	2c	Identify given combinational logic circuit	2.3	Combinational logic circuits, Design of half and full adder using k-map, Multiplexers and Demultiplexers: block diagram, truth table, logic expression and logic diagram of 2:1, 4:1, 8:1 MUX, 1:2, 1:4, 1:8 DEMUX	
	2d	Identify sequential logic circuit used for given application	2.4	Flip Flops - Symbols and truth table of D flip flop, T- flip flop, S R Flip Flop, J-K Flip Flop, Shift Register: Logic diagram, Truth Table of 4-bit shift registers (SISO, SIPO, PISO, PIPO), Counters - Asynchronous and synchronous counter	
ensors	3a	Identify type of given transducer	3.1	Definition of transducer, Classification – Active/Passive, Primary/Secondary, Electrical/Mechanical, Analog/Digital and their examples	

UNIT III: Transducers & S	3b	Select the relevant transducer for the given application	3.2	Selection Criteria for transducers Principle of working and application of i. Displacement transducers - LVDT, RVDT ii. Strain Gauge, Load cell, Cantilever arm	CO3
	3c	Select the relevant sensor for the given application	3.3	Definition of sensor, Types of sensor,Principle of working and applications of – i. Pressure Sensors - Bourdon Tube ii. Temperature Sensors - RTD, Thermistors. Iii. Photo sensors – Photodiode, LDR, LED iv. Proximity Sensors – Capacitive, Inductive	
UNIT IV: Microcontroller	4a	Identify type of given microcontroller	4.1	Introduction to 8051 Microcontroller : Architecture, Pin configuration, input-output ports, interrupts, types of microcontroller, Applications	CO4
	4b	Choose interfacing circuit to interface microcontroller with given peripherals	4.2	Interfacing of 8051 microcontroller with LED, switch, seven segment display	
tors	5a	Identify the given actuator with the help of features, specifications, sketch, working principle and applications.	5.1	Actuating Systems – Hydraulic, Pneumatic system, Features, specifications, sketch, working principle and applications of : Pneumatic Actuators - Direction Control Valves – Spool, Poppet, pilot operated, Directional Valves, Valve actuation symbols, Pressure Control Valves – Pressure regulating, Pressure Limiting, Cylinders – Single acting, Double acting	

UNIT V: Actua	5b	Select the relevant actuator for given application	5.2	Mechanical Actuators - Types of motion (Translational, Rotational), Kinematic Chains (Four bar chain, Slider-crank mechanism), Cams (Eccentric, Heart shaped, Pear Shaped), Cam followers, Gears (Gear trains, rack-and-pinion gears), Ratchet & Pawl, Bearings (Plain journal, Ball and roller bearings), Electrical Actuators – Stepper motor – Types (Variable reluctance, Permanent magnet, Hybrid Stepper motor), Stepper motor specifications, Stepper motor Control	CO5

VII Laboratory Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Psychomotor Domain)		Hours	Aligned COs
I	1	Identify and Test PN junction diode using digital multimeter Also Plot VI characteristics in forward biased mode.	2#	CO1
I	2	Build a circuit for transistor as an amplifier on a breadboard and observe it's input and output waveforms.	2#	CO1
I	3	Test performance of zener diode as a voltage regulator.	2#	CO1
II	4	Realize basic gates using NOR/NAND gate and verify truth table.	2#	CO2
II	5	Design the logic circuit for half adder and full adder using logic gates and verify its truth table	2#	CO3
II	6	Identify different pins of 8:1 multiplexer IC , apply input and measure the output. Relate practical output with it's truth table.	2#	CO4
III	7	Measure linear displacement using LVDT.	2#	CO4
III	8	Measure temperature using thermistor.	2#	CO4
III	9	Measure the stress & strain using strain gauges mounted on simply supported beam/cantilever beam.	2#	CO3
IV	10	Develop a program for interfacing LED with 8051 microcontroller	2#	CO4
IV	11	Develop a program for interfacing switch with 8051 microcontroller	2#	CO4
IV	12	Develop a program for interfacing seven segment display with 8051 microcontroller	2	CO4
V	13	Select actuator for given application with justification	2#	CO5
V	14	Develop small circuits using Cam followers, Gears, Ratchet & Pawl, Bearings	2	CO5
V	15	Build Electro-pneumatic circuits for given application	2	CO5

Note: # Compulsory

COURSE CURRICULUM

Program	:	DIPLOMA IN CE/ME/EE/EC/PK/MT/MK/AE/TX
Course Category	:	GE
Course Code	:	AI291H
Course Title	:	Python Programming

I Rationale:

Python is commonly used for developing websites and software, task automation, data analysis, and data visualisation. Since it's relatively easy to learn, Python has been adopted by many non-programmers, such as accountants and scientists, for a variety of everyday tasks, like organising finances. Engineering students should know the basics of python programming in open-source environment. Python lab course is designed for students to enrich the knowledge of different Python terminology. After this course student can build basic programs using fundamental programming constructs like variables, conditional logic, looping, and functions. Also, students can work with user input to create fun and interactive programs.

II Industry Identified Competency:

The Student will be able to do in Industry at entry level:

Demonstrate proficiency in Python Programming.

III Course Outcomes (COs):

After completing this course students will be able to:

CO1: **Use** basic entities of python in programming.

CO2: **Use** Python data structures for implementing the programs.

CO3: **Develop** Python program using control statements.

CO4: **Develop** Python program for implementing Array and NumPy.

CO5: **Develop** python program to show use of function and modules.

IV Learning Scheme:

Classroom Learning (CL)	Tutorial Learning (TL)	Laboratory Learning (LL)	Self-Study Learning (SL)	Notional Learning Hours (NLH)	Credits
2	-	2	-	4	2

V Assessment Scheme:

Classroom Learning				Tutorial/Laboratory Learning				Self-Study Learning	
FA	SA	Total		FA		SA		SA	
Max	Max	Max	Min	Max	Min	Max	Min	Max	Min
30	70**	100	40	25	10	25	10	-	-

**Online Objective Type

VI Classroom Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Cognitive Domain)		Topics and Sub-topics		Aligned Cos
UNIT I: Introduction to Python	1a	Select the correct syntax from given data type.	1.1	Introduction to Python Programming, Variable and Input, Identifiers and Keywords, Integral Types, Floating Point Types.	CO1
	1b	Choose the correct data type for given variable.	1.2	String Data Type: Strings, Comparing Strings, Slicing and Striding Strings, String Operators and Methods.	
	1c	Identify the correct operator from given operator.	1.3	Operators and Expression in Python, Escape Character and Quotes, Type conversion in python.	
Sequencing in Python	2a	Select the correct method for performing given operation on List.	2.1	Introduction to List: Creating List, Access List Items, Change List Items, Add List Items, Remove List Items, List Methods.	CO2
	2b	Identify the correct Tuple method from given methods to perform given operation.	2.2	Introduction to Tuples: Creating Tuple, Access Tuple Items, Update Tuples, Join Tuples, Tuple Methods.	

UNIT II:	2c	Choose the correct output of Dictionaries program from given output.	2.3	Introduction to Dictionaries: Access Dictionary Items, Change Dictionary Items, Add Dictionary Items.	
UNIT III: Decision Making and Looping in Python	3a	Choose the correct syntax of If Else statement from given syntax.	3.1	Introduction to Decision Making in python programming, Introduction to If, If Else and Else if statement in Python and Neste If.	CO3
	3b	Identify the correct output of Loop from given output.	3.2	Introduction to While Loops: Syntax, working and use of While Loop, programs using While Loop.	
	3c	Select the correct syntax of For loop from given syntax.	3.3	Introduction to For Loop: Syntax, working and use of For Loop, programs using For Loop, Difference between While and For Loop.	
UNIT IV: Python Array and NumPy	4a	Choose the correct method from given methods for performing given operation on Array.	4.1	Introduction to Array: Creating Array, Access Array Items, Add Array Items, Remove Array Items.	CO4
	4b	Select the correct syntax of given statement from given syntax.	4.2	Sort Arrays, Array Methods. Syntax, working and use of break, pass and continue Statements.	
	4c	Suggest the correct method from given methods to perform given operation on NumPy.	4.3	Introduction to NumPy: Uses of NumPy, Array Creation using NumPy Object, NumPy Indexing & Slicing, NumPy Mathematical Functions.	
UNIT V: Python Function and Module	5a	Select the syntax of Function from given syntax.	5.1	Introduction to Python Function, Types of Function. Defining a Python Function, Syntax to Define a Python Function.	CO5
	5b	Choose the correct argument type of python function from given types	5.2	Types of Python Function Arguments: Positional or Required Arguments, Keyword Arguments, Default Arguments.	
	5c	Identify the correct Python Module from given Modules for performing given operation.	5.3	Introduction to Python Modules, Python Built-in Modules, Python User-defined Modules, Creating a Python Module.	

VII Laboratory Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Psychomotor Domain)		Hours	Aligned COs
I	1	Install Python IDE and study various notebooks available for python programming.	2#	CO1
I	2	Explore various option given in python IDE.	2	CO1
II	3	Execute given sample programs for getting familiarity with execution environment.	2#	CO2
II	4	Execute simple Python programs for identify the syntax error.	2	CO2
II	5	Develop & Execute small Python programs to create List.	2#	CO2
III	6	Develop & Execute small Python programs to create Tuple.	2#	CO3
III	7	Develop & Execute small Python programs to create Dictionary.	2#	CO3
III	8	Develop & Execute Python programs based on if else statement.	2#	CO3
III	9	Develop & Execute Python programs on while loop statement.	2#	CO3
III	10	Develop & Execute Python programs on for loop statement.	2#	CO3
IV	11	Develop & Execute programs for creation of Array.	2	CO4
IV	12	Develop & Execute programs for creation of Numpy.	2#	CO4
IV	13	Develop & Execute programs for performing different operation on Numpy.	2#	CO4
V	14	Develop & Execute programs create User Define Function.	2#	CO5
V	15	Develop & Execute programs create User Define Module.	2#	CO5

Note: # Compulsory

COURSE CURRICULUM

Program	:	Diploma in CE/ME/EE/EC/CM/IT/PK/AIML/MT/MK/AE/TX
Course Category	:	GE
Course Code	:	TR291H
Course Title	:	Agro & Rural Tourism

I Rationale:

Agro & Rural Tourism is main component of emerging rural tourism segment worldwide. Tourist are preferring to access the remote area for the leisure and self-connect purpose. Same time tourist are looking to connect with rural India and explore destination in there nearby area for weekend and weeklong duration. This course is a understanding on the concept of Agri and rural tourism management and how individual and use the concept to the business or career option.

II Industry Identified Competency:

The Student will be able to do in Industry at entry level:

Develop an agro tourism project.

III Course Outcomes (COs):

After completing this course students will be able to:

CO1: **Identify** various types of tourism.

CO2: **Identify** the characteristiucs of rural India.

CO3: **Identify** the products of rural and agro tourism.

CO4: **Prepare** an itinerary and costing for rural and agro tourism visit.

CO5: **Prepare** an agro tourism project.

IV Learning Scheme:

Classroom Learning (CL)	Tutorial Learning (TL)	Laboratory Learning (LL)	Self-Study Learning (SL)	Notional Learning Hours (NLH)	Credits
2	-	2	-	4	2

V Assessment Scheme:

Classroom Learning				Tutorial/Laboratory Learning				Self-Study Learning	
FA	SA	Total		FA		SA		SA	
Max	Max	Max	Min	Max	Min	Max	Min	Max	Min
30	70**	100	40	25	10	25	10	-	-

** Online Objective Type

VI Classroom Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Cognitive Domain)		Topics and Sub-topics		Aligned Cos
UNIT I: Introduction	1a	Distinguish given types of tourism industry.	1.1	Concept of Tourism, Concept of Agro Tourism, Introduction of Tourism Industry: Domestic/ Inbound/ Outbound.	CO1
	1b	Identify the given componets of agro tourism.	1.2	Types of Tourism: Special Interest Tourism, Introduction of Agro Tourism industry.	

UNIT II: Rural India & Tourism products	2a	Identify the given characteristics of rural India.	2.1	Rural India and its characteristics, Rural, Community Based tourism.	CO2
	2b	Identify different products of rural India.	2.2	Different products and case studies, Culture of Rural India, Ethnic food and culinary tourism, art, craft of rural India.	
	2c	Identify different Agri and Farm Tourism Product.	2.3	Different types of Tourism Product associated with Rural, Agri and Farm Tourism Product and its component,	
	2d	Compare given agri tourisum products in in India and Abroad.	2.4	Tourism products related to Agri farm & Rural tourism products in India and Abroad.	
	2e	Identify different types of events related to rural India.	2.5	Type of Events related to agriculture, Rural and Farm culture. Associating Community with tourism.	
UNIT III: Tourism Product, Itinerary, Costing	3a	Prepare an itinerary for rural and agro tourism.	3.1	Itinerary Preparation	CO3
	3b	Estimate the cost for itinerary for rural and agro tourism.	3.2	Costing of the tourism products, Component supporting the costing of the products etc. Home stay & Rural Stay.	

UNIT IV: Sales & Marketing	4a	Classify the given products according to the target audience and market.	4.1	Classifcation of the product according to the target audience and market.	CO4
	4b	Differetiate between offline and online marketing and promotion.	4.2	Different offline and online marketing and promotional approach.	
	4c	Compare B2B and B2C market approach on given points.	4.3	B2B and B2C market approach.	
	4d	Identify the steps to Lead generation, and Lead conversation.	4.4	Lead generation, Lead conversation.	
	4e	Identify Do’s and Don't before, during and after the tours.	4.5	Do’s and Don't before, during and after the tours. Art to attract repeat customers.	
UNIT V: Tourist behavior	5a	Identify the behavioural characteristics of the tourist at the destination.	5.1	Behaviour of the tourist at the destinations.	CO5
	5b	Identify the behavioural characteristics of the staff at the destination.	5.2	Behaviour of tourism staff, Expectation and outcome of the tour, communication during the tour.	
	5c	Prepare feedback form.	5.3	Feedback and testimonials.	
	5d	Prepare documentation required for registration of agro tourism business.	5.4	Agro Tourism Registration Process, Documentation, Timeline & Fee.	

VII Laboratory Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Psychomotor Domain)		Hours	Aligned COs
I	1	Prepare a List of Best Rural Tourism Destination with Details.	2#	CO1
I	2	Present Best Tourism Activities for the Agro & Rural Tourism Setup.	2#	CO1
I	3	List down and present in class top 10 destination of Domestic Holidays for your family.	2#	CO1
I	4	List down and present in class top 10 destination of International Holidays for your family.	2#	CO1
II	5	Prepare a case study on rural and agro tourism of Vidarbh region.	2#	CO2
II	6	Prepare report on associating community with tourism.	2	CO2
III	7	Prepare an itinerary for agro tourism visit.	2#	CO3
III	8	Estimate the cost for the itinerary for agro tourism visit.	2#	CO3
IV	9	Prepare the Agro Tourism catalog for marketing activity.	2#	CO4
IV	10	Prepare a chart shdepecting the target audience and market.	2#	CO4
IV	11	Prepare a campaign for lead generation and lead conversion.	2#	CO4
V	12	Prepare a feedback form.	2#	CO5
V	13	Prepare documentation for registration of agro tourism business.	2#	CO5
V	14	Prepare Comparison Chart of 5 Best Agro Tourism Center of Vidarbha and Present in Class.	2	CO5
V	15	Prepare One District One Product list of Vidarbha.	2	CO5

Note: # Compulsory

COURSE CURRICULUM

Program	:	Diploma in MT.
Course Category	:	DSC
Course Code	:	MT205H
Course Title	:	Testing of Materials

I Rationale:

Course testing of materials in a diploma in metallurgical engineering program is essential to ensure students gain practical, hands-on experience with material properties and behaviors. This testing develops critical skills in analyzing and interpreting data, understanding material performance under various conditions, and applying theoretical knowledge to real-world scenarios. It enhances technical proficiency and prepares students for industry challenges, ensuring they are job-ready and capable of contributing effectively to the field.

II Industry Identified Competency:

The Student will be able to do in Industry at entry level:

Conduct Metallurgical Testing and Inspection procedures

III Course Outcomes (COs):

After completing this course students will be able to:

CO1: **Follow** safety rules in testing laboratory

CO2: **Use** universal testing machine to carry out tensile testing

CO3: **Perform** hardness test on different machines.

CO4: **Use** various machines for service test

CO5: **Perform** Conventional NDT for soundness of material

CO6: **Perform** different NDT tests to inspect soundness of metals

IV Learning Scheme:

Classroom Learning (CL)	Tutorial Learning (TL)	Laboratory Learning (LL)	Self-Study Learning (SL)	Notional Learning Hours (NLH)	Credits
4	-	2	2	8	4

V Assessment Scheme:

Classroom Learning				Tutorial/Laboratory Learning				Self-Study Learning	
FA	SA	Total		FA		SA		SA	
Max	Max	Max	Min	Max	Min	Max	Min	Max	Min
30	70	100	40	25	10	25+	10	25	10

VI Classroom Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Cognitive Domain)		Topics and Sub-topics		Aligned Cos
UNIT I: Scope Of Testing	1a	Compare Mechanical, Physical and Chemical properties of given metals.	1.1	The scope and need of testing,Mechanical, Physical and Chemical properties of metals,follow of safety rules and precautions in testing laboratoy.	CO1
	1b	Identify given material for testing of materials in tension /compression.	1.2	Concepts of Stress, strain, elastic and plastic bodies strain under axial load in tension and compression .	
	1c	Prepare various reports on testing.	1.3	Types and Forms of various Testing Results,Interpretation of Test Results.	
	1d	Select suitable Standardizing agencies for testing of given materials.	1.4	Standardizing Agencies: SAE, AISI, ASTM, BIS, IS.	
nical Testing	2a	Determine Youngs modulus for given material for given data.	2.1	Tensile test: Scope and applicability,Modulus of elasticity / Young's modulus, Hook's law.	
	2b	Sketch a standard Tensile Specimen.	2.2	Specification of testing specimen, Effect of important variable.	

UNIT II: Mecha	2c	Calculate proof stress for given steel for given data.	2.3	Yield stress and proof stress determinations, calculation of true and engineering stress – strain.	CO2
	2d	Justify functions for given parts of given UTM machine.	2.4	Types of tensile testing machine & their construcion, Universal testing machine, Extensometer and recorders.	
UNIT III: Hardness Test	3a	Classify given hardness test.	3.1	Scope and applicability of hardness test.definitions, Units, Need, Classification of different hardness test, working principle of hardness testing and hardness tester Scratch and wear hardness test- moh's scale.	CO3
	3b	Compare given types of hardness testing on given points.	3.2	Brinell hardness test: Procedure, derivation of BHN, effect of variables, applications, advantages and limitations.	
	3c	Calculate Rockwell hardness number using given hardness tester for given material/metal.	3.3	Rockwell test: Procedure, derivation of Rockwell hardness, effect of variables, applications, advantages and limitations.	
	3d	Calculate vikers hardness number using given hardness tester for given material/metal.	3.4	Vickers hardness test- : Procedure, derivation of VHN, effect of variables, applications, advantages and limitations .	
UNIT IV: Service Tests	4a	Identify type of fractures for given material.	4.1	Charpy and Izod impact tests: standard samples used, test procedure.	CO4
	4b	Compare ductile and brittle fracture on given basis of points.	4.2	Effect of variables.: Role of temperature and stress concentration factors like holes, cracks etc.	
	4c	Select suitable Impact tests to detect fracture for given material.	4.3	Fatigue test: concept of fatigue, loading condition to cause fatigue. Study of S-N Curve Scope and applicability of fatigue test Machine for fatigue test on metals, general procedure.	

	4d	Find creep curve for given application	4.4	Creep Test:Scope and applicability of creep test,,description,applications.creep curve	
UNIT V: Conventional Non-Destructive Testings	5a	Compare given NDT on given points.	5.1	Concept of non destructive testing Need of Non-destructive test, Types of non destructive test.	CO5
	5b	Select suitable NDT for given application.	5.2	Methods of Examination for defects: Visual examination, Penentrant tests, Hammer tests etc.	
	5c	Select suitabe NDT for given magnetic material.	5.3	Method based on magnetic analysis: Magnetic particle method, yoke type.	
UNIT VI: Recent Non-Destructive Testings	6a	Recommend suitable NDT for given application	6.1	Radiographic Examination : Principle of radiography.	CO6
	6b	Illustrate effect of given parameters on radiographic testing	6.2	Radiograph and effect of important variables, requirement for good radiograph , Interpretation of radiograph.Safety precautions in radiographic examination.	
	6c	Use Ultrasonic testing machine for given application for NDT	6.3	Ultrasonic Testing: Fundamentals, Equipments, procedure and applications. Interpretation of results.	
	6d	Compare NDT with destructive testing based on given points	6.4	Comparison of NDT with Destructive testing.	

VII Laboratory Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Psychomotor Domain)		Hours	Aligned COs
I	1	Identify different elastic and plastic bodies from given samples of materials	2#	CO1
I	2	Follow safety rules in Testing Laboratory in metallurgical plant/industry	2#	CO1
I	3	Identify ductile and or brittle failure for given material observing type of fracture occured	2#	CO1
II	4	Identify various parts of Brinell hardness Tester	2#	CO2
II	5	Operate Brinell hardness tester to Measure Hardness for given materials	2#	CO2
III	6	Identify various parts of Vickers hardness Tester	2#	CO3
III	7	Operate vickers hardness testing machine for given materials to find hardness values	2#	CO3
III	8	Measure Hardness by Rockwell hardness Tester for given materials	2#	CO3
III	9	Determine Impact strength for given material by Charpy impact tester.	2#	CO3
III	10	Determine Impact strength by for given material using Izod impact tester.	2#	CO3
III	11	Perform Scratch and wear hardness test for given materials using moh's scale	2#	CO3
IV	12	Operate standard fatigue testing Machine to determine fatigue in given metals	2#	CO4
V	13	Perform dye Penentrant tests on given material to detect any defects	2	CO5
V	14	Perform Magnetic particle testing on given material to detect defects	2#	CO5
VI	15	Perform Ultrasonic Testing on given material to detect any defects	2	CO6

VIII Self-Study Learning (SLO in Cognitive/Psychomotor/Affective Domain)

1. Perform survey on testing of material and write a report on it.
2. Test any 5 samples on Rockwelll harness testing machine and prepare test report.
3. Prepare model for standard samples for impact testing of metal.
4. Prepare comparative posters for hardness values of differnt materials using various hardness testers.
5. Collect various tested samples by different testing methods n prepare report on it .
6. Perform marke survey related cost of various equipments and testing of different materials.
7. Prepare comparative models for destructive and NDT.
8. Test any 5 samples on brinell harness testing machine and prepare test report.
9. Prepare metal samples for Testing , including cutting, polishing, and etching.
10. Test steel,MS rods,plates,angles on UTM and prepare test report on it.
11. Prepare microproject based on curriculum content.
12. Prepare microproject on fatigue testing of material and write a report on it.
13. Prepare model for any NDT method and write a report on it.
14. Prepare samples for testing using UTM and write result obtained after performing test.
15. Test any 5 samples on vickers harness testing machine and prepare test report.

IX Specification Table for Classroom Learning Assessment:

COURSE CURRICULUM

Program	:	Diploma in MT
Course Category	:	DSC
Course Code	:	MT206H
Course Title	:	Steel Making

I Rationale:

The Steel Making course is essential as it equips students with crucial knowledge and skills in steel production, a cornerstone of the country's industrial sector. The course covers fundamental techniques, modern practices, and sustainability measures, preparing students for careers in steel plants, research and development, thus supporting India's infrastructure and economic growth. Emphasis is given on principles of steelmaking and different processes of steel making from Indian viewpoint.

II Industry Identified Competency:

The Student will be able to do in Industry at entry level:

Sequence steps for different steel making process.

III Course Outcomes (COs):

After completing this course students will be able to:

CO1: **Evaluate** the roles of raw materials for steel making.

CO2: **Comprehend** basic principles of steel making.

CO3: **Outline** the various conventional methods of Steel production.

CO4: **Compare** steel making by different electric furnace.

CO5: **Select** appropriate secondary steelmaking processes for given conditions.

CO6: **Identify** the key components of continuous casting machine.

IV Learning Scheme:

Classroom Learning (CL)	Tutorial Learning (TL)	Laboratory Learning (LL)	Self-Study Learning (SL)	Notional Learning Hours (NLH)	Credits
4	-	-	2	6	3

V Assessment Scheme:

Classroom Learning				Tutorial/Laboratory Learning				Self-Study Learning	
FA	SA	Total		FA		SA		SA	
Max	Max	Max	Min	Max	Min	Max	Min	Max	Min
30	70	100	40	-	-	-	-	25	10

VI Classroom Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Cognitive Domain)		Topics and Sub-topics		Aligned Cos
UNIT I: Introduction	1a	Justify the role of given raw material for steel making.	1.1	History of steel making, Present status of iron and steel Industries in India, Raw materials for steel making: Sources of metallic iron, Oxidizing agents,fluxes, sources of heat, deoxidizers, Furnace refractories.	CO1
	1b	Analyse role of IOT in steel making.	1.2	Introduction to IOT in steel making process, IOT impacts on steel making process- real time monitoring, process optimization,supply chain efficiency, quality control, integration with industry 4.0, saftey enhancement.	
es of Steel Making	2a	Select conditions for feasibilty of given steel making reactions.	2.1	Principles of steel making: Carbon reaction- Decarburization, Phosphorous reaction- dephosphurization, Sulphur reaction- desulphurization, Manganese and silicon reactions, De-oxidation of steel, Slag properties.	CO2

UNIT II: Principl	2b	Compare acid steel making with basic steel making on the basis of given points.	2.2	Types of steel making processes- acid and basic steel making.	
	2c	Evaluate efficiency of steelmaking process based on given points.	2.3	Efficiency of steel making processes- factors consider to calculate efficiency of steel making.	
UNIT III: Conventional Steel Making Processes	3a	Outline the Bessemer process of steel making.	3.1	Bessemer process- principle, constructional details of Bessemer converter, process details, outline, merits and demerits, characteristics of steel produced	CO3
	3b	Outline the Open Hearth process of steel making.	3.2	Open - hearth process- principle, constructional details of open hearth furnace, process details, outline, merits and demerits, characteristics of steel produced, Twin Hearth Furnace (THF), Rotary process (Kaldo, Oberhausen) : principle, merits and demerits, characteristics of steel produced.	
	3c	Outline the L.D. process of steel making.	3.3	Oxygen steel making - L.D. Converter: principle, constructional details of L.D. Converter, process details, outline, merits and demerits, characteristics of steel produced.	
UNIT IV: Electric Steel Making	4a	Identify the given parts of EAF and its functions.	4.1	Electric arc furnace process: Electric Arc furnace, constructional details, charge materials, Process detail, outline to produce heat, merits and demerits, characteristics of steel produced.	CO4
	4b	Identify the given parts of Induction furnace and its functions.	4.2	Induction furnace: principles of heating process, charge materials, merits and demerits of process, characteristics of steel produced.	

UNIT V: Secondary Steel Making	5a	Compare secondary steel making with primary steel making on given points.	5.1	Introduction and Merits of secondary steel making process.	CO5
	5b	Recommend suitable Decarburizing techniques for refining of steel.	5.2	Decarburization techniques-Argon Oxygen Decarburising (AOD), Vaccum Oxygen Decarburising (VOD). CLU.	
	5c	Compare ESR with VAR on the basis of given points.	5.3	ESR and VAR process, Synthetic slag refining, Ladle furnace, Hybrid process.	
	5d	Differentiate varius Degassing Techniques on the basis of given points.	5.4	Vacuum Treatment of Steel-Principles, Sievert's law. Degassing techniques: Ladle degassing, Stream degassing, Recirculation degassing.	
	5e	Identify CCS.	5.5	Carbon Capture and Storage (CCS): Technologies for capturing CO2 emissions from steelmaking process.	
UNIT VI: Continuous Casting of Steel	6a	Identify continuous casting machine parts and their functions.	6.1	Continuous Casting : Principle of continuous casting, Construction of continuous casting machine and outline of processes.	CO6
	6b	Compare different continuous casting machines on the basis of given points.	6.2	Types of continuous casting machines with their sketches and comparison.Merits, Demerits and modern development in continuous casting machines.	

VII Laboratory Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Psychomotor Domain)	Hours	Aligned COs

VIII Self-Study Learning (SLO in Cognitive/Psychomotor/Affective Domain)

1. Prepare report on development of steel making.
2. Prepare model of plant lay out of integrated steel plant.
3. Prepare the model of EAF and Induction furnace.
4. Prepare model of Open Hearth and LD Converter.
5. Collect various samples of raw materials for steel making.
6. Prepare report on " variation in cost of different raw materials required for steel making for 3 months".
7. Compile current news related to steel making in and around India.
8. Prepare models of different ontinuous casting machine.
9. Prepare report on current status of steel industries in India and world.
10. Visit any steel plant and write detail report.
11. Prepare report on use of IOT in steel plant and submit.

COURSE CURRICULUM

Program	:	Diploma in MT
Course Category	:	DSC
Course Code	:	MT207H
Course Title	:	Physical Metallurgy

I Rationale:

The Physical Metallurgy course in a Diploma in Metallurgical Engineering deals into the fundamental principles governing the structure, properties, and processing of metals. This course equips students with a deep understanding of how the microstructure of metals influences their mechanical behavior, enabling them to make informed decisions in material selection, processing, and quality control in various industrial applications. The study of this course prepare the students for analysis of the microstructure observed under microscope in metallurgical industries which is further required for controlling the quality.

II Industry Identified Competency:

The Student will be able to do in Industry at entry level:

Carry out microscopic examination of metals and alloys.

III Course Outcomes (COs):

After completing this course students will be able to:

CO1: **Compare** solidification of pure metal with alloy.

CO2: **Construct** different equilibrium diagrams using given data.

CO3: **Interpret** Fe-Fe3C equilibrium diagram

CO4: **Interprete** microstructure of given metals and alloys using different techniques.

CO5: **Determine** ASTM Grain size Number.

CO6: **Interprete** different non ferrous alloy systems.

IV Learning Scheme:

Classroom Learning (CL)	Tutorial Learning (TL)	Laboratory Learning (LL)	Self-Study Learning (SL)	Notional Learning Hours (NLH)	Credits
4	-	4	2	10	5

V Assessment Scheme:

Classroom Learning				Tutorial/Laboratory Learning				Self-Study Learning	
FA	SA	Total		FA		SA		SA	
Max	Max	Max	Min	Max	Min	Max	Min	Max	Min
30	70	100	40	25	10	25+	10	25	10

VI Classroom Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Cognitive Domain)		Topics and Sub-topics		Aligned Cos
UNIT I: Solidification of metals	1a	Compare solidification of pure metal with alloy on the basis of given points.	1.1	Concept of solidification - Transformation of liquid into solid, Nucleation and growth, dendrite formation, Grain and grain boundaries, Cooling curves for pure metals and binary alloys, Coring defect.	CO1
e Equilibrium Diagrams	2a	Modify Gibbs phase rule for given metallurgical systems.	2.1	Definition of Gibbs's phase rule and its application, its modification for metallurgical system.	CO2
	2b	Apply Hume- Ruthery's principles for identification of solid solutions.	2.2	Hume- Ruthery's rules for formation of solid solution.	
	2c	Classify solid solutioins based on given points.	2.3	Solid solutions - Substitutional solid solution, Interstitial solid solution, Terminal solid solution & Intermediate solid solution, Intermediate compounds, electron compounds, their examples.	

UNIT II: phas	2d	Construct binary equilibrium diagram from given data.	2.4	Construction of equilibrium diagrams; viz. Monotectic, Peritectic, Eutectoid, peritectoid reaction, Numerical based on construction of Binary equilibrium diagram.	
	2e	Determine proportions of phases by applying lever rule.	2.5	Lever Rule: Its derivation and application to equilibrium diagram, Numerical based on lever rule.	
UNIT III: Iron- Carbon Equilibrium Diagram:	3a	Interpret Fe-Fe3C diagram.	3.1	Aotropic transformation of iron, Iron -Carbon Diagram-Reactions in Iron- Carbon diagram, Critical temperatures in Iron- carbon diagram, classifications of plain carbon steel and cast irons with reference to iron carbon diagram.	CO3
	3b	Draw different microstructures from given Fe-Fe3C diagram.	3.2	Microstructure and properties of plain carbon steels and cast iron with reference to iron carbon diagram.	
	3c	Compare cooling of different steels and cast irons based on iron carbon diagram.	3.3	Cooling of different carbon steels and cast irons.	
Macroscopic Examination	4a	Interprete microstructure of given metals and alloys using microscopic examinations.	4.1	Microscopic Examination: Preparation, techniques & methods of sampling,Mechanical and electrolytic polishing, Etching techniques and etching reagents,Analysis and interpretation of phases related to steel and cast iron, The metallurgical microscope and metallograph,Optical principles of metallurgical microscope. Optical system, objectives, eye pieces and properties , Microphotography, films properties, exposing, developing and printing.	CO4

UNIT IV: Micro and M	4b	Compare microcsopic examination with macroscopic examination on given points.	4.2	Macroscopic Examination: Principles and procedure of macroscopic examinations, Sulphur printing, phosphorus printing, oxide printing, Etching reagents, Grain / fibre flows of forged components, Hydrogen flakes and its determination.	
	4c	Interprete microstructure of given metals and alloys using advanced Imaging techniques	4.3	Advanced Imaging Techniques: The use of high-resolution imaging methods, such as scanning electron microscopy (SEM), transmission electron microscopy (TEM)	
UNIT V: Quantitative Metallography	5a	Determine ASTM grain size number.	5.1	Measuring attachment on microscope , Calibration of microscope, measurement of grain size, ASTM grain size number,Measurement of case depth, plating thickness.	CO5
VI: Metallurgy of Non ferrous Alloys	6a	Interprete Cu-Zn equilibrium Diagram.	6.1	Brasses- Cu-Zn equilibrium diagram, Brasses- single phase and double phase brass, Mechanical properties and application of commonly used industrial brasses.	
	6b	Interprete Cu-Sn equilibrium Diagram.	6.2	Bronzes: Cu-Sn equilibrium diagram- cast dendritic structure, composition, microstructure, mechanical properties and application of commonly used industrial bronzes, composition and properties Gun metal and phosphor bronze.	
	6c	Modify Al-Si alloy using appropriate composition.	6.3	Al Alloys: Al-Si equilibrium diagram, cast and modified structures of Al-Si alloys, Compositions and properties of commonly used as cast and as wrought Al-Si Alloys.	CO6

UNIT V	6d	Select proper Bearing material for given application.	6.4	Bearing metals: Classification of bearing metals, Requirements of good bearing metal, Composition, microstructure, mechanical properties and applications of Lead base and Tin base bearing metals, Effects of copper addition on properties of bearing metal.

VII Laboratory Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Psychomotor Domain)		Hours	Aligned COs
II	1	Construct Binary Equilibruim Diagram from given data.	4#	CO2
III	2	Draw Fe-Fe3C diagram phases present over diagram.	4#	CO3
IV	3	Operate Metallurgical Microscope.	4#	CO4
IV	4	Perform microscopic analysis of Steel sample.	4#	CO4
IV	5	Perform microscopic analysis of Cast Iron sample.	4#	CO4
IV	6	Carry out Mounting of specimen by mounting press.	4#	CO4
IV	7	Carry out phoshorous printing of given specimen.	4#	CO4
IV	8	Carry out Shulphur printing of given specimen.	4#	CO4
V	9	Measure ASTM Grain size nnumber of given sample.	4#	CO5
V	10	Analyse microstructure using Image Analyser.	4#	CO5
VI	11	Carry out polishing and etching by Electrolytic polishing.	4#	CO5
VI	12	Perform microscopic analysis of Copper alloys	4#	CO6
VI	13	Perform microscopic analysis of Aluminium alloys	4	CO6
VI	14	Perform microscopic analysis of bronze.	4	CO6

Note: # Compulsory

VIII Self-Study Learning (SLO in Cognitive/Psychomotor/Affective Domain)

1. Prepare model of mounting press.
2. Prepare model of electrolytic polishing machine.
3. Draw equilibrium diagrams for brass and bronzes.
4. prepare microproject on any topic of curriculum.
5. Collect at least one sample of steel and prepare microscopic examination report.
6. Collect at least one sample of cast iron and prepare microscopic examination report.
7. Collect at least one sample of non ferrous alloy and prepare microscopic examination report.
8. Prepare report on various raw materials/ chemicals/ reagents required for microscopic examimation of steel.

IX Specification Table for Classroom Learning Assessment:

Unit No.	Units	Classroom Learning Hours	C/O	Levels from Cognition Process Dimension			Total Marks
				R	U	A	
1	Solidification of metals	8	C	02	04	04	10
			O	0	04	00	4
2	phase Equilibrium Diagrams	10	C	02	04	06	12
			O	00	04	04	8
3	Iron- Carbon Equilibrium Diagram:	12	C	02	08	06	16
			O	00	04	04	8
4	Micro and Macroscopic Examination	12	C	02	08	04	14
			O	02	00	06	8
5	Quantitative Metallography	6	C	02	04	00	6
			O	00	00	04	4
6	Metallurgy of Non ferrous Alloys	12	C	00	00	12	12
			O	02	06	00	8
Total		60	C	10	28	32	70
			O	4	18	18	40

*C - Compusory O - Optional
*R – Remember U – Understand A – Analyze / Apply

X Question Paper Format for Summative Assessment (SA):

Q. No.	Bit 1	Bit 2	Bit 3	Bit 4	Bit 5	Bit 6	Bit 7	Options	
	TLM	TLM	TLM	TLM	TLM	TLM	TLM	C	O
1	1R2	2R2	3R2	4R2	5R2	4R2	6R2	5	7

COURSE CURRICULUM

Program	:	Diploma in MT
Course Category	:	DSE
Course Code	:	MT208H
Course Title	:	Welding Technology

I Rationale:

The Welding Technology course equips students with practical skills and theoretical knowledge related to various welding techniques, equipment, and materials. This course prepares students for careers in industries such as construction, manufacturing, and automotive by providing hands-on experience in welding processes like arc welding, gas welding, and resistance welding. Understanding welding technology is essential for joining metal components effectively and ensuring the structural integrity of welded assemblies.

II Industry Identified Competency:

The Student will be able to do in Industry at entry level:

Carry out different welding processes.

III Course Outcomes (COs):

After completing this course students will be able to:

CO1: **Analyse** suitability of metals for welding.

CO2: **Select** different welding processes for given applications.

CO3: **Recommend** most appropriate special welding process for given application.

CO4: **Compare** Brazing with soldering.

CO5: **Inspect** weld joints using different methods..

CO6: **Select** proper welding process for given alloys.

IV Learning Scheme:

Classroom Learning (CL)	Tutorial Learning (TL)	Laboratory Learning (LL)	Self-Study Learning (SL)	Notional Learning Hours (NLH)	Credits
3	-	2	1	6	3

V Assessment Scheme:

Classroom Learning				Tutorial/Laboratory Learning				Self-Study Learning	
FA	SA	Total		FA		SA		SA	
Max	Max	Max	Min	Max	Min	Max	Min	Max	Min
30	70	100	40	25	10	25+	10	25	10

VI Classroom Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Cognitive Domain)		Topics and Sub-topics		Aligned Cos
UNIT I: Introduction to Welding	1a	Classify givn welding processes.	1.1	Principle of Welding, Classification of Welding Methods,Weldability, Properties required to weld metal, Heat affected zone,Microstructure of HAZ of steel.	CO1
	1b	Compare weld positions on given points.	1.2	Welding terms, Welding procedure, Joint design, Weld positions.I.S. Specification, AWS electrode classification, Electrode coating	
	1c	Follow safety rules and regulations in welding shop.	1.3	Safety rules and regulations in welding shop.Welding Specifications.	
ments	2a	Compare given gas welding flames.	2.1	Gas Welding Process: Principle, Types of Flames, Working, Machines and accessories, Advantages, Limitations & Applications.	

UNIT II: Welding Processes and Equip	2b	Select SAW for different applications.	2.2	Shielded Metal Arc Welding Process: Principle, Power Sources, Electrode coating, Working, Machines and accessories, Advantages, Limitations & Applications, AWS electrode classification Submerged Arc Welding Process: Principle, Working, Machines and accessories, Advantages, Limitations & Applications, Resistance Welding: spot welding, seam welding, nugget formation.	CO2
	2c	Differentiate TIG and MIG process.	2.3	TIG and MIG Welding Process: Principle, Working, Machines and accessories Advantages, Limitations & Applications	
UNIT III: Special welding Methods	3a	Compare different special welding methods.	3.1	Principle and applications of : Electroslag Welding, Plasma Arc Welding, Laser Beam Welding, Electron Beam Welding, Ultrasonic Welding,Thermit Welding, Explosive Welding, Friction Welding.	CO3
UNIT IV: Brazing and Soldering	4a	Compare brazing with soldering.	4.1	Brazing and Soldering : Principle, Physical aspects of processes, Joint Preparation.	CO4
	4b	Suggest suitable fluxes for brazing and soldering.	4.2	Brazing and Soldering : Fluxes and their purpose, Different Methods, Applications.	
UNIT V: Imnspection of Welds.	5a	Suggest suitable remedies for welding defects.	5.1	Causes and Remedies of Weld Defects : Incomplete Penetration, Cracking, Inclusions, Porosity, Lack of Fusion, Undercutting, Embrittlement of steel weld.	CO5
	5b	Inspect weld using suitable tests.	5.2	Inspection and Testing of welded parts: Tension Test, Nick Bend Test, Non destructive tests.	

UNIT VI: Welding of Metals and Alloys.	6a	Select proper welding process for given alloys.	6.1	Welding of - Steel, Cast Iron, Aluminum and its alloy, Copper and its alloy.	CO6

VII Laboratory Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Psychomotor Domain)		Hours	Aligned COs
I	1	Prepare Different weld Joints.	2#	CO1
I	2	Perform analysis of HAZ microstructure of steel weld.(Part I)	2#	CO1
I	3	Perform analysis of HAZ microstructure of steel weld. (Part II)	2	CO1
II	4	Perform welding of steel parts by Oxy-Acetylene Gas welding process (Part I)	2#	CO2
II	5	Perform welding of steel parts by Oxy-Acetylene Gas welding process (Part II)	2	CO2
II	6	Perform electric arc welding of steel parts.	2#	CO2
II	7	Perform MIG Welding process. (Part I)	2#	CO3
II	8	Perform MIG Welding process. (Part II)	2#	CO2
III	9	Perform Thermit welding on steel parts. (Part I)	2#	CO3
III	10	Perform Thermit welding on steel parts. (Part II)	2	CO3
IV	11	Perform brazing of given alloys.	2#	CO4
IV	12	Perform Soldering of given alloys.	2#	CO4
V	13	Perform Nick bend test on weld.	2#	CO5
VI	14	Perform any one NDT to inspect given weld.	2#	CO6
VI	15	Perform Welding of Cu/Al alloys.	2#	CO6

Note: # Compulsory

VIII Self-Study Learning (SLO in Cognitive/Psychomotor/Affective Domain)

1. Collect specifications of gas welding and arc welding equipments and accessories
2. Compile specifications of gas welding and arc welding equipments and accessories.
3. Collect samples of weld defects and prepare disply.
4. Prepare model of any one special welding process.
5. Visit to any fabrication workshop and prepare the report.
6. Prepare microproject based on curriculum.

