

Profile of Government Polytechnic

Government Polytechnic, Nagpur is one of the Prime Institutions of Govt. of Maharashtra established in 1914. This Institute imparts technical education at Diploma and Post Diploma levels and is known for its excellence at State level and National level.

Institute has been accredited by National Board of Accreditation, New Delhi.

Importance of the course

This course contains the knowledge of Interior Design & Decoration in depth as well as includes the different aspects regarding Interior Designing such as Anthropometrics Data, (Std. dimension of human body in different postures) specific details & standard dimensions of furniture's. The updated data of materials required for the interior designing are collected and analyse in the project, which are carried over through out the year. The subject "**Building Technology**" will help to know the basics in construction aspects (this will be very helpful for those who are not from the technical background). The subject "**Professional Practice**" will lead to analyze the estimate and bill of quantities of the material required for ID.

Prospects & Opportunities:

As soon as diploma is completed one can start his career as Professional in Interior Designing & Decoration. This will be helpful to the participants for making his/her career in interior designing field and can work as architects assistant also. Imparted knowledge of computer-based drafting will help to work as computer based draftsman also.

Course Contents

▪ Design

To develop ability of the student to imagine, visualize and develop the design ideas having conceptual base with them

- To come up with new innovative ideas
- To appraise the concept of optimization and aesthetic design
- Analysis of designs & select the proper as per the requirement.

▪ Technical Drawing

- The student will be able to visualize & draft the various elements of the interiors and technical drawings.

- The student also will be familiarized & go through the technical details of the building structure & interiors, etc.

▪ Building Technology

- In building technology the basic of civil engineering structures e.g. Residential & public building, anatomy of the building will be taught to the student.
- Also will go through various building materials, their use in different situations and requirements.

▪ Professional Practice

- It is very much necessary for an Interior Designer to know how to practice in this competitive field. So it will be necessary for the designer to know, how to work out the project cost, i.e. estimate quantity of the material etc. so student will be able to calculate estimate, rate analysis, quality & quantity survey, importance of tender & various types of tender, specification & its importance and code of conduct to follow while practicing.

Eligibility

XIIth, Diploma or Graduate / Appeared from any stream.

Course Fee: Rs. 16,500/-