COURSE CURRICULUM

Program	:	Diploma in MT
Course Category	:	DSE
Course Code	:	ME209H
Course Title	:	Production Technology

I Rationale:

Production technology encompasses the integration of human resources, machinery, materials, methodologies, information, and energy to create products efficiently and sustainably. In today's advanced manufacturing scenery, production processes are increasingly complex, necessitating skilled technicians who can navigate different challenges. To effectively increase productivity across men, machines, equipment, and materials, it is vital to employ industrial engineering techniques. This course provides valuable insights and practical techniques aimed at increasing productivity and improving quality. By mastering these concepts, technicians will be equipped to tackle modern manufacturing challenges effectively and contribute to the overall success of their organizations.

II Industry Identified Competency:

The Student will be able to do in Industry at entry level:

Optimize material handling and logistics systems.

III Course Outcomes (COs):

After completing this course students will be able to:

CO1: **Identify** various techniques of product design, process planning and control.

CO2: **Apply** machine scheduling and sequencing technique for given application.

CO3: **Identify** factors affecting process planning.

CO4: **Choose** plant location and design plant layout.

CO5: **Apply** method study and work measurement for given application.

CO6: **Apply** postural assessment methods for given application.

IV Learning Scheme:

Classroom Learning (CL)	Tutorial Learning (TL)	Laboratory Learning (LL)	Self-Study Learning (SL)	Notional Learning Hours (NLH)	Credits
3	-	2	1	6	3

V Assessment Scheme:

Classroom Learning				Tutorial/Laboratory Learning				Self-Study Learning	
FA	SA	Total		FA		SA		SA	
Max	Max	Max	Min	Max	Min	Max	Min	Max	Min
30	70	100	40	25	10	25+	10	25	10

VI Classroom Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Cognitive Domain)		Topics and Sub-topics		Aligned Cos
UNIT I: Production System	1a	Classify given Production System and justify its need.	1.1	Introduction to production system, Types of production system- Intermittent and Continuous, Classification of Production system - i) Job Shop ii) Intermittent (Batch) iii) Continuous iv) Cellular, Requirements and Factors of good production system.	CO1
	1b	Use given standared for particular application.	1.2	Product development approaches, Product development process and Related Concepts- Simplification, standardization, Specialization.	
	1c	Distinguish between given productive system.	1.3	Definition of productivity, types, techniques of improvement of productivity.	
	2a	Establish a frame work for process design.	2.1	Introduction- Definition, scope, framework.	

UNIT II: Process Planning	2b	Identify the factors responsible for affecting process planning.	2.2	Process Design- functions, types, characteristics; Process Planning-steps, process selection, Equipment Selection; Factors affecting the process planning.	CO2
	2c	Select ther plant and equipmetns using Breack Even Analysis (BEA)	2.3	Breack Even Analysis (BEA)-Introduction, Application; Manpower planning-Definition, Reasons, Objectives, Process, Advantages.	
	2d	Decide make or buy decision based on the given information/ application.	2.4	Make or Buy Decision-Introduction, Factors influencing make or buy Decision, Functions.	
UNIT III: Production planning, Scheduling and control	3a	Select the functions of production planning and control.	3.1	Production Planning and Control (PPC)- Introduction, Need, Objectives, Principles and Functions.	CO3
	3b	Differentiate between given terms.	3.2	Production Planning and Control (PPC) Elements-Planning, Routing, Scheduling, Dispatching, Checking the process or follow-up, Inspction; Organisation for PPC-Centralised PPC and Decentralised PPC.	
	3c	Prepare a production schedule using a Gantt chart for given application.	3.3	Production Scheduling: Introduction, concept of loading and Sequencing; Loading- Introduction, Gantt Chart.	
	3d	Solve sequencing problem of given application.	3.4	Sequencing-Introduction, Sequencing Problems-i) N jobs on 2 machines problem, ii) N jobs 3 Machines Problem.	
ation and Layout	4a	Identify factors affecting site selection.	4.1	Plant Location-Introduction, Need, Plant location problem, Advantages, Importanct of Location, Importance of site selection, Factors influence the selection of plant location.	
	4b	Apply Government policies and their relation for plant	4.2	Government policies, Geographical Relaxation for backward areas.	

UNIT IV: Plant Loc	4c	Compare given types of plant layout on given points.	4.3	Plant layout: Introduction, Definition, Plant layout problems, Objectives, Principles, Advantages and types of plant layout.	CO4
	4d	Distinguish between good and bad plant layout on given points.	4.4	Plant layout: Characteristics of good plant layout, Symptoms of bad plant layout- Product, Process, combination and Fixed position.	
UNIT V: Method Study and Work Measurement	5a	Select proper recording technique for given application.	5.1	Method study:– Definition, Objectives, Terminology used, Steps in method study and method improvement.	CO5
	5b	Prepare chart for the given application with proper justification.	5.2	Method study (various recording techniques):– Charts - i) Outline process, ii) Flow process charts, iii) Multiple activity chart, iv) Two handed process chart; Diagrams- Flow and String diagram.	
	5c	Select proper time study equipment for the given application.	5.3	Work Measurement: - Definition, Objectives, Techniques of Work Measurement, Time study	
UNIT VI: Ergonomics	6a	Select proper anthropometric measurement tool forthe given application.	6.1	Ergonomics: Definition, Social significance of ergonomics, General and individual ergonomics principle. Anthropometric Measurements: Introduction, Percentile Humans, Anthropometric Databases, Anthropometric Resources.	CO6
	6b	Identify various environmental effect on human and work.	6.2	Effect of Environmental factors: Noice, Vibration, illumination, climate, chemical substances.	

VII Laboratory Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Psychomotor Domain)		Hours	Aligned COs
I	1	Identify the technique to improve the productivity of given application.	2	CO1
II	2	Solve Problems on Break Even Analysis of the given appliation.	2#	CO2
II	3	Solve Problems on Break Even Analysis of the given appliation.	2#	CO2
III	4	Optimize given sequencing problem (N jobs on 2 machines) for the given situation/ application/ Problem.	2#	CO3
III	5	Optimize scheduling problem using gantt chart.OR Draw the network of the project using gantt chart for the given problem.	2#	CO3
III	6	Draw the network of the project using gantt chart for the given problem.	2#	CO3
IV	7	Collect information about government policies for locating the plant.	2#	CO4
IV	8	Collect the information about government relaxation policies for locating the plant in backward area.	2#	CO4
V	9	Use flow process chart (Man and material type) for Inspection of given component.	2#	CO4
V	10	Use two handed process chart for assembly of ceiling fan to ceiling.	2#	CO5
V	11	Use two handed process chart for assebly of pen.	2#	CO5
V	12	Calculate stadard time, Normal time and cycle time of the given problem.	2#	CO5
VI	13	Calculate risk score using REBA worksheet for the given posture.	2#	CO5
VI	14	Calculate risk score using RULA worksheet for the given posture.	2#	CO5
VI	15	Calculate risk score using ERIN worksheet for the given posture.	2#	CO6
VI	16	Calculate risk score using WERA worksheet for the given posture.	2#	CO6

Note: # Compulsory

VIII Self-Study Learning (SLO in Cognitive/Psychomotor/Affective Domain)

1. Collect informtion about product development and factors of good prodution system and prepare report.
2. Visit to sugar industry and Prepare a report on the process of sugar manufacturing.
3. Visit gear manufacturing industry and Analysie the process of gear manufacturing and write report on it.
4. Visit to tyre manufacturing industry and prepare report on its manufacturing process.
5. Visit to any manufacturing industry with automated system and perform comparative study on scheduling and sequencing.
6. Collect the information on government policies about establishment of new factory.
7. Collect the information on govenment policies about establishment of new factory in backward areas.
8. Prepare model on line balancing.
9. Prepare model of Gannt chart.
10. Prepare various motion study chart for given application using Therbligs.
11. Prepare various hand activity chart for laboratory and use it for development of laboratory.
12. Prepare two-hand process chart drawn in terms of therbligs for given applicaiton.
13. Perform measurment of the body of your friend in laboratory.
14. Perform study on awkward posture of given application using REBA, RULA, ERIN and WERA assessemnt sheet.
15. Analyse given awkward posture and suggest remedial action.

IX Specification Table for Classroom Learning Assessment:

Unit No.	Units	Classroom Learning Hours	C/O	Levels from Cognition Process Dimension			Total Marks
				R	U	A	
1	Production System	6	C	2	4	0	6
			O	0	0	4	4
2	Process Planning	8	C	2	4	4	10
			O	0	0	4	4
3	Production planning, Scheduling and control	9	C	2	4	10	16
			O	0	0	6	6
4	Plant Location and Layout	9	C	2	8	4	14
			O	2	4	6	12
5	Method Study and Work Measurement	7	C	2	4	12	18
			O	0	4	4	8
6	Ergonomics	6	C	0	0	6	6
			O	2	4	0	6
Total		45	C	10	24	36	70
			O	4	12	24	40

*C - Compusory O - Optional
*R – Remember U – Understand A – Analyze / Apply

X Question Paper Format for Summative Assessment (SA):

Q. No.	Bit 1	Bit 2	Bit 3	Bit 4	Bit 5	Bit 6	Bit 7	Options	
	TLM	TLM	TLM	TLM	TLM	TLM	TLM	C	O

COURSE CURRICULUM

Program	:	Diploma in MT
Course Category	:	SEC
Course Code	:	MT252H
Course Title	:	Metallurgical Analysis

I Rationale:

The course on Metallurgical Analysis is essential for a diploma in Metallurgy, providing students with a deep understanding of material properties and behaviors through advanced analytical techniques. This knowledge is crucial for quality control, material selection, and failure analysis in various industries. By mastering these techniques, students gain practical skills to address real-world challenges, ensuring they are well-equipped for careers in materials science, engineering, and manufacturing sectors.

II Industry Identified Competency:

The Student will be able to do in Industry at entry level:

Conduct Metallurgical Analysis and Testing

III Course Outcomes (COs):

After completing this course students will be able to:

CO1: **Design** chemical lab layout

CO2: **Follow** safety rules and precautions in chemical laboratory

CO3: **Perform** gravimetric analysis

CO4: **Perform** volumetric analysis

CO5: **Analyse** metals using various instrumental methods

CO6: **Analyse** different slags

IV Learning Scheme:

Classroom Learning (CL)	Tutorial Learning (TL)	Laboratory Learning (LL)	Self-Study Learning (SL)	Notional Learning Hours (NLH)	Credits
2	-	4	-	6	3

V Assessment Scheme:

Classroom Learning				Tutorial/Laboratory Learning				Self-Study Learning	
FA	SA	Total		FA		SA		SA	
Max	Max	Max	Min	Max	Min	Max	Min	Max	Min
-	-	-	-	50	20	50+	20	-	-

VI Classroom Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Cognitive Domain)		Topics and Sub-topics		Aligned Cos
UNIT I: Introduction	1a	Follow safety rules and precautions in chemical testing lab.	1.1	Importance of chemical analysis of metals and alloys, Methods of quantitative analysis.safety rules and precauitons in chemical lab	CO1
	1b	Carry out Sampling of ores, metals, alloys	1.2	Sampling of ores, metals, alloys and other metallurgical important products	
	1c	Identify Important chemicals required in chemical laboratory	1.3	Layout of chemical laboratory and equipments in chemical laboratory, Important chemicals required in chemical laboratory	
	1d	Identify Errors in quantitative determination – along with causes and remedies	1.4	Quantitative & Qualitative analysis, Errors in quantitative determination – their causes and remedies	

UNIT II: Gravimetric Analysis	2a	Perform Gravimetric Analysis on given material	2.1	Gravimetric Analysis: Principle and Applications, Solubility product rule: statement and applications of solubility product, Steps in gravimetric analysis: Filtration, Drying and Ignition of precipitate	CO2
	2b	Compare Requirements of precipitated and weighed form	2.2	Requirements of precipitated and weighed form, Effect of excess precipitant and temperature in gravimetric analysis	
	2c	Carry out Co-Precipitation, Masking for given meatsl/alloy	2.3	Salt effect, Effect of pH on completion of precipitation in gravimetric analysis Importance of Co-Precipitation, Masking in gravimetric analyisis	
UNIT III: Volumetric Analysis	3a	Perform volumetric analysis for given metal/alloy	3.1	Principle, Advantages of volumetric analysis. Classification of methods of volumetric analysis, Volume Measurement	CO3
	3b	Prepare of standard solutions for chemical analysis	3.2	Requirements of reactions for volumetric analysis methods, Normality of solution, Gram Equivalent –Definition and Importance,Steps for Preparation of standard solutions, Indictors and their properties used for volumetric analysis	
	3c	Draw titration curves for given solutions	3.3	Titration of acid and alkaline solutions, titration curves, titration of oxidizing and reducing solutions.	
ntal Methods	4a	Use Instrumental Methods for chemical analysis of given metals/allloys	4.1	Spectroscope– principle, spectrograph and applications, Electro gravimetric analyzer–operation and application, Photocolorimetry- operation and application	

UNIT IV: Instrume	4b	Use Strohlein Apparatus for chemical analysis of given metal/alloy	4.2	Carbon & sulphur determination by combustion method – Strohlien apparatus instrument and operation	CO4
	4c	Carry out fractrographic study of given metals/alloy using SEM	4.3	Fractrographic study of metals/alloy/materials by steromicroscope/SEM	
UNIT V: Fire-Assay Principle	5a	Prepare standard solutions for various tests in fire assaying	5.1	Fire Assay– Principle, Methods of Silver and Gold determination from ores,Steps for Preparation of standard solutions for Fire-Assay	CO5
	5b	Determine Quantitatively percentage of – C, Si, S, P and Mn in given steel.	5.2	Quantitative determination of – C, Si, S, P and Mn in steel.	
	5c	Determine content of given alloy	5.3	Cu and Zn in brass,copper and tin in bronze by wet chemical analysis method	
UNIT VI: Analysis of Slags	6a	Suggest suitable method for analysis of slag	6.1	Iron Blast furnace slag Analysis: i) Determination of silica ii)Determination of sulphur by Evolution –Titration method	CO6
	6b	Classify Types of Slags in metallurgical industries	6.2	Steel making slag Analysis: i) Basic Open Hearth Slag ii) Acid Open Hearth Slag	
	6c	Determine content for given slag sample	6.3	Determination of Silica and Alumina	

VII Laboratory Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Psychomotor Domain)		Hours	Aligned COs
I	1	Design chemical analysis Laboratory	4#	CO1
I	2	Follow safety rules ina chemical laboratory	4#	CO1
I	3	Prepare Standard solution for chemical analysis of metals and alloys	4#	CO1
II	4	Carry out sampling of given ore by coning and quartering method	4#	CO2
II	5	Determine Manganese by Sodium Bismuthate method	4#	CO2
II	6	Prepare standard solution for strhohlein appratus for determination of Carbon and sulphur	4#	CO2
II	7	Operate Strohlein Apparatus to determine Carbon and Sulphur in steel sample	4#	CO2
II	8	Determine combined Carbon in iron or steel by Eggert'z method	4#	CO2
II	9	Determine Silicon in plain carbon steel by Gravimetric method	4#	CO2
III	10	Determine S in steel and cast iron by Evolution-titration method	4#	CO3
III	11	Analyze iron ore for determination of total Fe by gravimetric method	4#	CO3
IV	12	Determine Zinc in given brass sample by Wet Chemical Analysis (Gravimetric and Volumetric Methods)Method	4#	CO4
V	13	Prepare samples for microscopic and spectroscopic analysis (cutting, mounting, grinding, polishing, and etching).	4#	CO5
V	14	Determine Cu in given brass sample by Wet Chemical Analysis (Gravimetric and Volumetric Methods)Method	4#	CO5
V	15	Perform fire assaying of silver coin by cupellation process	4#	CO5
VI	16	Perform Iron Blast furnace slag Analysis	4	CO6

Note: # Compulsory

COURSE CURRICULUM

Program	:	Diploma in CE/ME/EE/EC/CO/IT/AE/MT/ PK/TX/TR/AI/MK
Course Category	:	VEC
Course Code	:	VE251H
Course Title	:	Environmental Sustainability

I Rationale:

This course aims to equip students with practical skills and knowledge necessary for promoting environmental sustainability in engineering practices. The focus will be on hands-on activities, real-world applications, and practical projects that address key areas of environmental sustainability.

II Industry Identified Competency:

The Student will be able to do in Industry at entry level:

Address environmental concerns and provide sustainable solutions.

III Course Outcomes (COs):

After completing this course students will be able to:

CO1: **Select** and plant native and drought-resistant tree species to enhance local biodiversity.

CO2: **Manage** different types of waste, and create effective collection and processing plans for recyclable materials.

CO3: **Analyse** environmental data such as temperature and CO2 levels, and present findings through graphs and reports.

CO4: **Implement** systems for rainwater harvesting, waste water minimization, and conduct audits.

CO5: **Develop** analytical and problem-solving skills to assess environmental practices and recommend improvements for sustainability.

IV Learning Scheme:

Classroom Learning (CL)	Tutorial Learning (TL)	Laboratory Learning (LL)	Self-Study Learning (SL)	Notional Learning Hours (NLH)	Credits
-	-	2	2	4	2

V Assessment Scheme:

Classroom Learning				Tutorial/Laboratory Learning				Self-Study Learning	
FA	SA	Total		FA		SA		SA	
Max	Max	Max	Min	Max	Min	Max	Min	Max	Min
-	-	-	-	25	10	25	10	25	10

VI Classroom Learning Content:

VII Laboratory Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Psychomotor Domain)		Hours	Aligned COs
	1	Select and plant native and drought-resistant tree species to provide shade and cool the environment through evapotranspiration.	2#	CO1
	2	Prepare seed bomb and plant it in campus.	2#	CO1
	3	Develop a schedule and assign teams to take care of the planted trees.	2#	CO1
	4	Identify and document different species of flora and fauna.	2	CO1
	5	Categorize and quantify different types of waste generated in institute campus.	2#	CO2
	6	Create a collection and processing plan for recyclable materials.	2#	CO2
	7	Monitor the effectiveness of the segregation system and provide feedback.	2	CO2
	8	Prepare a solid waste management plan of your campus.	2#	CO2
	9	Develop composting plant for biodegradable waste of your campus.	2#	CO2
	10	Create graphs and reports on temperature and CO2 levels over time.	2	CO3
	11	Calculate the carbon footprint of the campus or individual students.	2#	CO3
	12	Design a rainwater harvesting system for any building in your campus.	2#	CO4

	13	Prepare a report on wastewater generation in any one building in your campus including comments to reduce it.	2#	CO4
	14	Conduct a simple energy audit in the classroom or home.	2#	CO5
	15	Analyse energy consumption and identify saving opportunities in any campus building / home..	2#	CO5
	16	Conduct a simple waste audit in the classroom or home.	2	CO5
	17	Analyse waste generation and identify reduction opportunities.	2	CO5

Note: # Compulsory

VIII Self-Study Learning (SLO in Cognitive/Psychomotor/Affective Domain)

1. Organize a tree planting day on campus or in the local community.
2. Design and create useful items from waste materials, such as furniture from pallets or art from plastic bottles.
3. Create educational materials and conduct workshops on energy-saving practices.
4. Organize an awareness drive to educate peers and the community about global warming and its effects.
5. Install a small-scale rainwater harvesting system at home/campus and test its efficiency.
6. Prepare and Install bird feeders in appropriate location.
7. Organize a waste material collection drive in campus or in the local community.
8. Organize a energy conservation drive in campus or in the local community.

COURSE CURRICULUM

Program	:	Diploma in ME/EE/EC/IT/MT/TX/AE/PK/CM/MK/AI
Course Category	:	GE
Course Code	:	CE292H
Course Title	:	Basic Surveying

I Rationale:

The outcomes aim to develop essential surveying skills, crucial for accurate data collection and land measurement. Identifying signs and symbols helps in understanding survey plans. Measuring line lengths with proper equipment ensures precision. Taking bearings using a Prismatic Compass is fundamental for directional accuracy. Plotting alignments with a Plane Table Survey enhances the ability to represent field data visually. Finally, conducting levelling tasks ensures elevation measurements are correctly taken for various engineering or construction applications. These skills are critical for effective surveying, contributing to precise planning, design, and implementation of infrastructure projects.

II Industry Identified Competency:

The Student will be able to do in Industry at entry level:

Carry out surveys of small area**.**

III Course Outcomes (COs):

After completing this course students will be able to:

CO1: **Identify** the signs and symbols used in surveying.

CO2: **Measure** the length of lines using given equipment.

CO3: **Take** bearings of the lines using Prismatic Compass.

CO4: **Plot** alignments of open traverse or boundaries of close traverse using Plane table survey.

CO5: **Carry** out levelling for given task.

IV Learning Scheme:

Classroom Learning (CL)	Tutorial Learning (TL)	Laboratory Learning (LL)	Self-Study Learning (SL)	Notional Learning Hours (NLH)	Credits
2	-	2	-	4	2

V Assessment Scheme:

Classroom Learning				Tutorial/Laboratory Learning				Self-Study Learning	
FA	SA	Total		FA		SA		SA	
Max	Max	Max	Min	Max	Min	Max	Min	Max	Min
30	70**	100	40	25	10	25	10	-	-

** Online Objective type

VI Classroom Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Cognitive Domain)		Topics and Sub-topics		Aligned Cos
UNIT I: Surveys	1a	Classify given type of survey based on purpose and instrument used.	1.1	Definition of Survey, Objects of survey, Types of survey, Use of survey, Principles of survey, Instruments used in surveying and levelling	CO1
	1b	Identify conventional signs and symbols in the given map.	1.2	Conventional signs and symbols used in survey maps	
urements	2a	Identify given linear distance measuring instruments.	2.1	Study and use of instruments for linear measurements- Metric chain, Measuring Tapes and its types, Ranging rod, Arrow, Peg, Digital tape, Methods of linear measurements- By pacing, by speedometer, by chaining, by digital tape. DDM, ODM, EDM.	
	2b	Describe given method of ranging.	2.2	Ranging- Direct and indirect ranging and procedure, Line Ranger, Code of signals used in ranging, Concept of Leader and Follower.	

UNIT II: Linear Meas	2c	Distinguish between given chaining procedures.	2.3	Chaining Procedure on plane and sloping ground. Correction of linear measurement for incorrect length of chain/tape.	CO2
	2d	Identify the instruments used for offset.	2.4	Taking offsets, Instruments used in taking offsets – Cross staff & Optical square; Types of offsets-Long and Short offsets, Perpendicular and Oblique offsets, Degree of precision in taking offset.	
	2e	Compute area of field from given data.	2.5	Chain & Cross Staff survey-Noting on page of field book, Precautions in booking field notes, Recording the observation. Calculation of Areas from cross staff survey	
UNIT III: Chain and Compass Traversing	3a	Convert WCB to RB and vice versa to find included angle.	3.1	Technical Terms –True bearing, Magnetic bearing, and Arbitrary bearing, Whole Circle Bearing, Quadrantal Bearing /Reduced Bearing, Conversion of bearings.	CO3
	3b	Identify the given components of Prismatic compass.	3.2	Prismatic Compass – Component parts, construction and use.	
	3c	Determine included angles of traverse using given Compass survey data.	3.3	Fore bearing, Back bearing, finding Included angles from bearings and calculation of bearings from included angles.	
	3d	Select a method of plotting traverse for plotting a traverse based on given data.	3.4	Traversing – Methods of plotting a traverse and closing error, Graphical adjustment for closing error.	

UNIT IV: Levelling and Contouring	4a	Identify given components of a level and levelling staff.	4.1	Levels and Staff- Dumpy level – Components, Construction, Fundamental axes and their relationships Line of sight, Line of Collimation, Axis of bubble tube. Temporary adjustments of dumpy level. Types of levelling Staff – Ordinary, Telescopic and Folding type	CO4
	4b	Interpret given sight from the stated conditions.	4.2	Technical Terms used in levelling– Level surface, Level line, Horizontal line, Vertical line, Datum surface, Reduced level, Bench mark and its types. Foresight, Back sight, Intermediate sight, Change point, Height of collimation. Recording in Level book. Height of collimation. Recording in Level book.	
	4c	Compute reduce levels from the given data using HI and rise and fall method.	4.3	Methods of Reduction of level – Height of instrument method and Rise and Fall method. Arithmetical checks,	
	4d	Classify given type of levelling.	4.4	Classifications of levelling - Simple, Differential, Profile, Cross sectional, fly levelling, Plotting of Profile level and cross section using level data	
	4e	Interpret the given contour map.	4.5	Contouring- Tech. Terms – Contour, Contour Interval, Horizontal Equivalent., Uses of Contour Maps Characteristics of contours, Method of locating contours, Indirect method of contouring, Interpolation of contours.	

UNIT V: Plane table survey	5a	Identify given accessory of plane table and its use.	5.1	Principles of Plane Table Survey, It's Merits and Demerits, Site conditions where Plane Table Survey is used. Accessories required, Temporary adjustments of plane table: Levelling, Centering and Orientation, Use of Telescopic Alidade.	CO5
	5b	Compare the given methods of plane table surveying.	5.2	Methods of Plane Table surveying – Radiation, Intersection and Traversing.	

VII Laboratory Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Psychomotor Domain)		Hours	Aligned COs
I	1	Draw Conventional signs and symbols used in maps or plans to represent survey data.	02#	CO1
II	2	Measure distances on plane or sloping ground using given metric chains steel or metallic tape, line ranger under direct ranging conditions.	02#	CO2
II	3	Measure distances on plane or sloping ground using given metric chains steel or metallic tape, line ranger under indirect ranging conditions.	02#	CO2
II	4	Set out the perpendicular offsets using optical square or open cross staff from a given point on the chain line as well as from a given point on the side of chain line to the chain line.	02#	CO2
II	5	Find area of a given field using Chain and cross staff survey.	02#	CO2
III	6	Observe fore and back bearings of given lines using prismatic compass, Record these in field book and calculate included and excluded angles from recorded bearings.	02#	CO3
III	7	Carry out Chain and compass survey for 5 sided traverse and record the measurements and observations in the field book and Plot the traverse surveyed. (Part -I).	02#	CO4
III	8	Carry out Chain and compass survey for 5 sided traverse and record the measurements and observations in the field book and Plot the traverse surveyed. (Part -II).	02#	CO4
IV	9	Carry out differential levelling to find Reduce levels of given points using Height of Instrument method as well as by Rise and Fall method.	2#	CO4
IV	10	Carry out Profile levelling by taking spot levels at 15 m interval and plot the profile of given alignment 300 m in length.	2	CO4
IV	11	Perform contouring by direct method for a plot of 100m x 100 m and plot the contours by method of interpolation. (Part -I).	2#	CO4

IV	12	Perform contouring by direct method for a plot of 100m x 100 m and plot the contours by method of interpolation. (Part -II).	2#	CO4
V	13	Identify the given accessory of plane table and its use in plane table survey.	2	CO5
V	14	Perform plane table survey of a given area by method of radiation.	2#	CO5
V	15	Perform plane table survey of a given area by method of intersection.	2#	CO5

Note: # Compulsory

VIII Self-Study Learning (SLO in Cognitive/Psychomotor/Affective Domain)

IX Specification Table for Classroom Learning Assessment:

Unit No.	Units	Classroom Learning Hours	C/O	Levels from Cognition Process Dimension			Total Marks

COURSE CURRICULUM

Program	:	Diploma in AI/AE/CE/CO/EE/EC/IT/MK/MT/PK/TX
Course Category	:	GE
Course Code	:	ME292H
Course Title	:	Workshop Technology

I Rationale:

The subject of workshop technology aims to impart knowledge and skill components in the field. It deals with different hand and machine tools essential for manufacturing simple metal components and articles.Additionally, it aims to provide a basic introduction to recent trends in modern manufacturing techniques.

II Industry Identified Competency:

The Student will be able to do in Industry at entry level:

Select the machine tool and process according to industrial application.

III Course Outcomes (COs):

After completing this course students will be able to:

CO1: **Use** Hand tools, gauging and measuring instruments for various applications.

CO2: **Select** metal forming Processes for the various manufacturing application.

CO3: **Perform** the metal joining operations.

CO4: **Perform** the different metal cutting operations.

CO5: **Use** advance machining processess like CNC machine, Robot and Adaptive manufacturing.

IV Learning Scheme:

Classroom Learning (CL)	Tutorial Learning (TL)	Laboratory Learning (LL)	Self-Study Learning (SL)	Notional Learning Hours (NLH)	Credits
2	-	2	-	4	2

Max	Max	Max	Min	Max	Min	Max	Min	Max	Min
30	70**	100	40	25	10	25	10	-	-

**Online Objective Type

VI Classroom Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Cognitive Domain)		Topics and Sub-topics		Aligned Cos
UNIT I: Safety practices in Basic operations and measuring Instruments	1a	Follow safety practices in basic operations.	1.1	Safety Practices, Causes of accidents, General safetyrules, Safety signs and symbols, First Aid.	CO1
	1b	Identify different hand tools for the basic operations.	1.2	Use hand tools like Suface plate, Rules,Tapes and squares, Bench Tools, Machinist's Hammers, Screw Drivers, Punches, Chisels, Scrapers, files, Pliers and Cutters, Wrenches, Hacksaw, Bench Vice, Hand Drill, Taps and die.	
	1c	Choose gauging and measuring instruments for given applications.	1.3	Demostrate proficiancy in handling Semi–Precision Tools: Calipers, Depth Gauge, Feeler gauge. Precision Tools: Micrometers,Vernier Calipers, Vernier Height Gauge, Telescopic Gauge, Hole Gauge, Bevel Protractor, Dial Indicator, Gauge Blocks and Surface plate.	

UNIT II: Basic Metal forming process	2a	Select the relevant forming process.	2.1	Types of forming process, Drop forging: Introduction to forging, upset forging, Press forging, open die and closed die forging operations.	CO2
	2b	Choose the correct comparision between various rolling and forging process on the given points.	2.2	Rolling: Principle of rolling, hot and cold rolling, Tyoes of rolling mills and Industrial applications.	
	2c	Suggest various press tool operations for given component.	2.3	Press tool:Various operations performed on press,press tool, simple,progressive and forming dies.	
	2d	Select various industrial application for forging and press shop.	2.4	Applictions of forging and press work in Automobile manufacturng and sheet metal industry.	
UNIT III: Metal joining process	3a	Select the proper welding process for the given component.	3.1	Welding Processes: Principal of welding, classification of welding processes, welding postion and techniques, welding symbols and safety measures in welding.	CO3
	3b	Select the gas welding process and its industrial application.	3.2	Gas welding: gas welding equipments, oxy-acetylene welding, types of flames, Gas cutting, industrial applications.	
	3c	Identify various resistance welding and arc welding processes.	3.3	Principal,details of types of process like spot,projection and seam welding and its industrial applications.Arc welding: arc welding equipments, flux shielded metal arc welding, TIG and MIG welding.	
	3d	Choose correct comparision of soldering and brazing process.	3.4	Soldering and brazing process, Comparison, merits, demerits and Industrial applications of processes in electronic, Electrical and Automobile industry.	

UNIT IV: Metal cutting processes and Machine tools	4a	Identify different machine tools with respect to its principal of operation.	4.1	Classification of machines with respect to principal of operation for lathe machine, drilling, shaping and Milling machines.	CO4
	4b	Select the main operations on lathe machine and drilling machine.	4.2	Types of lathe machine operations like turning, facing, taper turning, threading. Drilling operaions like Drilling, reaming, boring.	
	4c	Choose the main operations on shaper machine and milling machine.	4.3	shaper operations like slotting, groving, Milling operations like Plain milling, face milling, side milling.	
	4d	Select the tools and equipment for different machine tools.	4.4	Types of lathe and drill tools. Types of shaper and milling machine tools.	
	4e	Suggest various industrial applications for lathe, drilling and milling machine.	4.5	Applictions of lathe, drilling and milling machine in manufacturing industry.	
UNIT V: Advances in manufacturing	5a	Select advanced machining processes.	5.1	Overview of traditional machining vs. advanced machining processes. Introduction to additive manufacturing, CNC machining and Robotics.	CO5
	5b	Identify the principal of CNC machine and types of CNC.	5.2	Basic principles of CNC machine operation, including axes, coordinates, and tool paths and types of CNC.	
	5c	Select the types of Robot and suggest the applications of CNC and Robots in industry.	5.3	Fundamental concepts and principles of robotics, types of robot. Applications of CNC and Robot in various industries such as manufacturing, agriculture and Automobile.	
	5d	Identify the applications of additive manufacturing in mechanical engineering.	5.4	Principal of additive manufacturing and types. Applications of additive manufacturing in automobile industry and consumer goods.	

VII Laboratory Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Psychomotor Domain)		Hours	Aligned COs
I	1	Identify the safetymeasures for the given any four basic operations.	2	CO1
I	2	Use Hand drill, taps and dies for the threading operation	2#	CO1
I	3	Select the gauges and measuring instrument and measure the dimensions	2	CO1
II	4	Prepare bill of material for given press work job (individually)	2	CO2
II	5	Identify the various hand tools, machine tools and equipment used in Press machine shop, write specifications, details, applications and safety rules of above tools.	2#	CO2
II	6	Interpriate the drawing and plan sequence of operations for the giveny forging job	2#	CO2
II	7	Produce a bolt head/cold chisel/hook using forging oprations.Identify the various machine components, hand tools equipments and safty rules used in forging shop.	2	CO2
III	8	Perform soldering/brazing operations.	2#	CO3
III	9	Perform the metal joining process for the given job and list the tools,equipments and safety rules for the process .	2	CO3
III	10	Interpriate the given drawing and plan sequence of operations for gas welding job.	2#	CO3
III	11	Prepare any weld joint (like lap or butt joint) involving arc welding as per the given drawing (Job to be prepared by group of 2 to 4 students depending on volume of work).Operation involve: measuring and marking, cutting, welding, and finishing.	2#	CO3
IV	12	Collect information of cutting fluid and cutting tool materials used in manufacturing industry and their application	2	CO4
IV	13	Perform job with drilling, boaring reaming and counter sinking operation as per the drawing	2#	CO4
IV	14	Read and interpret job drawing and plan sequence of operations for the giveny lathe machine job.	2#	CO4

IV	15	Set and mount the tool workpiece and select the cutting parameters for machining operations.	2#	CO4
IV	16	Perform job on lathe containing the operations like face and plain turning (Group of 2 to 4 students) (Part I) Marking, cutting and facing.	2#	CO4
IV	17	Perform Turning and finishing operation on lathe (Part II) as per drawing.	2#	CO4
V	18	Identify the various components of CNC milling machine and list the tools.	2#	CO5

Note: # Compulsory

COURSE CURRICULUM

Program	:	DIPLOMA IN CE/ME/EC/CM/IT/AE/PK/MT/TX/MK/AI
Course Category	:	GE
Course Code	:	EE292H
Course Title	:	Electrical Machines

I Rationale:

The "Electrical Machines" course equips diploma engineering students from non-electrical branches with essential knowledge of basic electrical machines, fostering interdisciplinary skills. By understanding principles, operations, and applications of electrical machines such as AC/DC motors, transformers, and modern machines, students gain industry-relevant competency to effectively interact with electrical systems in diverse engineering domains. This minor diploma enhances employability, bridging knowledge gaps and enabling collaboration in multi-disciplinary projects.

II Industry Identified Competency:

The Student will be able to do in Industry at entry level:

Apply the Knowledge of basic electrical machines.

III Course Outcomes (COs):

After completing this course students will be able to:

CO1: **Select** DC machine for given application.

CO2: **Select** the transformer for given application.

CO3: **Suggest** the relevant three phase induction motor (IM) for different applications.

CO4: **Use** the relevant single phase induction motors for various applications.

CO5: **Use** BLDC and Stepper motors for various applications.

IV Learning Scheme:

Classroom Learning (CL)	Tutorial Learning (TL)	Laboratory Learning (LL)	Self-Study Learning (SL)	Notional Learning Hours (NLH)	Credits
2	-	2	-	4	2

V Assessment Scheme:

Classroom Learning				Tutorial/Laboratory Learning				Self-Study Learning	
FA	SA	Total		FA		SA		SA	
Max	Max	Max	Min	Max	Min	Max	Min	Max	Min
30	70**	100	40	25	10	25	10	-	-

**Online Objective Type

VI Classroom Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Cognitive Domain)		Topics and Sub-topics		Aligned Cos
UNIT I: DC Machine	1a	Classify given types of machine.	1.1	Introduction to DC and AC machines, Laws related to DC and AC machines, Classification of AC machines and DC machines, Differences between AC and DC machines.	CO1
	1b	Identify the given parts and materials for DC machine.	1.2	Construction, different parts of D.C. machines and thier functions, different materials used for parts.	
	1c	Suggest the given machine for given application.	1.3	Types of dc motor, its connection diagram and application, Types of dc generator, its connection diagram and application.	
nsformers	2a	Compare given transformers on the basis of given points.	2.1	Define transformer, working principle of transformer, construction parts and their fuctions, types of transformer, comparison between shell and core type.	

UNIT II: Tra	2b	Calculate basic parameters of single phase transformer from given data.	2.2	Different material used in construction, emf equation, voltage transformation ratio, application of single phase transformer.	CO2
	2c	Suggest transformer for given application.	2.3	Three phase transformer, its connection and application.	
UNIT III: Three-phase Induction Machine	3a	Compare the given types of three phase induction motors on given points.	3.1	Construction and working of 3 phase induction motor. Working principle, production of rotating magnetic field, synchronous speed, rotor speed and slip, types of three phase induction motor and its comparison.	CO3
	3b	Select induction machine for specified application.	3.2	Torque-Slip, Torque-Speed characteristic of three phase squirrel cage induction motor and its application, Induction generator principle and applications.	
	3c	Select given type of alternator for specified application.	3.3	Three phase alternator: construction, principle, types based on rotor construction and its application.	
UNIT IV: Single-phase Induction Motor	4a	Classify given types of single phase motors.	4.1	Double field revolvong theory, principle of making these motors selfstarting. Classification of single phase motors.	CO4
	4b	Compare the given types of single phase induction motor on the basis of given points.	4.2	Capacitor start induction run motor, capacitor start capacitor run motor, permanent capacitor motor and its connection and application.	
	4c	Suggest the application of given motor.	4.3	Universal motor its connection and application.	
r Machines	5a	Suggest the application of given motor.	5.1	Brushless DC motor (BLDC): Contruction, operation and applications.	
	5b	Suggest the application of given motor.	5.2	Stepper motor: Contruction, operation, types and applications.	

UNIT V: Othe	5c	Apply the concept of rermote operation of electrical machines for specified application.	5.3	Role of IoT in monitoring and controlling electric machines, smart sensors, data acquitions and remote diagnostics in electric machines. Energy conservation in electrical machines, remote operation of electric machines.	CO5

VII Laboratory Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Psychomotor Domain)		Hours	Aligned COs
I	1	Identify the different parts of DC machine.	2#	CO1
I	2	Start DC shunt motor by using three point starter and to reverse the direction of rotation of motor.	2#	CO1
II	3	Identify the different types of transformer and its construction parts.	2#	CO2
II	4	Calculate voltage ratio and current ratio of single phase transformer.	2#	CO2
II	5	Find the regulation and efficiecy of single phase transformer by direct loading.	2	CO2
III	6	Identify the different parts of squirrel cage induction motor.	2#	CO3
III	7	Connect and run three phase induction motor by using DOL or autotransformer starter and reverse direction of rotation.	2#	CO3
III	8	Control the speed of the given three phase squirrel cage using stator voltage control or frequency control method.	2#	CO3
IV	9	Identify different windings and components of single phase induction.	2#	CO4
IV	10	Start and run single phase induction motor also reverse the direction of rotation.	2#	CO4
IV	11	Perform load test on single phase induction motor.	2#	CO3
IV	12	Connect to start and reverse the direction of rotation of universal motor.	2#	CO4
V	13	Connect to start and run the stepper motor.	2	CO5
V	14	Control the speed and reverse the direction of the BLDC motor.	2#	CO5
V	15	Prepare a report on role of IoT in monitoring and control of electrical machines.	2	CO5

Note: # Compulsory

VIII Self-Study Learning (SLO in Cognitive/Psychomotor/Affective Domain)

IX Specification Table for Classroom Learning Assessment:

COURSE CURRICULUM

Program	:	Diploma in CE/ME/EE/CM/IT/PK/AIML/MT/MC/AE/TX
Course Category	:	GE
Course Code	:	EC292H
Course Title	:	Principle of Communication Engineering

I Rationale:

Electronics Communication is a field that deals with the transmission of information through electronic means. The communication plays in various aspects of modern life, ranging from personal interactions to global connectivity in business, science, and entertainment. Electronic communication technologies facilitate this connectivity by enabling real-time exchange of information via various mediums such as radio, television, telephone, and the internet.

II Industry Identified Competency:

The Student will be able to do in Industry at entry level:

Use basic principles of electronics communication engineering for communication system.

III Course Outcomes (COs):

After completing this course students will be able to:

CO1: **Set** up a communication link between transmitter & receiver.

CO2: **Use** a digital modulation technique for a digital communication system.

CO3: **Measure** the performance of a communication system for a given application.

CO4: **Identify** components in a communication system model and test the functions.

CO5: **Determine** an antenna type from the radiation pattern.

IV Learning Scheme:

Classroom Learning (CL)	Tutorial Learning (TL)	Laboratory Learning (LL)	Self-Study Learning (SL)	Notional Learning Hours (NLH)	Credits
2	-	2	-	4	2

V Assessment Scheme:

Classroom Learning				Tutorial/Laboratory Learning				Self-Study Learning	
FA	SA	Total		FA		SA		SA	
Max	Max	Max	Min	Max	Min	Max	Min	Max	Min
30	70**	100	40	25	10	25	10	-	-

**Online Objective Type

VI Classroom Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Cognitive Domain)		Topics and Sub-topics		Aligned Cos
UNIT I: Fundamentals of Communication	1a	Appy a given type of communication link between transmitter & receiver.	1.1	Introduction to basic electronic communication system. Block Schematic and elements of communication systems. Types of electronics communication: Simplex, half duplex & full duplex. Signals: Analog & Digital signals. Applications of communication system in many different areas. Simplex, half duplex & full duplex. Signals: Analog & Digital signals. Applications of communication system in many different areas	CO1
	1b	Identify the frequency range for given aplication in electromagnetic spectrum.	1.2	Electromagnetic spectrum-different bands & their corresponding frequencies and applications.	
	1c	Justify the need of modulation in a given communication system.	1.3	Definition of modulation, Necessity of Modulation, Types of modulation: AM-Amplitude modulation, FM-Frequency modulation, PM-Phase modulation (Only definition & waveforms).	

	1d	Compare given types of Noises on a given points.	1.4	Definition of Noise, Origin of Noise, Types of Noise.	
	1e	Analyse the different sections of transmitter & receiver.	1.5	Transmitters & Receivers: Low level & high level AM transmitters, TRF & Super heterodyne receivers.	
UNIT II: Digital Communication	2a	Use a given digital modulation technique for a given digital communication system.	2.1	Elements of Digital Communication system with its block diagram: source, transmitter, channel, receiver. Advantages & disadvantages of digital communication.	CO2
	2b	Compare Analog and Digital Communication on a given points.	2.2	Communication channel, characteristics: bit rate, baud rate. Comparison between Analog and Digital Communication. Sampling theorem, Nyquist rate.	
	2c	Identify the given blocks in digital modulation techniques	2.3	Basic Digital Modulation Techniques:-Amplitude Shift Keying(ASK), Frequency shift keying(FSK) ,Binary Phase shift ,keying(BPSK). (Only definition & waveforms)	
[: Basic communication systems.	3a	Evaluate the performance of a given communication system for a given application.	3.1	Microwave & waveguide components used: Microwave frequency spectrum and band designation, Rectangular and circular waveguides and their applications. Waveguide Components-H- Plane Tee, E-Plane Tee, E-H Plane Tee. (construction & their Properties only).	CO3
	3b	Identify a given type of radar system for a given application.	3.2	Radar system & its types:Basic Principles of Radar, Basic Radar system, Pulsed radar systems & CW Doppler radar, Radar antenna scanning methods-Horizontal nodding, Helical, Spiral. Advantages, disadvantages & applications of radar systems.	

UNIT III	3c	Compare a given types of optical fibers on a given points.	3.3	Optical Fiber communication: Block diagram of optical Communication, Advantages,disadvantages & applications of optical fiber communication. Basics of Optical fiber structure, Types of optical fibers.	
UNIT IV: Advanced Communication systems	4a	Identify a given components in a given communication system model and test the functions.	4.1	Satellite communication: Introduction of satellites communication, General structure of a satellite communication system.Advantages of satellite communication, Satellite orbital terms: Apogee, Perigee, Major axis, Minor axis, Angle of inclination , Ascending Node, Descending node , Line of nodes, Prograde orbit, Retrograde orbit.	CO4
	4b	Identify the given link model for a given satellite communication system.	4.2	Satellite system link model: Satellite uplink model, Satellite transponder, Satellite downlink model, Inter-satellite link.	
	4c	Choose a given type of Cellular system for given applications.	4.3	Mobile communication: Introduction to wireless communications. A basic Cellular System, Operation of Cellular system, Terms in Wireless communication system: base Station, Control Channel, forward channel, reverse channel, Mobile Station, Mobile Switching centre.	
	4d	Classify the given types of GSM Channel types.	4.4	GSM- Digital Cellular Mobile Standard: Global System for mobile (GSM):-Services and Features, GSM System Architecture, Radio subsystem, GSM channel types.	

UNIT V: Antenna & wave propagation	5a	Compare resonant & non-resonant antenna on a given points.	5.1	Definition of antenna, types of antennas; resonant & non-resonant antenna. Definitions of: Directive gain directivity, Power gain, Antenna resistance, Antenna efficiency, Band width, Beam width.	CO5
	5b	Select the antenna type from the given radiation pattern.	5.2	Directional high frequency antenna: Folded dipole antenna, Yagi-uda antenna; construction & radiation pattern.	
	5c	Predict the process of propagation of wave.	5.3	Propagation of waves, Ground waves, Sky waves, Space waves, Tropospheric propagation.	

VII Laboratory Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Psychomotor Domain)		Hours	Aligned COs
I	1	Set up a simplex and half duplex communication link between transmitter & receiver.	2#	CO1
I	2	Generate amplitude modulated (AM) waveforms for various value of modulating voltages (undermodulation, perfect modulation & over modulation).	2#	CO1
I	3	Generate frequency modulated (FM) waveform for various values of amplitude & frequency of modulating signals.	2#	CO1
II	4	Test the sample and hold circuit for various sampling frequencies to check the sampling theorem.	2#	CO2
II	5	Test the performance of ASK/FSK/PSK modulator and demodulator.	2#	CO2
III	6	Measure the output power in different arms of E-plane Tee / H-plane Tee / magic Tee.	2	CO3
III	7	Set the model of MTI radar for demonstration and observe the detection of object in range.	2	CO3
III	8	Use optical fiber as a communication channel to transmit an analog signal.	2#	CO3
III	9	Use optical fiber as a communication channel to transmit a digital signal.	2#	CO3
IV	10	Identify the various components in satellite communication model and test the functions.	2#	CO4
IV	11	Connect the satellite system model to set direct communication link and observed the communication established to transfer audio signal.	2#	CO4
IV	12	Identify different sections and components of mobile phone such as ringer section , dialer section, receiver section, transmitter section, camera, microphone, speaker , flashlight.	2#	CO4
IV	13	Use the CRO to observe the audio signal in mobile system using mobile kit.	2	CO4
V	14	Determine the radiation pattern of the given Yagi-Uda antenna.	2#	CO5
V	15	Determine the radiation pattern of the given dipole antenna.	2#	CO5

Note: # Compulsory

COURSE CURRICULUM

Program	:	Diploma in CE/ME/EE/EC/AE/TX/PK//MT/MK
Course Category	:	GE
Course Code	:	IT292H
Course Title	:	Web Designing

I Rationale:

Web Page Design is used to develop online applications for various organizations such as organizational and educational websites, virtual learning environments, business applications in various fields such as products, sales, banking railways reservation, services etc. Web pages are categorized into two namely: static and dynamic web page. This course introduces web page design using HTML5 and also give emphasis on learning Cascading Style Sheets (CSS) which is a style sheet language used for describing the presentation of a document written in a markup language for formatting and styling of content.

II Industry Identified Competency:

The Student will be able to do in Industry at entry level:

Develop and maintain websites and web applications

III Course Outcomes (COs):

After completing this course students will be able to:

CO1: **Design** the web page using basic tags of HTML.

CO2: **Develop** web page using list and hyperlinks.

CO3: **Develop** web pages using images, colors and backgrounds.

CO4: **Design** HTML forms using table and frames.

CO5: **Create** a Webpage using Cascading Stylesheets.

IV Learning Scheme:

Classroom Learning (CL)	Tutorial Learning (TL)	Laboratory Learning (LL)	Self-Study Learning (SL)	Notional Learning Hours (NLH)	Credits
2	-	2	-	4	2

V Assessment Scheme:

Classroom Learning				Tutorial/Laboratory Learning				Self-Study Learning	
FA	SA	Total		FA		SA		SA	
Max	Max	Max	Min	Max	Min	Max	Min	Max	Min
30	70**	100	40	25	10	25	10	-	-

**Online Objective Type

VI Classroom Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Cognitive Domain)		Topics and Sub-topics		Aligned Cos
UNIT I: Introduction to HTML	1a	Select correct defination from given statement.	1.1	Introduction of HTML	CO1
	1b	Identify structure of the given HTML page	1.2	Terminologies used in Web Design: World Wide Web (www), Web Pages, Web Site, Web Browsers, Web Servers and types of sites. Static vs. dynamic web sites, Search Engine.	
	1c	Identify use of attributes in given HTML tag.	1.3	Web page structure: DOCTYPE, HTML, TITLE, HEAD, BODY and other meta tags with attributes.	
	1d	Compare block level and text level tags on given points.	1.4	Block Level Elements: Headings, Paragraphs, Breaks, Divisions, Centered Text, Block Quotes, Preformatted text, types of Address, HR tag. Horizontal RuLe.	
	1e	Select the procedure of using the given Text level tag and use of special characters in web page.	1.5	Text Level Elements: Bold, Italic, Teletype, Underline, Strikethrough, Superscript, Subscript, DIV tag, displaying special characters, comments.	

UNIT II: Lists and Links	2a	Compare different types of given list.	2.1	Lists: Ordered Lists, Unordered Lists, Definition Lists, Nested Lists.	CO2
	2b	Compare different types of given Links.	2.2	Links: Absolute, Relative and Inline links, use image as link, link to an email address, button as link, types of links, linking various documents for internal and external links, to link different web page of same site, link different location on the same web page, a specific location on different web page of same site, to specific section within the document, inserting E-mail link.	
UNIT III: Images, Colors and Background	3a	Compare different types of image formats on basics of given point.	3.1	Image: Types of image format, jpg, bmp, png gif etc. IMG tag, alternate text, image alignment, HSPACE, VSPACE, height and width of images.	CO3
	3b	Identify given types of attributes of body tag.	3.2	Colors and Backgrounds: The text color, color attribute of FONT tag, text attribute of BODY tag. bgcolor attribute of BODY tag, Backgrounds: Inserting image as page background, background attributes of BODY tag.	
UNIT IV: Table, Frames and Forms	4a	Select appropriate tag on given table with attributes to organize data on a web page and table setting.	4.1	Table: Table tag with attributes. TABLE, <tr>, <th>, <td> tags. Border, cell spacing, cell padding, width, align, bgcolor attributes. Adding captions: CAPTION tag	CO4
	4b	Identify given types of table attributes.	4.2	Formatting contents in the table cells: align, valign, bgcolor, height, width. Spanning rows and columns: rowspan and colspan attributes.	
	4c	Identify the given type of 'frame' with examples and procedure to organize display as per given screen layout using frames.	4.3	Frames: Types of Frames with their attributes, Creating frames: FRAMESET tag – rows, cols attributes, FRAME tag – name, frame border, margin height, margin width, src.	

	4d	Identify the given attribute/elements of form tag	4.4	Forms: Creating basic form: FORM tag, action and method attributes, Form fields: Single line text field, password field, multiple line text area, radio buttons, and check boxes.	
UNIT V: Cascading Style sheets	5a	Identify CSS code for the given type of formatting on a web page with different CSS properties.	5.1	Cascading Style Sheets: Different types of Style Sheets, Benefits of using CSS. Adding style to the document: Linking to style sheets, Embedding style sheets.	CO5
	5b	Select the procedure to create CSS for applying the given presentation scheme on a web page.	5.2	Style sheet properties: Font, text, box, color and background properties; Creating and Using a simple external CSS file; Using the internal and inline CSS; background and color gradients in CSS Setting font and text in style sheet using table layout.	

VII Laboratory Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Psychomotor Domain)		Hours	Aligned COs
I	1	Design a Web page using basic HTML tags -<HTML>, <HEAD>, <TITLE>, <BODY>.	2#	CO1
I	2	Create a web page which display a string "Welcome to GP nagpuri" in all < h1> to <h6> header tags.	2#	CO1
I	3	Create a web page for displaying a paragraph using block level tags, HR tags.	2#	CO1
I	4	Create a web page using text level tags.	2#	CO1
II	5	Design a web page for implementing ordered list and unordered list.	2#	CO2
II	6	Design a web page for implementing: Ordered list within unordered list,Unordered list within ordered list, Ordered list within ordered list,Unordered list within unordered list.	2#	CO2
II	7	Create a web page to link: A different web page of same site,A different location on the same web page, A Specific location on different web page of same site.	2#	CO2
II	8	Create web page to link: An external page of different web site,To an e-mail ID.	2#	CO2
III	9	Create a webpage which includes photos and align with the ALT property on the left, right, and center.Create a webpage to set picture in left, right, and middle alignment.	2#	CO3
III	10	Insert images on web page using various attributes and set image as background.	2#	CO3
III	11	Create a web page to implement Table.	2#	CO3
III	12	Create table within table and also insert an image within the data elements of the table.	2#	CO3
IV	13	Create a web page to implement frame tags.	2	CO4
IV	14	Create a webpage using form with all its elements.	2#	CO4
V	15	Develope a program to create a web page to demonstrate CSS using internal and external CSS.	2#	CO5

Note: # Compulsory

COURSE CURRICULUM

Program	:	Diploma in CE/ME/EE/EC/PK/IT/CM/MK/AI/AE/TX
Course Category	:	GE
Course Code	:	MT292H
Course Title	:	Testing of Materials

I Rationale:

A "Testing of Materials" course is crucial for metallurgy diploma students in India as it provides foundational knowledge in assessing material properties essential for quality control and engineering applications. Understanding testing methods, such as tensile, hardness, and impact tests, equips students to ensure material reliability and safety in various industries. This course bridges theoretical knowledge with practical skills, enhancing their ability to address real-world challenges in metallurgy

II Industry Identified Competency:

The Student will be able to do in Industry at entry level:

Conduct Metallurgical Testing and Inspection procedures

III Course Outcomes (COs):

After completing this course students will be able to:

CO1: **Identify** different parts of testing equipments

CO2: **Select** destructive and NDT methods of testing

CO3: **Recommend** suitable test for different applications.

CO4: **Prepare** sample for different tests to be carried out

CO5: **Operate** various Testing equipments

CO6: **Perform** different NDT tests

IV Learning Scheme:

Classroom Learning (CL)	Tutorial Learning (TL)	Laboratory Learning (LL)	Self-Study Learning (SL)	Notional Learning Hours (NLH)	Credits
2	-	2	-	4	2

V Assessment Scheme:

Classroom Learning				Tutorial/Laboratory Learning				Self-Study Learning	
FA	SA	Total		FA		SA		SA	
Max	Max	Max	Min	Max	Min	Max	Min	Max	Min
30	70	100	40	25	10	25	10	-	-

VI Classroom Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Cognitive Domain)		Topics and Sub-topics		Aligned Cos
UNIT I: Scope Of Testing	1a	Compare Mechanical, Physical and Chemical properties of given metals.	1.1	The scope and need of testing Mechanical, Physical and Chemical properties of metals.	CO1
	1b	Identify elastic and plastic bodies	1.2	Concepts of Stress, strain, elastic and plastic bodies strain under axial load in tension and compression	
	1c	Prepare various reports on testing	1.3	Types and Forms of various Testing Results	
	1d	Compare different Standardizing agencies	1.4	Standardizing Agencies: SAE, AISI, ASTM, BIS, IS	
II: Mechanical Testing	2a	Sketch a standard Tensile Specimen	2.1	Tensile test: Scope and applicability. Modulus of elasticity / Young's modulus	CO2
	2b	Use Hook's law to find Youngs modulus	2.2	Specification of testing specime. Effect of important variables, Hook's law	
	2c	Calculate proof stress for given material	2.3	Yield stress and proof stress determinations, calculation of true and engineering stress – strain	

UNIT	2d	Use of UTM machine for tensile test of given sample	2.4	Types of tensile testing machine & their construction: Universal testing machine, Extensometer and recorders	
UNIT III: Hardness Test	3a	Justify the need of hardness testing in industrial application	3.1	Scope and applicability of hardness test.	CO3
	3b	Use MOH'S scale to compare hardness of different minerals	3.2	Scratch and wear hardness test- moh's scale	
	3c	Identify different hardness Testers	3.3	Rockwell test: procedure, effect of variables in rockwell hardness tester	
	3d	Compare given hardness test on the basis of given following points	3.4	Vickers hardness test- Procedure, derivation of VHN, effect of variables, applications, advantages and limitations	
	3e	Determine brinell hardness values for given samples	3.5	Brinell hardness test: Procedure, derivation of BHN, effect of variables, applications, advantages and limitations	
UNIT IV: Service Tests	4a	Identify type of fractures for given material	4.1	Charpy and Izod impact tests: standard samples used, test procedure.	CO4
	4b	Compare ductile and brittle fracture on the basis of given points	4.2	Effect of variables.: Role of temperature and stress concentration factors like holes, cracks etc	
	4c	Select suitable Impact tests for given test sample to detect fracture	4.3	Fatigue test: concept of fatigue, loading condition to cause fatigue. Study of S-N Curve Scope and applicability of fatigue test Machine for fatigue test on metals, general procedure	
ventional Non-ve Testings	5a	Justify the need for NDT in metallurgy industry	5.1	Concept of non destructive testing Need of Non-destructive test, Types of non-destructive test	CO5
	5b	Select suitable NDT for proper application	5.2	Methods of Examination for defects: Visual examination, Penentrant tests, Hammer tests etc	

UNIT V: Con Destructi	5c	Suggest suitable NDT method for magnetic materias	5.3	Method based on magnetic analysis: Magnetic particle method, yoke type
	5d	Use ultrasonic testing machine on given test sample to determine	5.4	Ultrasonic Testing: Fundamentals, Equipments, procedure and applications. Interpretation of results

VII Laboratory Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Psychomotor Domain)		Hours	Aligned COs
I	1	Prepare samples for different types of testing of materials	2#	CO1
I	2	Follow safety rules in Testing Laboratory in metallurgical plant/industry	2#	CO1
I	3	Identify ductile and or brittle failure for given material observing type of fracture occured	2#	CO1
II	4	Identify various parts of Brinell hardness Tester	2#	CO2
II	5	Operate Brinell hardness tester to MeasureHardness for given materials	2#	CO2
III	6	Operate vickershardness testingmachine for given materials to find hardness values	2#	CO3
III	7	Measure Hardness by Rockwell hardness Tester for given materials	2#	CO3
IV	8	Perform Crack detection using dye penetrant test for given material	2#	CO4
IV	9	Determine Impact strength for given material by Charpy impact tester	2#	CO4
IV	10	Determine Impact strength for given material by Izod impact tester	2#	CO4
IV	11	Operate standard fatigue testing Machine to determine fatigue in given metals and draw SN curve for the same	2	CO4
V	12	Perform Scratch and wear hardness test for given materials using moh's scale	2#	CO5
V	13	Perform Crack detection using dye penetrant test for given material	2#	CO5
V	14	Conduct Magnetic Particle Crack detection test for given material	2#	CO5
V	15	Operate U.T.M to determine Tensile strength and other given parameters for given steel bars. Prepare various results obtained from test.	2#	CO5

Note: # Compulsory

COURSE CURRICULUM

Program	:	Diploma in CE/ME/EE/EC/IT/MT/PK/CM/AE/AI/MK
Course Category	:	GE
Course Code	:	TX292H
Course Title	:	Dyeing and Printing

I Rationale:

This course is designed for the students of other than Textile department. The Dyeing and Printing course explores the art and science of coloration and decoration in Textiles. Students learn traditional and digital techniques understanding color theory, dye chemistry and printing processes.Bymastering dyeing and printing, students enhance textile products astheticand functional value.

II Industry Identified Competency:

The Student will be able to do in Industry at entry level:

Apply dyeing and printing on textile material.

III Course Outcomes (COs):

After completing this course students will be able to:

CO1: **Classify** the pretreatment process.

CO2: **Identify** the type of dye used for cotton material.

CO3: **Select** dye for protein and synthetic fibre

CO4: **Use** different methods of printing.

CO5: **Develop** print by diffrent styles of printing on textiles.

IV Learning Scheme:

Classroom Learning (CL)	Tutorial Learning (TL)	Laboratory Learning (LL)	Self-Study Learning (SL)	Notional Learning Hours (NLH)	Credits
2	-	2	-	4	2

V Assessment Scheme:

Classroom Learning				Tutorial/Laboratory Learning				Self-Study Learning	
FA	SA	Total		FA		SA		SA	
Max	Max	Max	Min	Max	Min	Max	Min	Max	Min
30	70**	100	40	25	10	25	10	-	-

**Online Objective Type

VI Classroom Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Cognitive Domain)		Topics and Sub-topics		Aligned Cos
UNIT I: Pretreatment for dyeing and Printing	1a	Identify flow chart of given wet procesing sequence.	1.1	Importance of Textile wet processing and Pretreatment Process, flowchart and objectives of each process.	CO1
	1b	Classify the given pretreatment process.	1.2	Classification of singeing machine, desizing, bleaching process. chemicals used in desizing process, scouring process,bleaching and mercerisation process.	
UNIT II: Dyeing of celllulosic fibres	2a	Classify the given type of dye for cotton material	2.1	Object of dyeing, Classification of Dyes, Common terms used in dyeing, dyeing assistants, Mechanism of dyeing. Natural Dyes and its importance	CO2
	2b	Apply the given dye on cotton/ viscose material.	2.2	Dyes for cellulosic material-Direct Dyes, Reactive dyes and Vat Dyes. Properties, types, parameters affecting dyeing quality, dyeing procedure.	

UNIT III: Dyeing of protein and synthetic fibre.	3a	Select the given dye for protein fabric.	3.1	Dyes for protein fibres, Classification of Acid dyes and basic dyes, Properties, dyeing procedure of silk and wool fibre.	CO3
	3b	Apply disperse dye to dye given fabric.	3.2	Classification of disperse dyes and cationic dyes, Properties, dyeing procedure of polyester, acetate and acrylic fibre.	
UNIT IV: Methods of printing	4a	Compare dyeing with printing on given parameters.	4.1	Objects of printing, difference between dyeing and printing, preparation of printing paste, sequence of printing. Ingredients in printing paste.	CO4
	4b	Use given printing method to print the fabric.	4.2	Methods of printing- Block, stencik, duplex, screen,transfer printing, rolle printing machiner, rotary sreen and flat bed screen printing machine.	
UNIT V: Styles of Printing	5a	Suggest different styles of given printing.	5.1	Styles of printing- Direct, discharge and resist printing.	CO5
	5b	Use dyes to print given fabric	5.2	Printing procedure of cotton and polyester.After treatment to printed goods.	

VII Laboratory Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Psychomotor Domain)		Hours	Aligned COs
I	1	Use chemicals to desize the grey fabric.	02#	CO1
I	2	Use chemicals to scour the given fabric.	02#	CO1
I	3	Use chemicals to bleach the given cotton fabric.	02#	CO1
I	4	Apply caustic treatment to mercerise the cotton fabric.	2	CO1
II	5	Use pretreated samples to dye with given natural dye.	02#	CO2
II	6	Use direct dye to dye given cellulosic material.	02#	CO2
II	7	Use reactive dye to dye given viscose/cotton material	02#	CO2
II	8	Use vat dye to dye given cotton material	02#	CO2
III	9	Use acid dye to dye protein material.	2	CO3
IV	10	Prepare printing paste for given textile material and write the functions of each ingredient.	02#	CO4
IV	11	Apply block print on given material.	02#	CO4
IV	12	Apply screen print on given material.	2	CO4
V	13	Prepare printing paste and print given fabric with direct style of printing.	02#	CO5
V	14	Apply tie and dye printing technique.	02#	CO5
V	15	Prepare printing paste and print given fabric with resist style of printing.	02#	CO5

COURSE CURRICULUM

Program	:	Diploma in CE/ME/EE/EC/CM/IT/PK/AI/MT/MK/TX
Course Category	:	GE
Course Code	:	AE292H
Course Title	:	Two Wheeler Technology

I Rationale:

There is an increased need of public transport. The public transport systems in cities and in rural area do not meet the requirement effectively. This has led to huge demand of two wheelers. Presently the two wheelers are used by a large section of society as personalized transport. In view of the growth, large employment potential in this field and the manpower required to cater to the same, this subject is included as an elective subject.

II Industry Identified Competency:

The Student will be able to do in Industry at entry level:

Perform maintenance and repair of two wheeler systems.

III Course Outcomes (COs):

After completing this course students will be able to:

CO1: **Identify** proper frame and chassis types and material for two wheelers.

CO2: **Diagnose** various problems in two-wheeler fuel and lubrication systems.

CO3: **Perform** repairs on transmission, steering, suspension and braking system.

CO4: **Maintain** the electrical systems and lightning system of a given vehicle.

CO5: **Identify** the significance of aerodynamics, aesthetics, ergonomics, safety.

CO6: **Identify** various advance mechanism used in Two wheeler.

IV Learning Scheme:

Classroom Learning (CL)	Tutorial Learning (TL)	Laboratory Learning (LL)	Self-Study Learning (SL)	Notional Learning Hours (NLH)	Credits
2	-	2		4	2

Max	Max	Max	Min	Max	Min	Max	Min	Max	Min
30	70**	100	40	25	10	25	10	-	-

**Online Objectice Type

VI Classroom Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Cognitive Domain)		Topics and Sub-topics		Aligned Cos
UNIT I: Frame and chassis	1a	Classify the frames with given parameters.	1.1	Frames: Single cradle frame, Double cradle frame, Tabular frame and its types, Engine based frame and Twin spar frame.	CO1
	1b	Compare the given two wheeler chassis on the given basis.	1.2	Chassis: Conventional chassis and monocoque or integral construction. Layout of Two wheeler vehicle.	
	1c	Select relevant frame materials for given vehicle application with justification.	1.3	Frame material and its properties: Alloy steel, aluminium alloy, carbon fiber.	
mission system	2a	Compare engine technology upgradation from BS IV to BS VI.	2.1	Basics of two wheeler engine, Engine technology upgradation (From BS IV to BS VI), Engine selection criteria, Valve operating mechanism.	
	2b	Select an air filter for given vehicle with justification.	2.2	Induction System: Air filter/Air cleaner: Function, types, construction and working.	

UNIT II: Fuel supply and er	2c	Identify an engine exhaust system component for given vehicle .	2.3	Exhaust System: Function, Construction. Basic Parts- Heat Diffuser, Header pipe, Muffler.	CO2
	2d	Draw the sketch of fuel supply system and describe it.	2.4	Fuel supply system: Block diagram, Construction & working of Carburetor System, Electronic fuel injection system as per BSVI Norms.	
	2e	Justify the application of lubrication system for the given two wheeler engine.	2.5	Lubrication system: Lubrication in four stroke engines of two wheeler.	
UNIT III: Comfort and Control system	3a	Identify the transmission system of the given vehicle on the given parameters.	3.1	Transmission system : Layout of transmission system in two wheeler, Construction and working of - Cable actuated wet multi- disc clutch, Centrifugal clutch, Chain drive, Continuous variable transmission (CVT), Gearbox- working of constant mesh gearbox, Gear shifting mechanism- hand and foot operated shifting mechanism.	CO3
	3b	Find effect of steering geometry relevant parameters for the given vehicle with sketch.	3.2	Steering system: Steering geometry and effects-Caster angle & Trail, Steering fork, Handlebar arrangement.	
	3c	Select the suspension system for the given application with justification.	3.3	Suspension System: Two wheeler suspension system- Spring and damper- swing arm and telescopic type. Monoshock suspension. Swing Arm type rear suspension of passenger Auto rickshaw.	
	3d	Compare the braking system of the given vehicle on the basis of given parametes.	3.4	Braking system: Drum brake and disc brake - Construction & Working. Brake control system- hand and foot operated brake, Braking system of Auto rickshaw.	

	3e	Select wheels and tires for the given vehicle with justification.	3.5	Wheels and tires selection criteria of wheels and tires and their specification for motorcycle scooter sports bike.	
UNIT IV: Electrical system	4a	Justify the working of the given ignition system with sketch.	4.1	Ignition system: a. Working of capacitive discharge ignition system. b. Procedure to check CDI system aggregates. c. Microprocessor control ignition system block diagram and working. d. Concept of twin Spark ignition system.	CO4
	4b	Select the procedure to check aggregates of CDI system with sketch.	4.2	Starting system: a. Kick start and button start arrangement. b. Components of starting system and their function DC motor battery rating for use in button start vehicle.	
	4c	Compare the engine starting system and their aggregates on the basis of the given parameters.	4.3	Charging system components of charging system schematic circuit and working of charging system.	
	4d	Determine the specification and features of the given dashboard oblique lighting system aggregate.	4.4	Lighting system and accessories: a. Specification and application of headlamp tail and number plate lamp purpose of using LED lights in tail lamp turn signal lamp side stand indicator lamp high beam indicator lamp neutral indicator lamp speedometer lamp on mobile charger point headlamp and tail lamp reflectors used in two wheelers. b. Dash units use of speedometer analogue and digital trip meter use of engine speed indicator/tachometer.	

UNIT V: Aerodynamic and safety aspects	5a	Draw sketch of the given aggregates of aerodynamic for the vehicle.	5.1	Aerodynamic as aspects:a-Headlamp shape sealed beam and conventional Tail lamp and indicator light arrangement body in closed and separate c-Shaped of attack in motorcycle.	CO5
	5b	Justify a mix of spectral even to the given vehicle handling sitting arrangement with sketch.	5.2	Ergonomic aspect: a. Seat arrangement for raider and pillion rider. b. Handle bar position.	
	5c	Identify significance of aesthetic aspects for relevant aggregates of the given vehicle with justification.	5.3	Aesthetic aspect: a. Headlamp fairing of motorcycle. b. Side panels for scooter scooter and motorcycle. c. Ground clearance d mudguard shape and position.	
	5d	Select the safety aspect of given two wheeler relay rider and justify it.	5.4	Safety expect: a. Crash bar saree guard. b. Driving habits. c. Drive gear jacket helmet day night.	

VII Laboratory Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Psychomotor Domain)		Hours	Aligned COs
I	1	Dismantle the given two wheeler vehicle.	02#	CO1
I	2	Identify the parts of the vehicle frame and chassis.	02#	CO1
I	3	Assemble the given two wheeler vehicle.	02#	CO1
II	4	Adjust Valve Clearance of the given engine using relevant tools.	02#	CO2
II	5	Service induction system of the given two wheeler petrol engine for emission control.	02#	CO2
II	6	Fine-tune idle speed of a two wheeler engine using the specified procedure.	02#	CO2
II	7	Lubricate the given two wheeler chassis.	2	CO2
III	8	Dismantle the given clutch assembly to check condition of components with reference to service manual.	2	CO3
III	9	Adjust the multi-plate clutch after assembly.	02#	CO3
III	10	Dismantle the gearbox of the given two wheeler	02#	CO3
III	11	Assemble the gearbox of the given two wheeler	02#	CO3
III	12	Service the brake system of the given two wheeler.	02#	CO3
III	13	Maintain ignition system of the given two wheeler.	2	CO3
IV	14	Check components of self- start system of the given two- wheeler engines.	02#	CO4
IV	15	Maintain wiring harness of the given two- wheeler.	2	CO4
V	16	Adjust handlebar for ergonomic position of given two wheeler.	02#	CO5
VI	17	Interpret the aerodynamic, ergonomic design and safety aspects of the given two or three wheelers.	2	CO6

Note: # Compulsory

COURSE CURRICULUM

Program	:	Diploma in CE/ME/EE/EC/IT/MT/TX/AE/CM/MK/AI
Course Category	:	GE
Course Code	:	PK292H
Course Title	:	Folding Cartons & Corrugated Boxes

I Rationale:

In the packaging industry, folding cartons and corrugated boxes are among the most widely used packaging solutions. To design, convert, and apply these effectively, it is essential to understand the raw materials—primarily paperboard and corrugated board—their properties, structure, and behavior during conversion processes. This course provides foundational knowledge of paperboard and corrugated board materials, their manufacturing and conversion techniques, structural design, and practical applications in packaging. It prepares students with the skills needed to work with various carton and box formats used across industries.

II Industry Identified Competency:

The Student will be able to do in Industry at entry level:

Comprehend the knowledge of papers and their conversion processes for packaging applications.

III Course Outcomes (COs):

After completing this course students will be able to:

CO1: **Identify** the given types of paperboard materials used in folding cartons and appriciate sustainability.

CO2: **Evaluate** carton designs and test for balance between aesthetics and functionality.

CO3: **Apply** modern trends in carton manufacturing, such as laser cutting, by observing demonstrations

CO4: **Operate** machines for converting corrugated boards into boxes, and demonstrate sealing methods.

CO5: **Evaluate** testing methods and conduct compression tests on corrugated boxes and quality control measures and perform simple quality checks.

VI Classroom Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Cognitive Domain)		Topics and Sub-topics		Aligned Cos
UNIT I: Material Selection for Folding Cartons	1a	Identify the given types of paperboard materials used in folding cartons.	1.1	Folding Cartons; Introduction. Raw material; Paperboards: SBS (Solid Bleached Sulfate), FBB (Food and Beverage Board), WLC (White Lined Chipboard), their composition and applications, Glue; composition.	CO1
	1b	Compare various coatings and laminates.	1.2	Board coating and lamination processes: UV coatings, aqueous coatings, PE laminates, and their applications.	
	1c	Calculate the given strength parameter using standard testing methods for Paperboards.	1.3	Grain direction, caliper selection and typical properties; whiteness, stiffness, Bursting Strength, GSM or Grammage, and Cobb, folding endurance test.	
	1d	Justify the importance of using Sustainable materials in folding carton manufacturing.	1.4	Sustainable materials: Recyclable, biodegradable, and compostable paperboards; concepts and importance.	

	1e	Justify the importance of FDA compliant packaging.	1.5	Food safety standards (FDA, EU) and compliance for food-grade packaging (folding cartons); glimpses.	
UNIT II: Structural Design and Prototyping of Folding Cartons	2a	Identify and sketch the structural elements of a folding carton.	2.1	Basic design elements: Tucks or tabs, flaps, locking mechanisms, and their impact on carton strength.	CO2
	2b	Justify the importance of using CAD tools in prototyping.	2.2	CAD tools (Introduction): ArtiosCAD, Packly, and prototyping techniques and there advantages.	
	2c	Apply the nesting concept for Folding Carton Manufacturing.	2.3	Die-line creation, nesting for material optimization, and common errors to avoid.	
	2d	Compare different folding carton styles.	2.4	Carton styles (features): Straight tuck end, reverse tuck end, crash lock (self-locking bottom), specialty cartons and their industrial uses.	
	2e	Justify the importance of branding elements and functional	2.5	Incorporating branding elements and functional considerations.	
anufacturing Processes for Folding Cartons	3a	Compare different steps in folding carton manufacturing on given points.	3.1	Overview of folding carton manufacturing (steps): Material selection, Printing, die-cutting, folding, and gluing. Printing with offset press;	CO3
	3b	Identify the given elements of a flat die and blanking tools.	3.2	Die-cut & punching; process steps. Flat die; construction, elements and their functions. Blanking tools.	
	3c	Justify the use of platen press for die cutting and punching.	3.3	Uses of platen press for die cutting & punching.	
	3d	Justify the importance of laser cutting process in folding carton manufacturing.	3.4	Laser cut cartons; Manufacturing process steps, advantages and limitations.	

UNIT III: Ma	3e	Identify the elements of a tetra pack wall structure and style of cartons.	3.5	Tetra pak; Introduction, raw material, mfg. process , Tetra pack wall structure; functions of each element. Different styles of tetra pack cartons, their applications.	
UNIT IV: Raw Materials and Components for Corrugated Boxes	4a	Identify differences between folding cartons and corrugated boxes by categorizing samples.	4.1	Corrugated Fiberboard Box (CFB); Introduction, carton and box comparison. Raw material; Liner board, fluting medium and Adhesive. Corrugated Fiberboard and Solid fiberboard comparison.	CO4
	4b	Compare different types of corrugated boards and flutes by handling and investigation.	4.2	Types of flutes: their specifications and applications. Types of Corrugated fiberboards: Singe Facer, Single-wall, double-wall, triple-wall structure and applications.	
	4c	Justify the importance of the raw material used for glue formation.	4.3	Glue formulation; glue kitchen, raw material, glue making. Glue consumption.	
	4d	Justify the importance of various operations involved in corrugated box manufacturing (CFB).	4.4	Creasing, slotting, die-cutting, gluing, taping, and sealing operations with machines used.	
	4e	Compare Single-piece with two-piece blanks on given points.	4.5	Single-piece vs. two-piece blanks: Construction, applications, and benefits.	
ing	5a	Justify the importance of various structural design considerations for a corrugated board manufacturing.	5.1	Structural design considerations; Wall thickness, flute types, box dimensions (Internal & Outer). Various box styles (RSC, HSC, die-cut, trays), and their applications.	

UNIT V: Corrugated Box Design and Manufacturi	5b	Justify the importance of different styles of palletiziting corrugated boxes.	5.2	Palletizing styles (Brick and others) – advantages & limitations; Introduction to prototyping software.	CO5
	5c	Identify CFB box manufacturing steps	5.3	CFB Box Manufacturing Steps: Board making, Printing, Slotting/Die-cutting, Folding, Gluing, Bundling, Strapping.	
	5d	Find out the strength of the corrugated board by given IS testing methods.	5.4	IS Testing methods: BS, BCT, ECT, RCT, Cobb, Puncture Resistance; Standard QC tests: Grammage, Caliper, BCT, Delamination, Barcode readability.	
	5e	Identify the defects in CFB Box manufacturing and Propose remedies.	5.5	Common Defects and Remedies in CFB Box Manufacturing; Issues like washboarding, soft boards, improper joints, fishtailing, delamination – causes and solutions.	

VII Laboratory Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Psychomotor Domain)		Hours	Aligned COs
I	1	Identify and compare various types of paperboards used in the production of folding cartons. Collect samples of three different types of cartons; compare the characteristics such as style of carton, board colour, texture, thickness and weight.	2#	CO1
I	2	Conduct tests to determine the grain direction of the paperboard.	2#	CO1
I	3	Conduct the test to determine the whiteness of the paperboard.	2	CO1
I	4	Carry out the burst strength test and calculate the burst factor of the paperboard.	2#	CO1
I	5	Perform folding endurance test – for paperboard.	2	CO1
II	6	Prepare a report on comparison of different folding carton styles by collecting any three samples.	2#	CO2
II	7	Design a basic folding carton style. Draft the design on paperboard, ensuring correct dimensions and folding lines. Cut and fold the carton to demonstrate the style.	2#	CO2
III	8	Create a prototype of a folding carton based on the previous (Practical No - 2) design. Cut, crease, and fold the carton prototype. Glue or tape the carton as needed. Measure the internal and external dimensions of the same.	2#	CO3
III	9	Prepare a report on "Elements of a Flat Die" by observing a real flat die.	2#	CO3
VI	10	Conduct Cobb test to find out water absorptiveness of kraft paper/ paperboard/corrugated fiberboard.	2#	CO4
VI	11	Explore Corrugated Fiberboard Types. Identify and compare three different types of corrugated fiberboards. Inspect and compare them on the basis of Board thickness, Flute type and Flute count.	2#	CO4
V	12	Conduct Edge crush / Ring crush test/ Flat crush test to find out edge crush strength of corrugated fiber board.	2#	CO5
V	13	Perform Puncture test to find out puncture resistance of paperboard/ corrugated fiber board.	2	CO5

V	14	Measure Internal and External Dimensions of a Regular Slotted Container (RSC) Box.	2#	CO5
VI	15	Operate Single Facer - Corrugated Board Making Machine. Set up the machine for two ply board production. Feed the material into the machine and execute the board-making process.	2#	CO6
VI	16	Operate creasing and slitting machine. Set up machine for a suitable job. Execute creasing and cutting operation.	2#	CO6
VI	17	Identify and resolve common defects in box making. Collect and inspect boxes for common defects such as fishtailing, delamination, soft board, or poor slotting. Identify the causes of the defects and suggest corrective actions.	2#	CO6
VI	18	Operate Box Stapler and Strapping Machine to Seal and Reinforce Corrugated Boxes.	2#	CO6

XVI List of Major Equipment/Machineries with Specification:

1. Analog Substance Indicator/GSM Tester/ Electronic Weighing Machine.
2. Bursting Strength Tester.
3. Universal Testing Machine.
4. Compression Tester- ECT/FCT/RCT, etc.
5. Thickness Gauge.
6. Puncture Strength Tester.
7. Brightness Tester.
8. Folding Endurance Tester.
9. Sigle Facer- corrugattor machine
10. COBB Tester
11. Creasing and cutting machine
12. Portable staplers, Box stitching machine & Box strapping machine

COURSE CURRICULUM

Program	:	Diploma in CE/ME/EE/EC/MC/MT/PK/TX/AE
Course Category	:	GE
Course Code	:	CM292H
Course Title	:	Web Development

I Rationale:

Web Page Design is used to develop online applications for various organizations such as organizational and educational websites, virtual learning environments, business applications in various fields such as products, sales,banking railways reservation, services etc. Web pages are categorized into two namely: static and dynamic web page. This course introduces web page design using HTML5 and also give emphasis on learning Cascading Style Sheets (CSS) which is a style sheet language used for describing the presentation of a document written in a markuplanguage for formatting and styling of content.

II Industry Identified Competency:

The Student will be able to do in Industry at entry level:

Use development tools and integrated development environments (IDEs).

III Course Outcomes (COs):

After completing this course students will be able to:

CO1: **Design** a webpage using HTML formatting tags.

CO2: **Develop** web page using list and hyperlinks.

CO3: **Develop** web pages using images, colors and backgrounds

CO4: **Design** HTML forms using table and frames

CO5: **Develop** presentation schemes on content using CSS.

IV Learning Scheme:

Classroom Learning (CL)	Tutorial Learning (TL)	Laboratory Learning (LL)	Self-Study Learning (SL)	Notional Learning Hours (NLH)	Credits
2	-	2	-	4	2

V Assessment Scheme:

Classroom Learning				Tutorial/Laboratory Learning				Self-Study Learning	
FA	SA	Total		FA		SA		SA	
Max	Max	Max	Min	Max	Min	Max	Min	Max	Min
30	70**	100	40	25	10	25	10	-	-

**Online Objective Type

VI Classroom Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Cognitive Domain)		Topics and Sub-topics		Aligned Cos
UNIT I: Introduction to HTML	1a	Identify the characteristics of the given type of web sites.	1.1	Introduction of HTML:- Definition,history,importance, characteristics.	CO1
	1b	Select structure of the given HTML page.	1.2	Terminologies used in Web Design: World Wide Web(www), Web Pages, Web Site, Web Browsers, Web Servers and types of sites. Static vs. dynamic web sites,Search Engine.	
	1c	Choose Head tag and body tag in the given web page code.	1.3	Web page structure: DOCTYPE, HTML, TITLE,HEAD, BODY and other meta tags with attributes.	
	1d	Select procedure of using the given block level tag on a web page.	1.4	Block Level Elements: Headings, Paragraphs, Breaks, Divisions, Centered Text, Block Quotes, Preformatted text, types of Address, HR tag. Horizontal Rule.	
	1e	Select the procedure of using the given Text level tag.	1.5	Text Level Elements: Bold,Teletype,Underline,Strikethrough ,Superscript, DIV tag, displaying special characters,comments.	
s	2a	Identify given type of List.	2.1	Lists: Ordered Lists, Unordered Lists, Definition Lists, Nested Lists.	

UNIT II: Lists and Link	2b	Select appropriate types of Links for given situation.	2.2	Links: Absolute, Relative and Inline links, use image as link,link to an email address, button as link, types of links,linking various documents for internal and external links, to link different web page of same site, link different location on the same web page, a specific location on different web page of same site, to specific section within the document, inserting E-mail link	CO2
UNIT III: Images, Colors and Background	3a	Select the proper image attribute for web page code.	3.1	Image: Types of image format, jpg, bmp, png gif etc.IMG tag, alternate text, image alignment, HSPACE,VSPACE, wrapping text, height and width of images,Image as a link, Inserting Images, formatting image for sizing, alignment. Border and using other attributes with IMG tag.	CO3
	3b	Identify process of using the given colors/images as page background on a web page.	3.2	Colors and Backgrounds: The text color, color attribute of FONT tag, text attribute of BODY tag. bgcolor attribute of BODY tag, changing link colors: link, alink,vlink, attributes of BODY tag, Backgrounds: Inserting image as page background, background attributes of BODY tag, creating solid color page background.	
/: Table, Frames and Forms	4a	Choose the proper table tags and table attributes for given table.	4.1	Table: Table tag with attributes. TABLE, <tr>, <th>,<td> tags. Border, cell spacing, cell padding, width, align,bgcolor attributes. Adding captions: CAPTION tag.	CO4
	4b	Select proper types of table attributes for given senario.	4.2	Formatting contents in the table cells: align,valign,bgcolor, height, width, nowrap attributes. Spanning rows and columns: rowspan and colspan attributes.	
	4c	Identify type of 'frame' with examples and procedure to organize display as per given screen layout using frames.	4.3	Frames: Types of Frames with their attributes, Creating frames: FRAMESET tag – rows, cols attributes, FRAME tag – name, frame border, margin height, margin width, src, resize, scrolling Attributes, Use of NOFRAMES tag, Frame targeting.	

UNIT IV	4d	Choose basic form using different form fields and Button tags.	4.4	Forms: Creating basic form: FORM tag, action and method attributes, Form fields: Single line text field, password field, multiple line text area, radio buttons, and check boxes. Pull down menus: SELECT and OPTION tags. Buttons: submit, reset and generalized buttons.Formatting technique: Using table to layout form.	
UNIT V: Cascading Style sheets	5a	Idnetify CSS code for the given type of formatting on a web page with different CSS properties.	5.1	Cascading Style Sheets: Different types of Style Sheets, Benefits of using CSS. Adding style to the document: Linking to style sheets, Embedding style sheets, Using inline style, Selectors: CLASS rules, ID rules.	CO5
	5b	Identify the procedure to create CSS for applying the given presentation scheme on a web page.	5.2	Style sheet properties: Font, text, box, color and background properties.	
	5c	Select the procedure to create internal, inline and external CSS for applying the given presentation scheme on a web page.	5.3	Creating and Using a simple external CSS file; Using the internal and inline CSS;background and color gradients in CSS Setting font and text in style sheet using table layout.	

VII Laboratory Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Psychomotor Domain)		Hours	Aligned COs
I	1	Use following HTML Tags for webpage design- <HTML>, <HEAD>, <TITLE>, <BODY> elements.	2#	CO1
I	2	Design Web page and apply some block level tags and some text level tags.	2#	CO1
I	3	Design Web page using font Color, font face, font size, background color.	2#	CO1
II	4	Design Web page including- i) Ordered lists ii) Unordered list iii) Nesting list	2#	CO2
II	5	Design Web page including links in a Web page. Local page in same folder • Page in different folder. • Page in web. • Specified location within document.	2#	CO2
III	6	Design a web page using Image tags with height and width and also Used for background image.	2#	CO3
III	7	Design a web page to link a different web page of same site and create webpage using Image tags with height and width and also Used for background image.	2#	CO3
IV	8	Design table in web page using basic tables tags- <table>, <tr>, <td>, <th>	2#	CO4
IV	9	Design a web page to create a web page using Table tags a)Using rowspan and columnspan b)Background Image in a table.	2#	CO4
IV	10	Create a web page using Table tags a)Create table of 3 rows and Columns b) Having border , border size, border color c) Image in a particular cell	2#	CO4
IV	11	Create a web page to implement frame tags.	2#	CO4
IV	12	Create a web page using Form tag. Example:-Admission Form.	2#	CO4
V	13	Develop HTML page to demonstrate Inline CSS.	2#	CO5
V	14	Develop HTML page to demonstrate Internal CSS.	2#	CO5
V	15	Develop HTML page to demonstrate External CSS.	2	CO5

Note: # Compulsory

VIII Self-Study Learning (SLO in Cognitive/Psychomotor/Affective Domain)

IX Specification Table for Classroom Learning Assessment:

Unit No.	Units	Classroom Learning Hours	C/O	Levels from Cognition Process Dimension			Total Marks

COURSE CURRICULUM

Program	:	Diploma in CE/ME/EE/EC/CM/IT/PK/AI/MT/AE/TX
Course Category	:	GE
Course Code	:	MK292H
Course Title	:	Computer Aided Design

I Rationale:

CAD (Computer Aided Design) technology is moving in the direction of greater integration of design activities & manufacturing activities. CAD is the use of computer system to assist in the creation modification, analysis, or optimization of a design. CAD software is used to increase the productivity of the designer, improve the quality of design, and improve communication through documentation. It also may be useful to generate assembly and manufacturing drawings.

II Industry Identified Competency:

The Student will be able to do in Industry at entry level:

Use CAD software for design and drafting.

III Course Outcomes (COs):

After completing this course students will be able to:

CO1: **Use** CAD/CAM hardware and software.

CO2: **Develop** 2D geometric modeling features.

CO3: **Develop** 3D engineering model using solid modeling command.

CO4: **Use** advance features of 3D geometric modeling.

CO5: **Create** assembly of components and generate exploded view.

IV Learning Scheme:

Classroom Learning (CL)	Tutorial Learning (TL)	Laboratory Learning (LL)	Self-Study Learning (SL)	Notional Learning Hours (NLH)	Credits
2	-	2	-	4	2

V Assessment Scheme:

Classroom Learning				Tutorial/Laboratory Learning				Self-Study Learning

Max	Max	Max	Min	Max	Min	Max	Min	Max	Min
30	70**	100	40	25	10	25	10	-	-

**Online Objective Type

VI Classroom Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Cognitive Domain)		Topics and Sub-topics		Aligned Cos
UNIT I: Introduction to CAD/CAM	1a	Use CAD/CAM software in industry.	1.1	Roles of computers in industrial Manufacturing, Introduction to: CAD/CAM, Product life cycle, Design process, Applications of CAD/CAM, CAD/CAM hardware.	CO1
	1b	Compare given softwares for use in CAD/CAM	1.2	Introduction to CAD/CAM software: CATIA, SolidWorks, Nx, CREO, M CAM, Del CAM	
cs of Geometric Modelling	2a	Differentiate between 2D and 3D parametric softwares.	2.1	Introduction to geometric modelling, 2D and 3D modelling, difference between 2D & 3D, parametric softwares.	CO2
	2b	Construct 2D geometric model.	2.2	Geometric construction methods: wireframe modeling, surface modeling, solid modeling, develop 2D Sketching of 3D model.	

UNIT II: Basi	2c	Use modification techniques and polting features.	2.3	Modeling facilities desired: drafting features, modelling features, editing features, annotations, dimensioning and constrains, Plotting features.	
UNIT III: Solid Modelling Basic	3a	Apply datum planes, axes, and points to construct 3D models.	3.1	Understanding/creating & Working with datum Planes, axis, points	CO3
	3b	Create 3D solid model by using Extrude, Revolve, Sweep command.	3.2	Creating Solid using Extrude,Revolve, Sweep command.	
	3c	Improve the developed 3D model by using Edit Round,chamfer commands.	3.3	Modifying & Regenerating by Edit Definition, Applying Round, chamfer, Rib, Auto round	
UNIT IV: Solid Modelling Advance	4a	Create 3D solid model using Holes, Spring & Threads.	4.1	Creating Holes, Spring & Threads using Helical sweep	CO4
	4b	Develop 3D solid model with the help of Swept blend, Helical sweep Warp, Applying Drift	4.2	Creat 3D solid model with the help of Swept blend, Helical sweep Warp, Applying Drift	
	4c	Reconstruct & modify the developed 3D solid model.	4.3	Copying features, Patterning, blending, View manager for Cross sections, customize screen, Environment	
UNIT V: Assembly Modelling	5a	Discriminate attributes of assembly.	5.1	Calling components, Constraining components, working with Layers & Visibility, Patterning	CO5
	5b	Produce assembly and animation to it	5.2	Creating Assembly features and animation	
	5c	Construct exploded views and orthographic views.	5.3	View manager, Exploded Views, projection views – Front, Top, side view and sectional views, BOM, drafting	

VII Laboratory Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Psychomotor Domain)		Hours	Aligned COs
I	1	Identify different input and output devices used in CAD/CAM	2#	CO1
I	2	Install Creo software (open source software) on your personal computer.	2	CO1
II	3	Use basic draw commands to draw 2D drawing.	2#	CO2
II	4	Modify and Edit above drawing.	2#	CO2
II	5	Draw 2 dimensional figure using Solid Modeling sketcher commands.	2#	CO2
III	6	Develop a solid geometry by using Extrude.	2#	CO3
III	7	Develop a solid geometry by using Revolve.	2	CO3
III	8	Create 3 D solid modelling of any one engineering component	2#	CO3
IV	9	Create a hole in a solid body by using hole command.	2#	CO4
IV	10	Use helical sweep command to create springs and threads.	2#	CO4
IV	11	Use warp and drift command to rectangle box.	2#	CO4
IV	12	Apply swept blend command to form irregular shapes in a solid.	2	CO4
V	13	Call main assembly component and apply constrain on it.	2#	CO5
V	14	Complete the assembly and view it from all direction by using view manager.	2#	CO5
V	15	Apply the animation to moving part of assembly.	2#	CO5

Note: # Compulsory

VIII Self-Study Learning (SLO in Cognitive/Psychomotor/Affective Domain)

COURSE CURRICULUM

Program	:	Diploma in CE/ME/EE/EC/PK/MT/MK/AE/TX
Course Category	:	GE
Course Code	:	AI292H
Course Title	:	Basics of Artificial Intelligence

I Rationale:

This course provides a comprehensive introduction to the fundamental principles and methodologies of artificial intelligence (AI). Students will explore the concept of intelligence and the various methods for encoding knowledge in computer systems. The course covers essential AI elements, including problem formulation, problem space exploration, search algorithms, knowledge representation, inference, logic, and learning mechanisms. By the end of the course, students will have developed a solid understanding of these core AI components and their applications in real-world scenarios.

II Industry Identified Competency:

The Student will be able to do in Industry at entry level:

Comprehend the knowledge of the foundational concepts of AI

III Course Outcomes (COs):

After completing this course students will be able to:

CO1: **Identify** the need of AI and its applications in real life.

CO2: **Use** appropriate search techniques for solving a AI problem

CO3: **Identify** the methods used for knowledge representation in developing logic for game playing.

CO4: **Apply** knowledge representation and reasoning methods for solving real world problems using Artificial Intelligence.

CO5: **Apply** AI knowledge in developing Internet of Things applications

IV Learning Scheme:

Classroom Learning (CL)	Tutorial Learning (TL)	Laboratory Learning (LL)	Self-Study Learning (SL)	Notional Learning Hours (NLH)	Credits
2	-	2	-	4	2

V Assessment Scheme:

Classroom Learning				Tutorial/Laboratory Learning				Self-Study Learning	
FA	SA	Total		FA		SA		SA	
Max	Max	Max	Min	Max	Min	Max	Min	Max	Min
30	70**	100	40	25	10	25	10	-	-

**Online Objective Type

VI Classroom Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Cognitive Domain)		Topics and Sub-topics		Aligned Cos
UNIT I: Introduction to Artificial Intelligence	1a	Classify artificial intelligence on the basis of given point.	1.1	Definitions – Artificial Intelligence, History of AI, Evolution of AI	CO1
	1b	Distingusih between various types of AI on the basis of given points	1.2	Applications of AI in NLP, Robotics, Automation, Human Emothion recognition, Types of AI	
	1c	Select the intelligent agent from the given data.	1.3	Types of Agents, Intelligent Agent	
	1d	Justify the difficulties encounted while conducting the Turing Test	1.4	Agent Environment,Turing Test in AI	
UNIT II: Search Techniques in AI	2a	Select and justify given search technique on basis of given point.	2.1	Search Techniques in AI ,Search based problems- Slide bar puzzle problem,Tower of Hanoi	CO2
	2b	Choose a suitable heuristic function for solving given problem.	2.2	Uninformed Search Breadth first Search Depth First Search, Heuristic Search/ Informed Search Techniques: Generate-and-Test, Hill Climbing, Best-first Search	

UNIT III: Game playing in AI	3a	Apply procedures on given function using given search.	3.1	Game Playing: The Minimax Search Procedure, Adding Alpha-beta Cutoffs, Iterative Deepening	CO3
	3b	Apply specific search methods on particular game	3.2	Case study : Search in Game Playing	
UNIT IV: Knowledge Representation	4a	Differentiate between the various types of knowledge based on the given criteria.	4.1	Introduction to Knowledge representation, types of knowledge	CO4
	4b	Compare the given techniques on the basis of given data.	4.2	Techniques of knowledge representation-Logical Representation, Semantic Network Representation Frame Representation, Production Rules	
	4c	Represent the given knowledge using propositional logic.	4.3	Propositional logic in Artificial intelligence	
	4d	Represent the given knowledge using First order logic.	4.4	First-Order Logic in Artificial intelligence	
UNIT V: Role of AI in Internet ofThings (IoT)	5a	Identify the contribution of AI in making IoT work	5.1	Role of AI in making IoT sucessful, Applications of AI in IoT	CO5
	5b	Suggest 2 imaginations of future based on collaboration of AI and IoT	5.2	Real world examples of AI in IoT,Future of AI based IoT	

VII Laboratory Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Psychomotor Domain)		Hours	Aligned COs
II	1	Implement Hill climbing to solve 8-Puzzle problem	2#	CO2
II	2	Develop a program to solve Tower of Hanoi problem using recursion.	2#	CO2
II	3	Develop a program to perform the generate and Test Search using Heuristic approach	2#	CO2
III	4	Implement Best First Search to solve a problem using Heuristic approach	2#	CO3
III	5	Develop a program to perform breadth- first search of a given problem graph.	2#	CO3
III	6	Develop a program to perform depth- first search of a given problem graph.	2#	CO3
IV	7	Develop a program to solve family tree problem using rules	2#	CO4
IV	8	Design an application to simulate number puzzle problem	2#	CO4
V	9	Implement water jug problem using artificial intelligence technique	2#	CO5
V	10	Implement the program based on Minimax Search for designing the Tic-Tac-Toe game	2#	CO5
V	11	Develop a program to solve the Travelling Sales person Problem using Heuristic approach	2#	CO5
V	12	Develop a program to solve the Slide bar puzzle problem using Heuristic approach	2#	CO5
V	13	Develop a mini project on Automated inventory tracking using IoT	2	CO5
V	14	Develop a mini project on IoT in Healthcare.	2	CO5
V	15	Develop a mini project on IoT in any other application.	2	CO5

Note: # Compulsory

VIII Self-Study Learning (SLO in Cognitive/Psychomotor/Affective Domain)

IX Specification Table for Classroom Learning Assessment:

Unit No.	Units	Classroom Learning Hours	C/O	Levels from Cognition Process Dimension			Total Marks
				R	U	A	
1	Introduction to Artificial Intelligence	6	C	02	04	10	16
			O	00	00	00	00

COURSE CURRICULUM

Program	:	Diploma in CE/ME/EE/EC/IT/CM/PK/MT/AE/AI/MK/TX
Course Category	:	GE
Course Code	:	TR292H
Course Title	:	Wildlife Tourist Guide / Naturalist

I Rationale:

Over a period of time, it has been observed that efficiency of polytechnic student can be increased at the workplace by imparting key skills right from entry to the polytechnic. It is an effort to develop student that enables him to be successful in finding a practical and quick solution to any problem he comes across. It covers more or less all aspects of life skills. The development of subject is progressively ascending parallel to development of study in polytechnic.

II Industry Identified Competency:

The Student will be able to do in Industry at entry level:

Facilitate guided wildlife and nature tours with strong communication, safety, and interpretive storytelling skills.

III Course Outcomes (COs):

After completing this course students will be able to:

CO1: **Classify** the concept of Tour Guiding and Naturalist.

CO2: **Identify** the key communication and behavior skills for Guide.

CO3: **Identify** types of products for tour guiding and types of tourists.

CO4: **Identify** and understand the tourist behavior and expectations.

CO5: **Identify** technical and storytelling skills required for effective tour guiding.

CO6: **Identify** various hygiene, safety and documentation process.

IV Learning Scheme:

Classroom Learning (CL)	Tutorial Learning (TL)	Laboratory Learning (LL)	Self-Study Learning (SL)	Notional Learning Hours (NLH)	Credits
2	-	2	-	4	2

V Assessment Scheme:

Classroom Learning				Tutorial/Laboratory Learning				Self-Study Learning	
FA	SA	Total		FA		SA		SA	
Max	Max	Max	Min	Max	Min	Max	Min	Max	Min
30	70**	100	40	25	10	25	10	25	10

**Online Objective Type

VI Classroom Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Cognitive Domain)		Topics and Sub-topics		Aligned Cos
UNIT I: Introduction	1a	Classify the duty of tour guiding.	1.1	Introduction of tourism industry. Background of tour guiding Duty and responsibilities.	CO1
	1b	Identify the role of wildlife tourism in India.	1.2	Wildlife tourism in India, Role of Naturalists.	
	1c	Identify the local experience and excursion.	1.3	Introduction of Local excursion and experiences.	
UNIT II: Communication Skills	2a	Identify skill set.	2.1	Learn basic communication skills required for the profession.	CO2
	2b	Relate skills with profession.	2.2	Etiquettes and behaviour.	
	2c	Recognize the types of skills.	2.3	Presentation skills and storytelling.	
	2d	Identify the hard skills.	2.4	Hard skills and domain knowledge.	
IT III: Tour ing Products	3a	Recognize the types of Products.	3.1	Types of tour.	CO3
	3b	Recognize product for tour guiding.	3.2	Types of products for tour guiding, costing, inclusion etc.	

UNI Guid	3c	Identify type of tourist.	3.3	Types of tour for different types of tourist.	
UNIT IV: Tourist Expectation	4a	Identify behavior of tourist.	4.1	Types of tourist, Types of destination, Types of tour, Behaviour of the tourist at the destinations.	CO4
	4b	Identify expectation of Tourist.	4.2	Understating the expectation and outcome of the tour.	
	4c	Identify communication and importance of feedback.	4.3	Communication during the tour, feedback and testimonials.	
UNIT V: Component of the Wildlife Destination	5a	Classify Wildlife Tourism products.	5.1	Different types of Destination, Inbound and Domestic Market, Eco system of the wildlife Industry.	CO5
	5b	Identify types of components of the wildlife tourism products.	5.2	Understanding flora and Fauna of the wildlife destination.	
	5c	Prepare pitch for storytelling.	5.3	Art of Story Telling. Short and long pitch, content creation for the story telling.	
UNIT VI: Hygiene, Safety & Documentation	6a	Identify use hygiene in tourism industry.	6.1	Understanding the importance of hygiene during tours, Tips to maintain hygiene during tour and making connections with tourists.	CO6
	6b	Use of safety guidelines for tourist.	6.2	Safely at the destination and while taking walking tours. Important checklist for the safety of tourists.	
	6c	Identify use of tour guiding documentation.	6.3	Tour Guiding documentation.	
	6d	Use of procedures pre during and post tours.	6.4	Pre service and Post service procedure, Maintaining documents.	

VII Laboratory Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Psychomotor Domain)		Hours	Aligned COs
I	1	Prepare the list of types of wildlife and historic destination in Vidarbha.	2#	CO1
I	2	Prepare and present the importance of wildlife tourism in India.	2#	CO1
II	3	Prepare and present a role play for tour guiding profession.	2#	CO2
II	4	Prepare a story for oral narration with respect to a wildlife destination.	2#	CO2
III	5	Present the Tourism Products.	2	CO3
III	6	Prepare a present a role plays of types of tourists.	2	CO3
III	7	Prepare report on the product of tour guiding.	2#	CO3
IV	8	Prepare Roleplay on Tourist behavior.	2#	CO4
IV	9	Prepare report on tourist expectation at different types of destination.	2#	CO4
IV	10	Prepare feedback form for tourist visiting wildlife destination.	2	CO4
V	11	Demonstarte wildlife Story telling.	2#	CO5
V	12	Submit the assignment of a destinations flora and fauna in the form of story telling.	2#	CO5
VI	13	Prepare the documentation chekist for an organization managing wildlife tourism activities.	2#	CO6
I to VI	14	Presents your self as a wildlife tourist guide.	2#	CO1 to CO6

Note: # Compulsory

Exit Course

II Year

Government of Maharashtra
GOVERNMENT POLYTECHNIC, NAGPUR
(An Autonomous Institute of Govt. of Maharashtra)
Near Mangalwari Bazar, Sadar, Nagpur-440001

COURSE CURRICULUM

Program	:	Diploma in CE/ME/EE/EC/CM/IT/AE/MT/PK/TX/MK/AI
Course Category	:	INP
Course Code	:	IN252H
Course Title	:	Internship (Vocational Skills)

I Rationale:

The Internship (Vocational Skill) course is a vital component for fulfilling the requirements of the diploma in vocation after the fourth semester as per NEP guidelines as an exit course. It provides students with hands-on experience in small, medium, or large-scale industries related to their field of study. This course bridges the gap between academic learning and practical application, enabling students to apply their theoretical knowledge in real-world industrial settings, enhancing their employability and vocational competencies.

II Industry Identified Competency:

The Student will be able to do in Industry at entry level:

Bridge theoretical knowledge with practical experience in a professional environment.

III Course Outcomes (COs):

After completing this course students will be able to:

CO1: **Evaluate** the organization's structure, processes, safety protocols, and industry standards to determine operational effectiveness.

CO2: **Apply** industry-specific tools, technologies, and skills to perform various operations.

CO3: **Contribute** to organizational goals by handling projects/ tasks under mentor guidance, applying learned skills.

CO4: **Analyze** technical challenges, addressing industry-specific issues effectively.

CO5: **Prepare** a internship report, ensuring accuracy and clarity.

CO6: **Deliver** presentation using visual aids and effective communication.

IV Learning Scheme:

Classroom Learning (CL)	Tutorial Learning (TL)	Laboratory Learning (LL)	Self-Study Learning (SL)	Notional Learning Hours (NLH)	Credits
-	-	-	8	8	4

V Assessment Scheme:

Classroom Learning				Tutorial/Laboratory Learning				Self-Study Learning

COURSE CURRICULUM

Program	:	Diploma in MT
Course Category	:	DSC
Course Code	:	MT301H
Course Title	:	Heat Treatment

I Rationale:

A heat treatment course for a diploma in metallurgical engineering in India is essential for imparting industry-relevant skills in modifying metal properties. It provides hands-on experience in various heat treatment techniques crucial for industries like automotive and aerospace. Understanding heat treatment principles is key for material optimization and career opportunities in manufacturing and research. Overall, the course enhances students' practical skills and knowledge, making them highly desirable in the metallurgical industry.

II Industry Identified Competency:

The Student will be able to do in Industry at entry level:

Perform heat treatment processes to modify material properties.

III Course Outcomes (COs):

After completing this course students will be able to:

CO1: **Analyse** effects of Heat treatment variables.

CO2: **Use** TTT, CCT Diagrams for different heat treatments.

CO3: **Determine** Hardenability of steel using different methods.

CO4: **Select** proper heat treatment processes to steels for given applications.

CO5: **Select** proper case hardening method for given applications.

CO6: **Recommend** proper heat treatment for Al alloys.

IV Learning Scheme:

Classroom Learning (CL)	Tutorial Learning (TL)	Laboratory Learning (LL)	Self-Study Learning (SL)	Notional Learning Hours (NLH)	Credits
4	-	4	-	8	4

V Assessment Scheme:

Classroom Learning				Tutorial/Laboratory Learning				Self-Study Learning	
FA	SA	Total		FA		SA		SA	
Max	Max	Max	Min	Max	Min	Max	Min	Max	Min
30	70	100	40	25	10	25+	10	-	-

VI Classroom Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Cognitive Domain)		Topics and Sub-topics		Aligned Cos
UNIT I: General Aspects of Heat Treatment	1a	Analyse effects of given heat treatment variables.	1.1	Heat treatmemt- Definition, Importance in the industry. Process Variables, heat btreatmemnt cycles, Heating of steel- Heating time, Oxidation and decarburization, furnace atmosphere and control, Saftey rules in heat treatment shop.	CO1
	1b	Determine austenitic grain size using given data and methods.	1.2	Critical Transformation temperatures and their notation, Austenitization: mechanism and kinetics of formation of Austenite, Determination of austenite grain size in steel, effect of austenitic grain size.	

UNIT II: Isothermal transformation	2a	Construct T.T.T. diagram for given stee.	2.1	Time Temperature Transformation (T.T.T.) diagram, construction of T.T.T. diagram from transformation curves, use of T.T.T. diagram for determining H.T. cycles, Continuous Cooling Transformation (C.C.T.) Diagram, C.C.R.	CO2
	2b	Compare different transformation mechanism based on given points.	2.2	Transformation of austenite into pearlite - Nucleation and growth of cementite and ferrite, effect of time, grain size etc, Characteristics of martensitic transformation - Ms- Mf temp. Volumetric changes during martensitic transformation, Characteristics of Bainitic transformation, Retained austenite - effect of carbon and alloying elements.	
UNIT III: Hardenability of steel	3a	Compare hardness with Hardenability based on given points.	3.1	Hardenability-factors affecting Hardenability, Hardness vs Hardenability, Use of Hardenability data in industry.	CO3
	3b	Determine Hardenability of steel by given method.	3.2	Determination of Hardenability of steel by Grossman method, Jominy end quench test and chemical composition method, Determination of ideal critical diameter.	
	3c	Select proper quenchant for given heat treatment.	3.3	Quenchant- Severity of quenchant, types and characteristics quenching mediums.	
	4a	Compare different annealing processes based on given points.	4.1	Annealing treatments : Purpose of Annealing, Recrystallisation annealing, stress relieving, full annealing, partial annealing, diffusion annealing isothermal annealing, vacuum annealing.	

UNIT IV: Heat treatment Processes	4b	Analyse effects of normalising based on given data.	4.2	Normalizing – purposes, micro structural changes and its applications.	CO4
	4c	Select proper hardening temperatures for given steel.	4.3	Hardening: Purpose of hardening, selection of hardening temp.- Methods of quenching. Sub-zero treatment, H.T. based on T.T.T. diagram-Austempering, Martempering, Ausforming, Patenting of steel, Tempering - purpose of tempering - stages in tempering - effect of temp., and time on structure- temper Embrittlement, Spheroidizing of steel.	
	4d	Suggest remedies for givent heat treatment defects.	4.4	H.T. based on T.T.T. diagram Austempering, Martempering, Ausforming, Patenting of stee Heat Treatment defects, causes and remedies, Heat treatment of Grey cast iron-stress relieving, annealing, normalizing, hardening and tempering. Malleabilization of white cast iron, Heat treatments of Spheroidal graphite (SG) iron.	
UNIT V: Surface Hardening	5a	Select proper case hardening method for given application.	5.1	Case hardening of steel - carburizing, heat treatment after carburizing. Cyaniding, Nitriding, Plasma Nitriding, and Sursulf process.	CO5
	5b	Compare given case hardening methods on given points.	5.2	Surface hardening of steel: Induction hardening - principle, equipments and steels used, Flame hardening-principle, equipments and steels used.	

UNIT VI: Heat Treatment of non ferrous alloys	6a	Use Al- Cu equilibrium diagram for precipitation hardening of Al alloys based on given alloy composition.	6.1	Al-Cu equilibrium diagram, Heat treatment processes for Aluminium alloys, Precipitation hardening of Al alloys .	CO6
	6b	Interpret given Cu-Al equilibrium diagram.	6.2	Aluminium bronze: Cu-Al equilibrium diagram, bronze, Heat treatment of Al bronze (Cu- Al).	

VII Laboratory Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Psychomotor Domain)		Hours	Aligned COs
I	1	Follow saftey rules and regulations while Operating heat treatmenmt furnace.	4#	CO1
II	2	Construct TTT diagram for eutectoid steel.	4#	CO2
III	3	Determine Hardenability of given steel by Jominey End Quench test.	4#	CO3
IV	4	Perform Annealing of steel.	4#	CO4
IV	5	Perform Normalizing on steel.	4#	CO4
IV	6	Perform Hardening of steel with varying carbon content to analyze effect of carbon % on hardness.	4#	CO4
IV	7	Perform Hardening on steel with varying hardening temperatures to analyze effect of temperatures on hardness.	4#	CO4
IV	8	Perform tempering on hardened steel at different time to analyze effects of time on hardness.	4#	CO4
IV	9	Perform tempering on hardened steel at different temperature to analyze effects of temperature on hardness.	4#	CO4
IV	10	Perform any one heat treatment on cast iron.	4#	CO4
V	11	Perform Hardening on steel with different quenchant medias to analyze effect of quenchant on hardness.	4#	CO5
V	12	Perform pack carburzing of steel.	4#	CO6
V	13	Perform Induction hardening of steel.	4	CO6
V	14	Perform flame hardening of steel.	4	
VI	15	Perform Age hardening process on Al –Cu alloy .	4#	

Note: # Compulsory

VIII Self-Study Learning (SLO in Cognitive/Psychomotor/Affective Domain)

IX Specification Table for Classroom Learning Assessment:

Unit No.	Units	Classroom Learning Hours	C/O	Levels from Cognition Process Dimension			Total Marks

COURSE CURRICULUM

Program	:	Diploma in MT
Course Category	:	DSC
Course Code	:	MT302H
Course Title	:	Mechanical Metallurgy

I Rationale:

A mechanical metallurgy course is essential for a diploma in metallurgical engineering in India as it focuses on the mechanical behavior of metals and alloys. This course equips students with knowledge of how materials deform, fracture, and respond to different mechanical forces. The course enhances students' skills in material selection, testing, and analysis, preparing them for diverse engineering roles.

II Industry Identified Competency:

The Student will be able to do in Industry at entry level:

Perform various metal working operations.

III Course Outcomes (COs):

After completing this course students will be able to:

CO1: **Compare** cold working with hot working.

CO2: **Analyse** effects of rolling on properties and structures of metal.

CO3: **Formulate** steps for preparation of forgings

CO4: **Suggest** suitable extrusion for given application.

CO5: **Sequence** procedural steps for wire, rod drawing.

CO6: **Carry** out forming operations in sheet metal working of metals /alloys.

IV Learning Scheme:

Classroom Learning (CL)	Tutorial Learning (TL)	Laboratory Learning (LL)	Self-Study Learning (SL)	Notional Learning Hours (NLH)	Credits
3	-	2	1	6	3

V Assessment Scheme:

Classroom Learning				Tutorial/Laboratory Learning				Self-Study Learning	
FA	SA	Total		FA		SA		SA	
Max	Max	Max	Min	Max	Min	Max	Min	Max	Min
30	70	100	40	25	10	25+	10	25	10

VI Classroom Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Cognitive Domain)		Topics and Sub-topics		Aligned Cos
UNIT I: Basics of mechanical metallurgy	1a	Compare Cold Working & Hot working on given points.	1.1	Definition and scope of mechanical metallurgy, Objectives and classification of forming processes and metal working processes., Workability of materials-forming limit diagram,Elastic and Plastic deformation of single crystal, flow curve, Modes of plastic deformation-slip and twinning ,Hot working and warm working, Changes of Structures during plastic deformation.	CO1
	1b	Calculate Critical resolved shear stress on given data.	1.2	Critical resolved shear stress (CRSS)- derivation and numerical, Work hardening/strain hardening, causes of strain hardening, Cold Working.	
	1c	Interprete given cold worked- annealed cycle.	1.3	Cold worked- annealed cycle: Recovery, Recrystallisation and grain growth.	

UNIT II: Rolling Of Metals	2a	Analyse effect of given rolling on metal properties and structures.	2.1	Concept and Principle of metal rolling, Structural changes in rolled products, Classification of rolling processes.	CO2
	2b	Calculate various parameters in rolling based on given data.	2.2	Parameters in rolling:entry and exit zone, neutral plane, Spreading, Rolling force, torque and power, Elastic deformation of rolls and remedies, Hot rolling and cold rolling.	
	2c	Classify rolling rolling mills on given points.	2.3	Rolling Mills:Construction in brief,Classification – main features of each mill, Types with their sketches.	
	2d	Suggest remedies for given rolling defects.	2.4	Tube making by rolling Mannesmann's process, Pilger process, Plug rolling,Types of Rolled products. Defects in rolled products and their remedies Rolling plant lay-out.	
UNIT III: Forging Of Metals	3a	Classify forging based on given points.	3.1	Forging : definition, principle, structure of forgings, Types of forgings -Open die and closed die forging; principle and comparision, Forging temperatures and time for Heating.	CO3
	3b	Select proper forging die materilas for given applications.	3.2	Forgings die- die materials, properties of die materials, Different forging operations,Press forgings and hammer forgings.	
	3c	Select proper forgings equipments for given applications.	3.3	Forging equipments- Working principles of following Hammers and presses for forging: Steam Hammer, Pneumatic Hammer, Board drop Hamme Spring Hammer, Mechanical Press, Hydraulic Press, Forging Plant Layout.	
	3d	Suggest remedies for given Forging defects.	3.4	Forging defects and residual stresses in forgings.	

UNIT IV: Extrusion Of Metals	4a	Compare different extrusion based on given points.	4.1	Extrusion -Principle and Definition, Deformation in extrusion, Lubricants used in extrusion, Types of extrusion Direct, Indirect, Hydrostatics, Impact extrusion, High velocity rate extrusion , extrusion pressure and parameters affecting Extrusion.	CO4
	4b	Select appropriate extrusion die materia for given applications.	4.2	Extrusion Equipments / machineries: extrusion dies, extrusion machines, Extrusion defects and remedies.	
	4c	Compare given methods of tube making by extrusion.	4.3	Tube making by extrusion-From hollow billet, From solid billet, With porthole die, Advantages of extrusion tube making.	
UNIT V: Drawing Of Wire and Rod	5a	Compare wire drawing and rod drawing based on given points.	5.1	Principle of Drawing,, classification of drawing processes, comparison of Wire drawing and rod drawing , Raw materials for wire/ rod drawing, Sequential procedure for Preparation of wire, rod for drawing.	CO5
	5b	Analyse effect of given parameters on drawing opeartions.	5.2	Deformation pattern of metal in drawing die, Effects of friction and die angle on energy required for drawing,Selection of Die material for drawing operations, Defects in wire/rod, Tube drawing vs Tube making.	
	5c	Compare given drawing machines on given points.	5.3	Wire/rod Drawing machines-Principle and description of Draw Bench, Bull block-Continuous wire drawing machine.	

UNIT VI: Sheet Metal Working	6a	Select suitability of given metal for forming operations.	6.1	Characteristics and properties of metal sheets for forming operations, Typical press tools and processes for sheet metal working, Component of typical press tools. Type of the presses used, their construction and advantages and disadvantages.	CO6
	6b	Draw sketches showing effects for given clearance.	6.2	Shear action in sheet metal cutting, clearance and its effects on cut edge.	
	6c	Compare different forming operations on given points.	6.3	Forming operations, blanking, bending, deep drawing, Stretch forming.	
	6d	Suggest remedies for given sheet metal defects.	6.4	Principle of spinning of metals, spinning ratio,, Advantages, applications of spinning, spinning lathe, Defects in sheet metal products.	

VII Laboratory Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Psychomotor Domain)		Hours	Aligned COs
I	1	Operate Hydraulic press for plastic deformation of metals/Alloys	2#	CO1
I	2	Operate the rolling mill for Mild steel bar	2#	CO1
II	3	Operate the rolling mill for Aluminium Bar	2#	CO2
II	4	Determine effect of rolling on properties and structure of metals	2#	CO2
III	5	Prepare any component by Rolling operation	2#	CO3
III	6	Perform microscopic examination of rolled component	2#	CO3
IV	7	Prepare any component by Press Forging operation	2#	CO4
IV	8	Perform microscopic examination of forged component	2#	CO4
IV	9	Operate Draw bench machine for Drawing operation of Wire	2#	CO4
V	10	Operate Draw bench machine for Drawing operation of Rod	2#	CO5
V	11	Perform Erichson's Cupping Test.	2#	CO5
V	12	Prepare component by Spinning Lathe.	2#	CO5
VI	13	carry out blanking operation on given component ,	2#	CO6
VI	14	carry out punching operation on given component	2#	CO6
VI	15	carry out Shearing operation on given component	2#	CO6

Note: # Compulsory

VIII Self-Study Learning (SLO in Cognitive/Psychomotor/Affective Domain)

1. Draw rolling plant lay out on A3 Drawing sheet
2. Draw extrusion and forging plant lay out on A3 Drawing sheet
3. Draw different metal working products and prepare charts with sketches on A3 Drawing sheet.
4. Draw power press and hydraulic press on A3 Drawing sheet.
5. Perform market survey of different metal worked products of different materials and submit report.
6. Collect different defective metal worked products and preprae report on it.

COURSE CURRICULUM

Program	:	Diploma in MT
Course Category	:	DSE
Course Code	:	MT303H
Course Title	:	Corrosion Engineering

I Rationale:

Continuous decay and destruction of metal when put into use is of immense concern to Engineers. It is the primary job of the Design Engineers to choose the right type of metal for a particular use and apply some protection methods to minimize corrosion. This course includes sources of various types of corrosion and their manifestations in the first part. The second part deals with the various protective measures undertaken by the Quality Control & Design Department

II Industry Identified Competency:

The Student will be able to do in Industry at entry level:

Carry out electroplating works

III Course Outcomes (COs):

After completing this course students will be able to:

CO1: **Use** different series in corrosion.

CO2: **Detect** types of Corrosion occured in material.

CO3: **Design** proper material component for corrosion control.

CO4: **Use** pourbaix diagram in corrosion.

CO5: **Perform** surface protection of different materials

CO6: **Perform** Electroplating of metals/Alloys to protect from corrosion

IV Learning Scheme:

Classroom Learning (CL)	Tutorial Learning (TL)	Laboratory Learning (LL)	Self-Study Learning (SL)	Notional Learning Hours (NLH)	Credits
3	-	2	1	6	3

V Assessment Scheme:

Classroom Learning				Tutorial/Laboratory Learning				Self-Study Learning	
FA	SA	Total		FA		SA		SA	
Max	Max	Max	Min	Max	Min	Max	Min	Max	Min
30	70	100	40	25	10	25+	10	25	10

VI Classroom Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Cognitive Domain)		Topics and Sub-topics		Aligned Cos
UNIT I: Corrosion	1a	Identify given type of corrosion	1.1	Introduction to corrosion, Growth Laws	CO1
	1b	Use of Electrochemical Series, Galvanic Series for given applications	1.2	Electrochemical Series, It's Advantages and Limitations & applications, Galvanic Series , its Advantages, limitations and applications	
Of Corrosion	2a	Compare given type of corrosion on the basis of given points	2.1	Dry Corrosion: Types, Mechanism, Types of films, Wet Corrosion: Hydrogen Evolution & Oxygen Absorption.	
	2b	Identify Hydrogen Attack for given material	2.2	Action of Hydrogen : Hydrogen Embrittlement & Hydrogen Attack	

UNIT II: Types (	2c	Detect type Corrosion for given material	2.3	Description,process details,of:Galvanic Corrosion, Concentration Cell Corrosion, Atmospheric Corrosion, corrosion, Pitting Corrosion, Intergrannular Corrosion, Underground Corrosion, Microbiological Corrosion, Stress Corrosion, Season Cracking, erosion.	CO2
UNIT III: Corrosion Control	3a	Design components to prevent corrosion for given material	3.1	Proper selection of materials, proper design and fabrication procedure ,Passivity	CO3
	3b	Make use of proper Inhibitors for corrosion control for given application	3.2	Protection by Inhibitors : Anodic & Cathodic Inhibitors	
	3c	Use Cathodic protection for corrosion protection for given material	3.3	Cathodic protection: Scope, Applicabilit, need, principle, process, description, applications, Intergrannular corrosion Test: Scope, Applicability, need, principle, process description, applications	
UNIT IV: Thermodynamics In Corrosion	4a	Use Pourbais diagram for given material	4.1	Study of Free energy for Electrochemical reaction, Pourbais diagram :Benefits and Limitations, Pourbais diagram for Iron.Nerst Equation. Faraday's Law	CO4
	4b	Use reference electrodes for given material	4.2	Study of reference electrodes: Calomel Electrod, Hydrogen and Standard Hydrogen Electrode	
UNIT V: Surface Protection	5a	Identify Metallic & Non-metallic coatings for given material	5.1	Pretreatment before surface coating,Metallic coating, Non-metallic coating & Chemical Conversion Coatings	CO5
	5b	Carry out pre surface coating for corrosion protection for given material	5.2	Hot Dipping : Galvanizing, Tinning ,Cementation, Metal cladding, Metal spraying, Sputtering,Anodizing, Phosphating	

UNIT VI: Electro-Plating	6a	Design plant layout for electroplating	6.1	Electroplating equipments and plant layout, Pretreatments before plating,Copper Plating: Bath Composition, Operating Conditions	CO6
	6b	Perform given metal plating process for given material	6.2	Chromium Plating: Bath Composition, Operating Conditions, Nickel Plating : Bath Composition, Operating Conditions, Hard Chrome Plating	
	6c	Determine various defect, causes and remedial measures	6.3	Plating thickness Tests Defects in Plating: Causes and remedies	

VII Laboratory Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Psychomotor Domain)		Hours	Aligned COs
I	1	Determine the corrosion rate of different metals metals by weight loss method	2#	CO1
I	2	Arrange Al,Zn,Mg,Fe,Cu in using electrochemical/galvanic series	2#	CO1
II	3	Carry out pitting corrosion on steel/iron samples	2#	CO2
II	4	Carry out underground corrosion on steel/iron samples	2#	CO2
II	5	Perform atmospheric corrosion on steel/iron samples	2#	CO2
III	6	perform cathodic protection of steel/iron samples for corrosion prevention	2#	CO3
III	7	Design various ferrous components for corrosion control	2#	CO3
IV	8	Calculate free energy for materials in corrosion	2	CO4
IV	9	Determine corrosion of iron using Pourbaix diagram.	2#	CO4
V	10	Perform Anodizing and Coloring of Aluminium.	2#	CO5
V	11	Perform any surface protection methods on ferrous metals for surface protection	2#	CO5
VI	12	Measure Plating thickness on steel.	2#	CO6
VI	13	Measure plating thickness by weight change method of galvanised Mild Steel	2#	CO6
VI	14	Perform Chromium Plating on Mild Steel	2#	CO6
VI	15	Perform Copper Plating on steel	2#	CO6

Note: # Compulsory

VIII Self-Study Learning (SLO in Cognitive/Psychomotor/Affective Domain)

1. Prepare comparative models for types of corrosion
2. Collect different types of metal powders after corrosion and write a report on it
3. Draw size, shape and design of corroded product and write a report on it
4. Prepare a report on electrical energy consumption used in various plating methods used for protection of metals
5. Collect variouis samples of corroded products/metals and write a report on it
6. Prepare micro project on surface protection of metals and write a report on it
7. Design plant layout for electroplating
8. Analyse different corroded products and write a report on it
9. Prepare micro project on loss of materials occuring worldwide due to corrosion of materials
10. Prepare microproject based on curriculum content
11. Prepare microproject on electroplating of different metals/alloys and write report on it.
12. Prepare microproject on electroplating defects stating their cuases and remedies of different metals/alloys and write report on it.
13. Prepare microproject on thermodynamics in corrosion and write a report on it

COURSE CURRICULUM

Program	:	Diploma in MT
Course Category	:	DSE
Course Code	:	MT304H
Course Title	:	Advanced Foundry Technology

I Rationale:

This course includes various aspects of casting. Students will study the actual engineering drawing of the castings and evaluation of methodology for quality casting production. Optimization of casting design and latest developments in foundry will be the highlights of this course.

II Industry Identified Competency:

The Student will be able to do in Industry at entry level:

Design gating and Risering system.

III Course Outcomes (COs):

After completing this course students will be able to:

CO1: **Design** the components of gating system.

CO2: **Apply** proper method for riser calculation.

CO3: **Design** steel Castings conmsidering various parameters.

CO4: **Use** solidification behaviour of different cast iron in casting design.

CO5: **Select** meltimg practices for light metals and alloys.

CO6: **Use** different casting softwares.

IV Learning Scheme:

Classroom Learning (CL)	Tutorial Learning (TL)	Laboratory Learning (LL)	Self-Study Learning (SL)	Notional Learning Hours (NLH)	Credits
3	-	2	1	6	3

V Assessment Scheme:

Classroom Learning				Tutorial/Laboratory Learning				Self-Study Learning	
FA	SA	Total		FA		SA		SA	
Max	Max	Max	Min	Max	Min	Max	Min	Max	Min
30	70	100	40	25	10	25+	10	25	10

VI Classroom Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Cognitive Domain)		Topics and Sub-topics		Aligned Cos
UNIT I: PRINCIPLE OF GATING	1a	Use fluid flow equations for design of given gating component.	1.1	Fluid flow equations and their applications in gating design considerations.	CO1
	1b	Design sprue for given casting.	1.2	Aspirations in sprues and at sharp corners, step gates,Stack-Moulding design.	
	1c	Calculate pouring time for given casting.	1.3	Calculation of pouring time of the castings, Numericals based on evaluation of Gating design.	
ERING TECHNIQUES	2a	Apply given method for riser calculation.	2.1	Riser calculation based on solidification time and shrinkage cavity measurements: Caine's method, NRL method, Modulus method, Application of these methods for various casting shapes.	CO2

UNIT II: RISI	2b	Calculate feeding distance of given riser.	2.2	Calculation of feeding distance of the risers for bars and plates, Numericals based on Risering of the castings.	
UNIT III: STEEL FOUNDRY PRACTICE	3a	Select means to achieve directional solidification of given steel casting.	3.1	Melting and solidification of steel, Moulding methods.	CO3
	3b	Design riser for given steel castings.	3.2	Risering of steel castings.	
	3c	Suggest remedies for given steel castings.	3.3	Defects in steel castings.	
UNIT IV: NODULAR AND MALLEABLE IRON CASTING PRACTICE	4a	Suggest suitable melting practice for cast irons.	4.1	Melting and solidification behavior of the metal.	CO4
	4b	Design Gating system for givent cast irons.	4.2	Gating and inoculation techniques and practice	
	4c	Design riser for given cast iron castings.	4.3	Risering design, heat treatment of malleable and S.G.Iron casting.	
UNIT V: CASTING OF LIGHT	5a	Compare foundry practices for different light metals and alloys on given points.	5.1	Foundry Practices for light metals and alloys: Cu-Cu alloys, foundry practices, Al-Al alloys .	CO5
UNIT VI: RECENT TRENDS IN CASTING TECHNOLOGY	6a	Compare liquid forging with squeezing forging on given points.	6.1	Introduction to bi-metallic casting production, squeezing and liquid forging.	CO6
	6b	Optimize casting design using given methods.	6.2	Methodology for various engineering castings and optimization of casting design.	
	6c	Use given casting software.	6.3	Recent casting softwares.	

VII Laboratory Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Psychomotor Domain)		Hours	Aligned COs
I	1	Prepare sheets on Numericals based on Gating design.	4#	CO1
II	2	Prepare sheets on Numericals based on Design of Risering of the castings and number of risers required.	4#	CO2
III	3	Design the Gating and riser system for any two steel castings.	4#	CO3
IV	4	Design the Gating and riser system for S.G Iron castings.	4#	CO4
IV	5	Design the Gating and riser system for Grey cast iron castings.	4#	CO4
V	6	Examine actual engineering Drawing of the castings	4#	CO5
V	7	Design gating and risering system for quality castings production.	4#	CO5
VI	8	Use recent software for casting design.	4#	CO6

Note: # Compulsory

VIII Self-Study Learning (SLO in Cognitive/Psychomotor/Affective Domain)

1. Prepare model of Gating system and submit report.
2. Draw foundry lay out for Cast iron foundry by visiting C.I. Foundry on A3 drawing sheet.
3. Prepare survey report on proces of Al, Cu , Steel and cast iron castings.
4. Collect prices of Al casting,Cu castings, steel casting, cast iron castings.
5. Prepare microproject on any one topic in curriculum.
6. Visit any foundry shop and submit report.

COURSE CURRICULUM

Program	:	Diploma in MT
Course Category	:	SEC
Course Code	:	MT351H
Course Title	:	Metallurgical Design & Drawing

I Rationale:

The Metallurgical Design and Drawing course is essential for a Metallurgy diploma, focusing on translating material properties and engineering principles into practical design solutions. Students learn to create detailed drawings and designs for metal components, understanding the interplay between material characteristics and design requirements. This course enhances skills in drafting, analysis, and problem-solving, preparing graduates for roles in designing and developing efficient, high-quality metallurgical products and systems.

II Industry Identified Competency:

The Student will be able to do in Industry at entry level:

Integrate design considerations with manufacturing processes to meet industry standards and optimize performance.

III Course Outcomes (COs):

After completing this course students will be able to:

CO1: **Design** proper heat treatment cycle for given steel/alloy.

CO2: **Calculate** charge for cupola operation.

CO3: **Sketch** different tools/machines in metallurgical workshops/labs.

CO4: **Sketch** various weld joints.

CO5: **Follow** powder production techniques for industrial applications.

CO6: **Perform** crushing and or milling operations for industrial application.

IV Learning Scheme:

Classroom Learning (CL)	Tutorial Learning (TL)	Laboratory Learning (LL)	Self-Study Learning (SL)	Notional Learning Hours (NLH)	Credits
-	-	4	-	4	2

COURSE CURRICULUM

Program	:	DIPLOMA IN AE/ME/PK/EC/MC/CM/IT/AI/MT/TX/EE
Course Category	:	INP
Course Code	:	IN301H
Course Title	:	Industrial Management

I Rationale:

Diploma level students works at middle management level in the industries.Therefore he has to be proficient in planning, organizing & coordinating various activities of industries s/ organizations or when he is required to work in different types of projects. They are also expected to deal with workforce and management problems. In the present era of competition, optimum utilization of the resources with achieving higher productivity is essential for any industry to survive. This course aims to deal effectively at superwisory level.

II Industry Identified Competency:

The Student will be able to do in Industry at entry level:

Apply the Knowledge of management.

III Course Outcomes (COs):

After completing this course students will be able to:

CO1: **Analyze** management concepts, organizational structures, functions, principles, and levels for effective decision-making.

CO2: **Analyze** financial sources, capital types, break-even point, and EOQ effectively.

CO3: **Apply** Human Resource Management functions, safety practices, supervision techniques, and industrial acts effectively.

CO4: **Determine** product costs, selling price, depreciation, and financial statements effectively.

CO5: **Apply** quality control techniques, TQM, and ISO standards to ensure quality management and improvement.

CO6: **Apply** the principle of project management, Project Planning and Scheduling.

IV Learning Scheme:

VI Classroom Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Cognitive Domain)		Topics and Sub-topics		Aligned Cos
UNIT I: Introduction to Management	1a	Campare the concept and principles of management.administration & form of ownership.	1.1	Definitions: Management, Organization, Administration and Entrepreneurship. Forms of ownership: Proprietorship, Partnership, Joint stock company.	CO1
	1b	Select suitable forms of ownership & its limitation	1.2	Co-operative sector, Public sector, Government Undertaking, Advantages, Limitations & Application of each type, comparison between different forms.	
	1c	Compare given types of organizations.	1.3	Types of Organization: Line, Functional, line & staff organization, Advantages, limitations & Applications of each type, comparison between different types.	
	1d	Apply the principles of management and functions of management.	1.4	Functions of Management: Forecasting, Planning, Organizing, Directing, Motivating, Controlling, Coordinating, Decision making.	

	1e	Apply the level of management.	1.5	Principles of management, Levels of management and its Function.	
UNIT II: Financial Management	2a	Select suitable finance mode for a given venture.	2.1	Need of Finance and Sources of finance for enterprises - Short term,Medium term and long term sources.	CO2
	2b	Compare the share and debentures on given factors.	2.2	Shares, debentures, types of shares and Comparison between shares & debentures.	
	2c	Calculate Economic Order Quantity (E.O.Q.) based on given data.	2.3	Break Even Analysis, Importance of Break even point, E.O.Q.(Numerical on EOQ).	
	2d	Identify the types of capital use for organisation.	2.4	Types of capital: fixed and working capital, fix deposites.	
UNIT III: Human Resource Management	3a	Apply the Human Resourses Management for organisation.	3.1	Concept, aim, & objectives of Human Resource Management.	CO3
	3b	Apply HRM functions to solve workplace human resource management problems.	3.2	Functions of HRM: planning, organizing, staffing, recruitment, education & training- its need, methods of training, Motivation, controlling,compensation, Labour welfare, Industrial relations.	
	3c	Apply the safety need, causes and its prevention in organisation.	3.3	Safety Engineering: need, organization, committee, programme, instructions & training. Accidents:causes & prevention.	
	3d	Justify the given charecterstic and function of management.	3.4	Characteristics of supervisors, functions of supervisors and styles of supervision & its advantages and limitations.	
	3e	Apply the purpose of the act .	3.5	Industrial act: Need, Factory act 1948, ESI act, Workmen compensation act only	

UNIT IV: Marketing and Inventory Management	4a	Select the Market and apply the Functions,Consumer behavior.	4.1	Definition of Market, Functions of Marketing Department, Marketing strategies, Marketing environment, Consumer behavior.	CO4
	4b	Apply marketing concepts for effective sales forecasting and promotional strategies.	4.2	Market research, Market survey,marketing mix.Sales forecasting, Sales promotion, advertising, media selection.	
	4c	Apply the inventory & inventory control in industries.	4.3	Definition of inventory & inventory control.Types of inventory items in industries, ABC and VED analysis only.	
	4d	Select the Material Cost, Labour Cost and Expenses in Factory	4.4	Product cost determination, Direct Cost and Indirect Cost, Material Cost And Labour Cost, Expenses-Factory and Overheads.Determination of Selling Price of product- Profit and Loss Statement,Balance sheet description.	
	4e	Estimate depreciation.	4.5	Depreciation &, Obsolescence-Concept and Comparison. Methods of Calculating depreciation straightline, reducing balance, annuity, sinking fund & sum of the digit methods. (Simple Numerical)	
UNIT V: Total Quality Management	5a	Apply the concept of quality control and Quality Assurance	5.1	Concept and definition of Quality, Quality Control, Quality Conformance and Quality Assurance	CO5
	5b	Apply the Total quality Management.	5.2	TQM- Concept, Objectives and Process.	
	5c	Suggest the Quality control techniques.	5.3	Quality control techniques: Lean Manufacturing -JIT, 5S", Six sigma, Kaizen.	
	5d	Compare the Quality Circle and ISO on given points..	5.4	Quality Circle and ISO 9000, ISO14000, ISO 9001: 2015, ISO 14001:2015,	
	5e	Compare ISO and TQM on given points.	5.5	Difference between ISO9000 and TQM.	

UNIT VI: Introduction to Project Management	6a	Justify the Project Management.	6.1	Concept and Definition of Project Management.	CO6
	6b	Suggest the clear project objectives and its scope.	6.2	Project Objectives and its Scope.	
	6c	Apply the project objectives and scope align with project team and stakeholders.	6.3	Defining clear project objectives and scope to align the project team and stakeholders. Managing scope creep and ensuring the project delivers as per the defined scope.	
	6d	Identify the Project Planning.	6.4	Project Planning and ensuring the project delivers as per the defined scope.	
	6e	Select the Scheduling Techniques.	6.5	Introduction to scheduling tools like Gantt charts, Critical Path Method (CPM), and Program Evaluation and Review Technique (PERT). Methods to allocate resources efficiently and track project timelines.

COURSE CURRICULUM

Program	:	Diploma in CE/ME/EE/EC/PK/MT/IT/AE/CM/TR/TX/MK/AI
Course Category	:	VEC
Course Code	:	VE352H
Course Title	:	Indian Knowledge System

I Rationale:

This course on "Indian Knowledge System" for diploma students is designed as per the requirements of the National Education Policy (NEP) 2020. It aims to provide a comprehensive understanding of India's rich heritage in knowledge, covering areas like philosophy, mathematics, science, engineering, town planning, and Vastu-sastra. By exploring these diverse fields, students will gain insights into the holistic and unique approaches that shaped Indian civilization. The course bridges ancient wisdom with modern technological practices, fostering an appreciation for India's significant contributions to global knowledge.

II Industry Identified Competency:

The Student will be able to do in Industry at entry level:

Exhibit a comprehensive grasp of Indian knowledge systems, applying their principles across various domains of technology and philosophy.

III Course Outcomes (COs):

After completing this course students will be able to:

CO1: **Exhibit** comprehension of Indian knowledge systems' significance, evolution, and unique holistic approaches.

CO2: **Explore** philosophical principles of Vedic and Non-Vedic schools, emphasizing their significance and unique approaches.

CO3: **Analyze** the Indian numeral system, measurement units, and Bhaskaracarya's contributions to the decimal system.

CO4: **Apply** ancient Indian mathematical methods and principles, emphasizing contributions and practical problem-solving techniques.

CO5: **Analyze** India's science, engineering, and metalworking heritage, emphasizing technological advancements and artistic craftsmanship.

CO6: **Analyze** ancient town planning and architecture while exploring the key principles of Vastu-sastra.

IV Learning Scheme:

Classroom Learning (CL)	Tutorial Learning (TL)	Laboratory Learning (LL)	Self-Study Learning (SL)	Notional Learning Hours (NLH)	Credits
-	-	2	-	2	1

V Assessment Scheme:

Classroom Learning				Tutorial/Laboratory Learning				Self-Study Learning	
FA	SA	Total		FA		SA		SA	
Max	Max	Max	Min	Max	Min	Max	Min	Max	Min
-	-	-	-	25	10	25	10	-	-

VI Classroom Learning Content:

VII Laboratory Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Psychomotor Domain)		Hours	Aligned COs
I	1	Organize a report showcasing ancient Indian knowledge's significance in mathematics, astronomy, medicine, architecture, and global influence.	2#	CO1
I	2	Categorize education features and institutes during Vedic, medieval, and colonial periods, emphasizing methodologies, curricula, and societal impact.	2#	CO1
I	3	Compile a report on Indian knowledge's uniqueness, including holistic approaches, sustainability, ethics, and integration of science and spirituality.	2#	CO1
II	4	Analyze the salient features of philosophical systems belonging to the Vedic school, emphasizing their principles and contributions.	2#	CO2
II	5	Examine the salient features of philosophical systems belonging to the Non-Vedic school, highlighting their distinctive approaches and significance.	2#	CO2
III	6	Investigate the Indian Numeral System and traditional units of measurement, emphasizing their historical development and applications.	2#	CO3

III	7	Explore Bhaskaracarya's Lilavati, focusing on the decimal system and the concept of place value.	2#	CO3
III	8	Compile a report on ancient Indian mathematicians and their significant contributions to mathematics and related fields.	2	CO3
IV	9	Apply Aryabhata's method to find the square root of numbers and verify the results.	2#	CO4
IV	10	Use the Bhakshali method to calculate square roots and verify accuracy through practical examples.	2#	CO4
IV	11	Construct a five-letter binary word table using Pingala's Prastara and explain its systematic arrangement.	2	CO4
V	12	Investigate the science, engineering, and technology heritage of ancient and medieval India, highlighting key achievements.	2#	CO5
V	13	Examine ancient practices in metalworking, metal arts, and idol making, focusing on techniques and innovations.	2#	CO5
VI	14	Analyze the historical development of town planning and architecture in ancient India, highlighting key principles.	2#	CO6
VI	15	Explore the basic limbs of Vastu-sastra, focusing on its foundational concepts and applications.	2#	CO6

Note: # Compulsory

COURSE CURRICULUM

Program	:	Diploma in CE/ME/EE/EC/CM/IT/AE/MT/PK/TX/MK/AI
Course Category	:	INP
Course Code	:	IN351H
Course Title	:	Internship (Seminar)

I Rationale:

The internship course is a critical component of the diploma program, providing students with hands-on experience in a real-world industry setting. The internship takes place after the fourth semester during summer vacation and involves working in a small, medium, or large-scale industry related to the student's field of study. The course is designed to bridge the gap between academic learning and industrial application, allowing students to apply theoretical knowledge in a practical environment. For ease, assessment this course is devided into two semester, semimar assessment in fifth semester and report writing in sixth semester.

The seminar presentation component of the internship course enables students to develop and refine their communication skills by presenting their internship experience to peers and faculty. This part of the course focuses on the student's ability to articulate the work they performed, the skills they acquired, and the knowledge they gained during their internship. It also emphasizes the importance of clear and effective communication, which is essential in the professional world.

II Industry Identified Competency:

The Student will be able to do in Industry at entry level:

Bridge theoretical knowledge with practical experience in a professional environment.

III Course Outcomes (COs):

After completing this course students will be able to:

CO1: **Evaluate** the organization's structure, processes, safety protocols, and industry standards to determine operational effectiveness.

CO2: **Apply** industry-specific tools, technologies, and skills to perform various operations.

CO3: **Contribute** to organizational goals by handling projects/ tasks under mentor guidance, applying learned skills.

CO4: **Analyze** technical challenges, addressing industry-specific issues effectively.

CO5: **Create** a structured presentation, ensuring accuracy and clarity.

CO6: **Deliver** presentation using visual aids and effective communication.

IV Learning Scheme:

Classroom Learning (CL)	Tutorial Learning (TL)	Laboratory Learning (LL)	Self-Study Learning (SL)	Notional Learning Hours (NLH)	Credits
-	-	2	10	12	6

V Assessment Scheme:

Classroom Learning				Tutorial/Laboratory Learning				Self-Study Learning	
FA	SA	Total		FA		SA		SA	
Max	Max	Max	Min	Max	Min	Max	Min	Max	Min
-	-	-	-	-	-	25	10	50	20

VI Classroom Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Cognitive Domain)	Topics and Sub-topics	Aligned Cos

VII Laboratory Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Psychomotor Domain)		Hours	Aligned COs
I	1	Learn the organization's structure, operational workflow, safety standards, industry practices, methodologies, technologies, and workplace processes to analyze operational efficiency and compliance requirements.	30#	CO1
II	2	Undergo training on industry-specific tools, technologies, and software, while gaining hands-on experience in performing basic operations, troubleshooting, and maintenance tasks, applying relevant skills to real-world industry scenarios and challenges.	60#	CO2
III	3	Participate in daily operations under mentor guidance, handling assigned projects or tasks aligned with industry needs, applying learned skills to contribute to organizational goals and gaining practical experience in real-world scenarios.	150#	CO3

IV	4	Identify and analyze technical challenges in industry, and address industry-specific issues (if any).	60#	CO4
V	5	Prepare a PowerPoint presentation on internship learnings, create and share a structured seminar outline, review technical documents, and practice presentations with peers to ensure accuracy, relevance, and logical flow.	20#	CO5
VI	6	Design slides with visual aids, practice body language, record and refine voice modulation, participate in mock Question & Answer sessions, and deliver the final presentation incorporating feedback for clarity and engagement.	10#	CO6

Note: # Compulsory. Unit No. I to IV during summer vacation in industry and Unit No. V and VI during Fifth Sem.

VIII Self-Study Learning (SLO in Cognitive/Psychomotor/Affective Domain)

1. During the summer vacations, after the 4th Semester, students are required to undergo internship with industry/ NGO"s/ Government organizations/ Micro/ Small/ Medium enterprises to make ready for the industry.

IX Specification Table for Classroom Learning Assessment:

COURSE CURRICULUM

Program	:	Diploma in ME/EE/EC/IT/MT/TX/AE/PK/CM/MK/AI
Course Category	:	GE
Course Code	:	CE391H
Course Title	:	Building Services

I Rationale:

This Course is designed for other programmes Students under NEP guidelines because it is necessary for the students to understand the basic principles of building services.Building services like water supply, sanitary services, rain water harvesting, elevators and fire protection systems form an essential part of every residential and commercial building. No building can be put into effective use without these services. Also now days the eco friendly design of these systems are on demand. It is necessary for the students to understand the basic principles of building services.

II Industry Identified Competency:

The Student will be able to do in Industry at entry level:

Manage effectively Various building services.

III Course Outcomes (COs):

After completing this course students will be able to:

CO1: **Identify** various types of building services required

CO2: **Design** the various building services like water supply, Building drainage, rain water harvesting.

CO3: **Identify** types of tools and accessories required to design plumbing and sanitary services**.**

CO4: **Identify** various installation services like fire fighting extinguisher, elevators.

CO5: **Evaluate** green building criteria for sustainable building practices

IV Learning Scheme:

Classroom Learning (CL)	Tutorial Learning (TL)	Laboratory Learning (LL)	Self-Study Learning (SL)	Notional Learning Hours (NLH)	Credits
2	-	2	-	4	2

** Online Objetive type

VI Classroom Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Cognitive Domain)		Topics and Sub-topics		Aligned Cos
UNIT I: Introduction to Building Services	1a	Identify given types of building services.	1.1	Definitions of building services, Objective and usesof services, Applications of services for different types building.	CO1
	1b	Select given building services for specific need.	1.2	Classification of building services, Types of services and selection of building services.	
	1c	Compare natural and mechanical ventilation on given points .	1.3	Distinguish natural and mechanical ventilation, Necessity of Ventilation, Types – Natural and Mechanical Factors to be considered in the design.	
	2a	Classify given types of systems.	2.1	Sanitary appurtenances - Classification of fixtures (ablution fixtures and Soil fixtures), bathroom accessories & fitting	

UNIT II: water & waste water	2b	Identify given type of fitting.	2.2	Building Drainage- General principles governing building drainage, Nature of drainage phenomenon, Various plumbing systems (one pipe,two pipe, single stack single tack partially ventilated and hybrid), Capacity and sizing of pipes (primary & secondary braches), Siphonic action & vent piping, Traps for appliances-Bottle trap, Nahani trap, Gulley trap, Air admittance valve, installation of pipes	CO2
	2c	Compare the various water recycling method.	2.3	Recycling of water- need & its usesses & types-storm water, Residential, Industrial & commecial, Grey water.	
	2d	Suggest the use of recycled water.	2.4	Environmental Benefits of recycled water, future of water	
	2e	Justify the concept of Zero Liquid Discharge (ZLD) in industrial plants.	2.5	Recycling of waste water need & uses ZLD – Concept of Zero Liquid Discharge for industrial plant.	
and Communication Services	3a	Identify the design considerations for pipe systems.	3.1	Introduction, Collection of runoff, pipe system, design consideration, Road surface runoff (open drain and close)	CO3
	3b	Identify the given methods of rainwater disposal.	3.2	Disposal of rain water (surface and under ground rainharvesting) - Overview of rainwater management Importance of effective rainwater disposal Design principles for surface rainwater harvesting systemsComponents: collection surfaces, gutters, downspouts, and storage, Maintenance and cleaning of surface systems.	

UNIT III: Rainwater	3c	Identify safety mechanisms commonly used in lifts.	3.3	Construction aspects of Lift, types of lifts, Overview of lift systems and theri importance in building design Basic principles of lift operation.	
	3d	Identify the essential features of a lift.	3.4	Essential features of a Lift (machine room equipment, lift well,lift pit, lift landing door,lift car), Electrical requirements, Preventive maintenance & legal formalities of elevators.	
UNIT IV: Fire Services	4a	Identify the various types of fire fighting system.	4.1	Systems of fire fighting –External (pillar and flush hydrants), Internal (residential and industrial), training topersonnel for service & maintenance and safety measures.	CO4
	4b	Identify the key provisions and updates of the latest.	4.2	Maharashtra fire Prevention and Life Safety Measures Act.	
	4c	Identify the compliance requirements for effective fire safety management.	4.3	Fire Audit -Purpose and importance of fire auditsTypes of fire audits (internal vs. external) , Fire Safety Regulations and Standards - Relevant local and national codes (e.g., NFPA, IS codes) Compliance requirements.	
ination & Ventilation	5a	Interpret the strategies to minimize noise through special treatments.	5.1	Recommendations to minimise noise, special treatments ceiling, wall, floor, sound insulation.	
	5b	Interprete the factors affecting illumination for effective lighting planning.	5.2	Recommended value of illumination, factors affecting illumination- sources of day lighting, siting of buildings, design & planning.	

UNIT V: Acoustics, Illum	5c	Evaluate the concept of green building.	5.3	Green Building- Concept, advantages & comparison of green building with normal building. Green Building Standards and Certifications LEED (Leadership in Energy and Environmental Design). Overview and certification. Acoustics and Noise, lightinging and levels, Key criteria and credits.	CO5

VII Laboratory Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Psychomotor Domain)		Hours	Aligned COs
I	1	Identify the various Building Services required for the given Building.	2	CO1
II	2	Perform tests to check for leaks, water pressure.	2#	CO2
II	3	Design a basic plumbing system of water supply and distribution.	2#	CO2
II	4	Design a simple water supply system for a given building.	2#	CO2
II	5	Conduct Market Survey on varous pipes,pipe fitting & trap & write a report on that.	2#	CO2
III	6	Identify proper location for Lift/Escalator/elevator in commercial Complex.	2#	CO3
III	7	Analyze the Collected samples of storm water, residential grey water samples for various parameterssuch as pH, turbidity.	2#	CO3
III	8	Identify and examine the key components of lift systems, such as the lift car, hoistway, control panel,and drive mechanisms.	2#	CO3
III	9	Prepare Lift Standars as per norms.	2#	CO3
IV	10	Perform routine checks on fire extinguishers.	2#	CO4
IV	11	Perform safety measures associated with fire fighting systems.	2#	CO4
IV	12	Identify the LEED (Leadership in Energy and Environmental Design) certification process and criteria & write a report on it .	2#	CO4
V	13	Identify various methods of minimizing noise through sound insulation treatments for ceilings, walls, and floors & write a report on it .	2	CO5
V	14	Prepare a report of various sound insulation materials available in market.	2#	CO5
V	15	Suggest Noise Control Methods for Commercials.	2#	CO5

Note # Compulsory

COURSE CURRICULUM

Program	:	Diploma in CE/EE/EC/IT/MT/PK/CM/AE/TX/AI/MK
Course Category	:	GE
Course Code	:	ME391H
Course Title	:	Heat Engine Technology

I Rationale:

This course introduces the fundamentals of heat engines, including IC and SI engines, essential across various engineering fields. Students learn to analyze engine performance, aiding in operation, selection, and maintenance of power devices. Applicable in industries like automotive, energy, and manufacturing, this multidisciplinary knowledge supports collaboration among engineers from electrical, civil, and other domains, promoting efficient, sustainable, and practical engineering solutions in real-world applications.

II Industry Identified Competency:

The Student will be able to do in Industry at entry level:

Work with Internal combuction and spark ignition engines.

III Course Outcomes (COs):

After completing this course students will be able to:

CO1: **Identify** I.C. engines and its auxiliaries.

CO2: **Identify** faults of SI Engine and its components and service the engine.

CO3: **Interpret** different system in CI Engine and its faults.

CO4: **Maintain** cooling and lubrication system of I C Engine.

CO5: **Test** the performance of I C Engine.

IV Learning Scheme:

Classroom Learning (CL)	Tutorial Learning (TL)	Laboratory Learning (LL)	Self-Study Learning (SL)	Notional Learning Hours (NLH)	Credits
2	-	2	-	4	2

V Assessment Scheme:

Classroom Learning				Tutorial/Laboratory Learning				Self-Study Learning	
FA	SA	Total		FA		SA		SA	
Max	Max	Max	Min	Max	Min	Max	Min	Max	Min
30	70**	100	40	25	10	25	10	-	-

** Online Objective Type

VI Classroom Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Cognitive Domain)		Topics and Sub-topics		Aligned Cos
UNIT I: Introduction to IC engine	1a	Classify given type of engine depending on various parameters.	1.1	Classification of I.C. engines, Different parts of I.C. engines and their functions.	CO1
	1b	Illustrate applications of given IC engines.	1.2	Applications of I. C. engine, Basic engine terminology: (Bore, stroke, TDC, BDC, Clearance volume, Swept volume, Compression ratio, Piston speed and Cut off ratio).	
	1c	Analyse given thermodynamic power cycle.	1.3	Thermodynamic Power Cycles: Working of 4 stroke engines (Otto cycle, Diesel cycle), PV and TS diagram.	
	1d	Compare applications of 2- stroke SI and CI engine.	1.4	Working of 2-stroke engine, Advantages and Application of 2-stroke SI and CI engine.	
ngine	2a	Analyze the theoretical and actual valve timing diagrams for four-stroke S.I. engines.	2.1	Working and application of Two and Four stroke S.I. engine. Theoretical and Actual Valve timing diagram for four stroke SI engines.	

UNIT II: Spark Ignition Er	2b	Illustrate the concept of Octane Number including Research Octane Number (RON) and Motor Octane Number (MON).	2.2	Combustion in SI engines, Octane Number, Research Octane Number (RON) and Motor Octane Number (MON) Concepts of pre-ignition and detonation.	CO2
	2c	Justify the requirement of different A:F mixture requirement in different condition of running of SI engine.	2.3	Carburetion: Fuel supply system, Function of carburetor, Air-Fuel mixture and fuel requirements of S. I. engines., Concept of Simple carburetor and its drawback.	
UNIT III: Compression Ignition Engine	3a	Draw actual valve timing diagram for low speed 4-stroke diesel engine.	3.1	Working and application of Four stroke C.I. engine. Theoreticall and Actual Valve timing diagram for four stroke CI engines.	CO3
	3b	Identify given fuel injection system in CI engine.	3.2	Fuel injection: Function of fuel injection system, Types of fuel injection systems, CRDI concept, Combustion in CI engines, Importance of Cetane Number.	
	3c	Justify the need of electronic injection system.	3.3	Working of Fuel injector, Fuel pump -Bosch type only, Need of electronic injection system.	
	3d	Differentiate given engines on the basis of given points.	3.4	Comparison between S.I. and C.I. engine. Comparison between two stroke and four stroke engine.	
System	4a	Illustrate the need for cooling in an I.C.engine, including effects of heat on performance.	4.1	Cooling: - Pupose of Cooling of an I. C. engine, Effects of Cooling of IC engine, Types of cooling system and their selection as per the type of engine.	

UNIT IV: Cooling and Lubrication	4b	Compare Cooling systems on various factors.	4.2	Types of Water / liquid cooling (Thermo-syphon and Forced circulation of water), Application and advantages of forced water cooling system. Comparison between water and air cooling. Different types of coolants.	CO4
	4c	Evaluate the applications of splash, pressure, and charge lubrication systems in various engine configurations in automotive engines.	4.3	Need of lubrication in an I.C. engine. Functions of lubrication system. Types of lubrication system and its application, Splash, Pressure and Charge lubrication system, Lubricant additives and their function.	
UNIT V: Testing and Emission control	5a	Calculate IP for given 4-stroke petrol engine data.	5.1	I.C. Engine testing: Need of testing, I.P, B.P, BSFC, ISFC, mean effective pressure, compression ratio. Thermal and mechanical efficiency. Morse test.	CO5
	5b	Analyze the trade-offs between engine performance and emissions control when adjusting air-fuel ratio.	5.2	Types of pollutants in exhaust emissions of petrol and diesel engines, Effects of exhaust pollutants on environment, Effect of air – fuel ratio on exhaust emission.	
	5c	Illustrate the need for continuous improvement in auto industry.	5.3	Need of pollution norms for vehicles, Bharat stage V and VI norms, Table of pollutants emitted from petrol and diesel engines, including carbon monoxide (CO), nitrogen oxides (NOx), hydrocarbons (HC), and particulate matter (PM) for LMV and HMV.	

VII Laboratory Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Psychomotor Domain)		Hours	Aligned COs
I	1	Inspect 2- stroke engine and identify its different parts.	2#	CO1
I	2	Inspect 2-stroke S.I. engine, note down its complete specification.	2#	CO1
I	3	Inspect 4- stroke S.I. engine locate its various parts.	2#	CO1
I	4	Inspect 4- stroke C.I. engine, identify its various parts.	2#	CO1
II	5	Perform basic maintenance tasks on a S.I. engine, such as checking and changing spark plugs, air filter, oil filter and oil.	2#	CO2
II	6	Perform troubleshooting of a carburetor.	2#	CO2
II	7	Service and inspect the given carburetor.	2	CO2
II	8	Test and diagnose ignition system components, such as spark plugs and ignition coils.	2#	CO2
III	9	Troubleshoot common issues related to the operation of a four-stroke CI / SI engine and apply appropriate solutions.	2#	CO3
III	10	Identify and label different types of fuel injection systems installed on CI engines.	2	CO3
IV	11	Inspect components of different types of cooling systems to understand their construction and function.	2#	CO4
IV	12	Identify function and interconnections and also observe the distribution of lubricant to different engine components on working model.	2#	CO4
V	13	Conduct engine tests in a laboratory environment and Identify the importance of engine testing in evaluating and optimizing engine performance and efficiency.	2#	CO5
V	14	Identify types of pollutants emitted from petrol and diesel engines, including carbon monoxide (CO), nitrogen oxides (NOx), hydrocarbons (HC), and particulate matter (PM).	2	CO5
V	15	Examine the evolution of emission standards, such as Bharat Stage V and VI norms, and their role in addressing environmental challenges.	2#	CO5

Note: # Compulsory

XVI List of Major Equipment/Machineries with Specification:

1. Test rig of four stroke petrol/ diesel engine.
2. Test rig on two stage reciprocating air compressor. Pressure and temperature gauges at suitable locations with manometer. Minimum ½ HP compressor
3. Working Model of fuel pump, injector & carburetor.
4. Working Model of S.I. / C.I. engine, Lubrication system and cooling system.
5. Demonstration Model & chart of cooling, lubrication & fuel supply system of I. C. engine
6. Exhaust gas analyzer 3/5 gas analyzer.
7. Single cylinder IC engine suitable for assembly/ dismantling with necessary tool set. (Engine complying latest Euro Norms)
8. Multi cylinder IC engine suitable for assembly/ dismantling with necessary tool set. (Engine complying latest Euro Norms)
9. Test rig on multi cylinder IC engine. 3/5/7 HP petrol engine with required accessories.

COURSE CURRICULUM

Program	:	Diploma in CE/ME/EC/PK/AI/CM/IT/PK/MT/TX/AE
Course Category	:	GE
Course Code	:	EE391H
Course Title	:	Electrical Wiring and Estimation

I Rationale:

This course equips learners with essential skills in wiring and estimation of electrical installation projects. Students will understand basic concept of wiring, Layout, installation plans and calculation of material required also they are aware about current market rates. This course emphasizing hands-on experience and safety standards. It prepares future electrical technicians and supervisors for field demands, ensuring they are well-equipped to execute new installation projects effectively.

II Industry Identified Competency:

The Student will be able to do in Industry at entry level:

Prepare electrical estimates of electrical installations.

III Course Outcomes (COs):

After completing this course students will be able to:

CO1: **Identify** various wiring tools, components and safety devices while undertaking any electrical work.

CO2: **Build** Various Wiring layouts.

CO3: **Prepare** documents of Quotations, Tenders and Contract

CO4: **Estimate** the cost and material required for residential and commercial electrical installation.

CO5: **Estimate** the cost and material required for industrial electrical installation.

IV Learning Scheme:

Classroom Learning (CL)	Tutorial Learning (TL)	Laboratory Learning (LL)	Self-Study Learning (SL)	Notional Learning Hours (NLH)	Credits

**Online Objective Type

VI Classroom Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Cognitive Domain)		Topics and Sub-topics		Aligned Cos
: Wiring tools, components and safety devices	1a	Identify the function of given electrical wiring tools.	1.1	Tools used in Electrical Wiring and its functions:Pliers and its types, Cutter, Screw driver, Tester, Test lamp, Crimping tool, Continuity tester, Electrician knife, Wire Gauge, Insulation remover.	CO1
	1b	Identify the function of given components used in electrical wiring system with their specification.	1.2	Different Components used in wiring systems and its function along with specifications: Various types of switches, Plugs, Sockets, DBs, MCBs, MCCBs, RCCBs, RCBs, Holders, Wires, Cables.	
	1c	Select the given safety accessories used in electrical wiring.	1.3	Significance of Electrical Safety, Electrical Safety Accessories such as Hand gloves, Helmet, Safety Shoes, Goggles, Rubber mats. Various types of fire extinguishing techniques.	

UNIT I	1d	Select the given type of earthing for given installation.	1.4	Earthing: Need of Earthing, Types of earthing such as Rod, Pipe and Plate. Earth resistance values for various installations as per IEEE standards. Measurement of earth resistance by Earth tester.	
UNIT II: Electrical Wiring Circuit system	2a	Identify wires based on colour codes.	2.1	Differentiation between wires and cables based on structure, Flexibility, Durability, Strength, Application and cost. Various sizes of wire and cable according to current carrying capacity. Colour coding of wire and cable in AC & DC system as per IS 732.	CO2
	2b	Identify given types of wiring system.	2.2	Different types of electrical Wiring systems - Surface conduit, concealed conduit, PVC casing capping with their application.	
	2c	Identify the given symbols used in electrical drawing.	2.3	Terminoloigy of electrical wiring drawing: Wiring Layout, Wiring Diagram, Single line diagram and Installation Plan. Different Symbols used in electrical wiring drawing.	
	2d	Implement the different wiring Layout as per the given functional requirements.	2.4	Different wiring Layout: 1. One lamp control from one place. 2. One lamp, one fan & one tube light control from switch on board. 3. Staircase Wiring Layout. 4. Go-down wiring Layout. 5. Bell Circuit. List various components and accessories used in above wiring system.	

UNIT III: Estimate, Contract, Tender and Quatation	3a	Justify the need of given type of estimates.	3.1	Need of estimation, Qualities of good estimator, Essential elements of Estimation. Meaning and purpose of- Rough Estimate, Detailed Estimate, Supplementary Estimate, Annual maintenance Estimate and Revised Estimate. Factors to be considered while preparing estimate.	CO3
	3b	Identify the role and qualities of good contractor.	3.2	Concepts of contract and their types, Contractor and their role, Qualities of good Contractor.	
	3c	Prepare the tender documents for given requirement.	3.3	Concept of Contract and their types, Tender Notice, Preparation of Tender document and method of opening of tender. Concept of Quotation and its different formats. Comparison between Tender and quotation. Comparative statement, format of comparative statement. Order format, Placing of purchasing order. Principles of execution of works, Planning, Organizing and completion of Work. Billing of Work.	
	4a	Interpret given civil engineering building drawing.	4.1	Residential Installation: Necessity and reading of Civil Engineering Building Drawing. General requirements and Inspection of Electrical installation according to IS: 732. Guidelines on design and construction of wiring installations as per part I section 9 of NEC- 2011.	

Γ IV: Residential and Commercial Installation	4b	Compare industrial and non-industrial Installation on the basis of given criteria.	4.2	Compare industrial and non-industrial Installation on the basis of purpose, load capacity, design complexity, voltage level, Safety, wiring system, Equipment & Components, Cost.	
	4c	Estimate material required for given Residential installation on the basis of given data.	4.3	Rules related to lighting load followed in electrical installation: 1. Positioning of equipment- Importance of plan and layouts. 2. Principles of circuit design in Lighting and power circuits- a) Light and fan circuit b) Power circuit. 3. Load calculation and selection of size of conductor- a) Load assessment b) Selection of size of conductor. 4. Selection of rating of main switch and protective switchgear. 5. Calculation of length of wire and other materials. 6. Calculation of labour cost. Sequence to be followed for preparing estimate.	CO4

UNIT	4d	Estimate material required for given Commercial installation.	4.4	1. Design consideration of electrical installation in commercial buildings. 2. Calculate number of luminaries according to recommended values of illumination. 3. Calculate total load, deciding number of sub-circuits, Deciding size and rating of switch board and distribution boards, deciding size of cables. Deciding size of conduits, Bus bar and bus bar chamber. 4. The Mounting arrangement of switch board & distribution board. 5. Calculation of length of wire and other materials. 6. Preparation of material schedule - Calculation of labour cost, Estimation and costing of unit.	
UNIT V: Industrial Installation	5a	Interpret the given electrical Drawing of industrial installation.	5.1	Design consideration of industrial installations. Types of Industrial Installation. General characteristics of industrial building. Selection of wiring system. Drawing of wiring diagram and single line diagram for single phase and three phase motors.	
	5b	Determine the different quantities for given industrial load.	5.2	Calculation of total load, Selection and rating of wire & cable size, main switch, fuses, distribution board, bus-bar, cable route, motor starter, earthing wire & earthing. Calculation of length of wire and other Materials. Preparation of material Schedule, Calculation of labour cost, Estimation and costing of unit.	CO5

5c	Identify the different application of IOT (Internet of things) in Building Installation	5.3	Concept of IOT in electrical installation. The application of IOT in Building Installation: 1. Smart Lighting System 2. Smart heatung , ventilation & air conditioner system. 3. Energy Management System. 4. Smart Security & Surveillance. 5. Smart Parking System.

VII Laboratory Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Psychomotor Domain)		Hours	Aligned COs
I	1	Use different types of wiring tools such as Combination Pliers, Nose Pliers, Cutter, Screwdriver, Continuity tester, Test Lamp, Crimping tools, Electrician tester and knife.	2#	CO1
I	2	Use different types of wiring equipment such as Switches, Sockets, Plugs, DB, MCBs, RCBs, ELCBs, Holders, Wires, and Cables.	2#	CO1
I	3	Identify the use of different electrical accessories such as Hand gloves, Helmet, Boots, Goggles, Rubber mats.	2#	CO1
II	4	Build a circuit to control one lamp from one place and test the wiring for phase control on wiring board.	2#	CO2
II	5	Build a circuit to control two lamps from two places independently on wiring board using conduit wiring.	2#	CO2
II	6	Build a circuit to control one lamp from two place using two way switches on wiring board using casing capping wiring.	2#	CO2
II	7	Build a circuit to control Bell circuit used in residential installation.	2#	CO2
II	8	Prepare a installation plan and layout diagram of one room consist of Light, ceiling fan, socket. (Assume suitable parameters)	2#	CO2
III	9	Prepare a quotation of electrical material required for wiring 1 BHK house.	2#	CO3
III	10	Prepare a contract document for the supply and installation of electrical installation of 1 BHK house.	2#	CO3
IV	11	Estimate the cost of material for a one room residential electrical installation.	2#	CO4
IV	12	Prepare the Bill of material for a small commercial installation (e.g. Book depot / Grossary shop) from installation plan. (Part - I)	2#	CO4
IV	13	Prepare the Bill of material for a small commercial installation (e.g. Book depot / Grossary shop) from installation plan. (Part - II)	2#	CO4
V	14	Prepare the estimate cost of material for a floor mill. (Part - I)	2#	CO5
V	15	Prepare the estimate cost of material for a floor mill. (Part - II)	2#	CO5

Note: # Compulsory

VIII Self-Study Learning (SLO in Cognitive/Psychomotor/Affective Domain)

IX Specification Table for Classroom Learning Assessment:

Unit No.	Units	Classroom Learning Hours	C/O	Levels from Cognition Process Dimension			Total Marks

XVI List of Major Equipment/Machineries with Specification:

1. Crimping Tools: Handheld, suitable for terminal lugs, 0.5mm² to 6mm²
2. Wires and Cables: 1.5mm² to 6mm² copper conductor, PVC-insulated, 90°C-rated.
3. Digital Multimeter AC: 200mV to 750V, DC: 200mV to 1000V, Resistance Measurement: 200Ω to 20MΩ
4. Standard Wire guage Range: SWG 1 to 36
5. Pump: 1.5HP single-phase.
6. Motors: 10HP and 5HP three-phase, starter panels, and cables.
7. Megger 500V, 1000V, 0.01MΩ to 2000MΩ.
8. Earthing: GI earth rod, 1.5m.
9. Wiring Board: Plywood, predrilled for mounting components.
10. Earth Tester- Analog or digital, 0.01Ω to 2000Ω, 20V or 50V

COURSE CURRICULUM

Program	:	Diploma in CE/ME/EE/CM/IT/PK/AI/MT/MC/AE/TX
Course Category	:	GE
Course Code	:	EC391H
Course Title	:	Microcontroller and Applications

I Rationale:

Microcontrollers are essential for embedding intelligence into various devices, offering the ultimate flexibility for controlling and automating tasks. They are used in applications ranging from consumer electronics to industrial systems, enabling precise control, real-time processing, and efficient resource management. This makes them ideal for diverse uses such as home automation, medical devices, and automotive systems.

II Industry Identified Competency:

The Student will be able to do in Industry at entry level:

Develop microcontrollers program for various applications.

III Course Outcomes (COs):

After completing this course students will be able to:

CO1: **Interpret** features of various versions of 8051 microcontrollers.

CO2: **Interpret** features of advance microcontrollers.

CO3: **Design** sketch in Arduino IDE.

CO4: **Design** Arduino based applications.

CO5: **Develop** IoT based System.

IV Learning Scheme:

Classroom Learning (CL)	Tutorial Learning (TL)	Laboratory Learning (LL)	Self-Study Learning (SL)	Notional Learning Hours (NLH)	Credits
2	-	2	-	4	2

V Assessment Scheme:

Classroom Learning				Tutorial/Laboratory Learning				Self-Study Learning	
FA	SA	Total		FA		SA		SA	
Max	Max	Max	Min	Max	Min	Max	Min	Max	Min
30	70**	100	40	25	10	25	10	-	-

**Online Objective Type

VI Classroom Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Cognitive Domain)		Topics and Sub-topics		Aligned Cos
UNIT I: Introduction to Microcontrollers	1a	Identify given elements of Microcomputer.	1.1	Evolution of Microcontrollers, Block diagram of Microcomputer, elements of Microcomputer, types of buses	CO1
	1b	Identify given Architecture on given points.	1.2	Comparison of Microprocessor and Microcontrollers	
	1c	Select versions of Microcontroller for specified application.	1.3	Need of Microcontroller, Family of 8051 Microcontrollers and their specifications, Versions of Microcontroller 89C51, 89C1051, 89C2051, 89C4051	
ed System Basics and Microcontrollers	2a	Identify given Components of Embedded System.	2.1	Introduction to embedded systems, Block diagram of the components of embedded system hardware, Advantages and applications of embedded systems, Difference between Embedded Systems and General computing systems.	CO2

UNIT II: Embedd Advance M	2b	Identify Features of given Advance Microcontrollers.	2.2	Features of 89C51, PIC, AVR, ARM Microcontrollers with their applications. Comparison between 89C51, PIC, AVR and ARM	
	2c	Identify Function of given pins of ATMega328.	2.3	Features of ATMega328 Pin Diagram of ATMega328	
UNIT III: Open Source Development Board (Arduino)	3a	Identify given Components of Arduino UNO R3	3.1	Arduino : Introduction to Open Source Prototype Platform Types of Arduino Boards Features of Arduino UNO R3 Components of Arduino UNO R3 Functions of each Pin of Arduino UNO R3	CO3
	3b	Choose Arduino Variables and Structure.	3.2	Embedded C Programming: Introduction to Arduino Functions(I/O only), Variables(Constants, Data Types only) and Structure	
	3c	Suggest Arduino Sketch of Blinking Inbuild LED	3.3	Installation of Arduino IDE Sketch of Blinking Inbuild LED in Arduino IDE	
UNIT IV: Interfacing of Input and Output Devices with Arduino	4a	Choose Arduino based system with LED, Relay, Switch.	4.1	Interfacing with LED, Interfacing with Relay, Interfacing with Switch.	CO4
	4b	Choose Arduino based system with Seven Segment Display, LCD.	4.2	Interfacing with Seven Segment Display, Interfacing with LCD.	
	4c	Choose Arduino based system with 4x4 Keyboard.	4.3	Interfacing with 4x4 Keyboard.	
	4d	Choose Arduino based system with Stepper Motor.	4.4	Interfacing with Stepper Motor.	
	4e	Choose Arduino based system with IR Sensors, Buzzer.	4.5	Interfacing with IR Sensors, Interfacing with Buzzer.	

UNIT V: Introduction to Internet of Things (IoT)	5a	Interpret Features of IoT.	5.1	Introduction to IoT (Internet of Things): Features of IoT, Advantages and Disadvantages of (IoT), Embedded Devices (System) in (IoT), IoT Architecture Applications of IoT	CO5
	5b	Identify given IoT Devices.	5.2	Introduction of IoT Devices: Major IoT Boards in Market(Raspberry Pi, Arduino, ESP8266, Sense HAT 8x8 RGB LED matrix, Bluetooth Module HC-05	
	5c	Suggest IoT System for Controlling home light using WiFi Node MCU(ESP8266) and Relay module.	5.3	IoT Platforms: ThingWorx, Thingspeak, blynk, Controlling home light using WiFi Node MCU(ESP8266) and Relay module	

VII Laboratory Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Psychomotor Domain)		Hours	Aligned COs
I	1	Interpret Blocks of 89C51 microcontroller using Datasheet.	2	CO1
II	2	Interpret Blocks of ATMega328 microcontroller using Datasheet.	2#	CO2
III	3	Interpret Blocks of Arduino UNO R3 using Datasheet.	2#	CO3
III	4	Install Arduino IDE in Windows OS.	2#	CO3
III	5	Design Arduino Sketch for Blinking Inbuild LED connected to pin 13.	2#	CO3
IV	6	Develop and execute Arduino sketch to read the status of key from port pin and turn ON/OFF a LED connected to another port of Arduino UNO R3.	2#	CO4
IV	7	Design Arduino based system to interface Seven Segment Display with Arduino UNO R3 and display the numeric value 0 to 9.	2#	CO4
IV	8	Design Arduino based system to interface LCD with Arduino UNO R3 and display the string "G. P. Nagpur".	2#	CO4
IV	9	Design Arduino based system to interface 4x4 keyboard with Arduino UNO R3 and display the key pressed.	2	CO4
IV	10	Design Arduino based system to interface stepper motor with Arduino UNO R3 and rotate it in clockwise and anti-clockwise direction.	2#	CO4
IV	11	Design Arduino based system to interface buzzer with Arduino UNO R3.	2#	CO4
IV	12	Design Arduino based system to interface IR sensor module with Arduino UNO R3 and blink led/buzzer on object detection.	2#	CO4
V	13	Interpret Blocks of Raspberry Pi 4 Model using Datasheet.	2	CO5
V	14	Interpret Blocks of Node MCU(ESP8266) using Datasheet.	2#	CO5
V	15	Develop Embedded C Program for IoT System for Controlling home light using WiFi Node MCU(ESP8266) and Relay module.	4#	CO5

Note: # Compulsory

COURSE CURRICULUM

Program	:	Diploma in CE/ME/EE/EC/PK/MT/AE/TX/MK
Course Category	:	GE
Course Code	:	IT391H
Course Title	:	Cyber Security and Privacy

I Rationale:

The rise in internet usage has led to an increase in cybercrimes and illegal activities online. It's crucial to understand various cybercrimes and the importance of cybersecurity to protect personal, governmental, and organizational data and systems. Additionally, understanding cyber laws is essential to address crimes in cyberspace, ensuring legal protection against online fraud, hacking, and other malicious activities. Strong cybersecurity measures and legal frameworks are key to safeguarding the digital world.

II Industry Identified Competency:

The Student will be able to do in Industry at entry level:

Use the techniques of cyber security.

III Course Outcomes (COs):

After completing this course students will be able to:

CO1: **Identify** different types of cyber organized crime

CO2: **Analyze** the planning, risk events and concept of cyber attacks

CO3: **Identify** types of Cybercrimes related with mobile and wireless Devices

CO4: **Analyze** the conceptual foundation of cyber security awareness

CO5: **Identify** importance of Cyber Laws

IV Learning Scheme:

Classroom Learning (CL)	Tutorial Learning (TL)	Laboratory Learning (LL)	Self-Study Learning (SL)	Notional Learning Hours (NLH)	Credits
2	-	2	-	4	2

V Assessment Scheme:

Classroom Learning				Tutorial/Laboratory Learning				Self-Study Learning	
FA	SA	Total		FA		SA		SA	
Max	Max	Max	Min	Max	Min	Max	Min	Max	Min
30	70**	100	40	25	10	25	10	-	-

**Online Objective Type

VI Classroom Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Cognitive Domain)		Topics and Sub-topics		Aligned Cos
UNIT I: Introduction to Cybercrime	1a	Justify given term of cyber crime.	1.1	Cyber Crime: Definitions, An origin of the Word, cybercrime and information security	CO1
	1b	Identify criminals, with given cyber crimes.	1.2	Criminals in cybercrime, Classification of cyber-crimes; cyber defamation, internet time theft	
	1c	Identify a type of cybercrime done in given statements.	1.3	Hacking, online fraud, software piracy, password sniffing, Identity theft	
UNIT II: Planning of Cyber Attacks	2a	Justify given term.	2.1	CIA traid, Data protection, Security terminologies	CO2
	2b	Identify type of cyber-attacks in given scenario.	2.2	Attacks: passive and active attacks, Five phases of hacking:Reconnaissance, scanning, gaining - access, maintaining-access, clearing tracks	
	2c	Select from given statements, that showing cyber stalking.	2.3	cyber stalking: types of stalkers, stalking of cyber stalking, Real life incidents of cyber stalking	

UNIT III: Cybercrime: Mobile/Wireless devices	3a	Identify type/technique used for given cyber crime scenarios.	3.1	Credit card/debit card fraud in mobile and wireless computing era- types and technique of credit card fraud.	CO3
	3b	Justfy given android security.	3.2	Android security: Media player control security, networking API security for mobile devices, hardware and software security.	
	3c	Identify causes for given Cyber attack related with application and software security.	3.3	Applications and software security:Mobile viruses, Securities from mobile computing applications, hacking Bluetooth mobile devices.	
UNIT IV: Cybercrimes and need for Cyber - Security	4a	Analyze givenonline cybercrime.	4.1	Online Scams: Charity scam, lottery Scam, Fake offer/fake job scam	CO4
	4b	Analyse given type of Cyber threats.	4.2	Cyber threats: Types of Cyber threats,The legal Scenario and perspectives - Introduction, cybercrime and the legal base for cybercrime around world, Importance and need cyber laws.	
	4c	Identify given Recovery methodology.	4.3	Data privacy, Back-up and Recovery methodologies	
UNIT V: Cyber Laws and Way forward	5a	Identify importance of given feature of IT Act 2000.	5.1	Cyber laws in INDIA:IT ACT-2000, Positive aspects of IT ACT 2000, Weak areas in IT ACT 2000	CO5
	5b	Analyse Amendmends in IT ACT.	5.2	Amendments In cyber laws:changes made in IT ACT, State Government's power Impacted by amendment in IT ACT	
	5c	Identify required punishment for given Cybercrime.	5.3	Punishment: cybercrime and punishment, Information technology and students (Technology and students: An Indian scenario)	

VII Laboratory Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Psychomotor Domain)		Hours	Aligned COs
I	1	Check the network speed of your internet connection in computer LAB.	2#	CO1
I	2	Enable and disable network also check the data acceptance in network.	2#	CO1
II	3	Tackle and handle externally delivered web-link considering cyber-attack. (http & https)	2#	CO2
II	4	Take back-up and restore data using online platform. (Google drive, etc.)	2#	CO2
II	5	Check and configure IP settings on your PC. (Manual and Automatic).	2#	CO2
III	6	Clear and delete browsing history & unnecessary cache memory on your system.	2#	CO3
III	7	Identify and Configure network settings on your mobile devices.	2	CO3
III	8	Create a standard regulated high security password for social media or any other important transactions platform.	2#	CO3
III	9	Make hardware settings to share data on another device. (e.g:-Whenever connecting a cell phone to PC)	2#	CO3
IV	10	Configure settings related with permissions for downloading foreign applications on your mobile devices.	2#	CO4
IV	11	Perform a secure file sharing between two devices.	2	CO4
IV	12	Identify and configure web application settings for safe browsing.	2#	CO4
IV	13	Identify pattern and configure File sharing using various social media platform on your mobile device	2#	CO4
IV	14	Analyse and install antivirus on your computer system	2	CO4
V	15	Identify suitable cyber law performing stealing of data using file sharing	2#	CO5

Note: # Compulsory

COURSE CURRICULUM

Program	:	Diploma CE/ME/EE/EC/PK/IT/CM/MK/AI/AE/TR/TX
Course Category	:	GE
Course Code	:	MT391H
Course Title	:	Heat Treatment

I Rationale:

Heat treatment is crucial in metallurgical engineering for enhancing material properties such as strength, hardness, and toughness. It allows precise control over microstructures, tailoring materials to specific industrial needs. Understanding heat treatment equips students with essential problem-solving skills, ensuring quality control and effective failure analysis. This knowledge is vital for various industries, including automotive, aerospace, and construction, opening diverse career opportunities. Integrating heat treatment into the diploma curriculum ensures students are well-prepared for the challenges and demands of the metallurgical engineering field.

II Industry Identified Competency:

The Student will be able to do in Industry at entry level:

Carry out different heat treatment processes on steel to obtain desired properties.

III Course Outcomes (COs):

After completing this course students will be able to:

CO1: **Interpret** Fe-Fe3C diagram.

CO2: **Use** TTT Diagrams for different heat treatments.

CO3: **Find** Hardenability of steel using different methods.

CO4: **Recommend** proper heat treatment process to steels for given applications.

CO5: **Select** proper case hardening method for given applications.

IV Learning Scheme:

Classroom Learning (CL)	Tutorial Learning (TL)	Laboratory Learning (LL)	Self-Study Learning (SL)	Notional Learning Hours (NLH)	Credits
2	-	2	-	4	2

V Assessment Scheme:

Classroom Learning				Tutorial/Laboratory Learning				Self-Study Learning	
FA	SA	Total		FA		SA		SA	
Max	Max	Max	Min	Max	Min	Max	Min	Max	Min
30	70**	100	40	25	10	25	10	-	-

**Online Objective Type

VI Classroom Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Cognitive Domain)		Topics and Sub-topics		Aligned Cos
UNIT I: Iron- Carbon Equilibrium Diagram	1a	Identify reactions in Fe-Fe3C Diagram.	1.1	Allotropic transformation of iron, Reactions in Iron- Carbon diagram, various phases in Fe-Fe3C diagram.	CO1
	1b	Choose critical temperatures from Fe-F3C diagram.	1.2	Critical temperatures in Iron-carbon diagram.	
	1c	Classify steel and cast iron based on iron carbon diagram.	1.3	Classifications of plain carbon steel and cast irons with reference to iron carbon diagram.	
	1d	Identify microstructures of different steels and cast irons.	1.4	Microstructure and properties of plain carbon steels and cast iron with reference to iron carbon diagram.	
II: Principles of Heat Treatment	2a	Analyse heat treatment parameters.	2.1	Role and importance of heat treatment in the industry, safety preacutions in heat treatment shop. heat treatment parameters. Heat treatment cycles.	CO2
	2b	Compare different transformation mechanism based on different points.	2.2	Austenitization: mechanism of formation of Austenite, Pearlitic and Martensitic Transformation.	

UNIT I	2c	Use TTT Diagram for heat treatment.	2.3	T.T.T. diagram, construction of T.T.T. diagram from transformation curves, applications of TT Diagram	
UNIT III: Hardenability of steel	3a	Compare hardness with Hardenability based on given points	3.1	Hardenability - Concept of hardenabilty, factors affecting Hardenability. Hardness vs Hardenability.	CO3
	3b	Compare various Hardenability methods based on given points.	3.2	Determination of Hardenability of steel by Grossman method, Jominy end quench test.	
	3c	Select proper quenchants for given heat treatment.	3.3	Quenchant- Severity of quenchant, types and characteristics quenching mediums.	
UNIT IV: Heat treatment Processes	4a	Find heating temperature for various heat treatment processes.	4.1	Heating of steel- Heating time and temperature.	CO4
	4b	Compare different annealing processes on given points.	4.2	Annealing treatments : Purpose of Annealing, full annealing, partial annealing, diffusion annealing, isothermal annealing.Spheroidizing of steel.	
	4c	Identify normalised structure.	4.3	Normalizing – purposes, microstructural changes and its applications.	
	4d	Find hardening temperature for given steel.	4.4	Hardening: - Purpose of hardening selection of hardening temp. - Methods of quenching,Tempering - purpose of tempering - stages in tempering.	
V: Surface Hardening	5a	Compare different case hardeninmg methods.	5.1	Case hardening of steel - carburizing. Nitriding.	CO5
	5b	Select proper case hardening method.	5.2	Surface hardening of steel: Induction hardening - principle, equipments and steels used,Flame hardening- principle, equipments and steels used.	

UNIT	5c	Suggest remedies for different heat treatment defects.	5.3	General Heat Treatment defects, causes and remedies.

VII Laboratory Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Psychomotor Domain)		Hours	Aligned COs
I	1	Perform assignments based on Fe- Fe3c diagram.	2#	CO1
I	2	Carry microstructure analysis of steels and cast irons using Fe-Fe3C diagram.	2#	CO1
I	3	Carry microstructure analysis of steels and cast irons using Fe-Fe3C diagram. (Part II)	2	CO1
III	4	Determine hardenability of steel by Jominy End Quenched test.(Part II)	2#	CO3
III	5	Determine hardenability of steel by Jominy End Quenched test.(Part II)	2#	CO3
IV	6	Perform Annealing on steel. (Part I)	2#	CO4
IV	7	Perform Annealing on steel. (Part II)	2#	CO4
IV	8	Perform Normalizing on steel. (Part I)	2#	CO4
IV	9	Perform Normalizing on steel. (Part II)	2#	CO4
IV	10	Perform Hardening on steel with varying hardening temperatures to analyze effect of temperatures on hardness. (Part I)	2#	CO4
IV	11	Perform Hardening on steel with varying hardening temperatures to analyze effect of temperatures on hardness. (Part II)	2#	CO4
IV	12	Perform tempering on hardened steel at different temperatures. (Part I)	2#	CO4
IV	13	Perform tempering on hardened steel at different temperatures. (Part II)	2	CO4
V	14	Perform any one surface treatment process (carburizing, flame hardening) of steel. (Part I)	2#	CO5
V	15	Perform any one surface treatment process (carburizing, flame hardening) of steel. (Part II)	2	CO5

COURSE CURRICULUM

Program	:	Diploma in CE/ME/EE/EC/IT/MT/PK/CM/AE/AI/MK
Course Category	:	GE
Course Code	:	TX391H
Course Title	:	Garment and Fashion Technology

I Rationale:

This courseis designed for the students of other than Textile Deprtment. The Garment and Fashion Technology course equips students with the skills to design, produce and innovate garments using cutting edge technologies. Students master pattern making garment construction, textile science and fashion entrepreneurship. This fusion of creativity, technical expertise, and industry awareness prepares students for careers in fashion design, product development, and apparel manufacturing, driving innovation, sustainability, and excellence in the global fashion industry.

II Industry Identified Competency:

The Student will be able to do in Industry at entry level:

Manage fashion trends and apply on garments.

III Course Outcomes (COs):

After completing this course students will be able to:

CO1: **Suggest** the theories of fashion.

CO2: **Identify** the factors for clothing selection.

CO3: **Draft** a pattern for a garment.

CO4: **Use** cutting machine to cut the fabric.

CO5: **Use** sewing machine to stitch garment.

IV Learning Scheme:

Classroom Learning (CL)	Tutorial Learning (TL)	Laboratory Learning (LL)	Self-Study Learning (SL)	Notional Learning Hours (NLH)	Credits
2	-	2	-	4	2

V Assessment Scheme:

Classroom Learning				Tutorial/Laboratory Learning				Self-Study Learning	
FA	SA	Total		FA		SA		SA	
Max	Max	Max	Min	Max	Min	Max	Min	Max	Min
30	70**	100	40	25	10	25	10	-	-

**Online Objective Type

VI Classroom Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Cognitive Domain)		Topics and Sub-topics		Aligned Cos
UNIT I: Introduction to Fashion	1a	Select the given fashion terminologies.	1.1	Objective of Fashion. Basic fashion terminologies- Types of Fashion-Classic: Fad, Couture, Haute Couture, Label, Ensemble, Silhouette, Off-the-Rack	CO1
	1b	Identify the factors for given clothing selection	1.2	Fashion StyLe -Casual, Office Wear, Sports Wear, Classic, Exotic, Street, Vintage. Factors affecting textiles and clothing selection. Fashion cycle-Stages of fashion	
UNIT II: Fashion Design- Elements and Principles	2a	Apply elements of fashion design to make given garment.	2.1	Elements of Fashion Design - Line, Form, Shape, Texture and Colour.	CO2
	2b	Select the given principless of fashion.	2.2	Principles of fashion design- Balance, Proportion, Emphasis or Centre of Attraction, Rhythm, Harmony or Unity	

UNIT III: Garment - Marker planning and Pattern drafting	3a	Identify process flow chart for given Garment manufacturing	3.1	Importance of Garment industry. Process flow chart of Garment manufacturing. Principle of Garment Pattern drafting. Rules of Garment Pattern grading	CO3
	3b	Identify the pattern for given garment construction.	3.2	Draw Eight head theory, Planning, drawing and reproducing the marker. Marker planning, Methods of marker planning and Efficiency of marker plan.	
UNIT IV: Spreading and Cutting	4a	Classify the given fabric spreading methods.	4.1	Nature of fabric packages. Objective of spreading, Requirements of Fabric spreading process and methods of spreading	CO4
	4b	Use the given cutting devices.	4.2	Objectives of cutting process. Methods of cutting Manual and computerized. Types of cutting devices Straight knife, Round knie and Band knif.	
UNIT V: Sewing Machines	5a	Identify the given type of seam.	5.1	Objectives of sewing.Types of seams-Class 1: superimposed seam, Class 2: lapped seam, Class 3: bound seam, Class 4: flat seam.	CO5
	5b	Compare the given stitches on the given parameters.	5.2	Stitch types-Class 100 chainstitches, Class 200 hand stitches, Class 300 lockstitches and Class 400 multi-thread chain stitches	
	5c	Use sewing machine to stitch given garment.	5.3	Functions of sewing machine, Types of sewing machine, Parts of sewing machine and feed mechanism of sewing machine.	

VII Laboratory Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Psychomotor Domain)		Hours	Aligned COs
I	1	Draw and describe the different terminolgies of fashion.	02#	CO1
I	2	Draw and describe the different terminologies of fashion.	02#	CO1
I	3	Sketch any two styles of fashion.	02#	CO1
II	4	Sketch the different elements of fashion.	02#	CO2
II	5	Sketch the different principles of fashion design.	02#	CO2
III	6	Draw the flow chart of garment Industry.	02#	CO3
III	7	Draw pattern grading of any garment.	2	CO3
III	8	Use proper marker planning to improve efficiency of marker	2	CO3
IV	9	Use manual spreading technique to spread the fabric roll.	02#	CO4
IV	10	Use straight knife to cut the marked parts of garments.	02#	CO4
IV	11	Use round knife to cut the marked parts of garments.	2	CO4
V	12	Draw different types of seams and also practice on fabric.	02#	CO5
V	13	Draw different types of stitches and also practice on fabric.	02#	CO5
V	14	Use sewing machine to make to stitch the garment.	02#	CO5
V	15	Prepare any microproject based on garment and fashion designing.(Part I)	02#	CO5
V	16	Prepare any microproject based on garment and fashion designing.(Part II)	02#	CO5

Note: # Compulsory

COURSE CURRICULUM

Program	:	Diploma in AE
Course Category	:	GE
Course Code	:	AE391H
Course Title	:	Four Wheeler Technology

I Rationale:

This course is designed for the students who are studying diploma other than Automobile Engineering. This course equips students with a solid foundation in understanding the transformative impact of technology on the automotive sector. This course provides an overview of the four wheeler technology. By exploring recent trends, technological innovations, and emission regulations, students gain a holistic perspective essential for pursuing careers in automotive engineering and related fields. Key technologies covered include Automobile body technology, advancement in IC engines, Electric Vehicles (EVs), HVAC systems, Electronic Stability Control (ESC), Advanced safety and comfort systems along with On Board Diagnosis (OBD).

II Industry Identified Competency:

The Student will be able to do in Industry at entry level:

Apply the Knowledge of advanced technology in four wheelers.

III Course Outcomes (COs):

After completing this course students will be able to:

CO1: **Identify** the Vehicle bodies and select relevant body materials for better performance.

CO2: **Select** suitable advanced engine technology as per the requirements.

CO3: **Select** suitable HVAC systems keeping in mind the environmental and ethical aspects.

CO4: **Identify** the advanced accessories regarding passenger safety and comfort in the given vehicles.

CO5: **Diagnose** problems related with automotive systems and subsystems with the help of OBD.

IV Learning Scheme:

Classroom Learning (CL)	Tutorial Learning (TL)	Laboratory Learning (LL)	Self-Study Learning (SL)	Notional Learning Hours (NLH)	Credits
2	-	2	-	4	2

Max	Max	Max	Min	Max	Min	Max	Min	Max	Min
30	70**	100	40	25	10	25	10	-	-

** Online Objective Type

VI Classroom Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Cognitive Domain)		Topics and Sub-topics		Aligned Cos
UNIT I: Automobile Body Engineering	1a	Identify the body type of given vehicles.	1.1	Introduction to automobile bodies. Definition of body, terminology of a body, specifications of various vehicle body and comparison. Types of bodies and body construction.	CO1
	1b	Suggest the suitable materials for given parts of vehicular body.	1.2	Automobile body materials, fabrication and accidental repairs. Body Accessories and its functions.	
	1c	Justify, the effect of given parameters on performance of vehicle.	1.3	Streamlining shape of a vehicle body and its effects. Resistance faced by the vehicle Air resistance, rolling resistance, gradient resistance and Tractive resistance. Traction and Tractive efforts. Pitching, Bouncing, Rolling, Sway and Yaw.	
	1d	Justify the Protective and anticorrosive treatments of given vehicle with suitable reasons.	1.4	Protective and anticorrosive treatments, painting and repainting procedure.	

UNIT II: Advances in Automobile Engines and Electric Vehicles	2a	Compare MPFI engines with conventional engines on the basis of given parameters.	2.1	MPFI Engines: Drawbacks of Carbureted (SI) engines. Throttle body injection (TBI) and Port fuel injection (PFI) systems. Sensors and Actuators of MPFI engine.	CO2
	2b	Identify the components of given fuel injection system and write their functions.	2.2	CRDI Engines: Features of CRDI Engines, Major Components. Block diagram of CRDI. CRDI System operation and advantages.	
	2c	Justify the effect of given technology on the milage and performance of the engines.	2.3	Variable Geometric Turbocharger (VGT). Variable Valve timing mechanism (VVT). Gasoline Direct Injection (GDI) and Stratified - charge injection.	
	2d	Compare given emission control technology on the basis of given criteria.	2.4	Emission control: Exhaust - Gas recirculation (EGR)- EGR valve and control system. Positive crankcase ventilation (PCV) system. Evaporation emission control system.	
	2e	Compare given types of batteries used in EVs based on given points.	2.5	Electric Vehicles (EVs): Introduction to electric vehicles system, propulsion systems and charging infrastructure. Layout of Electric vehicles. Battery: Types of battery (Lithium ion battery, Battery Characteristics, Battery Management System (BSM)-operation Electric Motor: Types, components, functions and applications.	
Air Conditioning	3a	Justify the environmental and safety aspects of using HVAC system.	3.1	Environmental and safety aspects in car HVAC system. Fundamentals of Refrigeration and air conditioning. Description of vapour compression cycle.	

UNIT III: Car Heating, Ventilation and A (HVAC)	3b	Identify the components of given HVAC systems.	3.2	Components of Car Air Conditioning system. Layout and operation of HVAC. Heating and Ventilation system.	CO3
	3c	Compare the given properties for a given refrigerants.	3.3	Human comfort conditions. Type of refrigerants used in car air conditioning and their properties.	
	3d	Describe thecontrol of temperature and humidity inside the vehicles with justification.	3.4	Refrigerant Charging process for car AC system. Temperature control system, humidity control systems.	
UNIT IV: Advanced Automotive Accessories and Safety Devices	4a	Justify the purpose of given advanced automotive asseccories.	4.1	Purpose and Operation of advanced accessories: Keyless entry system, Common anti-theft system, Automatic door lock system. Park assists system.	CO4
	4b	Distinguish between given navigation systems.	4.2	Automatic headlight dimming. Automatic on/off headlight with time delay. Navigation systems: GPS, GPRS.	
	4c	Compare between different antidazzle devices on the basis of given points.	4.3	Construction and working of Sealed beam headlight. Control of headlight beam, headlight dazzle, Antidazzle devices.	
	4d	Compare between different safety devices on the basis of given points.	4.4	Safety devices – Air Bags, Seat Belt, Central locking, Collapsible steering, ABS and Electronic stability control systems.	
mponents and Systems	5a	Interpret the results of given type of sensor tests.	5.1	Construction, working and Testing of following sensors: Oxygen sensor, Engine coolant sensor, Intake air temperature sensor, Throttle position sensor, Manifold absolute pressure sensor. Vehicle Speed sensor, Mass airflow sensor, Knock sensor, crank shaft position sensor.	

UNIT V: Diagnosis of Automobile Cor	5b	Interpret the results of given type of actuator tests.	5.2	Types of Actuators and functions of actuators. Construction, working and Testing of following actuators: Electronic fuel Injector testing (Sound test, Ohmmeter test only).	CO5
	5c	Interpret 5-digit Diagnostic Trouble Codes (DTCs) as per SAE J2012 standards.	5.3	Onboard diagnosis (OBD): Purpose of onboard diagnostic second generation, Flash codes of Malfunction indicator light, OBD II Concept, SAE J2012 standards Diagnostic Trouble Code (DTC):-5 digits only.	

VII Laboratory Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Psychomotor Domain)		Hours	Aligned COs
I	1	Identify the types of body and Materials used in body for a given vehicles.	2#	CO1
I	2	Identify the various suspension irregularities in the given vehicles. Suggest suitable remedies for them.	2#	CO1
II	3	Identify the components of MPFI engines and write their applications.	2#	CO2
II	4	Identify the components of CRDI engines and write their applications.	2	CO2
II	5	Identify the aggregates of EV, Draw layout of EV chassis, Record benefits of EV chassis as compared to chassis with I.C. engine.	2#	CO2
II	6	Perform multimter test on EV Components and interpret the results.	2#	CO2
III	7	Identify the components of HVAC systems. Draw the layout of HVAC system through observations.	2#	CO3
III	8	Measure the various temperatures of Car HVAC system and interpret the results.	2#	CO3
IV	9	Identify the various advanced accessories in the given vehicles and demonstrate their working.	2#	CO4
IV	10	Perform the operation of headlights and other accessories system for a given vehicle.	2#	CO4
IV	11	Identify the various safety devices used in given vehicles. Observe their working and correlate their applications.	2#	CO4
V	12	Identify the given sensors and actuators and write their applications.	2	CO5
V	13	Perform the multimeter test on given sensors and interpret the results.	2#	CO5
V	14	Perform the multimeter test on given actuators and interpret the results.	2#	CO5

Note: # Compulsory

COURSE CURRICULUM

Program	:	Diploma in CE/ME/EE/EC/IT/MT/TX/AE/CM/MK/AI
Course Category	:	GE
Course Code	:	PK391H
Course Title	:	Injection Moulding & Blow Moulding

I Rationale:

This course introduces the fundamentals of injection and extrusion blow moulding with emphasis on packaging applications. It aims to provide cross-disciplinary knowledge to students from various engineering backgrounds. The course covers basic machine operations, mould design, materials, and product applications. Learners will understand the relevance of these processes in packaging and general manufacturing. It enhances technical awareness and supports skill development in polymer-based production methods.

II Industry Identified Competency:

The Student will be able to do in Industry at entry level:

Apply injection and extrusion blow moulding processes for manufacturing packaging components using appropriate materials, machinery, and quality control practices.

III Course Outcomes (COs):

After completing this course students will be able to:

CO1: **Identify** and handle the feeding, motor, and drive systems of an injection moulding machine.

CO2: **Demonstrate** the barrel heating zones, clamping mechanism, and simulate the injection cycle.

CO3: **Observe** the cooling and ejection system and inspect injection moulded parts for defects.

CO4: **Identify** components of an extrusion blow moulding machine and simulate parison formation.

CO5: **Examine** blow mould cavities and demonstrate cooling and trimming procedures using samples. Evaluate blow moulded products for defects and differentiate design features based on application.

IV Learning Scheme:

Classroom Learning (CL)	Tutorial Learning (TL)	Laboratory Learning (LL)	Self-Study Learning (SL)	Notional Learning Hours (NLH)	Credits
2	-	2	-	4	2

V Assessment Scheme:

Classroom Learning				Tutorial/Laboratory Learning				Self-Study Learning

Max	Max	Max	Min	Max	Min	Max	Min	Max	Min
30	70**	100	40	25	10	25	10	-	-

** Online Objective Type

VI Classroom Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Cognitive Domain)		Topics and Sub-topics		Aligned Cos
UNIT I: Fundamentals of Injection Moulding	1a	Justify the importance of injection molding in packaging.	1.1	Introduction and outline of the injection molding process.	CO1
	1b	Illustrate the principle of injection molding for packaging use.	1.2	Principle of injection molding and packaging-specific applications.	
	1c	Differentiate types of injection molding machines by design and application.	1.3	Types and constructional features of injection molding machines.	
	1d	Describe with justification the roles of main machine parts.	1.4	Main parts of the injection molding machine and their roles.	
	1e	Compare screw and plunger feed systems.	1.5	Barrel construction and material feed mechanisms (screw, plunger types).	

UNIT II: Mould Design and Injection Moulding Operation	2a	Illustrate core and cavity construction in mold design.	2.1	Mould design basics, core and cavity construction.	CO2
	2b	Differentiate runner systems and gate types with justification.	2.2	Runner system, mold venting, and gate types.	
	2c	Justify factors affecting shrinkage in molded parts.	2.3	Shrinkages in molded parts and factors affecting it	
	2d	Compare mold heating and cooling systems for performance.	2.4	Mould heating and cooling systems – types and functions.	
	2e	Illustrate ejection systems and their impact on cycle time.	2.5	Part ejection systems and cycle time optimization.	
UNIT III: Process Control, Applications & Defects in Injection Moulding	3a	Illustrate the full injection molding cycle with control points.	3.1	Complete process cycle and operation control.	CO3
	3b	Justify common packaging uses of injection molding.	3.2	Applications in packaging – caps, closures, containers, etc.	
	3c	Compare molding materials based on properties and use.	3.3	Types of materials used for packaging injection molding.	
	3d	Identify and justify causes of common molding defects.	3.4	Common injection molding defects (e.g., sink marks, short shot, flash)	
	3e	Justify corrective actions for injection molding issues.	3.5	Troubleshooting and corrective measures in molding.	
UNIT IV: Basics of Extrusion Blow Moulding	4a	Justify the role of blow molding in packaging.	4.1	Introduction to blow molding and packaging relevance.	CO4
	4b	Differentiate blow molding types by principle and use.	4.2	Principle and classification (extrusion blow, injection blow, stretch blow)	
	4c	Illustrate extrusion blow molding machine construction.	4.3	Construction and working of extrusion blow molding machine.	
	4d	Justify parison formation and extrusion head design.	4.4	Parison formation and extrusion head design.	
	4e	Compare materials used in blow molded packaging.	4.5	Material selection for extrusion blow molded packaging.	

UNIT V: Blow Moulding Operations	5a	Illustrate key features of blow mold design.	5.1	Blow mold design: cavity, neck finish, and parting lines, Clamping unit, inflation system, and cooling cycle.	CO5
	5b	Justify blow molding steps and wall thickness control.	5.2	Deflashing and trimming methods, Wall thickness control methods (parison programming), Process cycle – step-by-step working of extrusion blow molding.	
	5c	Illustrate applications and trends in blow molded packaging.	5.3	Packaging applications – bottles, jars, containers. Types of blow molded products and market trends.	
	5d	Identify and justify causes of blow molding defects.	5.4	Common defects – uneven wall thickness, flash, air entrapment.	
	5e	Justify quality control and innovations in blow molding.	5.5	Quality control in blow molded packaging. Innovations – multilayer blow molding, in-mold labeling, sustainability aspects.	

VII Laboratory Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Psychomotor Domain)		Hours	Aligned COs
I	1	Operate and Examine the Material Feeding System of an Injection Moulding Machine: Operate hopper and feeding zones. Identify granule flow, feeding mechanisms, and control settings.	2#	CO1
I	2	Identify and Analyze the Motor and Drive System Functionality: Trace electric/hydraulic drives. Observe screw rotation and injection control in operation.	2#	CO1
I	3	Observe and Record the Temperature Control Across Barrel Heating Zones: Inspect barrel sections. Measure set vs. actual temperatures and note heater arrangements.	2#	CO1
II	4	Demonstrate the Mould Clamping and Die Movement Process: Activate the clamping system. Observe toggle/hydraulic locking and safety interlocks.	2#	CO2
II	5	Perform Observation of Injection and Product Formation Cycle: Track plasticization, injection, mold filling, and part formation. Record parameters.	2	CO2
III	6	Monitor Cooling System Performance During the Moulding Cycle: Identify cooling channel layout. Measure cycle cooling time and coolant temperature.	2	CO3
III	7	Observe and Interpret the Ejection Mechanism Used for Part Removal: Inspect ejector pins, sleeves, or air systems. Monitor timing, part release, and safety.	2#	CO3
IV	8	Identify and Sketch Key Units of an Extrusion Blow Moulding Machine: Inspect and draw layout including extruder, die head, mold clamp and blowing station.	2#	CO4
IV	9	Monitor and Describe Parison Formation and Thickness Profile: Observe parison drop. Measure variation and note influence of temperature or flow.	2#	CO4
IV	10	Disassemble and Examine a Blow Mould for Neck and Cavity Design: Handle mould halves. Measure cavity shape and neck finish dimensions.	2#	CO4

IV	11	Operate and Study the Air Blowing and Cooling Cycle: Run or simulate blowing. Record pressure, cycle timing, and cooling phase.	2#	CO4
V	12	Observe and Record Trimming and Deflashing Operations: Handle post-processed parts. Identify flash areas, trimming tools, and defects.	2#	CO5
V	13	Inspect and Categorize Defects in Blow Moulded Products: Study defect samples. Classify based on appearance and identify probable causes.	2#	CO5
V	14	Collect and Compare Blow Moulded Packaging Applications: Gather different products. Identify materials used and packaging functions.	2#	CO5
V	15	Examine and Compare Mono-layer and Multi-layer Blow Bottles: Dissect and analyze sample bottles. Identify barrier layers and their functions.	2	CO5

COURSE CURRICULUM

Program	:	Diploma in CE/ME/EE/EC/MC/MT/PK/TX/AE
Course Category	:	GE
Course Code	:	CM391H
Course Title	:	Digital Marketing

I Rationale:

Digital marketing offers unparalleled opportunities for businesses to grow and succeed in the modern marketplace. Its ability to reach a wide audience, cost-effectiveness, and the potential for high engagement and measurable results make it an indispensable tool for any business looking to thrive in the digital age.

II Industry Identified Competency:

The Student will be able to do in Industry at entry level:

Use ethical and legal standards in computer engineering for digital marketing

III Course Outcomes (COs):

After completing this course students will be able to:

CO1: **Explore** scope & necessity of digital marketing for various applications.

CO2: **Interpret** role of segmentation, Targeting and Positioning (STP) in digital marketing.

CO3: **Use** of Search Engine Optimization (SEO) for carrying out digital marketing.

CO4: **Analyze** Search engine marketing in context of digital marketing.

CO5: **Design** digital media campaign using appropriate mix of Face book and Twitter.

CO6: **Use** Web Analytic tool for different application.

IV Learning Scheme:

Classroom Learning (CL)	Tutorial Learning (TL)	Laboratory Learning (LL)	Self-Study Learning (SL)	Notional Learning Hours (NLH)	Credits

VI Classroom Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Cognitive Domain)		Topics and Sub-topics		Aligned Cos
UNIT I: Introduction to Digital Marketing	1a	Identify the given marketing.	1.1	Evaluation of digital marketing: from traditional to modern marketing, premise of traditional marketing, Factors Impacting the Shift from Traditional to Modern Marketing, Advent of Modern Marketing Techniques	CO1
	1b	Select appropriate type of E-concept.	1.2	Growth of 'E' Concepts: from E-Business to Advanced E-Commerce, Understanding E-Models, difference between E-Business & E-commerce.	
	1c	Choose proper type of marketing strategy forthe given scenario.	1.3	Digital Marketing: an Introduction, Emergence of Digital Marketing as a Tool, Pull and Push Marketing, digital Marketing Applications and Benefits.	
	2a	Justify the need of segmentation	2.1	Segmentation: Concept , need and benefits of segmentation.	

UNIT II:Digital Marketing techniques	2b	Classify the given types of segmentation on the given criteria	2.2	Criteria for segmenting digital Audience-geographic, demographic, psychographic behavioral segmentation.	CO2
	2c	Choose the given marketing strategy based on condition	2.3	Targeting definition, Various target marketing strategies: mass marketing, segment marketing, niche marketing, micro marketing ,local marketing.	
	2d	Choose the use of Positioning in marketing context .	2.4	Positioning: definition of positioning in marketing, Types of positioning in marketing: pricing, quality, differentiation, convenience, customer service, user group.	
	2e	Identify the benefits of positioning.	2.5	Benefits of positioning in marketing: Create a strong competitive position, improve sales, define a target market, make more effective decisions, and connect to customer need.	
UNIT III: Search Engine Optimization (SEO)	3a	Select given terms related to SEO.	3.1	Introduction to SEO concept and role in digital marketing Understanding search engine optimization , common SEO techniques , content creation as SEO technique, SEO as marketing strategy	CO3
	3b	Select the given suitable method for given web page analysis in SEO.	3.2	Understanding search engine: search engine working, interaction of people with search engine,search engine marketing: keyword analysis,site popularity,web analytic & HTML tools, sponsored results.	
	3c	Choose proper tags in Search Engine Design in given example.	3.3	Search engine site design & development: indexablecontent, title tags, meta tags, link structure, Nofollow links, keyword usage, URL structure	

UNIT IV: Search Engine Marketing (SEM)	4a	Identify given terminologies in Social Media Marketing for given problem statement	4.1	Search Engine Marketing: concept of search engine marketing, terminology associated to SEM, Pay per click(PPC), Cost per click(CPC),Search engine result Page(SERP), Cost per mile(CPM), Landing page, SEO Vs PPC, Pay per click	CO4
	4b	Choose the given type of advertising tool for given product	4.2	Search engine advertising: Google Adwords, Bing Ads, Google search, google partners, google display network, campaign subtypes, specialized compaign subtypes: dynamic search ads, mobile apps, remarketing, engagement	
	4c	Select the steps for creating given adword account.	4.3	Google Adwords account setting: account access, linked accounts, notification setting, preferences Google AdWord account structure: Account, campaign ,Ad group	
	4d	Choose the use of given tool based on the problem statement.	4.4	Google Analytic: concept of Google Analytic, need of Google Analytic, how to set up a free Googleaccount,	
UNIT V: Social Media Marketing (SMM)	5a	Identify the difference for given social media websites on the given points.	5.1	Introduction to Social Media marketing, types of social media websites, mobile social media	CO5
	5b	Select steps for creating given page	5.2	Facebook : creating a facebook page, creating a facebook group	
	5c	Choose the proper terms used in twitter advertising .	5.3	Twitter Advertising: Use hashtags, retweet ,follow and get followed, Linkedln	
	5d	Choose the concept of Blogging for given senario.	5.4	Blogging: Types of blogs, blogging platforms, blogging recommendations, advertising on facebook, advertising on youtube	

VII Laboratory Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Psychomotor Domain)		Hours	Aligned COs
II	1	Prepare a report of a sample website with strategic flow for e-commerce/publication etc. with the use of: HTML,CSS,Javascript	02#	CO2
II	2	Apply role of STP for marketing of any product and prepare a detail report on it.	02#	CO2
III	3	Create account on Google Analytics or any other analytics tool	02#	CO3
III	4	Create the tracking id for web site and track links using Google Analytics tool	02#	CO3
III	6	Analyze web site traffic and leads using Analytics tool	02#	CO3
III	7	Prepare report on Search Engine Optimization(SEO) using Digital Marketing Platform	02#	CO3
IV	8	Demonstrate and install any Google Analytics plug-in for the website	02#	CO4
V	9	Use marketing features of any social media websites (eg. Facebook, Instagram .etc)	02#	CO5
V	10	Implement following using Google Analytics: Content Marketing and Website content optimization.	02#	CO5
V	11	Generate different type of reports through Google Analytic	02#	CO5
V	12	Analyze data using Google Analytics	02#	CO5

Note: # Compulsory

COURSE CURRICULUM

Program	:	Diploma in CE/ME/EE/EC/CM/IT/PK/AI/MT/AE/TX
Course Category	:	GE
Course Code	:	MK391H
Course Title	:	Automotive Mechatronics

I Rationale:

This Generic Elective course is designed to introduce students from other branches to modern vehicle automation and electronic control systems. It covers fundamentals such as ECUs, sensors, actuators, transmission control, vehicle diagnostics, and emerging technologies like Drive-by-Wire and wireless communication protocols. The course enhances understanding of smart automotive systems, encouraging interdisciplinary learning and innovation in automation, essential for adapting to the evolving automotive industry and smart mobility solutions.

II Industry Identified Competency:

The Student will be able to do in Industry at entry level:

Apply knowledge of electronic control systems to analyze modern vehicle automation and diagnostic technologies.

III Course Outcomes (COs):

After completing this course students will be able to:

CO1: **Identify** potential areas and recent technology of vehicular communication system.

CO2: **Classify** various types of sensors and actuators for automotive industry.

CO3: **Select** requirment of vehicular networking.

CO4: **Select** suitable various electronics accessories.

CO5: **Classify** the various type of electronically operated system.

IV Learning Scheme:

Classroom Learning (CL)	Tutorial Learning (TL)	Laboratory Learning (LL)	Self-Study Learning (SL)	Notional Learning Hours (NLH)	Credits
2	-	2	-	4	2

V Assessment Scheme:

Classroom Learning				Tutorial/Laboratory Learning				Self-Study Learning	
FA	SA	Total		FA		SA		SA	
Max	Max	Max	Min	Max	Min	Max	Min	Max	Min
30	70**	100	40	25	10	25	10	-	-

**Online Objective Type

VI Classroom Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Cognitive Domain)		Topics and Sub-topics		Aligned Cos
UNIT I: Vehicular Applications	1a	Select the given electronic system for vehicular for specific application.	1.1	Electronic control unit (ECUs), ECU for fuel injector system.	CO1
	1b	Identify the given types of electronics control unit.	1.2	Engine system self – Diagnostics (On-Board Diagnostic) and EOBD.	
UNIT II: Sensors and Actuators	2a	Select the given types of sensors and actuator used in automotive industry.	2.1	Different types of Sensor and Actuator, example of various types of sensors.	CO2
	2b	Identify the given actuators used in industry.	2.2	Actuators: producing movement and other functions, Examples of different types of actuators, Electronics Control Unit (ECU) /actuator control signals.	

UNIT III: Driveline Infrotronic	3a	Select the given electronic system for driveline for specific application.	3.1	Selection of electronic system for driveline for specific application.	CO3
	3b	Identify the given types of transmission control systems.	3.2	Transmission control as a black box, Sensors and actuators used in transmission systems, Clutch electronic control.	
	3c	Select give types of hybrid vehicle.	3.3	Light hybrid power train, Technology: starter and generator. Electronic differential and four-wheel drive control.	
UNIT IV: Vehicle Networks and Data Exchange	4a	Select the various mode of vehicular communications.	4.1	Potential Wireless, Technologie ZigBee, UWB (ultra wideband), Bluetooth Wireless USB (Universal Serial Port) Wireless CAN.	CO4
UNIT V: Drive by wire System	5a	Identify the various component used in the drive by wire systems.	5.1	Introduction: Drive by Wire Systems, Current State of the art Advantages of drive by wire system.	CO5
	5b	Comapre given types of throttle wire systems.	5.2	Throttle By Wire Systems. Brake by wire system, electro-hyudraulic (EH). Electromechanical (EMg), Steer by wire system and safety monitoring/	

VII Laboratory Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Psychomotor Domain)		Hours	Aligned COs
I	1	Identify the variuos components of Electronics Control Unit (ECU)	2#	CO1
II	2	Identify colour coading of wires used for sensor connection.	2#	CO2
II	3	Identify various types of sensor used in automation industry.	2#	CO1
II	4	Identify colour coading of wires used for actuator connection.	2#	CO2
II	5	Identify various types of actuators used in automation industry.	2#	CO2
III	6	Prepare report on infotraonic vehicular system by visiting mechatronics industry. (Part I)	2#	CO3
III	7	Prepare report on infotraonic vehicular system by visiting mechatronics industry. (Part II)	2#	CO3
III	8	Prepare report on infotraonic vehicular system by visiting mechatronics industry. (Part III)	2	CO3
IV	9	Prepare report on application and use of various networking technologies and its interfacing with vehicle by visit. (Part I)	2#	CO4
IV	10	Prepare report on application and use of various networking technologies and its interfacing with vehicle by visit. (Part II)	2#	CO4
IV	11	Prepare report on application and use of various networking technologies and its interfacing with vehicle by visit. (Part III)	2	CO4
V	12	Identify various types of electronics cluches.	2#	CO5
V	13	Identify various types of electromechanical, Electo-hydraulic, electromagnetic cluches.	2#	CO5
V	14	Assemble and disassemble elecromechanical clutch.	2#	CO5
V	15	Assemble and disassemble electromagnetic clutch.	2	CO5

Note: # Compulsory

COURSE CURRICULUM

Program	:	DIPLOMA IN CE/ME/EE/EC/AE/MT/PK/TX/MK
Course Category	:	GE
Course Code	:	AI391H
Course Title	:	Machine Learning

I Rationale:

Machine Learning is a field within Artificial Intelligence in Computer Science that focuses on developing algorithms that mimic human learning processes. By leveraging statistical techniques, these algorithms are trained to make predictions based on data, enhancing the accuracy of software applications without requiring explicit programming for each task. Machine learning is a crucial skill in Data Science, enabling data scientists to harness historical data to predict outcomes. These predictions provide valuable insights that help businesses make informed decisions.

II Industry Identified Competency:

The Student will be able to do in Industry at entry level:

Comprehend the knowledge of the foundational concepts of AI.

III Course Outcomes (COs):

After completing this course students will be able to:

CO1: **Identify** uses and applications of machine learning in real life.

CO2: **Implement** preprocessing steps on data to make it ready for analysis.

CO3: **Apply** classification algorithms and regression algorithms for predictive analysis

CO4: **Implement** clustering algorithms on data models and build them.

CO5: **Use** the concepts of ML in IoT.

IV Learning Scheme:

Classroom Learning (CL)	Tutorial Learning (TL)	Laboratory Learning (LL)	Self-Study Learning (SL)	Notional Learning Hours (NLH)	Credits
2	-	2	-	4	2

V Assessment Scheme:

Classroom Learning				Tutorial/Laboratory Learning				Self-Study Learning	
FA	SA	Total		FA		SA		SA	
Max	Max	Max	Min	Max	Min	Max	Min	Max	Min
30	70**	100	40	25	10	25	10	-	-

**Online Objective Type

VI Classroom Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Cognitive Domain)		Topics and Sub-topics		Aligned Cos
UNIT I: Introduction to Machine Learning	1a	Compare the given types of machine learning on given points.	1.1	Introduction to Machine Learning. Overview and History.	CO1
	1b	Compare the various types of Ml based on the given points.	1.2	Types of Machine Learning: Supervised, Unsupervised, Reinforcement Learning.	
	1c	Compare Training and Testing on the basis of given points.	1.3	Features, Labels, Training, Testing.Applications of ML.	
a and Datasets	2a	Distinguish between the various types of data based on given points.	2.1	Understanding Datasets: Types of Data, Cleaning Data, Handling Missing Values.	CO2
	2b	Select a suitable model for the given data with justification.	2.2	Feature Scaling and Normalization.	

UNIT II: Dat	2c	Analyse the process of feature extraction and engineering on the given data.	2.3	Encoding Categorical Data.	
	2d	Identify the criteria on which data splitting is based.	2.4	Splitting Data into Training and Testing Sets.	
UNIT III: Supervised Learning	3a	Choose supervised learning model for the given situation with justification.	3.1	Introduction to Supervised Learning.	CO3
	3b	Compare given regression algorithms on the basis of given points.	3.2	Regression Algorithms: Linear Regression, Polynomial Regression.	
	3c	Select a suitable algorithm for classifying the given data.	3.3	Classification Algorithms: K-Nearest Neighbors (KNN).	
UNIT IV: Unsupervised Learning	4a	Analyse unsupervised learning concept by considering the given real life situation.	4.1	Introduction to Unsupervised Learning.	CO4
	4b	Compare given types of learning based on the given criteria.	4.2	Clustering Algorithms: K-Means, Hierarchical Clustering.	
UNIT V: Role of ML in IoT	5a	State the applications of IoT.	5.1	Internet of Things, It's applications	CO5
	5b	Distinguish between the various activities carried out in ML and IoT on the basis of given points.	5.2	Working of IoT and ML.	
	5c	Select type of algorithm for the given situation.	5.3	Role of Machine Learning for IoT. Data Analysis Automation by Machine Learning, The Predictive Power of Machine Learning.	

VII Laboratory Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Psychomotor Domain)		Hours	Aligned COs
I	1	Use Python Basic Libraries such as Statistics, Math, Numpy and Scipy a) Usage of methods such as floor(), ceil(), sqrt(), isqrt(), gcd() etc.b) Usage of attributes of array such as ndim, shape, size, methods such as sum(), mean(), sort(), sin() etc. c) Usage of methods such as det(), eig() etc. d) Consider a list datatype (1D) then reshape it into 2D, 3D matrix using numpy e) Generate random matrices using numpy f) Find the determinant of a matrix using scipy. Find eigenvalue and eigenvector of a matrix using scipy	2#	CO1
II	2	Develop basic Python scripts, understanding data types, loops, functions, and libraries like NumPy, Pandas, and Matplotlib.	2#	CO2
II	3	Implement the following actions of Creating and Loading different types of datasets in Python using the required libraries. a) Creation using panda b) Loading CSV dataset files using Pandas c) Loading datasets using sklearn	2#	CO2
II	4	Develop a python program to compute Mean, Median, Mode, Variance, Standard Deviation using Datasets	2#	CO2
II	5	Execute various data pre-processing techniques for a given dataset. Develop a python program to compute a) Reshaping the data, b) Filtering the data,c) Merging the data, d) Handling the missing values in datasets , e) Feature Normalization: Min-max normalization	2#	CO2
III	6	Implement simple linear regression, train the model, and evaluate using Mean Squared Error (MSE).	2#	CO3
III	7	Implement the Multiple Regression for iris dataset.	2#	CO3
III	8	Implement KNN Classification model for a given dataset. Vary the number of k values and compare the results.	2#	CO3
IV	9	Develop a python program to implement K-Means clustering Algorithm. Vary the number of k values and compare the results.	2#	CO4

V	10	Implement a IoT based ML model using libraries like TensorFlow or Keras, understanding layers, activation functions, and backpropagation.	2#	CO5
V	11	Develop a mini project using IoT and ML for the medical application	2#	CO5
V	12	Execute the following - Choose a dataset, define a problem statement, apply machine learning algorithms, evaluate the models, and present findings.	2#	CO5
V	13	Implement an End-to-end machine learning project including data collection, preprocessing, model building, evaluation, and deployment.	2	CO5
V	14	Develop a mini project using IoT and ML for the commercial l application	2	CO5
V	15	Develop a mini project using IoT and ML for the Library application	2	CO5

Note: # Compulsory

COURSE CURRICULUM

Program	:	Diploma in CE/ME/EE/EC/IT/CM/PK/MT/AE/AI/MK/TX
Course Category	:	GE
Course Code	:	TR391H
Course Title	:	Tourism Resources of India

I Rationale:

This multidisciplinary course introduces students to India's adventure tourism potential, popular destinations, and activities. It promotes awareness of sustainability, safety, and environmental responsibility. Aligned with NEP 2020, the course develops transferable skills like strategic thinking, and risk assessment. It is relevant for students across disciplines such as environmental studies, sports, and highlights challenges and strategies in adventure tourism development.

II Industry Identified Competency:

The Student will be able to do in Industry at entry level:

Plan and conduct safe, equipment-based adventure tourism activities.

III Course Outcomes (COs):

After completing this course students will be able to:

CO1: **Identify** tourism resources in India.

CO2: **Select** suitable topography and equipment for land based adventure tourism.

CO3: **Select** suitable equipment for water based adventure tourism cosidering physical fitness and safety measures required.

CO4: **Select** suitable equipment for air based adventure tourism cosidering physical fitness and safety measures required.

CO5: **Identify** various Artificial Advature activities.

IV Learning Scheme:

Classroom Learning (CL)	Tutorial Learning (TL)	Laboratory Learning (LL)	Self-Study Learning (SL)	Notional Learning Hours (NLH)	Credits
2	-	2	-	4	2

V Assessment Scheme:

Classroom Learning				Tutorial/Laboratory Learning				Self-Study Learning	
FA	SA	Total		FA		SA		SA	
Max	Max	Max	Min	Max	Min	Max	Min	Max	Min
30	70**	100	40	25	10	25	10	25	10

**Online Objective Type

VI Classroom Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Cognitive Domain)		Topics and Sub-topics		Aligned Cos
UNIT I: Introduction	1a	Classify to various tourism resources in India.	1.1	Indroduction to various tourism resources: Natural resources, Cultural resources.	CO1
	1b	Identify given Natural resources in India.	1.2	Natural resources: National park, Beaches, GHill stations, Water fall, Mountains	
	1c	Identify given cultural resources in India.	1.3	Cultural Resources: Historical Monuments, Temples and Pligimage sites, Festivals and Celebrations.	
UNIT II: Land Based Activities	2a	Identify major land-based adventure activities and their suitable destinations in India.	2.1	Mountaineering, Trekking, Rock Climbing, Skiing. Preferable destinations for adventure activities in India.	CO2
	2b	Identify essential equipment for land based adventure activities and relate them to tourist fitness requirements.	2.2	Necessary equipment for adventure activities. Energy level and physical fitness of Tourist.	
	2c	Apply appropriate safety measures and assess dos and don'ts in land-based adventure activities.	2.3	Dos and don'ts for tourists while undergoing adventure activities. Safety measures for land-based adventure sports.	

UNIT III: Water Based Activities	3a	Identify major water-based adventure activities and their suitable destinations in India.	3.1	Rafting, Kayaking, Canoeing, Yachting, Water Scooter, Hovercraft, Surfing, Scuba diving. Water Resources of India – Rivers, Seas and Lakes. Preferable destinations for adventure activities in India.	CO3
	3b	Identify essential equipment for water-based adventure activities and relate them to tourist fitness requirements.	3.2	Necessary equipment for Water Based adventure Activities. Energy level and physical fitness of Tourist.	
	3c	Apply appropriate safety measures and assess dos and don'ts in water-based adventure activities.	3.3	Dos and don'ts for tourists while undergoing Water Based adventure activities. Safety measures for water based adventure sports.	
UNIT IV: Air Based Activities	4a	Identify major air-based adventure activities and their suitable destinations in India.	4.1	Hang gliding, Hot Ballooning, Para Jumping, Parasailing, Sky diving. Preferable destinations for air based adventure activities in India.	CO4
	4b	Identify essential equipment for air-based adventure activities and relate them to tourist fitness requirements.	4.2	Necessary equipment for air based adventure activities. Energy level and physical fitness of Tourist.	
	4c	Apply appropriate safety measures and assess dos and don'ts in air-based adventure activities.	4.3	Dos and don'ts for tourists while undergoing adventure activities. Safety Measures for Air Based activities.	
UNIT V: Artificial Advature Tourism	5a	Identify various Artificial Advature activities.	5.1	Theme parks, Escape rooms, indoor climbing, Ziplining, Virtual reality experiences.	CO5
	5b	Locate Artificial Advature activities in India on map.	5.2	Locations of Artificial Advature activities in India.	

VII Laboratory Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Psychomotor Domain)		Hours	Aligned COs
I	1	Collect data and visuals from secondary sources (books, tourism websites, brochures) related to tourism resources in India.	2#	CO1
I	2	Identify and locate tourism resources in India on a map.	2#	CO1
II	3	Practice High hill trekking destinations. (Part I)	2#	CO2
II	4	Practice High hill trekking destinations. (Part II)	2#	CO2
II	5	Practice Rock Climbing.	2#	CO2
III	6	Prepare an observation based key learning points in Kayaking/Water Scooter.	2#	CO3
III	7	Prepare a Presentation on water based adventure sports activities.	2	CO3
III	8	Identify various equipments used in on water based adventure activities.	2#	CO3
IV	9	Follow the expert instructions of Parasailing/Hang gliding expert.	2#	CO4
IV	10	Identify various equipments used in on air based adventure activities.	2#	CO4
IV	11	Perform air based advanture activities by following safety measures.	2#	CO4
V	12	Prepare a report on artificial advanture activity you have experienced.	2#	CO5
V	13	Prepare a brouchure using self-photographed pictures and related information of the artificial advanture activities.	2#	CO5
V	14	Design an advertisement/promotional campaign for any one theme Park..	2	CO5
I to V	15	Prepare an adventure tourism package.	2	CO2 to CO5

Note: # Compulsory

VIII Self-Study Learning (SLO in Cognitive/Psychomotor/Affective Domain)

COURSE CURRICULUM

Program	:	Diploma in MT
Course Category	:	DSC
Course Code	:	MT305H
Course Title	:	Non Ferrous Metallurgy

I Rationale:

Preparation of ores and minerals are essential for efficient and economical extraction of metals. This course mainly deals with the economically viable beneficiation methods for important minerals available. Needs for proper ore dressing for particular type of ores are also highlighted.

II Industry Identified Competency:

The Student will be able to do in Industry at entry level:

Use methods of Extraction of Metals from ores.

III Course Outcomes (COs):

After completing this course students will be able to:

CO1: **Identify** various extraction process

CO2: **Select** suitable extraction process for copper metal

CO3: **Select** suitable extraction process for Zinc metal

CO4: **Select** suitable extraction process for lead metal

CO5: **Select** suitable extraction process for Aluminium metal

CO6: **Select** suitable extraction process for radioactive metals

IV Learning Scheme:

Classroom Learning (CL)	Tutorial Learning (TL)	Laboratory Learning (LL)	Self-Study Learning (SL)	Notional Learning Hours (NLH)	Credits
4	1	-	1	6	3

V Assessment Scheme:

Classroom Learning				Tutorial/Laboratory Learning				Self-Study Learning	
FA	SA	Total		FA		SA		SA	
Max	Max	Max	Min	Max	Min	Max	Min	Max	Min
30	70	100	40	50	20			25	10

VI Classroom Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Cognitive Domain)		Topics and Sub-topics		Aligned Cos
UNIT I: PRINCIPLES OF EXTRACTION	1a	Classify given sources of metals and minerals.	1.1	Classification and sources of Metals, Minerals, Ores etc.Pyrometallurgy Definition, principles involvedstages of Pyrometallurgy, advantages ,disadvantages.	CO1
	1b	Identify given stages of hydrometallurgy.	1.2	Hydrometallurgy- Definition, stages of hydrometallurgy, principles of hydrometallurgy ,advantages ,disadvantages.	
	1c	Justify the need of Electrometallurgy in extractive metallurgy .	1.3	Electrometallurgy- Definition, principle of electrometallurgy, advantages,disadvantages.	
	1d	Compare Pyrometalllurgy, Hydrometallurgy and electrometallurgy process of extraction on given points.	1.4	Comparison amongst Pyrometalllurgy, Hydrometallurgy and electrometallurgy Principles of roasting and calcinations Roasting techniques: fluidized bed roasting, multiple hearth roasting.	

	1e	Suggest suitable roasting techniques for given metals .	1.5	Solvent extraction, Counter current decantation:Process description.	
UNIT II: EXTRACTION OF COPPER	2a	Compare given copper ores on given points	2.1	Properties and uses of copper Ores/minerals of copper, preparation of ore, current status of copper production in India	CO2
	2b	Suggest extraction techniques for given copper applications	2.2	Production of copper by a Pyrometallurgy- production flow sheet by conventional and newer route , stages of Pyrometalllurgy	
	2c	Disctinguish between given copper extraction methods	2.3	Hydrometallurgy of copper-ferric chloride leaching of copper ore, advantages and disadvantages,Flash smelting of copper, WORCRA process-features and merits of the process	
	2d	Select suitable refining process for given	2.4	Refining of Copper- fire and electrolytic refining	
UNIT III: EXTRACTION OF ZINC	3a	suggest suitable technique for given zinc extraction.	3.1	Properties and uses of Zinc,Ores/minerals of Zinc, preparation of ore, current status of production in Zinc,Pyrometallurgical extraction of zinc with flow sheet.	CO3
UNIT IV: EXTRACTION OF LEAD	4a	Identify various sources of Lead.	4.1	Properties and uses of Lead,Ores/minerals of Lead, preparation of ore, current status of copper production in Lead.	CO4
	4b	Suggest suitable refining process for lead.	4.2	Pyrometallurgical extraction of lead with flow sheet,Refining of base bullion.	

UNIT V: EXTRACTION OF ALUMINIUM	5a	Identify various applications of Aluminiun metal.	5.1	Aluminium;- Properties and uses , Ores/minerals of Aluminium, preparation of ore, current status of copper production in Aluminium, Feasibility of carbothermic reduction of Alumina, Requirements for aluminium extraction.	CO5
	5b	Select suitable process to obtain pure aluminium.	5.2	Bayer's process- flow sheet, stages involved, factors affecting Bayer's process.	
	5c	Recommend factors affecting Bayer's process.	5.3	Preparation of Cryolite- flow sheet and description with reactions involved.	
	5d	Suggesst suitable composition and properties of bath for given process .	5.4	Hall Heroult process (Aluminium cell) - construction, working, composition and properties of bath, anode effect Refining of aluminium.	
	5e	Use Red mud in metallurgical Industry for given application.	5.5	Manufacturing of carbon electrode,Utilization of Red mud in metallurgical Industry.	
UNIT VI: EXTRACTION OF URANIUM AND THORIUM	6a	Select suitable sources of Uranium & Thorium.	6.1	Properties and uses of Uranium and Thorium.	CO6
	6b	Suggest proper Ores/minerals of Uranium and Thorium.	6.2	Ores/minerals of Uranium and Thorium and preparation of ore.	
	6c	suggest methods for Uranium recovery for given industrial application.	6.3	Recovery of Uranium from their minerals with flow sheets.	
	6d	suggest methods for Thorium recovery for given industrial application.	6.4	Recovery of Thorium from their minerals with flow sheets.	

VII Laboratory Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Psychomotor Domain)		Hours	Aligned COs
I	1	Prepare flowsheet for various exctraction processes.	2#	CO1
II	2	Prepare flowsheet for extraction of copper by pyrometallurgical process.	2#	CO2
II	3	Prepare flowsheet for extraction of copper by Hydrometallurgical process.	2	CO2
III	4	Prepare flowsheet for extraction of lead metal.	2#	CO3
IV	5	Prepare flowsheet for extraction of Zinc metal.	2#	CO4
V	6	Prepare flowsheet for Bayer's process for aluminium extraction.	2#	CO5
V	7	Prepare flowsheet for Hall Heroult process for aluminium extraction.	2	CO5
V	8	Prepare flowsheet for preparation of cryolite in aluminium extraction.	2	CO5
VI	9	Prepare flowsheet for Recovery of Uranium from their minerals	2#	CO6
VI	10	Prepare flowsheet for Recovery of Thorium from their minerals	2	CO6

Note: # Compulsory, Use A3 drawing sheet.

VIII Self-Study Learning (SLO in Cognitive/Psychomotor/Affective Domain)

1. Prepare comparative model/flowsheets on various extraction techniques
2. Collect different ferrous and non ferrous metals/alloys
3. Prepare comparative model for ferrous/nonferorous metals/alloys
4. Prepare a report on electrical energy consumption used various extraction process
5. Prepare report on annual utilization of Thorium metal worldwide
6. Prepare report on annual utilization of Uranium metal worldwide
7. Carry our market survey for total costing/estimate required of extraction process of metals and prepare report on it
8. Prepare report on annual utilization of aluminium metal worldwide
9. Prepare report on annual utilization of Copper metal worldwide
10. Prepare report on annual utilization of zinc metal worldwide
11. Prepare report on annual utilization of Lead metal worldwide
12. Prepare report on wastage and recycling scrap metals and alloys
13. Prepare micro project on any given topic
14. Prepare report on harmful effect of radioactive metals on environment

COURSE CURRICULUM

Program	:	Diploma in MT
Course Category	:	DSC
Course Code	:	MT306H
Course Title	:	Modern Foundry Technology

I Rationale:

The Advanced Foundry Technology course is vital for a Metallurgy diploma, offering in-depth knowledge of modern casting processes, materials, and equipment. It equips students with expertise in optimizing foundry operations, improving product quality, and solving complex casting problems. Mastery of these advanced techniques is crucial for innovation and efficiency in metal casting industries, preparing graduates for impactful roles in manufacturing and quality control within the metallurgical sector.

II Industry Identified Competency:

The Student will be able to do in Industry at entry level:

Control and Optimize foundry process

III Course Outcomes (COs):

After completing this course students will be able to:

CO1: **Employ** Modern Techniques for production of different casting.

CO2: **Utilise** CO2 and Shell moulding for Industrial application.

CO3: **Analyse** castings produced by methods of Special casting techniques.

CO4: **Prepare** mould of different shapes using various moulding techniques.

CO5: **Identify** defects and suggest remedial measures.

CO6: **Design** proper foundry layouts.

IV Learning Scheme:

Classroom Learning (CL)	Tutorial Learning (TL)	Laboratory Learning (LL)	Self-Study Learning (SL)	Notional Learning Hours (NLH)	Credits
3	-	2	1	6	3

V Assessment Scheme:

Classroom Learning				Tutorial/Laboratory Learning				Self-Study Learning	
FA	SA	Total		FA		SA		SA	
Max	Max	Max	Min	Max	Min	Max	Min	Max	Min
30	70	100	40	25	10	25+	10	25	10

VI Classroom Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Cognitive Domain)		Topics and Sub-topics		Aligned Cos
UNIT I: Introduction	1a	Apply knowledge of casting techniques to produce different castings.	1.1	Special Casting Techniques – Importance, classification Present scenario of Foundry in India. Scope of foundry in India.	CO1
UNIT II: CO2 Moulding and Shell Moulding	2a	Apply CO2 molding process for given application.	2.1	CO2 Moulding – Principle, operation, advantages, limitations, applications, Core, mould and mixture for CO2 process, gassing techniques, fluid sand Moulding	CO2
	2b	Identify defects observed in given types of Moulding process.	2.2	Shell Moulding – Principle, steps involved for the production of casting, advantages, limitations, applications, production of resin coated sand, shell Moulding machines, Defects observed in CO2, shell Moulding, their remedies.	

UNIT III: Investment Mould Casting & Centrifugal Casting	3a	Select pattern materials for given investment castin.	3.1	Investment Mould Casting principle, Types of pattern materials and their properties for investment moulds. Steps involved for the production of casting, advantages, limitations, applications.	CO3
	3b	Compare given casting process on given points.	3.2	Centrifugal Casting – Principle, Methods – True centrifugal casting, Semi-centrifugal casting, Centrifuge casting defects observed in die casting and centrifugal casting.	
UNIT IV: Gravity Die Casting, Pressure Die Casting, Slush Casting	4a	Compare given casting processes on given points.	4.1	Gravity Die Casting – Permanent moulds, cores, gating system, process, casting design, casting alloys, comparison with sand casting technique, applications.	CO4
	4b	Compare given metal injection mechanism on given points.	4.2	Pressure Die Casting – Die casting machines, dies, die design, die material, Metal Injection Mechanism - Hot Chamber & Cold Chamber Die-casting, advantages, limitations, applications.	
	4c	Select slush casting process for specified application.	4.3	Slush casting technique: casting process details, alloys used and Applications.	
sign Casting Design And Casting Defects	5a	Calculate given parameters of gating and risering system on given data.	5.1	Sand mould design considering gating and risering principles Casting design consideration.Design features of each component of gating system.	CO5
	5b	Identify given gating systems components.	5.2	Sand-casting design:- Introduction, casting design consideration, software packages for the design of casting and production of castings.	

UNIT V: Mould De	5c	Calculate riser calculation using given method on given data.	5.3	Riser calculation using Cain's equation and NRL method for simple casting. Numericals based on Chovorinovs equation.	
	5d	Suggest remedies for given casting defects.	5.4	General defects in casting: - classification, causes and remedies.	
UNIT VI: Foundry Mechanization And Foundry Lay Out	6a	Classify given moulding machines.	6.1	Moulding Machines – Functions, Type of Moulding machines. Constructional details and working of Jolt-squeeze, pattern draw moulding machines, sand slinger, material handling equipments in foundry.	CO6
	6b	Employ suitable dust extraction equipments in foundry.	6.2	Dust control and dust extraction in foundries.	
	6c	Design layout of given foundry.	6.3	Foundry Mechanization - Introduction, Mechanization, Layout of Manual Foundry and Mechanized foundry, Processing steps in mechanized foundry.	

VII Laboratory Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Psychomotor Domain)		Hours	Aligned COs
I	1	Identify given special casting techniques.	2#	CO1
II	2	Prepare CO2 mould. (Part I)	2#	CO2
II	3	Produce castings by CO2 moulding process. (Part II).	2#	CO2
II	4	Prepare shell mould. (Part I)	2#	CO2
II	5	Produce castings by shel moulding process. (Part II).	2#	CO2
III	6	Prepare mould for investment casting. (Part I)	2#	CO3
III	7	Produce castings by investment casting process. (Part II).	2#	CO3
III	8	Produce castings by centifugal casting process.	2	CO3
IV	9	Produce castings by gravity diel casting process. (Part I)	2#	CO4
IV	10	Produce castings by gravity diel casting process. (Part II)	2#	CO4
IV	11	Produce castings using slush casting techniue.	2#	CO4
V	12	Design and draw gating system for any casting.	2#	CO5
V	13	Design and draw mechanised/ manual foundry layout.	2	CO6
VI	14	Prepare moulds for gassing techniques	2	CO6
VI	15	Apply sutiable gassing technique for given molds.	2#	CO6

Note: # Compulsory

VIII Self-Study Learning (SLO in Cognitive/Psychomotor/Affective Domain)

1. Prepare models for sepcial casting techniques.
2. Prepare comparative chart for various defects in casting.
3. Prepare micro project on any topic in curriculum .
4. Calculate energy consumption utilised in various special casting techniques and write a report on it.
5. Write current status of foundry industries in India and world and write report on it
6. Visit any foundry shop and submit report.
7. Draw foundry layout for mannual and mechanized foundaries on A3 drawing sheet
8. Design and draw moulds for various special casting techniques on A3 drawing sheet.

IX Specification Table for Classroom Learning Assessment:

COURSE CURRICULUM

Program	:	Diploma in MT
Course Category	:	DSC
Course Code	:	MT307H
Course Title	:	Selection of Material

I Rationale:

Introducing a new engineering product or changing an existing model involves making designs, reaching economic decisions, selecting materials, choosing manufacturing processes, and assessing its environmental impact. These activities are interdependent. and materials and processes used in making the product can have a large influence on its design, cost, and performance in service. . Industries now emphasis on manufacturing products and goods locally, & how products affect the environment, and society. The aim of the subject is to enable judicious selection of material based upon the relationship between technical and economic facts

II Industry Identified Competency:

The Student will be able to do in Industry at entry level:

Select appropriate materials for engineering applications

III Course Outcomes (COs):

After completing this course students will be able to:

CO1: **Utilize** different Material selection charts for various applications

CO2: **Interpret** factors for selection process of different materials

CO3: **Select** materials for industrial applications depending on their properties

CO4: **Select** suitable biomaterials and magnetic materials for different applications.

CO5: **Select** suitable composite materials for given industrial applications

CO6: **Carry** out Failure Analysis of the failed components

IV Learning Scheme:

Classroom Learning (CL)	Tutorial Learning (TL)	Laboratory Learning (LL)	Self-Study Learning (SL)	Notional Learning Hours (NLH)	Credits
3	-	2	1	6	3

V Assessment Scheme:

Classroom Learning				Tutorial/Laboratory Learning				Self-Study Learning	
FA	SA	Total		FA		SA		SA	
Max	Max	Max	Min	Max	Min	Max	Min	Max	Min
30	70	100	40	25	10	25+	10	25	10

VI Classroom Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Cognitive Domain)		Topics and Sub-topics		Aligned Cos
UNIT I: Introduction to selection of materials	1a	Select proper material for specified application.	1.1	Principles involved in the selection of materials. Selection Criteria : Availability, Economics, Properties, Selection process, determination of performance requirements, Evaluation of alternatives	CO1
	1b	Identify different Material properties.	1.2	Material Properties: Chemical, Physical and Mechanical, properties in detail and limits on properties. Factors affecting material prices, material substitution.	
	1c	Use given charts for material selection for specified application.	1.3	Material selection charts: Strength vs density, Young's modulus vs Density.	
ls	2a	Select proper material for resistant to corrosion and wear for specified application.	2.1	Selection of material for strength, resistance to corrosion – temperature – wears with practical examples.	

UNIT II: Functional Requirement of Engineering Materia	2b	Select material for proper stiffness for specified application.	2.2	Materials selection for stiffness : Stiffness of engineering materials, Importance of stiffness, material selection criterion for stiffness with examples	CO2
	2c	Select material for proper toughness for specified application.	2.3	Materials selection for toughness : Toughness, Selection of materials for toughness, assessment of toughness of different materials with examples	
	2d	Select material for proper fatigue strength for specified application.	2.4	Material selection for fatigue strength: Mechanisms, evaluation of fatigue life of different materials	
	2e	Select material for proper creep strength for specified application.	2.5	Material selection for creep : Mechanism, evaluation of creep resistance, Creep curve, Effect of stress and temperature, development of creep resistant alloys, selection criterion.Selection of non ferrous materials.	
election of materials for different application	3a	Identify properties required for materials for different applications	3.1	Properties of High strength, heat resistant alloys, corrosion resistant steels required for good weldability, formability, forgeability.	CO3
	3b	Select proper materials for tools and components for given industrial applications	3.2	Tool steels required for cutting, cold-working dies, hot working dies	
	3c	Recommend materials for given industrial and metallurgical applications.	3.3	Selection of materials and processes for tools and components of : automobile engines, machine tools, foundry, metal-working equipment, Testing machine, ore-dressing equipment.	

UNIT III: Se	3d	Select proper materials for High Temperature Service & Low Temperature Service.	3.4	Materials for High Temperature Service & Low Temperature Service, Electrical Materials.	
UNIT IV: Magnetic materials & Biomaterials	4a	Compare biomaterials with magnetic mateials on basis of given points.	4.1	Introduction to magnetic materials,Types of Magnetic materials, Concept of Diamagnetism, paramagnetism and Ferromagnetism, Applications of Magnetic materials.	CO4
	4b	Utilize biomaterials for given application.	4.2	Introduction to Biomaterials,Classification and applications of biomaterials.	
UNIT V: Composite Materials	5a	Use Disperse materials for different application.	5.1	Composite materials-Definition, Necessity, Applications, Advantages & Limitations. Loading under iso-strain condition and isostress condition. Disperse materials: Definition, Necessity, Applications, Advantages & Limitations.	CO5
UNIT VI: Failure Analysis	6a	Compare Ductile and brittle fracture on basis of given points	6.1	Modes of fracture, factors influencing brittle fracture Various Fractures : Ductile, Brittle, fatigue , Causes and Remedies.Griffith's Theory: Statement, Derivation	
	6b	Suggest suitable remedies for Failure prevention	6.2	Causes of failure of engineering components - Wear Failures, Corrosion Failures, Mechanical Failures,Failure Prevention by selection of proper material. Steps for Failure analysis.	CO6

VII Laboratory Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Psychomotor Domain)		Hours	Aligned COs
I	1	Identify various properties of materials	2#	CO1
I	2	Use material selection charts for selection of various materials for required applications	2#	CO1
II	3	Use material selection charts for selection of various materials for resistance to wear and corrosion for specified application.	2#	CO2
II	4	Use material selection charts for selection of various materials for stiffness for specified application.	2#	CO2
III	5	Use material selection charts for selection of various materials for good weldability for specified application.	2#	CO3
III	6	Use material selection charts for selection of materials for tools and hot working dies.	2#	CO3
IV	7	Perform separation between magnetic and nonmagnetic materials by any technique	2#	CO4
IV	8	Identify fractures by visual examinations for given application.	2#	CO4
V	9	Perform microscopic examination for failure analysis of different materials	2#	CO5
V	10	Carry out failure analysis of various components	2#	CO5
VI	11	Utilise composite materials for different industrial application	2#	CO6
VI	12	Utilise disperse materials for different industrial application	2	CO6

Note: # Compulsory

VIII Self-Study Learning (SLO in Cognitive/Psychomotor/Affective Domain)

1. Prepare models for different types of materials
2. Observe various defects in materials and write a report on it
3. Prepare comparative charts/models for Material selection charts for various applications
4. Calculate energy consumption utilised in failure analysis techniques and write a report on it
5. Prepare comparative models for biomaterials and magnetic materials and write a report on it
6. Carry out Case Study for failure analysis of different components and write a report on it
7. Prepare microproject on any topic in curriculum
8. Prepare comparative charts/models for various properties of materials

COURSE CURRICULUM

Program	:	Diploma in MT
Course Category	:	DSE
Course Code	:	MT308H
Course Title	:	Alloy Steel

I Rationale:

Alloy steel is crucial in a Diploma in Metallurgy curriculum due to its widespread industrial applications and enhanced properties over carbon steel. Understanding alloy steel production their heat treatment, properties and applications equips students with practical skills and aligns their education with industry demands. This knowledge prepares students for advanced studies and relevant roles in diverse sectors, ensuring their readiness for real-world challenges.

II Industry Identified Competency:

The Student will be able to do in Industry at entry level:

Prepare Charge for alloy steel production.

III Course Outcomes (COs):

After completing this course students will be able to:

CO1: **Classify** alloy steels.

CO2: **Analyse** effects of important alloying elements on Properties and structures of steels.

CO3: **Select** alloy steel for given applications.

CO4: **Prepare** heat for various alloy steel production.

CO5: **Design** heat treatment cycle for various alloy steels.

CO6: **Select** ferro alloys for given applications.

IV Learning Scheme:

Classroom Learning (CL)	Tutorial Learning (TL)	Laboratory Learning (LL)	Self-Study Learning (SL)	Notional Learning Hours (NLH)	Credits
3	-	2	1	6	3

V Assessment Scheme:

Classroom Learning				Tutorial/Laboratory Learning				Self-Study Learning	
FA	SA	Total		FA		SA		SA	
Max	Max	Max	Min	Max	Min	Max	Min	Max	Min
30	70	100	40	25	10	25+	10	25	10

VI Classroom Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Cognitive Domain)		Topics and Sub-topics		Aligned Cos
UNIT I: Introduction	1a	Classify alloy steel based on given Criterions.	1.1	Definition , need of alloy steels, Classification of alloy steels,Classification and composition of alloy cast irons, Characteristics of each class of alloy steels.	CO1
	1b	Compare various standards on given points.	1.2	Industrial applications of alloy steel and alloy cast irons, Alloy steel standards-ASTM/IS/SAE/EN.	
UNIT II: Alloying Elements	2a	Classify alloying elements on given points.	2.1	Classification of alloying elements w.r.t. Iron- iron carbide diagram – ferrite and austenite stabilizers, w.r.t. alloy steel making.	CO2
	2b	Analyse effects of alloying elements on Fe-Fe3c diagram.	2.2	Effects of alloying elements on TTT Diagram, shape of Fe-Fe3C diagram.	
	2c	Suggest suitable alloying elements to achieve given property in alloy steel.	2.3	Effects of important alloying elements on Properties and structures of steels.	

UNIT III: Important Alloy Steels	3a	Select alloy steel for given applications.	3.1	Composition, properties and applications of : Structural steel, Engineering steel, Spring steel , OHNS steel, Maraging steel, tool steel - HCHC steel, HSS Steel, Hadfield steel, Stainless steel	CO3
UNIT IV: Alloy Steel Production	4a	Outline the "heat" of given alloy steel production.	4.1	General outline of heat for alloy steel Production, Arc furnace practice for tool steels production. Conditions in different furnaces for efficient productions of alloy steel.	CO4
	4b	Compare given stainless steel production methods on given points.	4.2	Production of stainless steel by different methods.	
	4c	Calculate amount of ferro alloys required for production of alloy steel.	4.3	Alloy steel Plant lay out-factors to be considered, Equipments required for alloy steel plants with proper justifications, Charge calculations for alloy steels	
UNIT V: Heat Treatment of Alloy Steel	5a	Design heat treatment cycle for given alloy steels.	5.1	Heat treatment (h/t cycle, hardening, tempering) of : High speed steel, HCHC steel, Stainless steels, Maraging steel, Alloy cast irons.	CO5
UNIT VI: Ferro Alloys	6a	Compare various ferrro alloys on given points.	6.1	Importance of Ferro alloys, General applications of Ferro-alloys, Composition, physico-chemical properties of Ferro-Mn, Fe-Si and Fe-Cr.	CO6
	6b	Outline the production of Fe-Mn.	6.2	Raw materials for Ferro- Mn, Fe-Si and Fe-Cr production, Fe-Mn production by Thermit process .	

VII Laboratory Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Psychomotor Domain)		Hours	Aligned COs
I	1	preare Elecrtc arc furnace heat for HCHC steel	2#	CO1
I	2	Prepare electricarc arc furnace heat for stainless steel production.	2#	CO1
II	3	prepare alloy steel using induction furnace.	2	CO2
II	4	prepare electric arc furnace heat for spring steel.	2#	CO2
III	5	prepare electric arc furnace heat for high speed steel	2#	CO3
III	6	prepare heat treament cycle for stailess steel	2#	CO3
IV	7	prepare heat treament cycle for maraging steel	2#	CO4
IV	8	Preare Heat treatment cycle for high speed steel	2#	CO4
V	9	Prepare Heat treatment cycle for HCHC Steel.	2#	CO5
V	10	prepare heat treatment cycle for Ni-resist cast iron	2#	CO5
V	11	preare heat treatment cycle for Ni -Hard cast iron.	2#	CO5
VI	12	calculate charge material for low alloy steel	2#	CO6
VI	13	caculate charge materials for high alloy steel	2#	CO6
VI	14	calculate charge material for tool steel (H11)	2	CO6
VI	15	calculate raw material for ferromanganese production	2#	CO6
VI	16	calculate raw material for ferrosilicon production	2#	CO6

Note: # Compulsory

VIII Self-Study Learning (SLO in Cognitive/Psychomotor/Affective Domain)

1. Prepare and Report on current status of Ferro alloy production in India/World.
2. Prepare and Report on current status of alloy steel production in India/World.
3. Prepare model on fe-fe3c diagram showing effects of allying elements on it
4. Prepare model on TTT/CCT showing effects of alloying elements on it.
5. Prepare report on standards of Alloy steels.
6. Prepare microproject based on curriculum.
7. Visit any steel plant and submit report.

COURSE CURRICULUM

Program	:	Diploma in MT
Course Category	:	DSE
Course Code	:	WS302H
Course Title	:	Manufacturing Processes

I Rationale:

Diploma technicians must master diverse manufacturing processes, selecting, operating, and controlling machines, tools, and fluids to transform raw materials into finished products as per drawings. Staying updated on advancements is crucial. Proficiency in this realm enables technicians to adeptly handle practical challenges with confidence.

II Industry Identified Competency:

The Student will be able to do in Industry at entry level:

Apply the Knowledge for selecting, operating, and controlling machines, tools, and fluids to convert raw materials into finished products according to specifications.

III Course Outcomes (COs):

After completing this course students will be able to:

CO1: **Acquire** the knowledge and skills necessary to understand the metal cutting processes for efficient and precise manufacturing..

CO2: **Selection** and application of cutting fluids and tool materials to enhance machining efficiency, tool life, and surface quality in manufacturing processes..

CO3: **Use** proper metal joining technique for particular application

CO4: **Identify** the proper selection and utilization of appropriate tools, equipment, and machinery tailored to specific applications .

CO5: **Use** milling and grinding machinery to achieve precise machining operation

CO6: **Enhance** awareness of students with a comprehensive understanding of CNC systems.

IV Learning Scheme:

Classroom Learning (CL)	Tutorial Learning (TL)	Laboratory Learning (LL)	Self-Study Learning (SL)	Notional Learning Hours (NLH)	Credits
3	-	2	1	6	3

V Assessment Scheme:

Classroom Learning				Tutorial/Laboratory Learning				Self-Study Learning	
FA	SA	Total		FA		SA		SA	
Max	Max	Max	Min	Max	Min	Max	Min	Max	Min
30	70	100	40	25	10	25+	10	25	10

VI Classroom Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Cognitive Domain)		Topics and Sub-topics		Aligned Cos
UNIT I: Mechanics of Metal cutting	1a	Identify basic elements of metal cutting	1.1	Basic elements of machining.	CO1
	1b	Apply principles of metal cutting	1.2	Principles of metal cutting & forces involved in metal cutting,tool geometry, cutting parameters, and material properties.	
	1c	Identify cutting tool nomenclature	1.3	Cutting tool nomenclature & types of cutting tools	
	1d	Justify process of chip formation and metal cutting parameters.	1.4	Chip formation, Types of chips and Cutting parameters	
	2a	Select appropriate cutting fluids based on machining requirements, material compatibility and its application	2.1	Cutting Fluid: Introduction,classification of cutting fluid, solid & liquid cutting fluid,chemical coolants, Selection of cutting fluids and its application during machining operation	

UNIT II: Cutting fluid and tool materials	2b	Classify different types of tool materials.	2.2	Tool Material : Introduction,characteristics of tool material, types of tool material such as plain carbon steel, high carbon steel, high speed steels, carbide tools, ceramics, diamond tools, cemented oxides, abrasives & CBN etc	CO2
	2c	Evaluate the process of tool failure and need of tool resharpning	2.3	Tool life & tool wear, types of tool failure. Resharpening of cutting tools	
	2d	State factors affecting machinability	2.4	Machinability, factors affecting machinability	
	2e	Classify metal joining processes	2.5	Welding processes –Types,working principle & its applications	
UNIT III: Metal joining processes	3b	Differentiate electric arc and oxyacetelyne gas welding processes on given points.	3.2	Arc welding: arc welding equipment equipments, flux and methods. Gas welding: gas welding equipments, oxy-acetylene welding, types of flame.	CO3
	3c	Identify causes of welding defects and suggest remedies.	3.3	Defects in welding joints: causes and remedies.	
	3d	Compare soldering and brazing process and state its applications	3.4	Soldering and brazing process, Comparison, fillers,merits, demerits and applications.	
	3e	Enumerate safety guidelines and precautions for a welding shop	3.5	Safety practices/ precautions in welding shop.	
NIT IV: Machining Processes	4a	Identify parts, accessories of lathe machine and their function.	4.1	lathe; Basic parts and accessories like chucks (three jaw, four jaw, and magnetic chuck), mandrels, rests, faceplate, centres and angle plate of centre lathe and their functions.	
	4b	Describe various operation of centre lathe with justifucation.	4.2	Different lathe operations like facing, plain turning, taper turning, thread cutting, chamfering, grooving, knurling. Application of these oprerations in metallurgy	

UN	4c	Differentiate given types of a drilling machine operations.	4.3	Drill machine: Basic parts of bench drilling machine Classification, specification of drilling machine and operations like: Drilling, reaming, boring, counter sinking, counter boring	CO4
	4d	Compare shaping, slotting and planning machines on given points.	4.4	Working Principles, classification of shaping, slotting & planning machine.	
	4e	Identify machinng operations significance in metallurgical processes.	4.5	Rrecognize lathe, drilling, shaper operations significance in metallurgical processes. Safety precautions adopted while working on lathe,drilling and shaper machines	
UNIT V: Milling & Grinding machines	5a	Identify given types of milling machines.	5.1	Milling Machine: Working principle, types of milling machines.	CO5
	5b	Select appropriate milling cutter forthe given operation.	5.2	Milling cutter: Different types of cutters, face milling cutters end milling cutters, staggered tooth milling cutter, side and face milling cutter, form milling cutters	
	5c	Justify milling operations for the given workpiece.	5.3	Milling Process: Plain milling, face milling, side milling, end milling, straddle milling, gang milling, up and down milling and their applications in metallurgical engineering.	
	5d	Identify different types of grinding machines.	5.4	Working of grinding machine, Classification of grinding machine - surface, cylindrical, centreless, grinding wheel specifications, grinding wheel dressing & truing.	

	5e	Select appropriate grinding wheels and assess advancements in grinding technology for enhanced efficiency and precision.	5.5	Selection criteria for grinding wheel. High-speed grinding and creep-feed grinding, Surface roughness and dimensional accuracy control. Applications of advanced grinding techniques in metallurgy	
UNIT VI: Introduction to CNC machine	6a	Differentiate given Controls.	6.1	Define NC (Numeric control), CNC (Computer numeric control), DNC (Direct Numeric control) , Principle of CNC machining and its importance in metallurgical processes..	CO6
	6b	Identify different types of CNC machines, their components.	6.2	Classification of CNC machines. CNC organization, CNC machine components and control panel.	
	6c	Describe principle axes of CNC Machine with justification.	6.3	Cartesian Co-ordinate system and right hand rule for identification of axes.	
	6d	Use CNC machine for metallurgical application.	6.4	CNC machining in manufacturing processes: precision machining, surface finishing, and part replication. Role of CNC machining in metallurgical research, prototyping, and quality control.	

VII Laboratory Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Psychomotor Domain)		Hours	Aligned COs
I	1	Identify different types of cutting tools and obtain the nomenclature for lath machine tool	2	CO1
II	2	Identify different types of cutting fluid and select the cutting fluids for different lathe machine operations	2	CO2
II	3	Identify different types of tool material for machining process and nomenclat the tool material for lathe,Shaper and Milling operations.	2#	CO2
III	4	Analyze the given Fabricating Structure part drawing to understand the dimensions, shapes, and assembly sequence.Identify type of welding operation and types of weld joints specified (e.g., butt joint, lap joint, T-joint).	2	CO3
III	5	Prepare arc welding machine and cut the metal work pieces as per the drawing and assembly.	2#	CO3
III	6	Perform the arc welding as per seduence of joining work pieces.Inspect the weld joints and finish the weld joints.list safety measures followed to carry out the process	2#	CO3
IV	7	Select and mount the metal speciman securely on the lathe chuck or between centerss, ensuring proper alignment.Use calipers and micrometers to measure the initial dimensions of the metal specimen, including diameter and length.and surface finish.	2#	CO4
IV	8	Demonstrate proficiency in setting speed, feed, depth of cut. Select and mount the tool on the machine tool post.operating a lathe machine to accurately machine a metal specimen to specified dimensions and surface finish	2#	CO4
IV	9	Operating a lathe machine to accurately machine a metal specimen to specified dimensions and surface finish as perthe part drawing	2#	CO4
IV	10	Measure the machined part's dimensional accuracy and surface finish using measurement tools such as calipers and micrometers, and follow the safety rules	2	CO4
IV	11	Select and mount the proper drill tool.Measure and mark the drill hole postion on the metal speciman and hold the speciman on drill machine chuck properly. machined part's dimensional accuracy and surface finish using measurement tools	2#	CO4

IV	12	Operate the Drill machine to accurately drill a metal specimen to specified dimensions and surface finish as perthe part drawing .Measure the machined part's dimensional accuracy and surface finish using measurement tools such as calipers and micrometers	2#	CO4
IV	13	Select and mount the metal specimanand tool securely on the shaper machine ensuring proper alignment.Use calipers and micrometers to measure the initial dimensions of the metal specimen.Set the stroke and depth of cut for to produce slot as per drawing	2#	CO4
IV	14	Operating a Shaper machine to accurately machine a metal specimen to specified dimensions and surface finish as perthe part drawing.Measure the machined part's dimensional accuracy and surface finish using measurement tools such as calipers and micrometers, and follow the safety rules	2#	CO4
V	15	Set up a surface grider machine forthe given metal speciman.Analyse the drawing and palan seuence of operations .	2#	CO5
V	16	Perform the grinding operation to accurately machine a metal specimen to specified dimensions and surface finish as per the part drawing.Measure the machined part's dimensional accuracy and surface finish using measurement tools such as calipers and micrometers, and follow the safety rules	2#	CO5
VI	17	Identify the main components,tools of a milling machine and understand its functions .list safety protocols.	2	CO5
VI	18	Identify the main components of a CNC machine and list safety protocols..	2	CO6

Note: # Compulsory

VIII Self-Study Learning (SLO in Cognitive/Psychomotor/Affective Domain)

1. Prepare a chart on forces acting in metal cutting(orthgonal or oblique cutting)
2. Prepare a chart on nomenclature of drill machine tool.
3. Prepare a chart of various types lathe operations and cutting fluids use for the particular operation.
4. Prepare a display board showing different types of tools(single point and Multipoint tools).
5. Prepare a chart for different types of tools and material use for the particular tool.
6. Prepare a chart for showing gas welding process and safety tools used for process
7. Collect different types of Electrodes used in arc welding process
8. Prepare microproject to show lap and T weld joint.
9. Prepare microproject based on curriculum content.
10. Prepare microproject based on curriculum content.
11. Prepare microproject based on curriculum content.
12. Collect various types drill tools.
13. Use fundamentals of grinding to solve finishing of metallurgical sample problem

IX Specification Table for Classroom Learning Assessment:

Unit No.	Units	Classroom Learning Hours	C/O	Levels from Cognition Process Dimension			Total Marks
				R	U	A

COURSE CURRICULUM

Program	:	Diploma in MT
Course Category	:	SEC
Course Code	:	MT352H
Course Title	:	Capstone Project

I Rationale:

The Capstone Project curriculum bridges academic theory with practical application, offering diploma engineering students real-world experience in project planning, execution, and analysis. By engaging in teamwork and problem-solving, students apply technical knowledge, innovate solutions, and develop essential skills in technical communication through detailed report writing. Professional presentation practice builds confidence and clarity, preparing students to effectively convey and defend their work. This curriculum fosters adaptability, critical thinking, and self-directed learning, equipping students with the competencies necessary for success in engineering roles within industry or further academic study.

II Industry Identified Competency:

The Student will be able to do in Industry at entry level:

Excecute project work.

III Course Outcomes (COs):

After completing this course students will be able to:

CO1: **Develop** a feasible project proposal addressing relevant engineering problem(s).

CO2: **Plan** and organize project activities, including timeline, resource allocation, and budgeting.

CO3: **Compile** a literature review and methodology relevant to the project.

CO4: **Execute** project tasks systematically to achieve desired engineering outcomes.

CO5: **Test,** troubleshoot, and refine project components to ensure accuracy of results.

CO6: **Prepare** and present project report, effectively communicating goals, methodology, and results.

IV Learning Scheme:

Classroom Learning (CL)	Tutorial Learning (TL)	Laboratory Learning (LL)	Self-Study Learning (SL)	Notional Learning Hours (NLH)	Credits
-	-	4	-	4	2

V Assessment Scheme:

FA	SA	Total		FA		SA		SA	
Max	Max	Max	Min	Max	Min	Max	Min	Max	Min
-	-	-	-	50	20	50+	20	-	-

VI Classroom Learning Content:

VII Laboratory Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Psychomotor Domain)		Hours	Aligned COs
Unit I: Proposal	1	Form project teams of four to five students, as per the guidelines of your program.	2#	CO1
	2	Conduct initial survey to identify a relevant engineering problem and define the problem scope, objectives, and key challenges.	2#	CO1
	3	Hold team brainstorming sessions to explore potential approaches and solutions and evaluate each approach's feasibility and effectiveness in addressing the problem.	2#	CO1
	4	Analyse project requirements: materials, technology, cost, time, and human resources and identify potential risks and develop mitigation strategies.	2#	CO1
	5	Present the preliminary proposal to the project guide and revise the proposal based on feedback, refine the problem statement and solution approach (if required).	2#	CO1
	6	Prepare a formal proposal document in prescribed format and submit it for approval by the mentor (project guide).	2#	CO1

Unit II: Planning	7	Create a Gantt chart or project schedule outlining major tasks, milestones, and deadlines and set target dates for each phase, considering project scope.	2#	CO2
	8	Identify the necessary tools, equipment, materials, and software for project completion and assign team members to tasks based on skill sets and project needs.	2#	CO2
	9	Calculate costs for materials, equipment rentals, software licenses, and miscellaneous expenses and set a budget for each phase of the project to ensure cost-effective planning.	2#	CO2
	10	Estimate the required hours for each team member based on project needs and timelines and monitor resource usage throughout the project to stay within budget and schedule.	2#	CO2
Unit III: Liturature Survey	11	Search for academic papers, industry reports, and case studies related to the project topic and analyse collected resources and summarize findings, noting insights that inform project design.	2#	CO3
	12	Evaluate existing research to identify areas that lack sufficient study or solutions and define how the project will address these gaps and contribute new insights.	2#	CO3
	13	Choose appropriate methods for data collection, experimentation, or analysis to achieve project objectives and justify the chosen methodology based on similar studies and project requirements.	2#	CO3
	14	Compile a written review summarizing relevant literature, key insights, and the project's methodological approach and submit the literature review and methodology for mentor feedback and revision.	2#	CO3
Project Work	15	Divide the project into specific, manageable tasks aligned with the project plan and assign each task to team members according to skill and expertise.	2#	CO4
	16	Begin hands-on work, such as prototyping, coding, or constructing components, according to the project methodology and ensure all steps align with technical requirements and desired outcomes.	2#	CO4
	17	Continue project task.	2#	CO4
	18	Continue project task.	2#	CO4
	19	Continue project task.	2#	CO4
	20	Continue project task.	2#	CO4

UNIT IV:	21	Continue project task.	2#	CO4
	22	Continue project task.	2#	CO4
	23	Regularly review each task's progress to ensure alignment with specifications and quality standards and use checklists or logs to document completion and quality of each task.	2#	CO4
	24	Record steps taken, materials used, results, and any challenges faced in a project log and ensure all documentation is clear for future reference or report preparation.	2#	CO4
UNIT V: Testing	25	Perform functionality tests on individual components or subsystems to identify any issues and compare test results against expected outcomes to assess accuracy.	2#	CO5
	26	Apply systematic troubleshooting techniques to isolate the root causes of errors (if any) and modify component settings, recalibrate, or replace parts if needed to resolve issues.	2#	CO5
	27	Prepare detailed records of testing procedures, troubleshooting steps, and final adjustments and include annotated test results to support final project reporting.	2#	CO5
UNIT VI: Report Writing	28	Document project goals, methodology, findings, analysis, and conclusions in a structured report format which includes following. •Title Page which includes: Project Title, Purpose of submission, Institute logo, Students Name, Guide Name, Program, and Institute Name •Certificates: Student declaration, Certificate from guide •Acknowledgement •Table of contents •List of Tables •List of Figures •List of abbreviations and acronyms (if any) •Text 1.Introduction, objectives 2.Literature Survey 3.Methodology/Materials/Methods/Estimate. 4.Results 5.Summary/Conclusion. 6.References	2#	CO6
	29	Submit the project report to the project guide and revise the report based on feedback. Perform plagiarism check from any free internet site and submit report of plagiarism check to the guide.	2#	CO6

	30	Submit prited copies of project repiort to the guide as per policy of program.	2#	CO6

COURSE CURRICULUM

Program	:	Diploma in CE/ME/EE/EC/CM/IT/AE/MT/PK/TX/MK/AI
Course Category	:	INP
Course Code	:	IN352H
Course Title	:	Internship (Report Writing)

I Rationale:

The internship course is a critical component of the diploma program, providing students with hands-on experience in a real-world industry setting. The internship takes place after the fourth semester during summer vacation and involves working in a small, medium, or large-scale industry related to the student's field of study. The course is designed to bridge the gap between academic learning and industrial application, allowing students to apply theoretical knowledge in a practical environment. For ease, assessment this course is devided into two semester, semimar assessment in fifth semester and report writing in sixth semester.

The report writing component of the internship course is designed to enhance students' technical writing skills. This part of the course requires students to document their internship experience in a comprehensive report, demonstrating their ability to organize and present technical information clearly and accurately. The report serves as a formal record of the student's industrial experience and is an essential skill for any engineering professional.

II Industry Identified Competency:

The Student will be able to do in Industry at entry level:

Bridge theoretical knowledge with practical experience in a professional environment.

III Course Outcomes (COs):

After completing this course students will be able to:

CO1: **Evaluate** the organization's structure, processes, safety protocols, and industry standards to determine operational effectiveness.

CO2: **Apply** industry-specific tools, technologies, and skills to perform various operations.

CO3: **Contribute** to organizational goals by handling projects/ tasks under mentor guidance, applying learned skills.

CO4: **Analyze** technical challenges, addressing industry-specific issues effectively.

CO5: **Prepare** a internship report, ensuring accuracy and clarity.

CO6: **Submit** internship report in prescribed format.

IV Learning Scheme:

Classroom Learning (CL)	Tutorial Learning (TL)	Laboratory Learning (LL)	Self-Study Learning (SL)	Notional Learning Hours (NLH)	Credits
-	-	2	10	12	6

V Assessment Scheme:

Classroom Learning				Tutorial/Laboratory Learning				Self-Study Learning	
FA	SA	Total		FA		SA		SA	
Max	Max	Max	Min	Max	Min	Max	Min	Max	Min
-	-	-	-	-	-	25	10	50	20

VI Classroom Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Cognitive Domain)	Topics and Sub-topics	Aligned Cos

VII Laboratory Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Psychomotor Domain)		Hours	Aligned COs
I	1	Learn the organization's structure, operational workflow, safety standards, industry practices, methodologies, technologies, and workplace processes to analyze operational efficiency and compliance requirements.	30#	CO1
II	2	Undergo training on industry-specific tools, technologies, and software, while gaining hands-on experience in performing basic operations, troubleshooting, and maintenance tasks, applying relevant skills to real-world industry scenarios and challenges.	60#	CO2
III	3	Participate in daily operations under mentor guidance, handling assigned projects or tasks aligned with industry needs, applying learned skills to contribute to organizational goals and gaining practical experience in real-world scenarios.	150#	CO3

IV	4	Identify and analyze technical challenges in industry, and address industry-specific issues (if any).	60#	CO4
V	5	Prepare a comprehensive internship report that effectively documents work experiences, technical tasks, and key achievements throughout the internship. Ensure the accuracy of the content by cross-referencing with project details. Organize the report clearly, following industry standards.	20#	CO5
VI	6	Submit the internship report following the prescribed format, ensuring all required sections are included, such as introduction, methodology, project details, analysis, conclusions, and recommendations, while adhering to formatting and submission guidelines.	10#	CO6

Note: # Compulsory. Unit No. I to IV during summer vacation in industry and Unit No. V and VI during Sixth Sem.

VIII Self-Study Learning (SLO in Cognitive/Psychomotor/Affective Domain)

1. During the summer vacations, after the 4th Semester, students are required to undergo internship with industry/ NGO"s/ Government organizations/ Micro/ Small/ Medium enterprises to make ready for the industry.

IX Specification Table for Classroom Learning Assessment:

X Question Paper Format for Summative Assessment (SA):

XI Scheme of Laboratory Formative Assessment (FA):

COURSE CURRICULUM

Program	:	Diploma in CE/ME/EE/EC/CM/IT/AE/MT/ PK/TX/TR/AI/MK
Course Category	:	VEC
Course Code	:	VE351H
Course Title	:	Indian Constitution

I Rationale:

This course aims to equip students with practical skills and knowledge necessary for promoting constitutional morality in engineering practices and in society as a whole. The focus will be on hands-on activities, real-Indian applications, and practical projects that address key areas of Indian Constitution.

II Industry Identified Competency:

The Student will be able to do in Industry at entry level:

Use constitutional provisions in society.

III Course Outcomes (COs):

After completing this course students will be able to:

CO1: **Narret** the history of Indian Constitution.

CO2: **Illustrate** the Phylosophy of Indian Constitution.

CO3: **Represent** the significance of fundamental rights and duties in day to day life.

CO4: **Demonstrate** the importance of directive principles of state policy in governance.

CO5: **Illustrate** the functioning of constitutional institutions like legislatice, executive, judiciary and media.

IV Learning Scheme:

Classroom Learning (CL)	Tutorial Learning (TL)	Laboratory Learning (LL)	Self-Study Learning (SL)	Notional Learning Hours (NLH)	Credits
-	-	2	-	2	1

VI Classroom Learning Content:

VII Laboratory Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Psychomotor Domain)		Hours	Aligned COs
I	1	Prepare a report on history of making of Indian constitution including montague chelmsford reform, Govt. of India Act 1919, The Southborough Committee, The Simon Commission and Neharu Constitutional committee.	2#	CO1
I	2	Prepare a report on Round Table Conferences, 1935 Act, Cripps Mission 1942, Simla Conference 1945, Cabinet mission 1946, Interim Government 1946, The Indian Independence Act of 1947.	2	CO1
I	3	Prepare a report on parts, Total Articles, Total schedules of Indian Constitution and Total ammendments till date.	2#	CO1
I	4	Summerize Dr. B. R. Ambedkar's Speech in Constitution Assembly on 25th November 1949.	2#	CO1
II	5	Recite the preamble of the Indian Constitution at the time of starting of every assembly in laboratory / class room.	2#	CO2
II	6	Prepare a report on Phylosophy of preamble of Indian Constitution.	2#	CO2
II	7	Prepare a report by reading the definition, vision and importance of Indian Constitution.	2	CO2

II	8	Summerize the Article 1 of Indian Constitution.	2#	CO2
III	9	Prepare a report by reading the Fundamental rights mentioned in Indian Constitution.	2#	CO3
III	10	Prepare a report by reading the Fundamental duties mentioned in Indian Constitution.	2#	CO3
III	11	Prepare a report by reading Legal and Constitutional rights mentioned in Indian Constitution.	2	CO3
IV	12	Illustrate the meaning, importance and significance of Directive Principles of State Policy in Indian Constitution.	2#	CO4
IV	13	Summerize various institutions of Indian Constitution.	2#	CO4
IV	14	Prepare a report on Union and state legislature; Judiciary; Election Commission of India; Human Right Commissions.	2#	CO4
V	15	Prepare a report on the pillers of Indian Constitution and Constitutional morality.	2#	CO5
V	16	Prepare a report on the procedure of ammendment in Indian Constitution.	2	CO5

COURSE CURRICULUM

Program	:	Diploma in CE/ME/EE/EC/IT/MT/TX/AE/PK/CM/MK/AI
Course Category	:	INP
Course Code	:	IN353H
Course Title	:	Entrepreneurship and Startup

I Rationale:

Engineering curriculum is a dynamic process. It continuosly evolves itself reflecting the needs and aspiration of learners. In recent times, our society is influenced by knowledge creation and techological advancements. Competencies affecting Innovation and creativity have become important in all walks of life, including business context. This makes entrepreneurship education even more important for enhancing quality of life. Entrepreneurship plays an influential role in the economic growth and development of the country. As the world economy is changing so is the dynamism of the business world. The aim of this course is to inculcate the spirit of Entrepreneurship among the students. The idea of this course is to create "Job providers rather than job seekers."

II Industry Identified Competency:

The Student will be able to do in Industry at entry level:

Inculate entrepreneur inclination among students.

III Course Outcomes (COs):

After completing this course students will be able to:

CO1: **Develop** entrepreneur mindset among engineering students.

CO2: **Develop** entrepreneural traits for self employment and startup.

CO3: **Establish** problem solving technique to the challenges.

CO4: **Inculcate** characteristic for inovation and developing research mindset.

CO5: **Identify** the need of break even analysis for startups.

CO6: **Explore** business law and trade rules for startup units

IV Learning Scheme:

Classroom Learning (CL)	Tutorial Learning (TL)	Laboratory Learning (LL)	Self-Study Learning (SL)	Notional Learning Hours (NLH)	Credits
1	-	-	1	2	1

V Assessment Scheme:

Classroom Learning				Tutorial/Laboratory Learning				Self-Study Learning	
FA	SA	Total		FA		SA		SA	
Max	Max	Max	Min	Max	Min	Max	Min	Max	Min
-	-	-	-	-	-	-	-	100	40

VI Classroom Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Cognitive Domain)		Topics and Sub-topics		Aligned Cos
UNIT I: Introduction	1a	Develop Entrepreneur mindset among students.	1.1	Concept of entrepreneurship - definition of entrepreneurship by many researcher	CO1
	1b	Examine the process of entrepreneurship	1.2	Function of entrepreneur, Entrepreneurship as a carreer, Need of entrepreneurship in economic, Current scenerio of entrepreneur activity in India.	
UNIT II: An Entrepreneur Journey	2a	Identify the types of entrepreneurs	2.1	Entrepreneur- Types of entrepreneur, Motivation to become an entrepreneur, competencies of an entrepreneur	CO2
	2b	Develop given entrepreneurship traits.	2.2	Entrepreneural skills- Innovative idea generation	
UNIT III: Innovative Entrepreneurship	3a	Establish problem solving technique to given challanges.	3.1	Role of entrepreneurs - problem solvers, Innovations and startups, improve GDP of nation, Working with NGO	CO3

UNIT IV: Marketing	4a	Inculcate given innovation and market research among students.	4.1	Concept of market - elements of market enviornment, micro & macro level of marketing for innovative product	CO4
	4b	Identify given micro and macro market enviornment.	4.2	Conncept of marketing mix and its advantages of innovative product.	
UNIT V: Business Finance	5a	Suggest the sources of finance for given starup.	5.1	Sources of Finance - Advanatage and disadvantages, costing of the product	CO5
	5b	Identify the need of break even analysis for startup and innovative product	5.2	Costing - types of costing, cost of componant and operational cost. Break even analysis of product develop in startup	
UNIT VI: Resources of startup & Managemet	6a	Formulate a comprehensive business setup plan by integrating infrastructure, manpower, machinery placement, and trial production processes.	6.1	Sources to set up business startup- land, power and infrastucture. Organising business setup from placement of manpower, placement of machineries and trial production for the new startup product.	CO6
	6b	Explore basic business law and trade rule for given startup.	6.2	Laws related to business and starup- Trade rule & policy of Government of India	
	6c	Prepare detailed project report	6.3	Various government schemes implemented by MSME, KVIC, DIC, and DST. Write-up for detailed project report for PMEGP, CMEGP.	

VII Laboratory Learning Content:

Unit No	Specific Learning Outcomes (SLO) (In Psychomotor Domain)	Hours	Aligned COs

VIII Self-Study Learning (SLO in Cognitive/Psychomotor/Affective Domain)

1. Prepare a deailed project report (DPR) for any one project on any business/ start-up as you desire. Perform following activities: Market reasearch of the product, Identify demand and supply for the product, Identify area to launch the product, prepare the chart for financing the project, Interact with the bankers for financing the project, Visit to MIDC for land allocation, Prepare the Diagonstic Study Report (DSR), Interact with local government agencies like MSEDCL, Udhyog Registration, and NOC from Polution Board (if required), Collect DPR format from local DIC Centre and submit the complete report for evaluation.

Appendix II
Guidelines

Guidelines

for

Integrated Personality Development Courses (VE151H & VE152H)

1. For registration, use IPDC Campus course registration platform.
2. Use following links for registrations: (Use ipdc-campus-course-portal-user-manual for reference)
   i) IPDC Coordinators and Faculty Members Login Portal https://campus.ipdc.org/portal/Home/LoginForUsers/
   ii) IPDC Coordinator registration: https://campus.ipdc.org/portal/Home/coordinatorRegistration/
   iii) IPDC Faculty Members Registration https://campus.ipdc.org/portal/Home/facultyRegistration/
   iv) IPDC Students Registration https://campus.ipdc.org/portal/Home/studentRegistration/
3. IPDC Campus Course desktop application will be used to deliver lecture content to IPDC students into the physical classroom. Lecture content will have introductory films, lecture videos, student interactions, and workbook activities.
4. Role of IPDC Coordinators:
   i) Register yourself as an IPDC Coordinator, ask IPDC Administrator for approval.
   ii) Make sure that faculty members under your institution must register themselves.
   iii) Approve faculty members registered under you, by login portal via your profile.
5. Role of IPDC Faculty Members:
   i) Register yourself as an IPDC Faculty Member, ask your IPDC Coordinator for approval.
   ii) Make sure that your respective students must register themselves.
   iii) Enter the particular semester duration (only once) and approve students registered under you, by login portal via your profile.
   iv) Download desktop application from login portal via your profile login and install it to the computer system from which you want to conduct the multimedia lectures.
   v) Login to the desktop application by your profile, download the lectures and start conducting IPDC lectures.
6. Lectures will take place in the department classrooms and will be hosted by an integrated personality development course (IPDC) trained Faculty.
7. The Teaching resources will be provided by Swaminarayan Aksharpith on IPDC portal.
8. Each lecture has four components as shown below:
   i) **Introductory Film:** Each lecture begins with a short film that introduces the topic through modern production. The original content displays relatable scenarios and visuals that captivate the students' attention and stimulates their curiosity to learn more.

ii) **Lecture Video:** Students watch a lecture video presented by a dynamic speaker. The lecture reinforces the significance and necessity of fundamental principles and skills. The experience of the speaker, eloquence of presentation, and use of interactive visuals collectively create a profound impact on each student's mind and heart.

iii) **Student Interaction:** Student interaction sessions promote stimulating discussion and conversation and help create safe spaces for the healthy exchange of ideas. Thus, each session provides a forum in which students can openly express their emotions and thoughts.

iv) **Workbook Activities:** Workbooks assist students to begin implementing the values taught in the lecture into their personal lives. Reliable research, priceless experience, practical scenarios, and reflective questions are innovatively depicted, motivating students to contemplate and think creatively.

9. The assessments should include continuous assessment of 25 marks as mentioned in curriculum and based on the internal examination based on the question-bank with answers from each subject of IPDC provided by IPDC team.

Guidelines

for

Basic Internship Course (IN251H)

Duration of Summer Internship after Second Semester: **1st June to 30th June.**

Duration of Internship in Second Semester for DSY Student: **Part-time within Sem.**

Introduction:

The Basic Internship course provides diploma students in engineering with a four-week summer vacation internship opportunity after the second semester. The internship encompasses various inter/intra-institutional activities aimed at skill development, innovation, and professional growth. Students engage in practical experiences within institutional settings and are evaluated based on their daily activities documented in a diary.

As mentioned in program structure of third semester of NEP aligned 2023 Curriculum "Basic Internship" full time four week (120 Notional Hours) is mandatory for first year admitted students in the year 2023 and part-time (120 Notional Hours) during third semester for direct second year admitted students.

Internship activities:

During Internship students are required to be involved in:

1. Inter/ Intra Institutional Activities viz; Training with higher Institutions; Soft skill training organized by Training and Placement Cell of the respective institutions; (In case of Government Polytechnic, Nagpur by Continuing Education Department (CED).
2. Contribution at incubation/ innovation /entrepreneurship cell of the institute.
3. Participation conferences/ workshops/ competitions etc.
4. Learning at Departmental Lab/ Tinkering Lab/ Institutional workshop.
5. Working for consultancy/ research project within the institutes and Participation in all the activities of Institute's Innovation Council for eg: IPR workshop/Leadership Talks/ Idea/ Design/ Innovation/ Business Completion/ Technical Expos etc.
6. In case student want to pursue their family business, and don't want to undergo internship, a declaration by a parent may be submitted directly to the Head of the Department.

Documentation:

1. The Head of the Department should prepare a list of students indicating their consent for participation in the internship, along with the details of the internship location.
2. Every student is required to prepare a daily diary containing documentary proofs of the activities done by him during internship.

3. The report writing, preparation of presentation and the evaluation of these activities will be done by faculty mentor during third semester.
4. Students should use daily diary prepared by curriculum development cell.

Guidelines

for

Internship Course (IN351H and IN352H)

Duration of summer Internship after Fourth Semester: **1st June to 15th August.**

Introduction:

As mentioned in program structure of fourth and sixth semester of NEP aligned 2023 Curriculum a full time twelve week (360 Notional Hours) is mandatory for the students.

The internship course is a critical component of the diploma program, providing students with hands-on experience in a real-world industry setting. The internship takes place after the fourth semester during summer vacation and involves working in a small, medium, or large-scale industry related to the student's field of study. The course is designed to bridge the gap between academic learning and industrial application, allowing students to apply theoretical knowledge in a practical environment.

For ease, assessment of this course is divided into two semesters, seminar assessment in fifth semester (IN351H- Internship (Seminar)) and report writing (IN352H- Internship (Report Writing)) in sixth semester.

Internship activities:

During the summer vacations, after the 4th Semester, students are required to undergo internship with industry/ NGO"s/ Government organizations/ Micro/ Small/ Medium enterprises to make ready for the industry.

Documentation:

1. The Head of the Department should issue the letter to the industry in prescribed format framed by TPO.
2. The Head of the Department should prepare a list of students indicating their consent for participation in the internship, along with the details of the internship location.
3. Every student is required to prepare a daily diary containing documentary proofs of the activities done by him during internship.
4. The report writing, preparation of presentation and the evaluation of these activities will be done by faculty mentor during fifth and sixth semester as mentioned in curriculum.
5. Students should use daily diary prepared by curriculum development cell.

Guidelines

for

Generic Elective Courses

Introduction:

As third semester curriculum and program structure of NEP aligned 2023 curriculum were approved in 46th Board of studies meeting held on 20th June 2024. However, it is suggested by Hon. Chairman of BOS that the allotment of generic electives course should be as per "Inter-Se-Merit" of students rather than "first cum first serve" basis.

Decision as per Institute Level Committee Meeting held on 1st July, 2024.

i) Awareness workshop will be arranged by HOD of program related to Generic Elective Courses in offline or online mode for the students of III semester before registration.

ii) Sealing of Generic Elective seats is as per intake capacity of program plus 20% (for EWS/TFWS/DSY students).

iii) Quota of Generic Elective courses will be allotted by ILC. Refer annexure-I for program-wise quota for Generic Elective Course.

iv) Allot Generic Elective Course as per departmental "Inter-Se-Merit" by taking preferences for all Twelve programs other than own program. (For Computer Engineering, Information Technology and AIML for remaining Ten Programs)

v) Final registration of Generic Elective course of all students will be done by registration in-charge after allotting the GE course as per above procedure.

Timetable slots of Generic Elective Courses.

All program should keep reserved following slots for Generic Elective Course.

Day	Time	Remarks
Thursday	3.45 to 5.45 PM (last two periods)	Practical for first Batch
Friday	10.00 to 11.00 AM (First Period)	Theory Period- 1
Friday	3.45 to 5.45 PM (last two periods)	Practical for Second Batch
Saturday (working)	10.00 to 12.00 Noon (Second Period)	Theory Period- 2
Saturday (working)	1.00 PM to 5 PM	Practical for Third Batch

Use "Zero Period" between 9.00 AM to 10 AM for timetable to adjust department timetable, if required.

Annexure-I

Abstract of Generic Elective Quota

5	Information Technology	60	3	IT291H: Applied Multimedia Techniques	IT292H: Web Designing	IT391H: Cyber Security and Privacy
6	Metallurgical Engineering	36	1	MT291H: Foundry Technology	MT292H: Testing of Materials	MT391H: Heat Treatment
7	Automobile Engineering	60	3	AE291H: Basics of Automobile	AE292H: Two-Wheeler Technology	AE391H: Four-Wheeler Technology
8	Textile Manufacture	30	1	TX291H: General Textile Technology	TX292H: Dyeing and Printing	TX391H: Garment and fashion Technology
9	Computer Engineering	60	3	CM291H: Open-Source Technologies	CM292H: Web Development	CM391H: Digital Marketing
10	Mechatronics	30	1	MK291H: Basic Mechatronics	MK292H: Computer Aided Design	MK391H: Automotive Mechatronics
11	Artificial Intelligence and Machine Learning	30	1	AI291H: Python Programming	AI292H: Basics of Artificial Intelligence	AI391H: Machine Learning
12	Travel and Tourism	30	1	TR291H- Agro & Rural Tourism	TR292H- Wildlife Tourist Guide/ Naturalist	TR391H- Tourism Resources of India
		Total	**39**			

List of Generic Elective Courses (Multidisciplinary) for Mechatronics Program Students and Quota for Registration

SN	Name of Program	Intake	Quota/Seats	Third Semester	Fourth Semester	Fifth Semester
1	Civil Engineering	150	8	CE291H: Civil Engineering Practice	CE292H: Basic Surveying	CE391H: Building Services
2	Mechanical Engineering	120	6	ME291H: Elements of Mechanical Engineering	ME292H: Workshop Technology	ME391H: Heat Engine Technology
3	Electrical Engineering	60	3	EE291H: Electrical Generation, Transmission and Distribution	EE292H: Electrical Machines	EE391H: Electrical Wiring and Estimation
4	Electronics & Telecommunication Engineering	150	8	EC291H: Analog and Digital Electronics	EC292H: Principles of Communication Engineering	EC391H: Microcontroller and Applications
5	Information Technology	60	3	IT291H: Applied Multimedia Techniques	IT292H: Web Designing	IT391H: Cyber Security and Privacy
6	Metallurgical Engineering	36	1	MT291H: Foundry Technology	MT292H: Testing of Materials	MT391H: Heat Treatment
7	Automobile Engineering	60	3	AE291H: Basics of Automobile	AE292H: Two-Wheeler Technology	AE391H: Four-Wheeler Technology
8	Textile Manufacture	30	1	TX291H: General Textile Technology	TX292H: Dyeing and Printing	TX391H: Garment and fashion Technology
9	Computer Engineering	60	3	CM291H: Open-Source Technologies	CM292H: Web Development	CM391H: Digital Marketing
10	Packaging Technology	30	1	PK291H: Basics of Packaging Technology	PK292H: Folding Carton & Corrugated Box Manufacturing	PK391H: Injection & Extrusion Blow Molding in Packaging
11	Artificial Intelligence and Machine Learning	30	1	AI291H: Python Programming	AI292H: Basics of Artificial Intelligence	AI391H: Machine Learning
12	Travel and Tourism	30	1	TR291H- Agro & Rural Tourism	TR292H- Wildlife Tourist Guide/ Naturalist	TR391H- Tourism Resources of India
